Mr. Downey, in moving the second reading of his bill providing for the exemption of woodlands from taxation, made a strong plea for legislation that would promote any reforestation on the farm lands of Ontario. Hitherto a suicidal policy had been pursued with reference to the preservation of Ontario's forest lands. The bill, by exempting from taxation ten acres of forest land in every hundred acres, would encourage farmers to develop and preserve their wood lots. The result would beneficially effect climate and natural water-powers. Similar laws were in force in Connecticut, Illinois and other States of the Union.

Hon. Mr. Cochrane had no objection to giving the bill its second reading, but he noted that the Government had in contemplation a general scheme of reforestation and of forest protection. There was, however, not enough time this session to formulate in legislation the progressive policy under consideration.

BARN-RAISINGS.

Hon. Mr. Hanna did not think that Mr. Little's bill to ensure the safety of farmers attending barn-raising and to appoint an inspector to see the law carried out should go through, at least in its present form. He suggested that some such law as the Workmen's Compensation for Injuries Act might be practicable in these cases. The builders, however, were at the present time liable for damages in the case of accidents. The bill was withdrawn.

ASSESSMENT ACT.

On motion of Mr. Munro an amendment to the Assessment Act, providing that the amount of assessment on telephone lines in any township should not exceed the cost per mile of construction, was read a second time. Hon. Mr. Hanna remarking that the principle it enumerated be safeguarded against in committee.

Mr. Smellie's proposed change in the Assessment Act, which is intended to place exemptions in towns and villages in territorial districts on the same basis as those of cities and towns in the older parts of the province, will be considered in committee with other bills of the same class.

ELECTIONS ON NEW YEAR'S DAY.

Mr. Labrosse moved the second reading of a bill to postpone municipal elections to the Friday before New Year's Day, when, owing to the last Monday in December being Christmas Day, the nominations take place on the preceding Friday. Many people, Mr. Labrosse said were away visiting their friends at New Year time, and were deprived of their votes under the present regulations.

Hon. Mr. Hanna replied that elections had been held on Monday from time immemorial. He did not think they interfered with the celebration of the holiday. It might be a question, indeed, whether the midwinter season was the proper time to hold these elections, but since they did take place then, he believed it was as well to have them on the holiday, when everyone was at liberty. He agreed, however, to let the motion go on to the committee.

SALE OF ONTARIO BONDS.

Hon. Col. Matheson announced that arrangements had been made with the Bank of Montreal for the issue in London, upon most favorable conditions to the province, of a permanent loan to redeem the treasury bills, amounting to \$1,200,000 sterling, issued in November, 1904, and renewed in May and November, 1905, on account of the construction of the Temiskaming and Northern Ontario Railroad. The loan will fall due in 1946, and the issue price is 98½, with interest at 3½ per cent. per annum, payable half yearly. The present issue will net the province \$350,000 in excess

it was time a change was made. The farmers of Ontario wanted to learn how to conduct a dairy business at a profit rather than at a loss.

MUNICIPAL ACT.

Mr. Carscallen's bill to amend the Municipal Act provides that, in addition to the publication required in cases of a by-law authorizing the issue of debentures, the estimates of the intended expenditures shall be given, except where the issue covers extensions of gas, electric light or water works. The bill also provides that it shall not be necessary to obtain the consent of the electors to by-laws for extensions if they be approved by the Lieutenant-Governor-in-Council, and that it has been shown that the extensions are necessary, and that an additional revenue will be derived therefrom to meet the increased expenditure.

THE GRUESOME SECRET.

Living Tomb of Ages Ago Discovered in Castle.

A despatch from London says: The Daily Mail says While digging on land near Frenchpark, County Roscommon, Ireland, on Saturday, a laborer discovered a cavern, with an arched roof, about six feet in depth. From this a narrow winding passage led to an old castle about a quarter of a mile distant. The underground passage was well built and some of the walls bear traces of inscriptions, while at a certain point a number of skeletons and bones were found, together with a quantity of metal, which proved to be armor and weapons, evidently of great antiquity.

An old legend in connection with the castle runs to the effect that ages ago the remains of one of the most powerful of the Connaught clans took refuge in this castle after their defeat in battle, and being driven into the passage it was closed up at either end by their foes and the warriors were thus left to their death.

DEAD FROM STAB IN HOTEL.

An Ex-Bartender Killed in Fracas at Collingwood.

A despatch from Collingwood says: As the result of a fracas in the bar of the Grand Central Hotel here on Thursday evening Frederick Lewis is dead, stabbed by Louis Bartelle with a pocket-knife. Lewis was struck near the heart, the main artery being severed, and he did not long survive the wound. The murdered man, who was well known around Collingwood, was until recently a bartender in Midland, and has lately been bill-poster of the town. His mother resides on the corner of College and Markham streets, Toronto. Bartelle is a native of Tonawanda, employed by the Charlton Lumber Company. What caused the tragedy is not known, as there were few witnesses to the altercation, but it is said that Lewis, by taunts, goaded Bartelle into a desperate frame of mind. Both men were quite sober. As soon as the fatal blow was struck the murderer made his escape by the back door of the hotel. He was closely pursued, and finally was captured by ex-Chief of Police Cheesman, of Stayner, in the Grand Trunk yards. He had hitherto borne a good reputation.

SAD FATALITY AT ST. GEORGE.

Newly Arrived Immigrant Killed and Companion Injured.

A despatch from St. George, Ont., says: While crossing the bridge on the Grand Trunk Railway near St. George on Friday, Stephen Cox was killed and Ruth Hinchcliffe was severely injured by Grand Trunk freight train No. 813. The victims had just come from England with the contingent sent out by the Salvation Army, and, in company with Willy Hinchcliffe and a young man named Withers, had left the express train at Harrisburg and were proceeding to the homes of relatives living at St. George by the railway track. When on

LEADING MARKETS

Toronto, March 20. — Flour — Ontario wheat patents are \$3 bid in buyers' sacks outside for export. Manitoba first patents are quoted at \$4.30 to \$4.40, Toronto, and strong bakers' at \$3.90 to \$4, Toronto. Bran, nominal, at \$18 at outside points, and shorts at \$16.50 to \$18 outside.

Wheat — No. 2 white offered at 76½c outside, with 76c bid. No. 2 red Winter,

fat backs, \$19 to \$20; compound lard, 6½ to 7½c; Canadian pure lard, 11½ to 12c; kettle rendered, 12½ to 13c; hams, 12 to 13½c; bacon, 14½c; fresh killed abattoir dressed hogs, \$10; country dressed, \$8.75 to \$9.25; alive, \$7.50 for selects. Eggs — New laid, 16 to 17c per dozen; storage and lined, 12c, nominal. Butter — Cheapest creamery, 22 to 22½c; undergrades, 20 to 21c; dairy, 19 to 20c. Cheese — Ontario, 13 to 13½c.

UNITED STATES MARKETS.

Toronto. Bran, nominal, at \$18 to \$18 outside points, and shorts at \$16.50 to \$18 outside.

Wheat — No. 2 white offered at 76½¢ outside, with 76¢ bid. No. 2 red Winter, 75½¢ bid outside, on G. T. R.; it offered at 76¢, now shipped to Portland, with 75¢ bid. No. 2 mixed offered outside at 76¢ with 75¢ bid. No. 2 goose offered at 74¢ outside, without bids. No. 1 Northern offered at 80¢ on track, Point Edward, May delivery, while 80½¢ was bid North Bay, to arrive.

Barley — No. 2 offered at 50¢ outside, without bids. No. 3 extra, 47¢ bid f.o.b., at 78 per cent. points, for one load.

Oats — No. 2 white offered at 34½¢ low freights to New York, with 34¢ bid, and at 36½¢ in store, Toronto, with 36¢ in track bid to arrive Toronto; No. 2 mixed, 35¢ bid, Toronto.

Corn — No. 3 American yellow offered at 49½¢ on track, Toronto, and at 49½¢ to arrive, Toronto, with 49¢ bid.

Buckwheat — No. 2 offered outside at 50¢, without bids.

COUNTRY PRODUCE.

Apples — Choice stock, \$3 to \$3.50 per bbl., and inferior qualities, \$2.25 to \$2.50.

Beans — Hand-picked, \$1.75 to \$1.80; primes, \$1.65 to \$1.70.

Honey — 7 to 8¢ for strained, and \$1.50 to \$2 per dozen combs.

Hops — 15 to 18¢ per lb.

Hay — Car lots of No. 1 timothy are quoted at \$8 on track, Toronto, and No. 2 at 86.

Straw — \$1.50 to \$6 per ton.

Potatoes — Ontario stock, 65 to 75¢ per bag, and Eastern, 75 to 80¢ per bag on track.

Poultry — Turkeys, fresh killed, 14 to 15¢; ducks, 12 to 13¢; geese, 10 to 11¢; chickens, 11 to 12¢ live chickens, 7 to 9¢ per lb.

THE DAIRY MARKETS.

Butter — Pound rolls are quoted at 20 to 21¢; large rolls 19 to 20¢; good to choice dairy tubs, 20 to 21¢; and inferior 16 to 17¢. Creamery prints sell at 20 to 21¢, and solids at 24 to 25¢.

Eggs — New laid are selling at 16 to 16½¢ per dozen in case lots, and cold storage at 13½ to 14¢.

Cheese — Large cheese 14¢, twins 14½¢ per lb.

HOG PRODUCTS.

Dressed hogs in car lots are steady at \$8.50 to \$8.75. Bacon, long clear, 11 to 11½¢ per lb., in case lots; mess pork, \$18 to \$18.50; short cut, \$22 to \$22.50; hams, light to medium, 13 to 13½¢; do., heavy, 12½¢; rolls, 11½ to 11¾¢; shoulders, 11 to 11½¢; backs, 15½ to 16¢, breakfast bacon, 14 to 14½¢.

Lard — Tierces, 10½¢; tubs, 11¢; pails, 11½¢.

BUSINESS AT MONTREAL.

Montreal, March 20. — Grain — There but little enquiry for either Manitoba wheat or American corn from over the cable. Barley continues firm in tone; prices show no change. Dealers were offering oats at lower prices. Purchases could be made in car lots at 36½¢ for No. 4 oats in store, and 37¢ for No. 2, and 38½¢ for No. 2. Sales were made of a few lots at a shade more than these figures, but one may secure large quantities without having to pay more, buyers being hard enough to find even at the reduction. Flour — Manitoba Spring wheat patents, \$4.50; strong bakers', \$4 to \$4.10; Winter wheat patents, \$4.25 to \$4.50, and straight rollers, \$3.90 to \$4 in wood; in bags, \$1.85 to \$1.90. Rolled oats — \$2 to \$2.05 in bulk, 90 lbs. Feed oats — \$2 to \$2.05 in bulk, \$20; shorts, in bags, \$20 to \$20.50; Manitoba bran, in bags, \$20; shorts, \$20.50 to \$21. Hay — No. 1, \$8.50 to \$9 per ton on track; No. 2, \$7.50 to \$8; clover, \$5.50 to \$6; clover, mixed, \$6 to \$6.50. Beans — clover, \$1.60 to \$1.65 per bushel; Choice primes, \$1.80. Potatoes — Per bag hand-picked, 65 to 70¢. Honey — White of 80 lbs., 65 to 70¢; black, 60 to 65¢; clover, in comb, 13 to 14¢ per pound; clover, extract, 8 to 9¢; buckwheat, 6½ to 7¢. Provisions — Heavy Canadian short cut, \$21; light short cut, \$20; American short cut, \$20; American cut clear

to 21¢; dairy, 19 to 20¢. Cheese — Ontario, 13 to 13½¢.

UNITED STATES MARKETS.

Buffalo, March 20. — Flour — Steady. Wheat — Spring, firm; No. 1 Northern, 82½¢; Winter dull; No. 2 red, 86¢. Corn — Quiet; No. 2 yellow, 47¢; No. 2 corn, 46½¢. Oats — Steady; No. 2 white, 34½¢. Barley — Quiet; 48 to 52¢ for good to choice. Rye — Dull and weak; No. 1, 68¢.

St. Louis, March 20. — Wheat — Cash, 83¢; May, 74½¢; July, 74½¢.

Milwaukee, March 20. — Wheat — No. 1 Northern, 78 to 79¢; No. 2 Northern, 74 to 77¢; May, 77¢ bid. Rye — No. 1, 62 to 62½¢. Barley — No. 2, 54 to 55¢; sample, 37½ to 53¢. Corn — No. 3 cash, 40 to 40½¢; May, 43¢ asked.

Duluth, March 20. — Wheat — No. 1 Northern, 75½¢; No. 2 Northern, 73½¢; May, 76½¢; July, 78¢.

Minneapolis, March 20. — Wheat — May, 75½¢; July, 77½ to 78¢; September 77½¢; No. 1 hard, 75½¢; No. 1 Northern, 75½¢; No. 2 Northern, 73½¢. Flour — Unchanged. Bran — In bulk, \$13.50 to \$13.75.

LIVE STOCK MARKET.

Toronto, March 20. — The run of cattle offering at the Western Market this morning was rather heavy.

Export Cattle — Choice are quoted at \$4.00 to \$5.15, good to medium at \$4 to \$4.50, others at \$3.75 to \$4, bulls at \$3.50 to \$4, and cows at \$2.75 to \$3.50.

Butcher Cattle — Picked lots, \$4.60 to \$4.85; good to choice, \$4.25 to \$4.50; fair to good, \$3.50 to \$4; common, \$2.50 to \$3; cows, \$2.75 to \$4; bulls, \$3 to \$4; canners, \$1.50 to \$2.

Stockers and Feeders — Short-keep feeders are quoted at \$4 to \$4.50, heavy feeders at \$3.85 to \$4.15, medium at \$2.50 to \$3.50, bulls at \$2 to \$2.75, good stockers run at \$3 to \$3.65, light at \$2.75 to \$3, rough to common at \$2 to \$2.75, and bulls at \$1.75 to \$2.50.

Milk Cows — \$30 to \$60 each.

Calves — 3½¢ to 6½¢ per lb. Sheep and Lambs — Export ewes are quoted unchanged at \$4.75 to \$5.25 per cwt. and bucks are easier at \$3.50 to \$4.50. Grain-fed lambs are 15¢ higher at \$6.75 to \$7.25, and mixed are dull at \$5.50 to \$7.25, and mixed are dull at \$5.50 to \$6.50.

Hogs — \$6.85 per cwt. for selects and \$6.60 for lights and fats, fed and watered.

CHANGE AT ESQUIMALT.

The British Garrison Will March Out in May.

A Victoria, B. C., despatch says: The last British garrison in Canada will be withdrawn in May. Col. English, R. G., having received orders on Saturday night to hold himself in readiness to march out of the Work Point Barracks in that month, and with him will go about 350 men of all branches and ranks of the service, besides quite a colony of wives and children who occupy cottages in the vicinity of the barracks.

At the same time Col. Holmes, district officer commanding, acting for the Department of Militia and Defence at Ottawa has received notice to issue advertisements calling for tenders for supplies to the Canadian garrison, which will march in when their comrades of the British forces vacate. His instructions give no clue as to the number of men who will take the places of the British troops, but from unofficial sources it is learned that it will consist of as many, if not more, than at the present. This force will receive a haven of the present force, as forty or fifty of the men now on this station have received permission to take discharge and join the Canadian garrison. They consist of about equal numbers of Royal Engineers and Royal Artillery. These men much prefer remaining on this station to going home, and it is probable some arrangement will be reached whereby their pension allowance will be credited to them because of Canadian service.

Ontario Railroad. The loan will fall due in 1946, and the issue price is 98½¢, with interest at 3½ per cent. per annum, payable half yearly. The present issue will net the province \$350,000 in excess of the rate offered for the loan proposed in 1903, and will be over \$50,000 in excess of any offers made in 1905. The Provincial Treasurer also announced that the remaining amount authorized for the construction of the railway, \$1,200,000, will be raised in Canada.

TO IMPROVE SMALL FAIRS.

The House went into committee on the estimates for agriculture. Mr. Ross, speaking on the item of \$95,020 for agricultural and horticultural societies, asked if the Government was adopting any definite policy along the line of improving small rural fairs. He thought much of the provincial grant was wasted on some of these fairs, which were of small value from an educational standpoint.

Hon. Mr. Monteith replied that a Government bill would be brought down which would tend to better the present condition of matters in this respect, and would encourage the class of fairs which were purely agricultural and educational.

Hon. Adam Beck, commenting on the item of \$6,000 for Spring station shows and investigations, declared that the horse industry of the province had not been adequately assisted by the late Government as compared with the grants to the cattle, swine and sheep interests. His experience as a horseman, had been that it was more difficult to find good horses in Ontario now than it was ten years ago. Yet the market for good horses was better than then. Scrubs were no longer wanted. Fortunately the South African War had taken many horses of this class out of the country. The need of encouraging farmers to breed judiciously and intelligently was greater now than ever.

EXPERIMENTAL FARM.

Several new officials have been appointed in connection with Farmers' Institutes, and Hon. Mr. Ross wished to know how the necessity for their services arose.

Hon. Mr. Monteith replied that there had been a great improvement in the attendance at the institutes during the past year. Young men were beginning to take an interest in their work, and they were compelled to employ a few additional officers to cope with this increased attendance.

During a brief discussion on a vote of \$23,200 to the dairy branch, Hon. Mr. Monteith informed Mr. Ferguson, of Grenville, that the Government had not considered the establishment of an experimental farm in connection with the Kingston Dairy School.

SAN JOSE SCALE SPREADING.

An item of \$4,000 for spraying fruit trees affected with the San Jose scale was challenged by Mr. McCoig, of West Kent, who thought the amount much too small, as the scale, he understood, was spreading in some districts. It was a matter that required immediate attention.

Mr. Monteith replied that last year they had supplied the medicinal material to fruit-growers, and had borne the expense of sending a man round to show them how to apply it. This year the fruit men had sufficient knowledge of the spraying method to render this expense unnecessary; consequently, they had concluded that there was no need of increasing the vote.

EXPERIMENTAL DAIRY.

Mr. Sutherland (South Oxford) went at experimental dairy department at Guelph. He declared that the results of the past ten years' experiments had by no means justified the money spent on them. The annual output of the dairy herds at the O. A. C. had not been appreciably increased in ten years. He believed tests had not been properly made, and the experiments as conducted hitherto were of little value to the farmers. When the reports of the professors showed, for instance, that the cost of producing a pound of beef or a pound of cheese from the herd was very much more than could be realized even at extra high prices for the product, then

Willy Hinchecliffe and a young man named Withers, had left the express train at Harrisburg and were proceeding to the homes of relatives living at St. George by the railway track. When on the high bridge near St. George the freight train came close to them before they were aware of it. Both ran before the engine in order to get off the bridge, and the engineer reversed the locomotive. But both were struck by the cowcatcher, and Cox expired immediately afterwards. The girl, who is 15 years of age, will probably die. Cox was aged 22 years.

PRECIOUS METALS OF DOMINION.

Yukon Credited With 57 Per Cent of Gold Output.

A despatch from Ottawa says: Mr. Ingall, in his summary report of the mineral production of Canada for 1905 says the increase of 14 per cent. during the past year is the more remarkable as the falling off in the output of gold from the Yukon continues, amounting to over \$2,000,000 in value. Of the gold products of the Dominion the Yukon is credited with 57 per cent., British Columbia 40 per cent., and the other provinces three per cent. In Ontario activity was evident in prospecting and developing both in the old districts in the Eastern parts of the province and in the newer gold-bearing districts west of Thunder Bay.

In British Columbia the dry season affected the production of placer gold. The Yukon continued to fall off, and will do so until under more favorable conditions the permanent forms of mining lower grade bodies of gravel are fully established. British Columbia and Ontario, since the development of mining at Cobalt, are now credited with 98 per cent. of the silver produced in Canada.

LIFE POLICIES FOUR BILLIONS.

Vast Total of Insurance of the People of Great Britain.

A despatch from London says: The people of the British Islands are now insured by 96 companies to the enormous total of £941,879,726 (\$4,705,398,630), and this does not include the figures of the colonial and foreign companies. The blue-book which annually appears on this subject has just been published.

Premiums were paid last year to the amount of £35,644,141 (\$178,220,705), and the year's claims came to £22,122,432 (\$110,612,175), there being an increase under the latter head of £1,136,742 (\$5,683,710).

The companies closed the year with balances amounting in the aggregate to £317,088,943 (\$1,585,444,715). Of this sum they now have almost £36,000,000 (\$180,000,000) invested in land, house property and ground rents.

CHARGED BRITISH SQUARE.

Nigeria Rebels Were Practically Annihilated.

A despatch to the London Daily Mail from Zungeru, Nigeria, says that a British punitive force, commanded by Capt. Goodwin, attacked Sokoto on March 12. The natives twice charged the British square, but were almost annihilated. The British then advanced to Sairu, which they found to be strongly held. They bombarded the place. The defenders fought desperately, facing the British charges. The place was finally captured at the point of the bayonet. The natives were driven out and pursued by mounted troops. More than 300 of them were killed, including their leader. The revolt is now crushed. Loyal chiefs are now co-operating with the troops. One British officer was severely wounded.

In February a number of native fanatics in Northern Nigeria massacred a company of native troops and three British officers. The expedition referred to above was despatched to deal with them.

DOMINION PARLIAMENT

GOVERNOR GENERAL'S SPEECH AT THE OPENING.

OUTSTANDING LOANS.

Mr. Borden was informed by Sir Wilfrid Laurier that \$1,400,000 sterling of temporary loans contracted by the Government were outstanding on March 1st, 1906. \$200,000 was borrowed in September last at the rate of 3½ per cent. per annum, and \$200,000 on Nov. 3rd, 1905, to redeem a debt falling due, at the rate of 3½ per cent. The average rate of the two was 3.22 per cent.

MR. PRESTON'S VISIT.

Mr. Wilson (Lennox), was informed by Hon. Mr. Oliver that W. T. R. Preston, Dominion Immigration Commissioner, of London, Eng., visited Canada towards the close of last year on official business, having been sent for by the Government. Mr. Preston's position in England was that of an official subordinate to the Canadian High Commissioner.

THE HOG TRADE.

Mr. Clements was informed by Hon. Mr. Fisher that the Townships of Tilbury East, Raleigh, East and West Dover, Chatham, Harwich, Camden and Howard were now under quarantine in respect to the hog trade. The first six had been quarantined since Oct. 22, 1904, and the latter had been added on May 1st following. There had been 141 hogs reported and killed in Harwich and thirteen in Chatham. The sum of \$714 had been paid for compensation.

CANNINGTON POST OFFICE.

Col. Hughes was informed by Mr. Aylesworth that Mr. H. D. Talbot, postmaster at Cannington, was removed from office in February because he was carrying on under another name a mercantile business in the village in competition with others, when at the same time the salary and allowances seemed to be sufficient to maintain the postmaster. No complaints had been received by the department about the management of the post office.

IMMIGRATION.

Dr. Sproule obtained a great deal of information from Mr. Oliver relating to immigration and the amount of money spent upon it from 1901 to 1905. The total amount spent during these years was as follows:

1900 to 1901	\$444,729
1901 to 1902	484,841
1902 to 1903	642,913
1903 to 1904	744,788
1904 to 1905	972,356

There were 1,296 immigrants deported during 1903, 1904, and 1905 on account of being diseased or physically or mentally unsuited.

FRATERNAL INSURANCE.

Mr. Lalor was informed by Sir Wilfrid Laurier that the insurance commissioners had full authority to investigate fraternal insurance, as well as other forms of insurance carried on by companies operating under Dominion charter or Dominion license.

PATENT MEDICINES.

Dr. Sproule was told by the First Minister that the Government was considering the question of controlling the sale of patent medicines containing dangerous drugs or ingredients.

ATTENDANCE OF MEMBERS.

Mr. Henderson was told by Sir Wilfrid that he intended to move for the appointment of a committee to revise the rules of the House, and it would consider the matter of having a daily record made of the attendance of members.

ADULTERATION ACT.

Mr. Bergeron's bill to amend the Adulteration Act was introduced and read a first time. He explained that it was the same bill as he had introduced near the close of the last session. It would provide that manufacturers of patent medicines should indicate on the labels the ingredients of the article.

RAILWAY ACT.

dian Engineer to the effect that the bridge, which would be 150 feet above high water, would interfere with traffic. It ought, at least, to be 10 or 15 feet higher, in order to accommodate the large ships of the future and even some of the present day.

Hon. Mr. Emmerson said that there apparently was no need for any anxiety regarding the height of the Quebec bridge. He described the spans of the bridge, and said there would be a clearance above the highest water level of 150 feet for a width of 1,200 feet, covering the whole channel.

PETITIONS PRESENTED.

Mr. Bickerdike, M.P., presented scores of petitions, signed by some 15,000 people, urging that Parliament pass a law making usury a criminal offence.

Mr. Cockshutt presented petitions from Bible societies in all parts of Canada asking for incorporation as the Canadian Bible Auxiliary to the British and Foreign Bible Society.

The retired servants of the Hudson's Bay Company, known as the veterans of the Fur Trade Association, petitioned Parliament to investigate into their claim to certain lands set apart for them by Lord Selkirk in the early part of last century. Out of some 71,000,000 acres, only 368,640 acres, they say, have been granted to the retired servants.

ST. LAWRENCE CHANNEL.

Hon. Mr. Brodeur, Minister of Marine, said that by Oct. 1st next the channel in the St. Lawrence from Montreal to Batiscan would be thirty feet deep. So far as the width was concerned, there were some very large curves which they were trying to widen out in order to make the channel as wide as possible. It was also confidently expected that, with the improvements in the lighting system the channel would soon be navigable, both by night and day, without any difficulty.

PATENT MEDICINES.

Mr. A. C. Pratt's bill makes it compulsory on proprietary and patent medicine manufacturers and vendors to attach a label printed in plain English, on every package of goods, setting forth a full schedule of its ingredients. In addition, it provides that the word "Poison" must be placed on all packages or bottles in the contents of which there is more than six per cent. of alcohol or than one-twentieth per cent. of morphine, heroin, cocaine or of salts, derivatives or equivalents of any of them. The Secretary of the Board of Health is also empowered to make analyses at any time of any of these preparations and complete information as to them must be filed with him.

COST \$30,000 PER MILE.

Good Route Obtained for G. T. P. in Quebec.

A despatch from Ottawa says: The report of the Transcontinental Railway Commissioners for the year ending June 30, says a first-class line has been obtained, extending from the Quebec boundary at Lake Baker to Waymontachine, a distance of 433 miles. From one end to the other the line will pass through country which, where not capable of being developed into good agricultural districts, will supply good timber traffic to the railway. The cost per mile will not very much exceed \$30,000.

DISBAND JAMAICAN ARMY.

Waited Imperial Move and Decided to Save the Money.

A despatch from Kingston, Jamaica, says: As a result of the new policy followed by Great Britain in the disposition of her naval and military forces the local Legislature to-day refused to pass the appropriation for the maintenance of the Jamaica militia, which, with the exception of probably 100 men of the artillery for garrison duty, will be disbanded.

SHIP AND POWER TUNNEL.

Remarkable Invention Patented by an Old Vancouver Captain.

A Vancouver despatch says: Capt. Power of this city, a master mariner of over half a century's experience, has perfected an invention that, he believes, will be generally adopted in shipbuilding. The plan is to have two large parallel holes or tunnels run from prow to stern, deep down in the ship's hold. By this arrangement the water will pass through these tunnels or tubes at a speed equal to the forward movement of the vessel. A steamer going at the rate of 15 knots an hour would give a fifteen-mile current through the tubes, and from these internal rushing streams the captain would derive power for heating, lighting and ventilating the ship. As a matter of fact, he had a boat rigged out on this plan, and operated in the Vancouver waters. The result was so successful that he is absolutely sure of the practicability of his invention, which he has patented in several countries.

100,000 ACRES BOUGHT.

Colossal Purchase in Western Canada Wheat Belt.

A St. Paul, Minn., despatch says: Announcement was made on Thursday of a colossal land purchase in the Western Canada wheat belt by an American-Canadian syndicate, headed by F. A. Bean, miller, of New Prague, Minnesota. Canadian interests are represented by Hon. Dr. Montague, formerly Minister of Agriculture. Several different transactions are involved, and the total extent of the lands affected is 300,000 acres. The consideration is nearly \$3,000,000. The purchased lands are along the main line of the Grand Trunk Pacific Railway in Eastern Saskatchewan. Some parcels of land involved are on the main lines of the Canadian Northern Railway. The company is styled the "Western Canada Settlers Mutual Land Company." It will have offices in Winnipeg and St. Paul. Mr. Bean is convinced that in the near future the Western Canada wheat belt will be the greatest wheat producing region in the world. The company will have more than fifty plows at work in the vicinity of Esterhazy, Saskatchewan, as soon as the frost is out of the ground.

BURIED IN A GOLD MINE.

Four Men Killed at Middlefield, Nova Scotia.

A Halifax, N. S., despatch says: A cave-in occurred at the gold mine at Middlefield, fifteen miles from Liverpool, N.S., early on Thursday morning, burying four men. Their names are George Crouse of Baker's Settlement, Slaughenwhite of Chelsea, and two named Taul of Molega, all Queen's County men. The body of one of the Tauls has been recovered, but the work of digging out the other three had to be abandoned, for the pit started to cave in again. Crouse and Slaughenwhite were single, but the Tauls were married and leave families.

BODY EMITTED FLAMES.

Lineman Killed by Wire—Hung in View of Hundreds.

A Moncton despatch says: Harley Cole, aged 20, was killed on Friday afternoon by a live wire while working on the top of an electric light post in the Intercolonial yards. The body hung for 20 minutes, emitting flames and sparks in view of hundreds.

CANADA.

The Manitoba Legislature prorogued on Friday.

The United States Steel Corporation has decided to come into the Canadian market and erect a plant here.

A new issue of Provincial bonds will be made for the money to be used for the extension of the Temiskaming Railway.

A proposal for a motor coach service in Toronto has been laid before Buffalo and New York capitalists.

E. Hawke of Toronto has decided to establish large and fully equipped brick yards at Melfort, Sask.

The Peterboro tax rate for 1906 has fixed at 17½ mills, which is half a mill lower than last year.

The steamer Sovereign was burned to the water's edge at Lachine on Saturday.

Thomas W. Butler, Governor of Norfolk County Jail, died at Simcoe on Saturday, aged 62 years.

A new theatre and hotel are to be built at Winnipeg, to cost half a million dollars.

Smallpox has broken out at Seven Islands, and the Dominion and Quebec Governments are sending supplies, physicians and nurses down by steamer.

The C.P.R. has given another big order for new rolling stock, in view of the outlook for heavy demands all over the system.

John H. Cornish, the defaulting Treasurer of Brokenhead municipality, was sentenced to one year in jail at the Winnipeg Assizes.

Hamilton Police Commissioners granted an increase of twenty cents a day all around to the members of the police force, from the Chief down.

Mr. Justice Mahes fined W. J. Walsh, plumber, of Hamilton, \$400 for conspiracy. The case against the other twelve will probably be dropped.

Pictou has decided to accept Mr. Carnegie's offer of \$10,000 for a library, and steps will at once be taken to secure a suitable site for the building.

Alexander Graham Bell will present one of the telephones, with which he conducted early experiments, to the city of Brantford.

Canada's foreign trade for the eight months of the current fiscal year amounted to \$358,772,966, a gain over the same period last year of \$51,517,264.

During the summer the Minister of Railways contemplates running motor cars on the branch lines and in rural services of the Intercolonial Railway.

Hamilton Street Railway Company have received three car tickets from a man who said he had beaten the company out of them before he was converted.

The Standard Oil Company are reported to be building a wholesale warehouse at Melfort, Sask., to be used as a distributing point for the Carrot River country.

UNITED STATES.

Herr Johann Most, the widely-known anarchist, died suddenly at Cincinnati.

By her will Miss Susan B. Anthony leaves \$10,000 to the Women's suffragist movement.

Three firemen were killed by the collapse of a roof in a fire which destroyed the old Armory at Camden, N. J.

In a pitched battle near Vinita, Indian territory, with a gang of Indian outlaws, three United States deputy marshals were killed on Monday night.

Corinne Miller shot and killed Wm. Morrow, her sweetheart, at Wichita, Kansas, because of jealousy. Morrow stood at the head of a stairway when shot. The body rolled down stairs into the street.

The shaft of an ancient Spanish silver

was the same on as the last session. It would provide that manufacturers of patent medicines should indicate on the labels the ingredients of the article.

RAILWAY ACT.

Mr. Ingram was informed by Sir Wilfrid Laurier that the Minister of Railways would introduce a bill to amend the Railway Act this session which would probably include legislation regarding telephone companies.

POSITIONS OF EMOLUMENT.

Sir Wilfrid Laurier told Dr. Sproule that only two members of Parliament had been appointed to positions of emolument from the Crown since last session. They were Sir William Mulock, of North York, and Mr. Mackenzie, of Cape Breton.

CIGARETTE EVIL.

Mr. Blain learned from Mr. Fitzpatrick that it was possible that a bill would again be introduced this session dealing with the cigarette evil.

THE INTERCOLONIAL.

Mr. Morin learned from Mr. Emmerson that the number of employees on the Intercolonial were as follows: 1889, 5,037; 1900, 5,601; 1901, 7,251; 1902, 7,013; 1903, 6,962; 1904, 7,160; 1905, 8,540.

HEIGHT OF QUEBEC BRIDGE.

Mr. Armstrong brought up the question of the height of the Quebec bridge by reading from an article in the Cana-

the Jamaica militia, which, with the exception of probably 100 men of the artillery for garrison duty, will be disbanded.

STRIKERS USE DYNAMITE.

Severe Explosion in Doorway of Wholesale Grocer.

A despatch from New York says: A charge of dynamite was set off on Wednesday in the doorway of Clark, Chapin & Bushnell, wholesale grocers, against whom a teamsters strike has been in progress for some time. The explosion severely damaged the front of the store, which is on Duane street. Charges that strikers or their sympathizers set off the dynamite were made by members of the firm.

RUSSIA COURTING JAPAN.

Will Send an Imperial Prince to Tokio on a Visit.

A despatch from London says: The Toldo correspondent of the Telegraph says the Czar, wishing to increase the friendship between Russia and Japan, will send an Imperial prince to visit Japan, accompanied by a distinguished staff of generals and admirals. Japan will send a similar mission to Russia.

RUSSIA KNOWS NO PEACE

Arrest and Deportation of Candidate for Czar's Election.

PEASANTS ARE TERRORIZED.

The St. Petersburg correspondent of The London Times in cabling from the Russian capital says: The official communique states that the Minister of Justice is hurriedly drafting laws to prevent election abuses. Meanwhile the provincial authorities continue to arrest and deport candidates and terrorize the peasants. A telegram from Yaroslavl says that only thirteen of six hundred small landlords and clergy met to elect delegates to the provincial electoral college. These thirteen elected eleven of their own number.

Ominous rumors come from Moscow. The revolutionaries are said to be displaying great activity, and a large proportion of the workmen have definitely refused to take part in the elections. Considerable unrest is noticeable among the railwaymen and causes alarm to the authorities. A regiment of dragoons and several batteries of artillery have been drafted into Moscow from Tver. Proclamations are being distributed in Moscow announcing that the revolutionaries will blow up the electoral offices when the elections begin. It is difficult to ascertain the origin of these proclamations. Extremists on both sides are adopting tactics designed to defeat the elections.

PRISONERS LEAVE MOSCOW.

Another batch of a hundred and fifty political prisoners left Moscow for Yakutsk. Five Moscow newspapers have been indicted. The Charkoff Seminarists have mutinied and poured sulphuric acid over the rector. The Government announces that it will take measures to stop the incitement to murder the Jews. This gives rise to reports that it is intended to close the reactionary organizations, but there is no confirmation of this, and it is doubtful if the St. Petersburg police or the Governor-General of Odessa, who have been foremost in promoting race hatred, will be punished.

TROUBLE IN MANCHURIA.

A despatch from London says: Telegrams from Vladivostok, says the St. Petersburg correspondent of the Times, intimate that something serious is occurring in Manchuria. Traffic on the Ussuri Line is suspended. The Japanese

have been forbidden to come north. The Chinese are reported to be hostile.

SUBMARINE PLANS SOLD.

A despatch from St. Petersburg says: A big scandal has developed in the Ministry of Marine owing to the discovery that the plans of the construction of Russian submarine boats have been sold to agents of a foreign power.

TERRIBLY TORTURED.

A despatch from St. Petersburg says: Prof. Courtenay, a member of the Academy of Sciences, in an open letter on Thursday, describes the horrible tortures to which, he asserts, the political prisoners at Warsaw were subjected by Chief of Police Greun. He cites as examples two cases in which prisoners were starved, and on four consecutive nights were beaten with clubs, jumped on, their hair pulled out by the roots, and the soles of their feet cut with knives, until they signed statements confessing their guilt.

KICKED INTO INSENSIBILITY.

A despatch from St. Petersburg says: The daughter of General Izmailovich, who was condemned to death on March 2, her sentence later being commuted to imprisonment for life, has created a sensation similar to that caused by Mdle. Spiridonovo, the seventeen-year-old girl who shot M. Yuzhenoffsky, chief of the secret police of Tamboff, who smuggled a letter out of her prison describing the manner in which she had been treated. Mdle. Izmailovich has also succeeded in sending out a letter from her prison. It was published on Friday and described her horrible treatment after the attempt to kill the Governor of Minsk, as a result of which her accomplice, Ivan Kulikoff, was executed at Minsk, March 14. Mdle. Izmailovich says the police kicked her into insensibility and subsequently at the police station tore off her clothes, subjected her to indignities, cursed her, spat on her face and struck her with such force on the side of her head that an ear-drum was broken.

A local paper on Friday printed statistics showing that 397 executions occurred in Russia during the month of January.

FOUR BURNED TO DEATH.

Fatal and Destructive Fire in Michigan Village.

A Grand Rapids, Mich., despatch says: The business portion of the Village of Tustin, Osceola County, was destroyed by fire early on Friday, which started in the basement of the Hotel Compton from a defective furnace. Ten guests escaped in their night clothes, while four were burned to death. The dead: Wm. H. McGrane, proprietor of the hotel; Mrs. Wm. H. McGrane; Edward Demorest, porter; Charles Workman, traveling man, of Pierson. The financial loss is about \$22,000.

SHOT WITHOUT TRIAL.

Lionel W. Rothschild's Startling Charge in British House.

A London despatch says: Lionel Walter Rothschild, member of Parliament for the Aylesbury division of Bucks, speaking on Thursday night at Chesham on the question of exclusion of aliens and the number of poor Russian refugees excluded from Great Britain the last few months, said he possessed irrefutable evidence that every one of these men sent back was shot at the Russian frontier without trial.

GUESTS OF KING EDWARD.

Mr. and Mrs. Nicholas Longworth Visit England in June.

A London despatch says: The Chronicle says that Mr. and Mrs. Nicholas Longworth, when they visit London in June, will make a stay at Buckingham Palace as the guests of King Edward. They will also visit the Duke and Duchess of Marlborough, the Duke and Duchess of Roxburghe and Ambassador and Mrs. Reid. They have accepted an invitation from the Society of American Women in London to a luncheon.

FOUR WERE BEHEADED.

Chinese Rebels Implicated in Attack on House of a Missionary.

A Canton despatch says: The leader of the rebels of Kuangsi Province and three others who were implicated in the attack on the house of the Rev. Dr. Andrew Beattie, the American missionary, at Fati in February, were beheaded March 12.

CONSTITUTION FOR CHINA.

Commissioners of Opinion That Country Will Soon Have One.

A despatch from New York says: That China soon will have a constitutional government is the opinion of some of the Chinese commissioners who sailed for Liverpool on Tuesday. This constitution, they believe, will be modelled upon that of England. Announcement of this belief was made by one of the Secretaries of the commission just before the Baltic sailed.

PASSED JAPANESE HOUSE.

Bill for Nationalization of Railways Adopted Without Amendment.

A despatch from Tokio says: The Railway Nationalization Bill passed the House of Representatives on Friday without amendment by 243 to 109. The cost of the purchase of home railways is estimated at \$250,000,000.

WIRELESS TELEPHONE.

Clever Jap Engineer Credited With New Invention.

A despatch from Tokio says: The Admiralty announced on Thursday the invention of a wireless telephone. The inventor is an engineer of the name of Kimura.

Morrow, near Oswego, N. Y., Kansas, because of jealousy. Morrow stood at the head of a stairway when shot. The body rolled down stairs into the street.

The shaft of an ancient Spanish silver mine has been found near Cedar Park, Texas. It is believed to be the long lost San Saba mine, which was worked by the Spaniards more than a century ago. The steamer Swan sank at her pier at Lakeside, Oregon, as a result of a leak caused by muskrats. The rodents gnawed a hole through the hull near the waterline, and the boat settled until she rested on the bottom.

GENERAL.

The Pope does not think the condition of Catholics in France will be improved by the new Government.

Scotch shorthorn breeders will protest against the removal of the British embargo on cattle.

The British Admiralty has decided to take out a policy of £10,000,000 to cover the risk of including merchantmen in the coming naval manoeuvres.

INDUSTRIAL SCHOOLS.

Annual Report of the Superintendent of Neglected and Dependent Children.

In the annual report of Mr. J. J. Kelso, Superintendent of Neglected and Dependent Children for Ontario, a good deal of interesting information is given concerning the efforts that are being made to surround unfortunate young people with good influences, so that they may grow up useful citizens.

Referring to Industrial Schools the report states that there are four of these institutions containing 345 pupils, and costing for maintenance during the year 1905 the sum of \$52,293.27. The Victoria School at Mimico has 200 pupils and received \$19,350.00 from the Government. St. John's School for Catholic boys has nearly 90 pupils and received last year \$8,008.00. The Alexandra School for girls has 35 pupils and received \$2,591.00, while the St. Mary's School for Catholic girls has 25 children and received \$2,012.00. In addition to the Government grant the municipality from which each child comes pays \$1.25 per week for maintenance. Wayward and incorrigible children between the age of 10 and 16 are sent to these schools on the indeterminate plan, and can be released on parole at any time. They cannot be retained in an institution longer than three years without a trial outside, but the institution has the right of supervision until they are 21. Care is observed to avoid anything like prison discipline in these schools; the aim being to maintain their character as educational institutions. Mr. Kelso states that the superintendents and officials of the schools are men and women of a high type of character, deeply interested in the best welfare of those under their charge, and anxious to assist them in every way to develop nobility of character. Only such children should be committed, however, as cannot be successfully dealt with under the foster home plan of the Children's Aid Society.

A WORTHY DAIRY EXAMPLE.

In this regard we can look to Holland for one instance. The first feature that strikes us is the high value of the land, the price ranging from \$500 to \$2,000 per acre. In 1899 the country possessed 960,000 milk cows, valued at \$50,250,000. We find thus that the average milk cow is worth \$52. If we strike half that price as an "average" in this country we are doing well.

Looking into the production of these herds we find a reason. The average production is 4,227 quarts, or about 9,000 lbs. of milk per head. It is estimated that the average yield per cow in the United States is 1,300 quarts or somewhat over 3,000 pounds. Our own average we hardly dare put higher, at any rate. With the advantages of immensely cheaper land and cheaper feed, what is to prevent our approaching the example of this small country? The only obstacle will be lack of education and perseverance.

Does Your Heart Beat

Yes. 100,000 times each day. Does it send out good blood or bad blood? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood—Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

One frequent cause of bad blood is a sluggish liver. This produces constipation. Poisonous substances are then absorbed into the blood. Keep the bowels open with Ayer's Pills.

INCUBATORS AND BROODERS.

The hatching season is at hand and those who contemplate raising over two hundred chicks will find incubators and brooders more convenient than the natural method, and at the same time they can hatch their chickens early which means a better chance of getting eggs next winter.

There are a few points that need consideration in artificial incubating and brooding.

This incubator should be operated

95 degrees, at the age of 36 to 48 hours. We place on a board some grit also some bread crumbs or cracked wheat and oatmeal.

We keep this well supplied for perhaps two days until all the chicks know where to look for food. We also keep a constant supply of pure water in easy access. After the second day in the brooder we begin feeding about five or six times daily, just what the chickens eat quickly. It is still some what of a debatable point, whether it is wise to feed a young chick all it wants to eat before it is two weeks of age. We try to feed a little less than they would eat. Such feeds as bread and milk are given early in the morning, which is fed on clean boards or troughs. At nine o'clock some cracked wheat or pin head oatmeal is fed, or if these are not to be had, small wheat screening. This is buried slightly in the litter on the floor so as to induce the chicks to exercise. The above feeds are used alternately. Before there is any grass, we feed usually two feeds a day, after the chicks are a week old, of gruel or chopped roots or onions, sometimes boiled potatoes; enough shorts and bran is added to this to absorb the juices of the roots. We try to have the chicks drink some milk or if this is not at hand, we keep beef scrap in easy access. The feeding of much cooked or raw meat is dangerous a little is good. Where there is plenty of milk or insects, the animal food is not so essential. After three weeks of age feed three times daily, plenty of vegetables and grass (and exercise) Grit, water and broken charcoal in easy access. Reduce heat of brooder 4 degree per week until 75 degrees is reached. Chicks 5 or 6 weeks old require no artificial heat.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

WHAT OTHER PAPERS SAY.

Toronto Star.

The claim is made that the cold days are delaying the assessors. We don't see how this can be, as it is always a cold day for the taxpayer when the assessor calls.

Toronto Star.

It is the boast of the British Empire that conquered peoples always get a square deal. The latest instance of this appears to have occurred in Nigeria, where the poor benighted heathen "charged the square and got wiped out."

Goderich Signal.

Now that the county Councils are to be composed of members of the town and township Councils, why does not somebody start an agitation to have the Provincial Legislatures made up of county Councilors and the Dominion Parliament constituted of members of the Legislatures? Then we would settle the whole representation of the country by a single visit to the polls in January of each year.

Toronto Globe.

It is easy to understand why the short-horn breeders of Scotland are

heart with so much vitality as a frog, especially the species commonly known as the water frog. It is generally known that the aquatic frog will survive for months after the hind legs have been removed. Of course he cannot hop about as he could before losing his principal means of transit, but his fore legs help him to crawl wherever he desires to go. When I began to learn surgery I made a special dissection of a frog one day. I laid the various parts of the body on a table and discovered that life was extinct within a few hours in every organ except the heart. The heart showed valvular motion for a day after it had been severed entirely from the body. I am not aware that any other creature's heart is possessed of such vitality.

Hammers.

Hammers are represented on the monuments of Egypt twenty centuries before our era. They greatly resembled the hammers now in use, save that there were no claws on the back for the extraction of nails. The first hammer was undoubtedly a stone held in the hand. Claw hammers were invented some time during the middle ages. Illuminated manuscripts of the eleventh century represent carpenters with claw hammers. Hammers are of all sizes, from the dainty instruments used by the jeweler, which weigh less than half an ounce, to the gigantic

pared and colored by Titian. All the

and brooding.

This incubator should be operated where the air is pure. If the air in the room where the machine is run has an offensive odor due to the smell of kerosene, or decaying wood, or vegetables, the room is not a good place to run a machine. The machine may hatch fairly well but to raise the chicks is another question. Thousand of chicks are ruined by being hatched in ill ventilated rooms, especially if very moist.

The machine, especially a hot air make, must not be run in a direct draught as it may heat unevenly. It is well to have four or more thermometers and place them in different part of the egg tray before putting the eggs in, to make sure your machine has no "hot spots." Raise or lower the ends of the machine until it heats at least with in a degree and one-half at all parts. If a hot spot is found in the centre, this can be screened by attaching a cloth or a piece of metal under the top of the egg chamber. This will usually cause the heat to distribute better.

It is wise to follow the manufacturers' directions as to operating the machine. Different makes requires different treatment, and maker usually knows what his machine requires to do good work. Care should always be taken to keep the lamp and burner clean. At times the wire at the base of the burner gets dirty or covered with dust; this should be well cleaned, otherwise, the lamp is liable to flicker or smoke.

Chicks, as a rule, are more easily hatched than reared. Mortality in young chicks is frequently due to bad incubating; i.e. machine run in rooms in which the air is foul, or ran uneven in temperature; the parent stock being sickly or lacking in vigor, one can not be too particular about this point when selecting breeding stock; or it may be due to bad brooding and feeding, such as too large and too high temperatures, feeding heavy feeds, indigestible feeds, or too much at a time followed by long feeds.

One method of feeding is usually to remove the chicks from the incubator to the brooder, which has been bedded without straw or hay and warmed to

It is easy to understand why the short-horn breeders of Scotland are opposed to the repeal of the embargo on Canadian cattle, but they have no warrant for saying Canadian farmers are opposed to the removal of the restrictions. There is every reason why they should desire to have free entry of beef cattle into Great Britain, for it would mean a considerable addition to the value of Canadian cattle.

Saskatoon Phoenix.

There is no danger whatever to Canada so far as the Americans are concerned who are in Canada. The real crux of the situation is concerning the relations of eastern and western Canada. Anything that tends to bring us together is good, that which separates is ill. The largest freedom given our trade, the fullest development given to transportation and a generous treatment of this new land in the day of its beginnings will do more to cement the east and west together than anything in the form of foreign notions concerning our Government can ever break.

Ottawa Free Press.

Should every conservative who dislikes Mr. Foster, leave the party on that account, as Senator Miller has done, the party would soon be non-existent.

Owen Sound Sun.

This week a deputation of Owen Sounders went to Toronto and interviewed Provincial Secretary Hanna. The deputation is composed of some of those who opposed local option most strenuously. Their object is not very closely defined, but it is clear that, failing in their proceedings to disqualify the town Councillors, the anti-option knockers have gone off on another track, with a view to "putting local option on the bum." The methods the knockers have adopted do not receive popular approval.

Notice.

We are getting a lot of new dishes to be given away for coupons to customers that buy here. Why not get some by dealing at R. J. Wales GREY LION GROCERY.

A Pair of Coddlers.

A man with a curious fondness for skate was the Abbe de St. Martin, who, in the seventeenth century, made himself ridiculous by his vagaries. He always wore nine of these articles to keep off the cold and, furthermore, nine pairs of stockings. His mode of passing the night was more remarkable still. He caused to be constructed for himself a bed of ricks, beneath which was a furnace, so arranged that he could regulate it to the degree of warmth he might require, and his bed was fitted with only a very small opening, through which the abbe used to creep when he retired to rest at night.

Even more ludicrous was the contrivance which the great French mathematician, Fourier, designed and used for the protection of his health. He incased himself in a species of box, the interior of which, by some mechanical means, was kept at the only temperature at which he felt he could live without inconvenience. While enveloped in this clumsy affair he was necessarily confined to one spot, but he provided means for the freedom of his head and hands. Even the ill of asthma and rheumatism, one would have thought, were preferable to existence under such circumstances as this, but the French mathematician, we must believe, was of a different opinion.—London Standard.

Vitality of a Frog's Heart.

There is no living creature, according to a Philadelphia surgeon, that has a

hammer used by the jeweler, which weigh less than half an ounce, to the gigantic hammer of shipbuilding establishments, some of which weigh as much as fifty tons and have a falling force of from 90 to 100. Every trade has its own hammer and its own way of using it.

Legend of Sambur Lake.

One of the features of Jeypore, in India, is the wonderful Sambur salt lake, concerning which there is a curious legend. The story runs that an old fakir long ago told one of the rajahs that if he wanted to be rich he should ride a horse as far as he could go without once looking back, and the land as far as he could travel would become a field of silver, always provided he did not turn. He rode for thirty miles, and then, curiosity overcoming him, he looked back, with the result that instead of the promised field of silver he found a lake of salt.

The Father of Science.

Hippocrates is looked upon by anatomists as the father of the science. He died in 377 B. C. The modern science began in Italy in the thirteenth century. The first anatomical plates, designed to show the size and relative position of the bodily organs, were pre-

THE above picture of the man and fish is the trademark of Scott's Emulsion, and is the synonym for strength and purity. It is sold in almost all the civilized countries of the globe.

If the cod fish became extinct it would be a world-wide calamity, because the oil that comes from its liver surpasses all other fats in nourishing and life-giving properties. Thirty years ago the proprietors of Scott's Emulsion found a way of preparing cod liver oil so that everyone can take it and get the full value of the oil without the objectionable taste. Scott's Emulsion is the best thing in the world for weak, backward children, thin, delicate people, and all conditions of wasting and lost strength.

pared and colored by Titian. All the great painters and sculptors have been careful students of anatomy. Michael Angelo, Raphael and Leonardo da Vinci were noted for their anatomical researches.

James Lick's Test.

This is told of James Lick, the eccentric San Francisco millionaire, who founded the famous observatory bearing his name. When taking any one into his service he always asked the person to plant a tree upside down—the roots in the air, the branches underground. If there were any protest the man was at once sent away, Lick saying that he wanted only men who would obey orders strictly.

The Tourists' Way.

Alpine Traveler—This is a very dangerous place, you say. And do the poor people who live on the mountain have to travel this way every day? Guide—Oh, no! They are not such fools! They go up by a much easier road. We only bring the tourists round this way.

Criticism.

We cannot see the motives of the actions we condemn, we cannot know the trials and temptations of our brother's inner life; therefore how is it possible for us to criticise his actions fairly?

Electricity.

The electrical properties of amber were known to the Greeks before the Christian era. Electricity takes its name from the Greek word for amber. Gilbert in 1600 was the first to employ the terms "electric force" and "electric attractions." In 1748 Franklin's electrical researches had progressed so far that he killed a turkey by the electric spark and roasted it by an electric jack before a fire kindled by the electric bottle, and in 1752 by means of the kite experiment he demonstrated the identity of electricity and lightning. The first magneto-electric machine was made at Paris by Pixii in 1832; the first telegraph line in the United States was set up between Washington and Baltimore in 1844; the first submarine cable was laid between England and France in 1850. As early as 1802 Sir Humphry Davy produced an electric light with carbon points on almost the same principle as that now employed. The first electric railway on the continent of Europe was built by Siemens at Berlin in 1881, the first in England was constructed in 1882, and in America the first electric line was built in 1885.

Royal Roads.

People will discover at last that royal roads to anything can no more be laid in iron than they can in dust; that there are, in fact, no royal roads to anywhere worth going to; that if there were it would that instant cease to be worth going to—I mean so far as the things to be obtained are in any way estimable in terms of price, for there are two classes of precious things in the world—those that God gives us for nothing—sun, air and life, both mortal life and immortal, and the secondarily precious things which he gives us for a price. These secondarily precious things, worldly wine and milk, can only be bought for definite money. They never can be cheapened. No cheating nor bargaining will ever get a single thing out of nature's establishment at half price. Do we want to be strong? We must work. To be hungry? We must starve. To be happy? We must be kind. To be wise? We must look and think.—Ruskin.

CURED HIS WIFE of LA GRIPPE

Quebec Man tells how the Great Consumptive Preventative was an all-round Benefit

"My wife took La Grippe when she was in Ottawa," says R. N. Datoe of Northfield Farm, Que., in an interview. "She got a bottle of Psychine and after using it for a few days she was quite well. I took a cold and am using it and am getting all right. I think Psychine is one of the best tonics on the market to-day."

There you have the whole matter in a nutshell. La Grippe and colds are among the forerunners of consumption.

This man had one, his wife had the other. Psychine not only cured both but it built them up so that their bodies are strong enough to resist disease. All seeds of consumption are killed by

THE LAW'S MISTAKE

By DONALD ALLEN

Copyright, 1905, by Beatrix Reade

Whenever a man is sent to state prison his record reaches the institution ahead of him. The deputy warden gets it from the police who worked up the case and arrested him and from the published accounts of his trial. It is known before he arrives about what sort of a man he is, and he is sometimes assigned to this or that department in advance. If he is recorded as a bad man, the deputy gets ready to lay down the rules and regulations to him. If otherwise, the official heaves a sigh of relief. Nowhere is a bad man out of place more than in a penal institution, where his example may infect fifty others, and nowhere is a "good" man given a warmer welcome.

In broad daylight in a western city a stranger had entered a big dry goods store and held up the cashier, obtained something like \$10,000 and got into the street. He would have made good his escape but for an accident. As it was, he got half a mile away before

regulations permitted, even more than that.

If he had not been pardoned, then he must have escaped, but that he could sit there with such brazen assurance was not like Drayton. The deputy found his position embarrassing in a way, and yet it did not take him long to make up his mind what to do. He would have been glad to see Drayton get a pardon, but if he had escaped he must go back and serve the rest of his time.

During the meal the eyes of the two men met a dozen times, and of the two Drayton was the less confused. His hair was yet short from the prison regulations, and he had on civilian's dress of good texture. His demeanor was that of any traveler, careless and indifferent to a certain degree, and it was certain that if addressed he would promptly deny his identity and carry the matter through with a high hand. This dissembling and assurance on his part were new phases of his character, and dinner had been finished half an hour before the deputy approached him and said:

"I have a good memory for faces, and I am sure I have seen yours before."

"It may be so," was the careless reply, accompanied by a smile.

"Haven't I met you in the village of Wadsworth?" naming the place where the K. state prison was situated.

"I may have passed through the place on a train, but I am sure I never stopped there. It is possible that we have met before while traveling."

The voice, the movement of the mouth while speaking, the look of the eyes, everything about the man was perfectly familiar to the officer, but he suddenly decided to adopt a new line of policy for awhile. He would meet finesse with finesse. The pair entered into general conversation for two hours, and then the deputy sent out a telegram asking the warden of the state prison if Drayton had been pardoned or had escaped. Two hours later, as he was nearing the end of the journey, he received an answer reading:

"Drayton is still with us and has just been locked in his cell."

Here was another puzzle, but it did not take the astute official long to reach a conclusion. Drayton had claimed that the felony had been committed by some man resembling him. Here was his prototype, his twin brother. While he looked more like a respectable business man than a thief, the ex-deputy determined not to let him go without a rigid examination.

It happened that the two got off at the same city, and they had scarcely descended from the train before the stranger was given in charge by the official and taken to a police station. It was a high handed thing to do, and if he was what he represented or seemed to be he could make trouble for the other.

He seemed stunned at first over his arrest and then grew indignant and threatening. He gave a certain name and claimed a certain city as his residence, and for a time the police were inclined to apologize and let him go. It was only when the ex-deputy began to question him about a certain date, the date of the robbery, that he tripped in his answers and aroused new suspicion.

Few men have done for another what the deputy did for Drayton. He remained with the stranger until he got good grounds for his arrest on the old charge. He brought the cashier and others on at his own expense and got the authorities to extradite the man

THE CONVICT LOOKED UP AT HIM WITHOUT RECOGNITION.

being captured. The money was not found on him, but there were half a dozen persons to swear to his identity.

The prisoner, who gave his name as James Drayton, decided that a mistake had been made. At his trial he actually proved that he was a resident of a village fifty miles away, and half a dozen of his fellow townsmen were on hand to swear that he was an industrious, honest man.

There are times when waves of crime seem to sweep over a community, and there are also times when waves of justice follow, and in their zealousness the courts seem determined to convict at any cost. The two waves happened to be sweeping over the western city at the time, and the law made an example of Drayton. He was sentenced to state prison for five years, and the judge read him a severe moral lecture

RESTORED TO MANHOOD

The New Method Treatment of Drs. K. & K. has restored thousands of weak, diseased men to robust manhood. No matter how many doctors have failed to cure you, give our treatment a fair trial and you will never regret it. We guarantee all cases we accept for treatment. Not a dollar need be paid unless cured for you can pay after you are cured. Drs. K. & K. established 25 years.

We treat Varicocele, Nervous Debility, Stricture, Blood Diseases, Kidney Bladder and Urinary Diseases. If unable to call, write for Question Blank for Home Treatment. Consultation Free.

NOT A DOLLAR NEED BE PAID UNLESS CURED.

DRS. KENNEDY & KERGAN, 148 Shelby Street, Detroit, Mich.

Heart, Throat, Liver and Skin

DR. AGNEW'S FOUR FAMOUS SPECIFICS CURE COMPLETELY THE WORST DISEASES OF THESE PARTS—DREADFUL HEART DISEASE RELIEVED IN THIRTY MINUTES.

Heart disease will affect people differently, but in all cases it must be viewed with great alarm. Dr. Agnew's Cure for the Heart is the one remedy that can be safely depended upon in times of trouble. It will give relief in thirty minutes.

Mr. Thomas Petry, of Aylmer, Que., was troubled with severe heart complaint for five years, the pain, at times, being so severe that he could not attend to business. Every other remedy failed until he tried Dr. Agnew's Cure for the Heart, which gave immediate relief, and his words are these: "I have now taken four bottles of the remedy and am entirely free from every symptom of heart disease."

A cold in the head need not be trifled with, for it is catarrh in an incipient condition, and catarrh is not to be trifled with. Dr. Agnew's Catarrhal Powder, as scores of clergymen, members of parliament, and prominent citizens in the Dominion have borne testimony, drives away a cold in the head like magic, and where this has assumed the shape of aggravated catarrh producing deafness and throat trouble, it effects a permanent cure.

It is not always safe to take pills for liver trouble. They not unfrequently create other troubles that are serious. Dr. Agnew's Liver Pills, whilst thoroughly certain of removing all liver trouble, give no difficulty either at the time or afterwards. They are pleasant to take and cost only 10 cents.

The faculty that Dr. Agnew has displayed in getting at the seat of trouble is manifest in his Ointment, as in the other three remedies. This contains the elements that give speedy and permanent relief in all skin diseases and is peculiarly effective in curing piles. 35 cents.

Sold by F. L. Hooper.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

other of Drayton. He was sentenced to state prison for five years, and the judge read him a severe moral lecture from the bench in addition. The prisoner protested to the last, and his whole community felt that the law had made a grievous mistake, but there was a spurt of reform on, and the prosecution would have it that justice had her hands on the right man.

The deputy at K. prison had read a full account of the trial, but he did not let a doubt creep into his mind. Whoever came to his prison had been adjudged guilty by the courts and put into his keeping, and it was not for him to doubt or criticize. He looked for a man who would whine and beg for sympathy and carry himself as a martyr, but he was agreeably surprised to discover quite the contrary.

Drayton was in the prime of life, clear eyed and frank faced, and he had nothing to say against his sentence. He seemed to realize that the time had gone by for that. In the department to which he was assigned he made such a record that after a year he was appointed a "trustee." He had served almost two years of his time before the deputy heard his story. It had the ring of truth, and the officer believed it, but at the time he was going to leave the prison and take another position, and he felt helpless in the matter. In the course of a week he went to a distant state and took up a new occupation, and three months passed away.

Then one day the former deputy made a day's journey by rail, and as he sat down to dinner in the dining car his amazement was unbounded to observe Drayton at a nearby table. The convict looked up at him without recognition and did not seem at all abashed. Here was a man who had seen Drayton every day for two years, talked with him, noticed every peculiarity about him and could swear to him a thousand times over.

There was no more doubt in his mind that the convict sat before him than that he was living, and he was presently absorbed in speculation. It was just possible that the man had been pardoned. If so, why did he not recognize and greet his old friend? The deputy had been as friendly with him as the

others at his own expense and got the authorities to extradite the man and the courts to put him on trial and summon Drayton from state prison.

When the two men finally stood together there were wonder and amazement in the court. Their own mothers could not have told them apart. A little detective work had unearthed a bad record for the stranger, and, although he started out to make a great legal fight, he ended by confessing that he was the guilty party and that Drayton had served two years for a crime he had not committed. The latter was pardoned and restored to citizenship and respectability, while the guilty party was sent to occupy his place in prison, and the judge who had read a moral lesson from the bench had something more to say. His conscience had been troubling him for the way he charged the jury against an innocent man, and he sought to console it by admitting that somewhere in the world every man may find his prototype, but that the law could not take cognizance of the fact.

A Flattering Testimonial.

A very eminent London surgeon, one of the lights of the profession, one day observed a gentleman knocked down by a runaway horse. He went to his aid and found he had broken his leg. It was only a simple fracture, but the man was badly hurt.

The surgeon used his umbrella as a splint and with his own hands borrowed handkerchiefs, bandaged the limb tightly, put the patient in a cab and drove to the nearest hospital. There they were received by a young medical student.

"You've bandaged this pretty well," said the youth patronizingly.

"Not at all," said the other.

"I suppose you have been attending some ambulance class. They say a little learning is a dangerous thing, but the little you've learned you've put to good account. I can't give you your umbrella now, but if you leave your address it shall be sent to your house."

"I had better give you my card," said the eminent surgeon, and he did so.—Pearson's Weekly.

Revenge.

An old man leaving work got into a car. He had not gone far before the conductor asked him for twopence. The man said it was a penny for the distance he was going. The conductor said sharply to him, "Shut up and pay twopence." So he paid it.

The next morning the conductor received a letter without a stamp, which was surcharged as usual. When he opened it he was surprised to see written on paper, "Shut up and pay twopence."—London Tit-Bits.

Silenced Him.

A Kansas City woman tells this story on her husband to demonstrate the inferiority of the masculine mind. One morning as her husband was sitting down to the breakfast table he glanced at the dining room clock and said, "We must be later than usual this morning." "Don't place too much confidence in that clock. It stopped at 5 o'clock this morning, and I just set it going by guess," replied the good wife.

"Were you up at 5 o'clock?" asked the husband.

"Of course not."

"What time did you say the clock stopped?"

"At 5."

"If you weren't up at 5," replied the man, with a puzzled look, "how in thunder do you know when the clock stopped?"

"Why, dear, it stayed stopped," was the reply. The man did not say another word that morning.

And remember—should FROST FENCES go wrong, from mechanical defects or workmanship in building, they are repaired, free of charge.

Our Spring Goods have now arrived and we are able to show exceptional values and patterns in Crum's Prints, Sateen Prints, Dress Ducks, Organdies, Priestley's Lustres, and Silks.

We have a full supply of Groceries, Flour, and Feed, Patent Medicines, Boots and Shoes, and Hardware, in fact everything kept by a general store.

We are able to compete with any general store in the province.

We pay Highest Price for all Farm Produce.

S. BOND & CO., ODESSA.

The Tip of the Alligator's Tail.

A great delicacy in Florida, according to the Cleveland Leader, is the tip of an alligator's tail. It tastes like frogs' legs, though a bit more gamy. Alligator tails are best just after the ricebird season. The big alligators float in the water with only their eyes showing. When they see a flock of these fat, juicy little birds they dive to the bottom. Their long, wide snout scoops up some of the loam, and they float to the surface again with just the rich soil showing. The birds think it is an island. They alight upon it. When the whole family is there the big reptile turns suddenly. Just as the birds scramble off he opens his mouth once. They are gone. The birds are neat little feeders, and the alligator is an epicure at this time of the year. The ricebird diet makes the tip of his tail, of which he is most vain, tender and sweet.

A Famous Dwarf.

Geoffrey Hudson, the famous dwarf of Charles I., was introduced at court during the festivities attending the coronation. By an odd conceit he was concealed in a cold pie, the crust of which being removed disclosed the dwarf fully dressed and making his bow to the king and queen. At the age of twenty he was eighteen inches

high, but before attaining the age of thirty he grew several inches additional. Geoffrey, like most dwarfs, was of limited intelligence, but of intense vanity and large self conceit. It is asserted by many scientific authorities that this is a characteristic of dwarfs.

The Theater of Dionysus.

What was probably one of the earliest theaters built was the theater of Dionysus, which was begun five centuries before Christ. The seating capacity of this remarkable building is said to have been 30,000. The theater of Dionysus was erected when Greek art and literature were in their prime. Here were presented to appreciative spectators the wonderful works of Aeschylus, Sophocles and Euripides.

The Burglar's Grasp.

"Did it ever strike you that a burglar of all men is most sensitive to the fitness of things?"

"Can't say it ever did. How do you make it out?"

"He always throws light on his shady transactions with a dark lantern."

CASTORIA.

Bears the Signature of *Chas. H. Fletcher*

THE HOW AND WHY OF IT.

"Fruit-a-tives" are the parts of the fruit that do you good. Apples, Oranges, Figs and Prunes are pressed—the juices separated from the tough, woody fibre—and concentrated. Then—(and this is the secret of "Fruit-a-tives")—one more atom of bitter principle from the orange peels is forced into the concentrated fruit juices. By this process—one of the most remarkable achievements of the age—the juices are made stronger, and many times more active medicinally. Finest tonics and internal antiseptics are added, and the whole evaporated and pressed into tablets. "Fruit-a-tives" are the greatest tonic, laxative and blood purifying medicine ever discovered.

50c. a box.

At all druggists.

Luck Money.

"Handsel" is the first money received for the day ("luck money"), that which is given back "for luck" by the seller to the buyer. Spitting upon it is the essence of the whole transaction, and it is practiced today, not only all over England, but all over the world. We know from many classical authors what virtue was believed by ancient Greeks and Romans (see Potter, "Archaeol. Graec." I, 417) to lie in the act, and there is also abundant evidence of the belief all through the middle ages, and now in the twentieth century it remains as strong as ever. Otto Jahn says: "I have often seen the fishwives of Ellerbeck, when they had got handgeld from my mother, how they spat upon it. They say that it brings them besondere gluck. They will not tell the reason. Certainly it is done to keep off witchcraft." The same thing is done by modern Egyptians and by Italians. At Posillipo I gave a penny to a deaf mute. He first spat on it, then put it to his forehead, and lastly devoutly crossed himself with it, precisely (except the crossing) as is done by modern Egyptians. Even in faroff Celebes the natives spit in the same way as a protective rite.—Notes and Queries.

When Watches Were New.

At first the watch was about the size of a dessert plate. It had weights and was used as a "pocket clock." The earliest known use of the modern name occurs in the record of 1552, which mentions that Edward VI. had "one larum or watch of iron, the case being likewise of iron, with two plummetts of lead." The first watches may readily be supposed to have been of

rudé execution. The first great improvement, the substitution of springs for weights, was in 1550. The earliest springs were not coiled, but only straight pieces of steel. Early watches had only one hand, and, being wound up twice a day, they could not be expected to keep time nearer than fifteen or twenty minutes in the twelve hours. The dials were of silver or brass. The cases had no crystals, but opened at the back and front and were four or five inches in diameter. A plain watch cost the equivalent of \$1,000 in our currency, and after one was ordered it took a year to make it.

Trolling For Tarpon.

It is not easy to hook a tarpon while trolling, for his mouth is very hard, says Julian A. Dimock in Country Life In America, and much skill may doubtless here be shown. In the playing of the fish the work is about the same as in still fishing save that more care must be used, as the hook is probably not firmly imbedded. An old fisherman told me that he liked to be sure of his fish and so preferred still fishing, but to my mind it is one of the objections to that method. Another and stronger objection is the disturbance of my feelings in thinking that I am pulling against a fish's "In'ards." If the line does break the chance of the victim's being able to free himself from the hook is problematical, while in trolling it is the work of a minute after the strain is off the line until a sore mouth is the only symptom remaining.

The Greek Symposium.

The Greek symposium was literally "drinking together," but before the drinking fully began there was a banquet, more or less elaborate, as the wealth and taste of the host might dictate. The guests came in their best. Even old Socrates, Plato tells us in his "Dialogue" on the subject, was not above taking a little extra pains when he was invited out. Some one met him one day in the market place, "fresh from the bath and sandaled," and as the sight of the sandals was unusual, he asked him whither he was going that he was so fine. "To a banquet at Agathon's," he replied, "and I have put on my finery because he is a fine creature. What say you to going with me unbidden?"

THE PENSION OFFICE

HUMOR THAT SPICES THE ROUTINE WORK OF THE OFFICIALS.

Some of the Quaint and Original Applications For Payments That Have Been Handed In to the Representatives of Uncle Sam.

If he dared to do so the commissioner of pensions at Washington could compile a delightful volume, putting therein the strange applications for pensions that come to his office. Some of these letters belong to the "too good to keep" class, and they find their way out into the world, where they add a good deal to the hilarity of nations. Some applicants for pensions manifest the most childlike ignorance regarding the method of procedure necessary when applying for a pension. They seem to think that all they have to do is to send an application to the pension office and Uncle Sam will forward a check by return mail.

Soon after the close of the civil war there came to the pension office in Washington the following unique and

Tumors Conquered Without Operations

Unqualified Success of Lydia E. Pinkham's Vegetable Compound in Cases of Mrs. Fox and Miss Adams.

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy, Tumor.

So-called "wandering pains" may come from its early stages, or the presence of danger may be made manifest by excessive monthly periods accompanied by unusual pain extending from the abdomen through the groin and thighs.

If you have mysterious pains, if there are indications of inflammation, ulceration or displacement, don't wait for time to confirm your fears and go through the horrors of a hospital operation; secure Lydia E. Pinkham's Vegetable Compound at once and begin its use and write Mrs. Pinkham of Lynn, Mass., for advice.

Read these strong letters from grateful women who have been cured:

Dear Mrs. Pinkham:— (First Letter.) "In looking over your book I see that your medicine cures Tumors. I have been to a doctor and he tells me I have a tumor. I will be more than grateful if you can help me, as I do so dread an operation."— Fannie D. Fox, Bradford, Pa.

Dear Mrs. Pinkham:— (Second Letter.) "I take the liberty to congratulate you on the success I have had with your wonderful medicine.

"Eighteen months ago my periods stopped. Shortly after I felt so badly I submitted to a thorough examination by a physician, and was told that I had a tumor and would have to undergo an operation.

"I soon after read one of your advertisements and decided to give Lydia E. Pinkham's Vegetable Compound a trial. After taking five bottles as directed, the tumor is entirely gone. I have again been examined.

Lydia E. Pinkham's Vegetable Compound;

by the physician and he says I have no signs of a tumor now. It has also brought my periods around once more, and I am entirely well. I shall never be without a bottle of Lydia Pinkham's Vegetable Compound in the house."—Fannie D. Fox, Bradford, Pa.

Another Case of Tumor Cured by Lydia E. Pinkham's Vegetable Compound.

Dear Mrs. Pinkham:— "About three years ago I had intense pain in my stomach, with cramps and raging headaches. The doctor prescribed for me, but finding that I did not get any better he examined me and, to my surprise, declared I had a tumor.

"I felt sure that it meant my death warrant, and was very disheartened. I spent hundred of dollars in doctoring, but the tumor kept growing, till the doctor said that nothing but an operation would save me. Fortunately I corresponded with my aunt in the New England States, who advised me to try Lydia E. Pinkham's Vegetable Compound before submitting to an operation, and I at once started taking a regular treatment, finding to my great relief that my general health began to improve, and after three months I noticed that the tumor had reduced in size. I kept on taking the Compound, and in ten months it had entirely disappeared without an operation, and using two medicine but Lydia E. Pinkham's Vegetable Compound, and words fail to express how grateful I am for the good it has done me."—Miss Luella Adams, Colman Hotel, Seattle, Wash.

Such unquestionable testimony proves the value of Lydia E. Pinkham's Vegetable Compound, and should give confidence and hope to every sick woman.

Mrs. Pinkham invites all ailing women to write to her at Lynn, Mass., for advice.

Lydia E. Pinkham's Vegetable Compound; a Woman's Remedy for Woman's Ills.

Vapo-Cresolene

Established 1879.
Whooping Cough, Croup, Bronchitis
Cough, Grip, Asthma, Diphtheria
Cresolene is a boon to Asthmatics

"CRESCOLINE is a long established and standard remedy for the diseases indicated. It cures because the air rendered strongly antiseptic is carried over the diseased surfaces of the respiratory tubes with every breath, giving prompt and efficient treatment. There is a consumptive tendency, or suffering from chronic bronchitis, and immediate relief from coughs or inflamed conditions of the throat.

Vapo-Cresolene is sold by druggists or sent free paid on receipt of price. A Vapo-Cresolene outfit including a bottle of Cresolene \$1.00. Send for free illustrated booklet. LEWIS & CLARK CO., Ltd., Agents, 288 St. James St., Montreal, Canada.

DR. HENNEQUIN'S INFANT TABLETS

"Please hurry along Hennequin's Infant Tablets, as we cannot get along without them." M. E. PARKS, Keene, Ont.

"I believe Hennequin's Infant Tablets to be the best medicine for babies teething and troubled with worms. They should be tried by all mothers. They are just lovely." MRS. GEO. A. SMITH, Hayworth, Quebec.

"After 14 years' experience in treating infantile ailments in our home, we have found Hennequin's Infant Tablets superior to any other remedy we have tried." W. C. WEIR, Pastor Baptist Church, Carleton Place.

They solve the problem, and where used produce healthy children, placing them in a condition of attaining the highest conception of perfect manhood and womanhood. Hennequin's Infant Tablets are based on scientific facts, and is the only Dr. Hennequin preparation offered to the public. Positively no drug taste—perfectly safe. The genuine Tablet is stamped with the letter "H." Beware of imitations. Price 25c per package, 5 packages for \$1—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter.

DOUGLAS & CO., Nanapan, Ont., Can. Wholesale Agents for Canada.

Check and Eye brow but Slightly Scared and one Eye was left to me for to wright and read Poetre I hope that with that Eye to see the day when unkel Sam his Cripples will Pay.

Much more recent is the letter sent to the commissioner of pensions by an applicant who had contracted blood poisoning in the following remarkable manner:

I got blood poison by being hit with a hens egg when I came back from the front. The egg was not good when you send my pension I want the Deed made so my wife can't get none of it. She throve the egg. She war a rebel.

Equally appealing and remarkable was another letter sent to the pension office in which the applicant set forth his claims to a pension in this wise:

The way I got my War Ingerly was a ketchin of a hog. The Hog war wanted by our captain for forege. We was chasin the hog and she crawled threw a hole an I thot I were about the size of the hog and thried to crawl threw, but I stuck an in tryin to wiggle out I throve the rules off an one it hit me on my hed and nocked me senseless. I do not think the hog had nothin to do with my line of duty, for I did not ketch the hog. Wich she never was capt, so pleze send along my pension.

One aged pensioner had evidently made a serious blunder by taking unto himself a wife in his old age, for love of gain seems to have been the motive of the woman who married him if the following letter stated the facts in the case:

Dear Mister Government, Pleze to fix up my penshun papers so as my wife cant draw my twelve dolers a munt when I am ded, she say she married me for lov an to be a ole mans Darling but now I no it was for to git my penshun on herself by being my widower so pleze let my penshun end with me but pleze doant let on to her that you got this from me or I would have a hot time of it and times is hotter now than I can stand. So when I send word that I am no moar then send her this if you want to but not untill the penshun is shut off whitch it is her just desserts for marryin for money an in a Mersheany spirrit.

One day there came to the pension office a very old and subdued looking man who could scarcely totter along with the help of two canes. By his side was a very robust and perfectly self reliant young woman of perhaps thirty years of age. When some one went forward to ask what was wanted the young woman said:

"Well, I'll just tell you. This is my husband, and we ain't getting enough pension—that's what we ain't. We're getting only \$10 a month, and we know a man that wasn't in the war half as long as my husband was and didn't get a shot in him and he gets his \$12 a month, and we want our pension raised to that figger or more."

One applicant was willing to give the most palpable proof of the genuineness of his injuries, for he wrote as follows:

If you don't think I was shott in the war I am willing to come on there and you or any one else can lay their finger on the bullet imbedded in my back which panes me when I stoop or lay on it and which it has brought on permanent disability so I can't work like I used to could I guess if you would speak to President Maykinley and tell him about the bullet he would say to send on the pension and any medikal doctor would say the same. A doctor here will go by his affidavit that he has layed his fingers on the bullet wich I am proud of as scars of War where I fit and bled for my country wich it is America and Union forever.

Flance and Sweetheart.

For centuries we have tried to get the word that expresses the relation of the man to the maid he intends to marry. "Intended" has been tried and found wanting. "My bloke," "my young man"—these combinations are not heard in the best circles. "My betrothed," a phrase used in Germany, has not taken root in England. "My sweetheart" is pretty enough, but it lacks the official sound. Young men and maidens become engaged and marry, but they have to cross the channel for the word that leads them to the altar. One might suggest to the blushing girl who has to allude to the man of her acceptance "my future." French maidens speak of "mon futur," and it sounds comprehensive.—London Chronicle.

Not a Fair Division.

"If a house contains six bureaus, eleven armoires, seven chiffoniers and fifty-three miscellaneous drawers, how many of 'em is the husband entitled to and how many is the wife?" asked the young clubman.

The second clubman laughed harshly. "You are young and have much to learn," he said. "You may as well understand first as last that if there were in your house a mile of bureaus, three acres of armoires and 17,000 drawers all these would still be stuffed full of vells, ruching, hatpins, ribbons, silk stockings, petticoats, powder puffs and safety pins, and the best course for you to pursue would be to wrap your own things—in your shirts, underclothes and so on—in a newspaper and keep them under the bed."

He that falls into sin is a man; he that grieves at it is a saint; that boasts of it is a devil.—Fuller.

Nature's Way Is Best.

The function strengthening and tissue building plan of treating chronic, lingering and obstinate cases of disease as pursued by Dr. Pierce, is following after Nature's plan of restoring health.

He uses natural remedies, that is extracts from native medicinal roots, prepared by processes wrought out by the expenditure of much time and money, without the use of alcohol, and by skillful combination in just the right proportions.

Used as ingredients of Dr. Pierce's Golden Medical Discovery, Black Cherry-bark, Queen's root, Golden Seal root, Bloodroot and Stone root, specially exert their influence in cases of lung, bronchial and throat troubles, and this "Discovery" is, therefore, a sovereign remedy for bronchitis, laryngitis, chronic coughs, catarrh and kindred ailments.

The above native roots also have the strongest possible endorsement from the leading medical writers, of all the several schools of practice, for the cure not only of the diseases named above but also for indigestion, torpor of liver, or biliousness, obstinate constipation, kidney and bladder troubles and catarrh, no matter where located.

You don't have to take Dr. Pierce's say-so alone as to this; what he claims for his "Discovery" is backed up by the writings of the most eminent men in the medical profession. A request by postal card or letter, addressed to Dr. R. V. Pierce, Buffalo, N. Y., for a little book of extracts from eminent medical authorities endorsing the ingredients of his medicines, will bring a little book free that is worthy of your attention if needing a good, safe, reliable remedy of known composition for the cure of almost any old chronic, or lingering malady.

Dr. Pierce's Pleasant Pellets cure constipation. One little "Pellet" is a gentle laxative, and two a mild cathartic.

The most valuable book for both men and women is Dr. Pierce's Common Sense Medical Adviser. A splendid 1008-page volume, with engravings and colored plates. A copy, paper-covered, will be sent to anyone sending 5 cents in one-cent stamps, to pay the cost of mailing only, to Dr. R. V. Pierce, Buffalo, N. Y. Cloth-bound, 50 stamps.

Corporation of the Town of Napanee.

TO THE MAYOR AND COUNCIL OF THE TOWN OF NAPANEE,
Gentlemen—We your Auditors having completed our examination of the books of the Town Treasurer and the Treasurer of the Napanee School Board beg leave to report as follows.

We found proper vouchers for receipts and proper authority and vouchers for all items of expenditure and Cash on hand as represented to you in a detailed statement of receipts and expenditure with which we present you in duplicate.

We also present you with a detailed statement of the Debenture debt and the Assets and Liabilities of the Corporation to the 31st day of December 1905. We also present you with an abstract statement of Collegiate and Public school accounts for the year 1905.

The Treasurers surety remains the same as in former years which we consider is ample security.

All of which is respectfully Submitted.

JOHN T. GRANGE } Auditors.

TAMWORTH.

Another disastrous fire occurred here on Thursday evening of last week starting in the Fuller block about 6 20 p.m.

The fire started upstairs in the workshop and got such headway before it was discovered that nothing could be done to save the workshop but most of the goods in the shop were saved.

The fire next caught the Lott dwelling and the J. Coulter residence, the King residence and Mrs. Herkimer's old cabinet building, unoccupied, but covered by insurance. Mr. King has \$200 insurance on his dwelling, Mrs. Coulter \$400 on her dwelling, Mrs. Lott \$850 on dwelling and Mr. Fuller \$1500 insurance on stock and \$1000 on building. Mr. Fuller's loss on building and damages to dwelling would amount to about \$1500.

The fire was not serious in cash value but serious in that the people lost their homes, and the inconvenience of securing new places to stay and new premises for business.

A good many of the buildings will not be rebuilt and our village will suffer a severe loss in the looks of the place.

The fire covered quite a large area in addition to the dwelling and stores a number of outbuildings were destroyed though they were of no great value.

Mr. Taylor lost his furniture shop but saved most of his furniture and his house was badly damaged.

Mr. C. G. Coxall saved his store front by dropping his awning in front of his windows.

Mr. D. E. Rose had a good many of his windows cracked with the heat.

There is a splendid chance now for the erection of several substantial fire-proof buildings on the burnt area.

The amount of the loss totals about \$5,000 with insurance of \$3,800.

Paints, Oils and Glass, Ready Mixed Paints, White Lead and Colors, Elephant Brand.

MADOLE & WILSON.

KINGSFORD.

The river is clear of ice and the water is very low. Sleighing is a thing of the past.

Rev J W Forster preached to a large congregation in St Jude's Church Sunday.

Charles McNeill is somewhat better T Brown of Leinster, called on friends here Sunday.

Mrs McCullough's baby is dangerously ill.

Mr and Mrs Kerr spent Sunday as guests of W McCullough.

George Somers, of Napanee, visited friends here Sunday.

Miss Ella Schermerhorn is confined to the house with an attack of la grippe.

Miss Theresa McNeill spent a few days recently with her parents.

Nelson Frizzell is home for a few days. He hopes to have his cheese factory ready for business shortly.

Frank Marshall and his family moved to Forest Mills this week. He will take charge of the cheese factory there.

Mr Anderson, of Selly, will have charge of the cheese factory here this summer.

Milk Cans.

Second to none, best of tin, best of trimmings and workmanship, most improved bottom.

MADOLE & WILSON.

AVINDICATION FOR DR. PIERCE.

Decision by the Supreme Court of the State Against the Ladies' Home Journal.

A verdict has been rendered in favor of

CANADIAN SOCIETY GIRL CURED BY PE-RU-NA.

Cold Produced Catarrh of Throat--Attack Was Severe.

Miss Lottie Hollingsworth, Prescott, Ont., Can., writes:

"After suffering for weeks with a cold, it left me with catarrh of the larynx. My voice was so hoarse that I thought I would lose it entirely, my neck was swollen, and altogether my condition was very serious."

"I bought some Peruna after I had used other remedies without relief. In a few days my voice was clearer, it did not tire easily and I began to see relief in sight."

"I really was surprised to find that I was cured so soon. I took only four bottles of Peruna, and it is certainly well worthy of endorsement."

Dangers of Cocaine.

Cocaine, an alkaloid of coca leaves was discovered in 1859, but remained in comparative obscurity until 1884. In minute doses, whether taken internally or used as a spray on mucous surfaces, its effect is wonderfully exhilarating, producing for a time the fresh and buoyant sensations of youth and perfect health, that have apparently no unpleasant reaction, and therein lies the explanation of the subtle and irresistible power it quickly acquires over its victims, carrying them to the very brink of destruction before they have dreamed of danger. Being a cumulative poison, the first warning symptom does not appear until the fatal chains are riveted that shall drag them, horror stricken and powerless of resistance, over the precipice to complete mental, moral and physical ruin.

Foreign Flags in America.

The first flag to float over American soil was the royal standard of Isabella, emblazoned with the arms of Castile and Leon. A white flag with a green cross was its companion. Some years after Columbus landed at San Salvador the Cabots planted the banner of England and of St. Mark of Venice on the

A VINDICATION FOR DR. PIERCE.

Decision by the Supreme Court of
the State Against the Ladies'
Home Journal.

A verdict has been rendered in favor of the plaintiff in the libel suit brought against the Ladies' Home Journal (published by the Curtis Publishing Co.) by the World's Dispensary Medical Association, of which Dr. R. V. Pierce is President. The suit was brought by Doctor Pierce against the Curtis Publishing Co., for making false statements about one of his standard family medicines known as Dr. Pierce's Favorite Prescription. In the May number of the Ladies' Home Journal (1904), Mr. Edward Bok, the editor, stated that Dr. Pierce's Favorite Prescription contained alcohol and some other harmful ingredients, and Dr. Pierce had in the action alleged that the defendant maliciously published this article containing such false and defamatory matter. Dr. Pierce further claimed that no alcohol is or ever was contained in his "Favorite Prescription," that said medicine was a vegetable preparation and contained no deleterious ingredients whatever; that Mr. Bok's statement, pretending to give some of the ingredients of said medicine, was wholly and absolutely false. During the trial, the Vice-President of the World's Dispensary Medical Association stated, that the ingredient of Dr. Pierce's Favorite Prescription were extracted from the following natives roots: Golden Seal, Blue Cohosh, Lady's Slipper, Black Cohosh and Unicorn, by means of pure glycerine. He was asked how he knew, as a physician and experienced medical man, that the "Favorite Prescription" was a cure for the diseases peculiar to women, such as amenorrhea, dysmenorrhea, ante-version, retroversion, and he stated that he knew such was the fact because of his professional experience and the many thousand of women whose ills had been cured by this "Prescription." The Vice-President, being asked to give his authorities, read from the standard works, such as the United States Dispensary, The American Dispensary and many other standard medical books. The retraction printed by the Curtis Publishing Company two months after the libelous statement appeared and nearly two months after the suit had begun stated definitely that analyses had been made at their request and that the "Favorite Prescription" did not contain alcohol, opium or digitalis.

soil was the royal standard of Isabella, emblazoned with the arms of Castile and Leon. A white flag with a green cross was its companion. Some years after Columbus landed at San Salvador the Cabots planted the banner of England and of St. Mark of Venice on the eastern shore of North America. In the centuries that have intervened since a variety of national flags have waved where now only the stars and stripes is the accepted emblem. Over Texas have floated the French, Spanish, English, American and Confederate; in Louisiana the lilies of France, the Spanish flag, the tricolor, the American and Confederate flags; in California the Spanish, Mexican, Russian and American.

The Cocoanut.

The cocoanut tree is the most useful of all plants in the tropical region. Its seed furnishes food and an intoxicating drink. The shell gives drinking cups and vessels and a hard material capable of a high polish, from which personal ornaments may be manufactured. The trunk furnishes wood for dwellings and boats. The leaves make clothing, cordage and ropes. The fibers of the husk and of the nut afford matting and carpets. The buds furnish a succulent vegetable, and from the trunk a palatable liquor is drawn by making an incision.

He Misunderstood.

Mr. Simpson—Sam, is it true that you confiscate your neighbors' chickens? Sam—No, sah; I fricazees 'em.

Be sure no man was ever discontented with the world who did his duty in it.—Southey.

GOLD DUST makes, and washes, and cleans.

THE LAW OF FORGIVENESS

Forego the Feeling of Enmity and the Desire for Revenge.

Forgive and ye shall be forgiven. — Luke vi. 37.

A silly interpretation often leads to the utter rejection of a law. Sentimentalists have caused men of sense to pronounce this an impractical rule. Yet we indorse it every time we utter the Lord's prayer, and still we hope to be forgiven whether we find it possible to forgive or not. If this law means the soft minded flabbiness that sends bouquets to bloody criminals and petitions the pardon of murderers and the release of the foes of humanity, we must reject it as the utterance of one unacquainted with the rugged facts of life.

But forgiveness and pardon are two different things; forgiveness is between man and man; pardon is a matter of executive power. You can forgive a child and still punish him. The forgiveness that does away with consequences would make this an immoral world. No greater wrong can be done to a man than to protect him from the results of his evil deeds. This is as unjust as to withhold the rewards of the right.

The difference between the law of an eye for an eye and a tooth for a tooth and the law of the Great Teacher lies largely in the spirit of dealing with the offenses. The old spirit was that of

GETTING EVEN

with the wrongdoer. His act was largely regarded from the personal standpoint; a crime was individual and not social. Revenge followed wrongdoing.

But Jesus says it is better to lift a man up than to get even with him. It is better to help men to the right than to satisfy your desire for revenge. Forgiveness is more than saying, "Go without punishment"; rather it says, "Come learn a better way; live without sin." Forgiveness takes malice from the mind of the offender; it substitutes for it the motive of friendship for the offender.

Revenge says, "I will make it worse or you than you have made it for me." Sentimentalism says: "Let the poor vic-

tim of circumstances go; send him a rosewater spray and an embroidered text and he won't do it again." But love, she of the clear eye and the steady hand, takes him by the hand in silence, lifts him up, and leads him, perhaps by paths of pain, to his better self. Love puts his sins behind her back and teaches him to face her way. Love lets the wrong teach its own lesson, bear its own fruit, and in her labor for him she forgets her own pain and loss caused by his offense.

The best way to forgive a burglar would not be to let him out of jail, but to teach him the laws of property, to train him in the self respect that would lead to industry, to make him a brother and a fellow-worker among men instead of an outcast and

A SOCIAL PARASITE.

The test of any forgiveness is its helpfulness, the manner in which it wipes out the enmity of the victim and turns the guilty into better ways.

Many say, I can forgive, but I cannot forget. No one asks you to forget; but you cannot fully forgive unless you will forego the feeling of enmity and the desire for revenge. You cannot make any one forget that which they have once known; but you can substitute helpfulness for hatred and restoration for revenge. True love simply discounts the past as a ground for present action; it refuses to determine its personal bearing and deeds in to-day by the other's ill deeds of yesterday.

So far from forgiveness being the weakness of the thoughtless, it is the helpfulness of the strong and the wise. To forgive a man will not mean to escape from the trouble of securing his punishment; it will not mean the weak complaisance of indolent tolerance. It will mean thought for his weakness, taking up his burden, doing the brother's part for him, the endeavor to do for him what we would like to have the Father of us all do for us all.—Henry F. Cope.

THE S. S. LESSON

INTERNATIONAL LESSON,

MARCH 25.

Lesson XII. Temperance Lesson. Golden Text, Prov. 23. 32.

LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

The Book of Proverbs.—The book of Proverbs belongs to a class of biblical writings known as "Wisdom Literature." It is a compilation of wise sayings gathered from different sources, and falls naturally into a number of separate parts clearly distinguished from each other, and partially marked off by special titles. Thus that portion of the book included in 10. 1 to 22. 16, and which, in fact, forms the kernel of the whole book, is clearly designated as consisting of the proverbs of Solomon, while the portion included in 22. 17 to 24. 34 is designated "Words of the Wise." Chapters 1-29, however, are introduced by the words, "These also are proverbs of Solomon, which the men of Hezekiah king of Judah collected." Chapter 30 is entitled "Words of Agur." Chapter 31. 1-9 contains exhortations to Lemuel king of Assyria; chapter 31. 10-31 contains an alphabetical poem standing by itself, with apparently little connection with

thought by the reader. Wine or strong drink is referred to, and the evil influence of these so fills the thought of the writer that he neglects clearly to indicate the subject in this sentence.

LORD STRATHCONA'S TITLE.

He Was Anxious to be Styled Lord Glencoe, But Protest Was Raised.

When Sir Donald Alexander Smith was created a peer he was anxious to assume the title of Lord Glencoe, in the reign of King William III. But no sooner had he intimated his intention than not only all the Macdonalds, but even the very Campbells, and, indeed, all Scotland, raised up their voices in such angry protest at the idea of a man of the name of Smith, in no way connected with either of the clans concerned in the massacre, assuming the name of the Glen of Weeping (which is the meaning of Glencoe) that Sir Donald was compelled to withdraw his application to the Crown, and to content himself instead with the title of Lord Strathcona.

Appropos of the massacre of Glencoe, an ancient practice is still in vogue to this day in Scotland. Whenever a Macdonald meets a Campbell at table in the Old Country, he is in the habit of either passing, a knife, blade foremost, that is to say, pointing the blade at him, by way of indicating that the treacherous massacre by the Campbells of the Macdonalds, whose hospitality they were enjoying and by whom they had been most kindly received, at Glencoe in 1702, has

THE STORY OF NICKEL

EARLY EFFORTS OF THE CANADIAN COPPER CO.

Two Great Problems, and How They Were Solved — How to Separate and Use the Nickel.

II.

The Canadian Copper Co. began mining in the fall of 1886 at Copper Cliff. The ore was shipped to New York for a while and was purchased there by the Orford Copper Co. of Constable Hook. The Orford Copper Co. found that the analyses of these ores made by their chemists did not agree, and it was while seeking to account for this disagreement that the discovery was made that the ores contained a large percentage of nickel. In smelting for the copper this nickel had been allowed to pass out with the slag. So it was that the slag, the refuse from which the copper had been extracted, was actually more valuable than the ore itself had been previously accounted. This was a momentous discovery. But two problems were still awaiting solution. First, how to separate the nickel; second, how to turn it to commercial use.

Col. Robert M. Thompson, one of the owners, and the managing spirit of the Orford Copper Co., set about with characteristic energy the solution of both problems. It must be remembered that although what nickel had been produced up to this time had been held at a fancy price, there was a very limited market for it, for the reason that no commercial use had yet been found for it. It sometimes happens that a metal may be rare and costly, and yet

WITHOUT A COMMERCIAL USE.

Calcium, for instance, is worth seven thousand dollars a pound; but there is little use for it and little demand for it. So was it with nickel when Col. Thompson took up the problem. He had heard that the Vivians had been making nickel in Wales for many years; in fact one of the men working in the Orford Copper Refinery had formerly been in Vivian's employ, but knew nothing of what was done inside the secret place where the nickel was refined. All that anybody appeared to know, apart from Vivian himself was that somehow, "salynixon" was an important factor in the process. Now this mysterious "Sally" on closer investigation turned out to be a term used by the old alchemists—salenixon, meaning "salt washed out," which term the alchemists, who had spent their lives in the search for the Philosopher's Stone, had used to describe a substance that was washed out in the manufacture of muriatic acid. It was really a crude compound of soda and sulphur.

Col. Thompson ordered a few tons of "salynixon" and tried melting down the ore with it, with no better result than a waste of time and energy. He tried again, melting the material with some ore which had previously been melted and concentrated so as to remove the rock and other impurities. Finally he secured a molten substance, which in cooling separated into two portions, which could readily be broken apart. The top was black and looked like slag. The bottom was whitish and looked more like metal. Analysis showed that this was a mixture of nickel and copper with most of the nickel at the bottom, and most of the copper on the top. But the problem of perfect separation was still to be solved. Do what he would there was still too much nickel with the copper, or too much copper with the nickel: to allow the product to be of any commercial value. At last the idea occurred to him that if one melting would take out part of the copper, another melting might take out more of it. The experiment proved successful. After repeated meltings it was found that the copper was almost entirely removed, and the nickel was left in combination

WITH SODA AND SULPHUR,

which could be removed by roasting and

coinage purposes. As Mr. Whitney did not desire to be at the mercy of France he sought a supply at home. But the mine at Lancaster Gap, from which a small amount of American nickel had been made for years, had closed down, and, in the length and breadth of the United States there was not a pound of nickel that could be obtained. Mr. Whitney's attention was therefore directed to the Canadian mines, and meeting Col. Thompson, he asked him if he could guarantee to produce nickel enough to supply the American navy with the desired nickel-steel. Col. Thompson assured him that he could make all the nickel the navy required; the only question with him was whether the supply of Canadian ore would last or not.

About this time a commission was appointed to investigate the Sudbury district. The report of this commission was perhaps the first intimation the world received of the immense stores of nickel this country possessed. From this investigation the development of the nickel industry in Canada may be said to date. From the copper smelter built by Dr. Peters at Copper Cliff in 1888 the business there grew step by step, conservatively enough, it may be stated, until in ten years the production of Canadian nickel had grown from nothing to fifty per cent. of the world's total.

WHERE THE GOLD GOES TO

ONLY A TENTH PART OF IT IS MADE INTO MONEY.

The Stock of Gold Coin Varies Very Little From Year to Year.

There is dug out of the earth each year between thirteen and fourteen million ounces of fine gold. In round numbers, \$250,000,000 worth. And the product is increasing, so there is no danger of the precious metal running out. Fresh finds are constantly being made, and methods of separating gold from the ore which contains it have improved so greatly that it now pays to work ore which no expert would have dreamed of touching twenty years ago.

This looks as if the world must be getting very rich, for if our stock of gold increases at the rate of nearly \$5,000,000 a week, surely the national treasuries must be simply overflowing.

And yet it is not so. The fact is that the proportion of gold used each year in the mints of the various nations is only a mere fraction of the total production from the mines.

It is not possible to get exact returns, but it is a safe estimate to say that not more than one ounce in ten of all the gold mined is turned into gold coin. What, then, becomes of the other nine ounces?

JEWELLERS USE HALF OUR GOLD.

Well, in the first place, jewellers use a very large quantity. France heads the list as the country which uses up most gold in this way. Her jewellers work up 36,000 pounds weight of gold every year—that is, about one-thirteenth of the whole amount raised.

Great Britain accounts for an almost equal quantity, and the United States takes 32,000 pounds weight for similar objects. Bad as is the reputation of things "made in Germany," yet there must be plenty of honest German craftsmen, for that country worked up 30,000 pounds of virgin gold in the last year for which statistics are obtainable.

Small as Switzerland is, she absorbed nearly 20,000 pounds weight of fine gold, while Italy and Russia between them took a similar amount. We can procure no accurate statistics from Turkey or India or China, but, as each of these countries uses a large quantity of gold for purposes of ornament, we shall not be very far wrong if we say that the world's jewellers use more than half of all the gold raised.

The next consumers in point of quan-

contains exhortations to Lemuel king of Massa; chapter 31. 10-31 contains an alphabetical poem standing by itself, with apparently little connection with what precedes.

In 1 Kings 4. 32 we are told concerning Solomon that "He spake three thousand proverbs." Many of these have been preserved to us, as we have indicated above, in our canonical book of Proverbs, several subdivisions of which bear the title "Proverbs of Solomon." Our Temperance Lesson for to-day is taken from a collection of maxims of warning entitled "Words of the Wise."

Verse 29. Who hath woe?—The word translated "woe" in our Bibles in the Hebrew is simply an interjection or exclamation of distress. We might translate it simply O. The Hebrew idiom reads literally To whom O? That is, to whom is there cause for exclaiming in distress?

Who hath sorrow?—Hebrew literally—to whom alas! the word translated sorrow being again simply an interjection, though not the same interjection as in the preceding sentence.

Contentions—Quarrelsomeness such as results from indulgence in strong drink, and which consequently leads to pugnacity and therefore also to wounds without cause.

Redness of eyes—The actual meaning of the expression thus translated is not certain. The word rendered "redness" may also be translated darkness, or dark flashing. Any of these translations would make good sense and be in harmony with the facts, that is, with the actual effect of excessive indulgence in strong drink, though probably the rendering as we have it in the English Bible is the preferable.

30. Seek out—The verb here used is elsewhere, as in Job 28. 27 and Psa. 139. 1, used of diligent search for wisdom. Archdeacon Peckow, commenting on this verse in the Cambridge Bible, points out the touch of irony in the use of this word in this connection.

Mixed wine—Not a mixture of different kinds of wine, nor yet wine mixed with other forms of strong drink; not mixed drinks in the American sense—but wine mixed with spices of different kinds to make it more pungent.

31. Goeth down smoothly—Or, as our Authorized (or common) Version of the Bible translates the same phrase, "moveth itself aright." The rendering of the Revised Version is, however, to be preferred, and is in harmony with the wording of Song of Sol. 7. 9. "And thy mouth like the best wine, that goeth down smoothly," or, as in the Authorized Version, "goeth down sweetly" (marginal reading, "straightly").

32. Strange things—Marginal rendering, as in the Authorized Version, "Strange women." The thought is that the imagination of the drunkard is haunted by strange and sinful visions as his mouth uttereth perverse things.

33. As he that lieth down in the midst of the sea—That is, as one utterly foolhardy, because of having been robbed of his powers of reason and judgment by strong drink.

As he that lieth upon the top of a mast—The mast and sails of ancient ships were more simple and clumsy than those used in modern times; usually but one large mast supporting a large square sail fastened to a yard of great length was used. The drunkard is as foolhardy as one who would lie down to sleep on the top of such a mast.

35. Shalt thou say—The fact that these words are printed in italics in both the Authorized and Revised Versions indicates that they are supplied by the translators and do not occur in the original Hebrew. In translating from any one language to another it is often necessary to thus supply words to give the plainly intended meaning of the idiom of the language from which one is making the translation. Such supplying of words is not guesswork, but a necessity.

Not hurt—Or, pained. The senses of the drunkard are so dulled that he becomes unconscious of cold or mistreatment.

Seek it yet again—The antecedent of the pronoun "it" is left to be supplied in

the minds of the Campbells and the Macdonalds, whose hospitality they were enjoying and by whom they had been most kindly received, at Glencoe in 1902, has never been forgotten or forgiven. On yonder side of the Atlantic every Campbell and every Macdonald understands the customs and appreciates its meaning. Lord Strathcona, by the way, indignantly denies the story so constantly printed to the effect that he began life as an errand boy in a village dry goods store in Scotland, that he came to America in the steerage, and that after a short stay in New York he wandered on to Canada, where he made his way up, step by step, in the service of the Hudson Bay Company from the lowest rung of the ladder until he became its president. He wishes it to be known that his origin was far from being as humble as intimated by his biographers. He declares that his people were among the county families of Morayshire, and that his mother was a daughter of the same blue-blooded house to which the late Field Marshal Sir Donald Stewart belonged. He further claims kinship with the Grants of Manchester, who were the originals of the "Cheerful Brothers" in Charles Dickens' "Nicholas Nickleby."

Instead of earning his living in his youth as an errand boy in a village store, he studied law at Edinburgh, and, worst of all, he never came over in the steerage, but on the contrary, as a first-class passenger, with a commission as an officer of the powerful Hudson Bay Company.

AUSTRALIAN MOUSE KILLER.

Little Animal That Put an End to the Plague in Queensland.

A correspondent of the Advertiser, writing from Goyder's Lagoon, states that he was warned of the approaching visit of a plague of mice by the manager of Anandale station. One of Mr. Kidman's cattle-fattening depots, who wrote as follows:—"A wave of mice is passing here in countless numbers, heading south in your direction. Snakes are hard upon their tracks. Have already killed nine snakes about the premises and four more have taken up their abode in the house."

In the cattle camps the mice proved an incessant worry. No matter where the pack bags were hung mice found their way into them and riddled the bags. If stoppers were carelessly left out of the canteens at night, many mice would be poured into the quart pots in the morning. At the homestead they took possession of almost everything. At night the men retired to bed reluctantly, knowing that the pest would accompany them and would race up and down inside blankets.

They would know the ears of the sleepers, tug their hair, and use the nose as an obstacle over which to practice high jumping. Three hundred mice were poisoned in the kitchen at one station in a night, and within a few days the plague had been reduced to the extent of 2,000.

The mice, however, had their own way until a little grey visitor, which proved a skilled mouse catcher, put in an appearance. So thoroughly did he do his work that it would be difficult to find a mouse at Goyder's Lagoon at present. The little animal, which is approximately 9 inches from the point of the nose to the tip of the tail, stands $2\frac{1}{2}$ inches in height, has an extremely sharp nose, a somewhat foxlike shaped head, and large, luminous black eyes.

The tail is probably the most remarkable characteristic of the animal, being 4 inches long. The tail for 2 inches is round and covered with grey fur, while the remaining 2 inches is quite flat and jet black, resembling a feather. It was a stranger in these parts, no European spoken to having seen it before, but the elderly aborigines appear to be acquainted with it, and call it Modeckoora. It belongs to the marsupial family, and the number of the young the female carries in her pouch varies from two to five.

There are also sermons in bricks—when they are coming your way.

Nickel was left in combination

WITH SODA AND SULPHUR,

which could be removed by roasting and washing in ways that were familiar to him from his experience with copper. In this way the Orford process became an important factor in the metallurgy of nickel, and the Canadian mines, instead of being regarded as copper mines became producers of metallic nickel.

In 1888 the Canada Copper Co. hired Dr. Peters, one of the best known exponents of the metallurgy of copper in the United States, to build a smelter at Copper Cliff for the partial refining of the metal found there. Up to this time the mines had been shipping an ore which by picking and sorting had been brought up to about ten per cent. of metal contents. In 1888 Dr. Peters erected a furnace, by which in 1889 the Canadian Copper Co. was able to ship instead of the crude ore, a metal called matte, containing about forty per cent. nickel and copper. Matte, it may be explained, is to the ore of nickel and copper what pig iron is to iron ore. The matte from the Sudbury district contains usually copper, nickel, sulphur and iron.

So far we have seen the solution of part of the nickel problem. The Canadian mines were capable of supplying an almost unlimited quantity of ore. The Orford Copper Co., starting in 1886, were refining nickel on a small but entirely satisfactory commercial basis. The other part of the problem was to find a use, and therefore a market for the nickel. So far there was a very limited demand for it for nickel-plating and for coinage.

To understand the story of the further development of nickel is necessary to touch again upon the uncanny and the miraculous. Some time in the remote east two immense blocks of meteoric iron are said to have fallen in Northern Greenland. The Esquimaux, who worshipped these mysterious visitors from the outside world, are said to have discovered that the material made excellent arrow-heads and spear-points. Specimens were brought to Europe by explorers, and examined by scientists who found that the metal was a combination of

NICKEL AND IRON.

It was known in a general way that nickel had a great influence in making iron tougher and stronger, and the Esquimaux showed considerable wisdom in their choice. In 1880 Mr. James Reilly of Glasgow made a number of experiments with this new alloy of nickel and iron, and in a paper, which is now recognized as a classic in the history of nickel, he showed that this alloy could be easily made, and that in strength and toughness it far exceeded the best steel that could be made without nickel. His experiments attracted the attention of the French Government, which promptly instituted a series of tests to determine the fitness of this new material for armor plates. The British Admiralty at this time was using a combined armor plate made by welding together an outer surface of hard steel, to deflect the points of the shells, and an inner lining of soft steel to furnish the necessary strength. The tests made by the French Government showed that the new nickel metal was much stronger and tougher than the old steel plates, and much better suited for warships. The shell might pierce the new metal, but would not shatter it. Further experiments showed that the new metal could be hardened without losing its toughness.

At this point Mr. Whitney, Secretary of the American Navy, decided that the new nickel-steel might be just the thing he wanted for the since famous white squadron. He wanted the best armor plate there was to be had, and if nickel-steel was the best, he wanted nickel-steel. But up to this time nearly all the nickel that had reached the world's market had been mined in New Caledonia. New Caledonia, which is an island lying south of the Philippines and northeast of Australia, had been used as a French penal colony. The nickel-ore mined there had been taken to France and there refined and used for

very few things. It was said that the world's jewellers use more than half of all the gold raised.

The next consumers in point of quantity, are the dentists. Though there may be substitutes, yet nothing has yet been discovered which is quite so good for stopping teeth as pure gold. It is just hard enough, yet not too hard. It is, of course, incorrodible and tasteless, and, above all, is so perfectly malleable, more so than any other metal. Whole barrels of gold are stored away each year in the mouths of the human race, and, of course, is lost for good and all.

GOLD LOST IN THE POCKET.

A large amount of gold is used in the other fine arts, besides that of the jeweller. Painters and gilders use a great deal, especially for picture frames and for signs and advertisements. In the manufacture of fine china tens of thousands of dollars worth go annually. Gold thread is really made of gold, and gold plating uses up immense quantities of the precious metal. Chemists, too, use gold in laboratory work and in medicine. In such industries as bookbinding and making wall-paper, a large quantity of gold is absorbed, and it must be remembered that in all these manufactures a certain percentage of gold is bound to be lost through unfavorable waste.

The amount of gold wasted is almost appalling in the aggregate, and our trousers pockets perhaps contain the greatest proportion of this waste. A moderate estimate puts the waste from gold coins rubbing against one another in purses and pockets at \$2,500,000 annually.

Does it strike you that every big fire and every wreck loses to the world a certain proportion of gold? It is very certain that more gold lies in wrecked ships at the bottom of the sea than at present exists in manufactured form in the possession of mankind.

INDIA'S HOARDED WEALTH.

But, even taking all these arts and crafts and causes of waste into consideration, yet it is difficult to account for the comparative scarcity of gold. We must, however, remember another and more important sink of gold. This is India.

India produces more than one and a half million pounds worth of gold yearly, but the world at large is none the better off. Much gold is also shipped there, but little comes back. Once let a gold coin get into a native's hands and there is the end of it. He neither spends it nor puts it in the bank. Centuries of oppression have taught him to hoard, with the result that all his gold, except that made into jewellery, is promptly buried. An able authority considers that in the Bombay Presidency alone is buried \$60,000,000 worth of gold. Consider, then, what the whole of India must contain!

In China, too, matters are nearly as bad. These two countries, India and China, are estimated to absorb between them twelve tons of gold a year, practically all of which is lost for ever.—Pearson's Weekly.

FAITH WITH WORKS.

"Do you believe in athletics?" a contributor to Punch asked a well-known London business man who was found practising with the dumb-bells at the back of his warehouse the other day.

"Certainly I do," he promptly replied. "Think it is good for your health?"

"I know it is. Why, a couple of years ago I took twenty-four lessons in boxing and worked up a big muscle. I was going home one night, when a man jumped out at me from the alley. In a minute he was nowhere."

"Hit him hard, eh?"

"No; I didn't hit him at all."

"Trip him up and fell on him?"

"No."

"Didn't kick him?"

"No."

"Well what did you do?"

"Outran him! But for my athletic exercises I couldn't have done it."

It is man's nature to fall, but he sometimes fools people by refusing to do it.

PRIEST'S NEW INVENTION

MESSAGES MAY NOW BE SENT UNDERGROUND.

Two-Mile Underground Wireless System — Cheaper Than Aerial Method.

In a few months, residents in New York city may be able to drop a message in a deep hole there and have it arrive in London a few seconds later. They may also receive the response by the same method just as quickly.

The invention is an underground wireless telegraphy system patented by Father Joseph Murgas, of Wilkesbarre, Penn. Father Murgas is a pastor of the Slavish Catholic Church of Wilkesbarre and is a trained electrical expert. The underground wireless he considers the cheapest and most practical system of telegraphy in existence.

The secret of his invention is carefully guarded, but its success has already been established by a series of experiments. The communication between New York and London is to be the same kind of experiment upon a larger scale.

HOLES TWO MILES DEEP.

The Universal Aether Telegraph Company, which is backing Father Murgas' work, will be started simultaneously in New York and in London to drill the deepest holes ever bored in the earth, each about 3,000 yards, or nearly two miles deep.

This work, it is estimated, will cost about \$20,000, for the holes are to be concreted to prevent moisture affecting the wires, and heavy copper wires will connect the discharging and receiving apparatus at the bottom of the hole with the sending and receiving stations on the surface. After that all it will be necessary to do will be to send messages according to his system, and New York and London will be connected by wireless telegraphy.

CHEAPER THAN AERIAL SYSTEM.

Father Murgas declares the underground wireless will have many advantages over the aerial wireless system, in which air waves are used. He says there will be less resistance, and that less power will be needed.

So confident is the company that the underground system will be a success that the development of the aerial system has been suspended, the cost of the underground not only being less, but the results so far obtained being superior to those first obtained by the aerial messages. When underground messages are sent between Wilkesbarre and Scranton in a few weeks a public demonstration is to be given.

Father Murgas, who, despite his hard work on his inventions does not neglect his church, has been able to build up a congregation of more than a thousand, one so much larger, in fact, than the present church can accommodate, that he is to present, out of money which he has made out of his wireless system, a handsome new stone church, finished in hardwood and marble, to his parishioners. This, he says, is the only use he has for his money except to further his facilities for inventions and to perfect the equipment of his workshop.

HEALTH

TIGHT-LACING.

Most women will declare, and with reason, that they are more comfortable in some form of corset than without any; and although it may be argued against this by the corset-hater that this is because they have accustomed themselves to a constriction and support that is unnatural, the fact remains, and it is probable that this garment, in some form or another, will always be in the fashion. It remains, therefore, for the would-be reformers to devote their energies to the proper construction and the correct use of corsets.

As to construction, it may be claimed that any corset which makes pressure on the diaphragm is harming the wearer, for the reason that it then becomes impossible to breathe properly. Singers invariably wear their clothing loose here because they could not get enough breath to sing if they did not, and they are generally healthy and splendidly developed women.

It is probably not an extreme statement to make that nine-tenths of corseted women never breathe as they should, because they have entirely lost the habit. The result is that the blood is never sufficiently aerated, and the condition is all the time rendered more or less anemic and below par. For this reason, the so-called "straight-front" corset is a great advance on the old-fashioned shape, because it gives more room to the breathing apparatus, and exerts the pressure where it can be better borne.

But whatever may be conceded in the direction of loose, well-made corsets, nothing but ill can be said of any form of corset that is worn tight; and by tight is meant the application of any pressure that is sufficient to contract the figure.

There are few indeed, who do not come under this condemnation. Whatever women say to the contrary, the principal use of the corset is not to give necessary support, but produce the shape prescribed by fashion; and as this shape changes from season to season, the corset lines change with it, and women submit to the tyranny of one sort of waist and hip line one season and another the next, to the great advantage of the dressmakers and the corsetiers, but to the inevitable detriment of their own health.

It stands to reason that any pressure sufficient to change the lines of a figure must be strong enough to compress the internal organs, with the result that breathing is impeded, natural muscular development is weakened and digestion impaired. Many a woman by submitting to an inch or two more in the waist, could improve her complexion, brighten her eyes and renew her youth.—Youth's Companion.

THE HABIT OF NOT FEELING WELL.

Few people realize that their ailments are largely self-induced. They get into the habit of not feeling well. If they get up in the morning with a slight headache, or some other trifling indisposition, instead of trying to rise above this condition, they take a positive pleasure in expatiating upon their feelings to any one who will listen. Instead of combining the tendency to illness by filling the lungs with pure, fresh air, they dose themselves with "headache tablets," or some other patent specific warranted to cure whatever ill they think they are suffering from. They begin to pity themselves, and try to attract pity and sympathy from others. Unconsciously, by detailing and dwelling upon their symptoms, they reinforce the first simple suggestion of illness by a whole army of thoughts and fears and images of disease, until they are unfitted to do a day's work in their homes or offices.

It is said that man is a lazy animal. We are all more or less prone to indolence, and it is the easiest and most

STEAM FROM THE EARTH

A SCHEME WILL BE PROVIDED TO OBTAIN IT.

May be Utilized as a Source of Industrial Power in a Short Time.

It is promised by scientists in high position that the internal heat of the earth may be utilized as a source of industrial power in the near future. A comparison of underground temperatures has been made recently and a theoretical increase of one degree for every sixty feet has been determined. But there are exceptions to the rule which proves that the earth's crust is hotter in some places than in others. A thermometer lowered into the wells near Pittsburgh and Wheeling showed an increase for every fifty feet. The temperature in the Pittsburgh well at the bottom was 190 degrees. On the other hand, Professor Agassiz found the temperature at the 4,900 feet level in the Calumet and Hecla mine, at Houghton, Mich., to be no more than 100 degrees. The Schladebach well shows a temperature of 135 degrees at the bottom, and the Sperenberg well 118 degrees. The Cornwall mines show a temperature of 100 degrees and at Ronchamp, France, the temperature of the coal mines at 3,609 feet is 117 degrees. It is proved beyond doubt that, although it varies in different localities, the heat of the crust of the earth grows gradually greater from the surface inward, and upon this argument is the theory based for a new and general source of power.

AMOUNT TO BE HAD.

It is not merely a question of getting steam, but a question of the quantity of steam to be had. According to Prof. Hallock, of Columbia, hot water is even now drawn from a well and used to heat a house near Boise City, Idaho. Water pumped from the Pittsburgh well was too hot to keep the hand in it, for it had a temperature of 130 degrees. But, while the Pittsburgh and Wheeling wells are capable of heating water which has been in them over-night, even if their depth is sufficient to turn that water to steam, it would require many hours of heating, which would rob it of all commercial value. The great difficulty is not in obtaining steam from the interior of the earth, because that involves merely a little extra labor in boring down into the hot area, and is comparatively as easy to bore down ten thousand feet as six thousand, but in order to give steam commercial value a method must be provided for dropping the water to the hot area, allowing it time to heat, and yet having it returned to the earth's surface without interrupting its flow for a moment.

SUBTERRANEAN BOILER.

Suppose two holes were bored directly into the earth's surface, twelve thousand feet deep and fifty feet apart. According to the measurements made in the Pittsburgh well, at the bottom there would be a temperature of more than 240 degrees—far above the boiling point of water. If very heavy charges of dynamite or some other heavy explosive were to be lowered to the bottom of each hole and exploded simultaneously, and the process repeated many times, the two holes might have a sufficient connection established. The rocks would be cracked and fissured in all directions, as in deep oil wells when they are shot. If only one avenue were opened between the holes it would be enough. The shattering of the rocks around the base of the holes would turn the surrounding area into an immense hot water heater. The water poured down one hole in the earth would circulate through the cracks and fissures, the temperature of which would be more than 240 degrees, and in its passage it would be heated and turned to steam, which would pass through the earth's surface through the second hole.

GREAT PRESSURE

YOUNG FOLKS

WHO IS THE FRIEND?

Who is the faithful friend, my dear,
All marked in time, his face?
Although he has no wrinkles, still
He hath no faithful grace;
His hands are busy all day long,
Nor doth he rest at night;
He hath no eyes to see, for lo!
He hath no need of sight.
His wagging tongue is never still,
Yet do not think, I pray,
He spends the hours in gossiping.
Or fritters time away.
Although he is not glib, he yet
Was never seen to smile;
Nor is he vain, though in the glass
His face is all the while.
The barber never cuts his hair,
Nor doth he shave his beard,
For as he hath no hair, his plain,
He never needs it sheared.
He often strikes, though not in wrath;
His ringing voice you hear;
Although he knows not what to say,
You understand, my dear.
For when your head begins to nod,
You hate to hear him tell
Mamma "his time you were in bed,
That friend you know so well!
But when you wake up in the night,
And all is still around,
Oh, then you're glad to hear him speak
With such a cheery sound.
And when you're tired with your school
What joy to hear him say:
"Come, teacher, let the children go,
For it is time to play."

THE UNGRATEFUL SQUIRREL.

Once upon a time there was a squirrel that lived in a big park. He was a most industrious little fellow, and had laid up a plentiful store of nuts and vegetables.

"For, suppose," said he, "I should fall sick and not be able to get out. What in the world would become of me?"

Indeed, he had remembered well how once he had been ill away up on the top of a tall tree, and could not possibly get down to the ground, and what a gnawing pain he had suffered in his stomach. So he made up his mind that he would never again be hungry. Then, just as he had a store of nice nuts and sweets laid up for the winter, he met a strange squirrel limping along the pathway.

"Hello, my friend!" said he. "Pray what is the matter?"

"I have hurt my foot," replied the newcomer, "and a sorry plight I am in, with the winter coming on. Luckily there are no stray eggs about. Crippled as I am and unable to run, they would rend me to pieces."

"What can I do for you?" asked the new-found acquaintance.

"If you will help me to your nest," said the wounded squirrel, "and let me rest, I shall deem it a very great favor."

Now, the first squirrel, being a kind and good-natured little chap, helped his friend up the tree to his warm nest, and told him that he was perfectly welcome to remain until his foot was quite well again. He need not worry, for there was plenty of nuts for both.

There were some very good things in that nest, I can tell you, and the newcomer made himself quite at home. There were chestnuts and peanuts and hickorynuts; and, besides, his new friend brought him daily delicious little tidbits in the way of cake and apples, as he was a great favorite with all the visitors in the park, who were most generous in their contributions.

So the visiting squirrel grew fat, and, I am sorry to say, lazy. Although his foot was entirely cured, he showed no desire to leave the warm nest that sheltered him.

"What is the use," he argued with himself, "to work, so long as one can loaf and be taken care of? And he preferred to live in idleness rather than work.

Showing no inclination to depart, his

Lists.

A procession of prehistoric four-wheelers drawn by centenarian horses, driven by old men, any of whom might excusably have been mistaken for Methuselah, drew up at a house in Euston road, London, the other day.

The vehicles were simply packed to suffocation by men quite as ancient as the drivers. They were so old that on alighting they did not hear shouted warning about the steps, because they were deaf, and they stumbled badly because they were half blind.

Also because some of them were crippled with rheumatism they could hardly crawl up the path to the front door. But they assisted each other with much kindness.

Now that sad little spectacle was not, as might be supposed, a grand-father's show. It was, as a matter of fact, a gathering of old cabmen at the Dr. Forbes Winslow's Hospital, where they hoped that the doctor's scrutiny of their infirmities might result in their getting a small pension from the Cabmen's Benevolent Association.

When all the men were assembled upstairs the tale of their ages was 2,070 years, the oldest of them being a veteran of eighty. And this sprightly youth, who was one of the youngest looking, had been driving his cab up to a few years ago.

Dr. Forbes Winslow sat in the back room and called for the men one by one. And they came in, halting and peering at the doctor with their bleared old eyes, and craning their necks that their deaf ears might catch the verdict.

Most of them were so deaf that the doctor could comment freely before them. "It's the weather," he said, "that does it. Some of these men have been out in every kind of weather, day after day, for forty and fifty years."

"The rain gets into their ears and makes them deaf. They get cold after until it settles down into chronic bronchitis, and they become hopelessly rheumatic. These cases are all alike. People who hail a cab and drive where they want to do not realize the sufferings of the men who drive them."

WORN BY THE WEATHER.

Deafness, failing eyesight, failing heart, rheumatism; and memories, too, were bad. Some of them asked what the present year was, had to scratch their white heads before they could remember. One old man, who had been driving a cab for fifty years, said, "My mind is that bad, sir, that sometimes I has to pull up, and, begging the fares' pardon, ask them where they told me to drive to."

After their examination, Dr. Forbes Winslow asked most of them how trade was, and all agreed it was not what it was when they began, forty or fifty years ago. And the police? Their weather-beaten, frost-bitten, purple old faces broke into a thousand wrinkles. Ah! they kept clear of them—if they could.

TOOK HIS HORSES.

But they did not all smile at this question. "Old Jenkins," for instance, who is 73, said that the police took his horses. His horses were very old, and the police said they must be destroyed. "But I loved those horses," said the old man, "and I could not ill-treat a horse, sir, I could not." And the poor old fellow, after a gallant struggle, broke down and cried.

This brave old chap was going back to his work, for he was still driving. Though 73, he preferred to stand down and give some less hearty old fellow a chance for a pension.

Perhaps the most interesting of them all was Harris, who had driven his cab for fifty-eight years. He drove fit until eight weeks ago. He remembered many changes—remembered the time when omnibuses and tramcars did not exist, and the vehicle he himself drove was entered from the back.

He recalled, too, that he once found £29 in gold in a cab, and returned the same to a gentleman in Park street, who had said that anything he could do for him in the future he would do. Unfortunately, he had forgotten the gentleman's name.

images of disease, until they are unfitted to do a day's work in their homes of offices.

It is said that man is a lazy animal. We are all more or less prone to indolence, and it is the easiest and most natural thing in the world for young people to accustom themselves to lying down or lounging on a sofa because they think they are tired, or not well. Much so-called "invalidism" is simply laziness, fostered and indulged from childhood. There is a great danger that girls who are delicate while growing up, and lounge around the house and lie down whenever they feel the least bit out of sorts, will form a habit of invalidism when they reach maturity. How often do we see such girls "brace up" at once whenever anything happens which interests or excites them! An invitation to a reception, or any other pleasant social occasion, acts like a tonic. For the time being an instantaneous cure is affected. They are as well as anybody—until after the entertainment.

VALUABLE HINTS FOR ACCIDENTS.

Never wash a wound that bleeds much with warm water, which only increases the flow. If the wound is in the hand or arm and is serious, raise it and fasten it across the chest, if in the leg put the limb on a chair. Bleeding from the nose is not an unusual thing, and is generally not alarming. If it continues for a very long time and resists all remedies, do not delay in sending for a doctor. Never allow the sufferer to hang his head over a basin, but lay him down flat and apply cold-water cloths to his nose and forehead.

COLD IN THE HEAD.

A child suffering from a cold in the head should never be allowed to lie on its back in bed, but always on the side. The application of a little vaseline to the nasal passages will be found a relief. A little warm camphorated oil well rubbed on the back and chest is a capital remedy.

TAKE CARE OF YOUR EYES.

Don't face the light when reading or sewing. No matter if your eyes are shaded, the reflex rays strike from your book or from your sewing into your eyes. When your back is to the light the rays rebound away from you, not toward you.

QUITE MISTAKEN.

She was reclining in a low chair in the drawing-room, thinking about her dear Willie, who had been legally her property for the space of three months, when a telegram arrived for her. Hurdled tearing open the buff envelope, she scanned the contents, then fell back in a swoon.

The message was from her brother in the city and read: "Will run over to-day.—George."

Her maid at last restored her to consciousness. Her Willie run over! She could not grasp the full significance of it. One thing she would do—go to him at once. So she hastily attired herself, and at length reached her brother's office, who, having sent the news, would be able to tell her all about it.

"How is he? Where have they taken him?"

Her brother stared at her stupidly. "Oh, don't keep me in suspense! Tell me where he is!"

"Where who is?"

"Why, Willie, of course!"

"At his office, I suppose. I haven't seen him to-day."

"Then what does this mean? Isn't he run over? Is this one of your silly jokes?"

George took the flimsy from his sister, read his own message, then exploded with laughter. It was a long time before he could convince her that his simple intimation that he would run over and pay her a visit was not a detestable practical joke.

temperature of which would be more than 240 degrees, and in its passage it would be heated and turned to steam, which would pass through the earth's surface through the second hole.

GREAT PRESSURE.

The pressure of such a column of steam would be enormous. Aside from the initial velocity of the steam, the descending column of the cold water would exert a pressure of at least five thousand pounds to the square inch, which would drive up through the second hole anything movable. This done, the water heater would operate itself and a source of power be established which would surpass anything now in use.

As an undertaking it would not be beyond our present standards of cost and enterprise. Judged by the Pittsburgh and Wheeling wells, two such deep holes would cost about \$10,000 a mile, so that the plan might easily be carried out for about \$50,000. The benefit to science would be incalculable—that amount. It might not be very far to go far. The estimate of the cost is based on the Pittsburgh district, but there are many places where the increase of heat would be much more rapid. The Yellowstone Valley would almost surely yield commercial temperature at comparatively shallow depths.

ATTRACTIVE WINDOW.

Applicant—"I see you advertise for a window-dresser."

Merchant—"Yes. Have you had much experience?"

"I arranged the window in the last shop I was employed at, and every woman who passed stopped and looked in."

"That's something like it. You're just the man we want. By the way, what line was your firm in?"

"Mirrors."

THE CELEBRATION.

He—"To-morrow will be my birthday."

She—"I suppose you will take a day off?"

He—"I shall."

She—"And how do you think I celebrate when I have a birthday?"

He—"Oh, I presume you take a year off."

"What is the use," he argued with himself, "to work, so long as one can loaf and be taken care of? And he preferred to live in idleness rather than work."

Showing no inclination to depart, his benefactor was at length obliged to request him to leave, which he did with a very ill grace. I can assure you.

He was not only ungrateful, but most unwise. Unable to value the services of a good friend, he had imposed upon that friend's generosity, and should he ever meet with a similar misfortune, never again could look for favors from one whom he had treated so rudely.

After his guest had departed, the good squirrel shook up his nest and made it anew with clean twigs and straw, for he was glad to get rid of his insolent and indolent chance acquaintance.

LIVED LIKE A PRINCE.

Young Burglar Breaks Into Hotel Closed for the Winter.

During a round of inspection the proprietor of a hotel situated on the Grimsel Pass, Switzerland, was astonished to see smoke issuing from one of the chimneys of the hotel, which he had carefully locked up and left for the winter months. He unlocked a door, entered, and, attracted by the sounds of a piano, went into one of the best bed-sitting rooms.

There he found a young man decked out in his clothes, playing and singing. The stove was lighted, and on the tables were bottles of his best champagne and delicacies. The piano and a large bookcase had also been dragged into the room.

"For the last month," said the youthful burglar, on seeing the proprietor "I have been thoroughly enjoying my self. I never had such a good time in my life. I do not mind going to prison now, and I hope you will forgive me."

The jovial burglar put on a coat and hat, took a last glass of champagne and followed the proprietor to the police station in the valley.

Pa Twaddles—"Why are you spanking Tommy?" Ma Twaddles—"He needs a lesson, and I'm impressing it on his mind." Pa Twaddles—"Well, you've got a queer idea as to where the lad's mind is situated."

Mr. Hen Peck—Huh?
Willie Peck—I say what was your name before you married ma?

SYMPTOMS OF SMALLPOX IN THE KING'S HOUSEHOLD POISON-GIRLS IN INDIA LUDICROUS PUNISHMENT

MORE DREAD OF THE DISEASE THAN ANY OTHER.

Dr. Hodgett's Exhaustive Report on the Subject—Type Has Become Mild.

Dr. Charles A. Hodgett, secretary of the Ontario Board of Health, has issued a pamphlet containing a clinical description of smallpox with twenty illustrations, showing patients with the disease in various stages.

TYPE HAS CHANGED.

The writer deals with some of the misconceptions in regard to the disease which prevent the authorities from adopting the preventive measures essential to the prevention of epidemics. He states that there is a change in smallpox from what it used to be. In former epidemics the type of the disease was severe, patients suffering severely from the onset, which was generally sudden. Then during the few days immediately preceding the appearance of the rash there was headache, pains in the back and limbs, with accompanying nausea and vomiting, often incapacitating them from all work. With the cessation of these symptoms the rash began to show itself in a pronounced manner upon the exposed parts, as face, neck, hands and wrists. The present form of the disease, says Dr. Hodgett, in many cases shows but few pocks or pustules, and often their presence gives but little inconvenience even when numerous. The only sickness complained of is before the onset of the rash, the secondary symptoms being either very slight or entirely absent. The persons attacked are often able to follow their usual occupations throughout the whole progress of the disease. These misconceptions have led the disease to be called chicken pox, Cuban itch, Philippine rash, elephant's itch, impetigo and contagiosa.

MORE CASES IN WINTER.

A few facts about the disease as a result of the experience of the last five years. The maximum number of cases have occurred in January, and the minimum in the summer months, although the type presented no variation in cold weather, as compared with those cases happening in the heat of summer. The period of incubation is usually about 12 days from receiving the specific infection. The cases have been numerous during the last few years where the 15 or 16 days have elapsed before the disease developed itself. The quarantine period has in consequence been extended to 18 days, and in some States of the republic to three weeks.

SYMPTOMS OF DISEASE.

The initial symptoms of the disease are not of a serious character. Its appearance is mild and insidious. The first signals of its approach are a headache and a backache, accompanied by nausea and vomiting. The symptoms are more like those of a gripe than anything else. The temperature goes up from 100.1 to 102.1, and the fever continues for from 24 to 72 hours, after which the temperature becomes normal. The eruption appears from a few hours to 72 hours after the onset, and consists in the first instance of minute red macules, which disappear on pressure. They are not hard to the touch nor raised above the surface. Often within a few hours the maculae become papules, when the shotty feel is first noticeable. A fruitful source of the error of diagnosing the disease as chicken pox, is the misleading statement often made by the patient that the rash began as vesicles, whereas he should say that the eruption was first noticed when vesiculation began. It takes from one to three days for the rash to come right out, the vesicles increasing in size. The change to the pustule sometimes begins as early as the fourth

THERE ARE MANY RECEIVERS OF FAT SALARIES.

Positions Worth \$792,905 Are At the Disposal of the New Premier.

It is a singular and significant fact that the only person in the kingdom whose household is affected by the change of Government is the King. There could be no more striking proof that it is the prime minister and not the sovereign who is the real ruler of the British Empire than that it is the former who makes the appointments to the best paying and snuggest billets in his Majesty's domestic entourage.

As a result of the elevation of Sir Henry Campbell-Bannerman, the son of a Scotch draper, to the position of the first Minister of the Crown, several aristocratic members of the royal household, all personal friends of the King, have been sacked, and various other more or less exalted personages have been given their jobs. The new batch of court dignitaries are all Liberals.

HIS HEAVY DUTIES.

When the Lord Chamberlain is doing official stunts, he carries a white staff and a gold key, which never locks or unlocks anything, attached to his person by a blue ribbon. There is a greater than the Lord Chamberlain—to wit, the Lord Great Chamberlain.

His office is an hereditary one, and, therefore, he cannot be displaced when there is a change of administration. He is the most exalted sort of swell, and is regarded as far too important to be trotted out except on the greatest occasions.

He has the Palace of Westminster under his control, and among his privileges is that of selecting the peer who makes a lot of other peers envious by carrying the sword of state when the sovereign goes to Parliament.

He has precious little to do really, and few responsibilities; but it is quite in accordance with the British scale of remuneration where exalted dunces are concerned that his pay is more than double that of the Lord Chamberlain, amounting to \$22,500 a year.

Below stairs, among the kitchen pots and pans, the Lord Steward holds sway over the King's household. Lord Hawkesbury has just been given that job by the new Premier, displacing that staunch Conservative nobleman, the Earl of Pembroke. The pay is the same as that of the Lord Chamberlain.

THE LORD CHAMBERLAIN.

The post of Lord Chamberlain, from which the Earl of Arundon has been bounced, has been conferred upon Hon. C. Robert Spencer, the dapper and elegant half-brother of Lord Spencer. The "Honorable Bobby," as he was long ago affectionately nick-named—for everybody likes him—has for years enjoyed the reputation of being the best dressed member of the House of Commons.

The salary of \$10,000 a year will properly sustain the tremendous dignity of the position. He has been created a peer and given a seat among the hereditary legislators of the Upper House.

He is responsible for the smooth running of things "above stairs," except within the royal sleeping apartments, where the First Lord of the Bedchamber holds sway.

The pay roll of the Lord Chamberlain's department amounts to \$295,000 a year. He has under him a host of distinguished officials and titled flunkies, including a vice-chamberlain, who gets \$4,020 a year, a master of the ceremonies, a marshal of the ceremonies and a deputy marshal of the ceremonies, lords in waiting, grooms of the great chamber, a lot of gentlemen ushers, pages of the back stairs, pages of the presence, and state pages.

THE TERRIBLE POWER WHICH THEY POSSESS.

Living on Poison, Their Breath Becomes Fatal to all Approaching Them.

Private Calcutta letters to England to a member of the aristocracy tell of elaborate precautions taken by the Government to guard the Prince and Princess of Wales against "poison-girls and poison-men." These dangerous creatures, which Nathaniel Hawthorne immortalized in his "Rappaccini's Daughter," are supposed to be able to kill a person by breath or touch, and the Indian Government has no more succeeded in exterminating them than infant marriages and other Indian peculiarities.

Indian medicine men and priests knew long before Prof. Koch and other European alienists that the persistent consumption of poisons makes the body immune against poisoning. Accordingly potentates, priests, and others who had occasion to wish for the death of certain persons every little while kept on hand a number of poison-fed individuals to send to the persons that they wished to do away with. Both boys and girls were trained for this murderous office, principally girls.

THEIR TRAINING.

The Indian princess caused beautiful and healthy female children to be put under the care of physicians and medicine men soon after they were born. The medicine men strewed the floor under the baby's cradle with dried helmet flower, or monk's hood, that is such from which the deadly poison, aconite, had been partially extracted. After a few months, unprepared monk's hood was placed under the cradle and in vases in baby's chamber. Later the fresh flower was installed and baby was allowed to play with it and suck it.

Still later a mild solution of aconite was added to baby's milk and other food after a graduating scale. As the little bodies became more and more used to the poison, the doses were increased, and usually when a girl was ten or twelve she could eat aconite in the same quantities as some arsenic eaters devour that poison.

INSTRUMENTS OF DEATH.

It is a fact, though, that few human natures can stand the aconite treatment. We are told of an Indian prince who succeeded only in raising one poison girl out of more than a hundred. But this poison girl was so venomous that nobody and nothing could live in the house she inhabited, both human beings and animals dying from breathing the same air as she.

This particular poison girl whom nature had endowed with all the graces liable to capture a man's heart, was used by the Indian prince at various times to murder pretenders by a single kiss, to rob his enemy's army of its leader, to kill off inconvenient relatives and officials.

WHY MEN FAIL.

A well-known "king of commerce" told me the other day that one of the most frequent causes of failure is excessive ambition—that greed which leads a man to grasp at too many of its prizes. "There are some things," he proceeded to explain, "the acquisition of which is incompatible with that of others, and the sooner that truth is acted upon the better. To strive for a high professional position, and yet to expect to enjoy all the delights of social intercourse or of leisure; to toil after great riches, and yet to ask for freedom from anxiety and care; to live luxuriously, and yet to demand health and strength; to live for self exclusively, and yet to expect the love and esteem of one's fellow-beings, is to seek for contradictory and mutually destructive advantages; in short, for impossibilities. The world is a market

PENALTIES FOR BREAKING THE RULES ON A MAN-O-WAR.

Bailing a Tub of Water With a Spoon — Laughing for an Hour and a Half.

Naval officers do not always mete out to the men the punishments laid down in the King's regulations. They frequently adopt punishments of their own invention which prove most effective in preventing the recurrence of offences. These punishments are often of a very curious and even ludicrous nature.

It is an everyday occurrence to see half a dozen sailors lined up on deck facing the paint work, their hammocks on their shoulders and their faces presenting a most woful picture. For this punishment is not so trivial as it appears, says London Tit-Bits. The hammock is not very heavy, it is true, but after an hour or so it drags on one's shoulder like lead. Besides it is far from pleasant to stare fixedly at a square foot of gray painted woodwork for sixty minutes at a stretch. Jack would much prefer to do a few days "Ten A" or to have his leave "fambled."

Spitting upon the deck of a man-o-war is strictly prohibited. As soon as the bugler has sounded the "Stand Easy" spittoons are placed at intervals along the deck for the use of the sailors, and woe betide the tar who ignores the presence of these tubs and expectorates about.

THE SPOTLESS DECK.

On many vessels a wide belt is kept, and this the man who departs from the regulations is compelled to wear upon his person, and is thus subjected to the ridicule of his shipmates. He is given an opportunity of retrieving his character, however. He is permitted to walk the deck with the other men, and should he spot a sailor committing a like offence he at once presents him with the hated belt, and the new victim has to undergo a similar ordeal.

Some officers adopt more drastic measures. If Jack is detected expectorating anywhere but in the receptacles provided a "spit-kit" is strapped to his chest, and any man who cares to do so may make use of this curious walking receptacle. As may be supposed, this humiliating punishment effectively prevents the men from violating the regulations.

Were a civilian given two large wooden buckets, one empty and the other full of water, and told to bale the liquid from the full tub into the empty vessel with a small spoon, he would consider the order to be that of a madman, or a revival of ancient fairy lore. Yet this punishment has on several occasions been meted out to refractory "sea dogs." Nothing is more amusing than to see a weatherbeaten sailor carefully bailing out spoonful after spoonful of water, and as carefully depositing the fluid in a large bucket at his side.

A punishment frequently employed is that of setting the defaulter to walk slowly: backward and forward along the deck, nursing in his arms a 6 inch projectile (weighing a little over 100 pounds). After a quarter of an hour or so of this beneficial "exercise" the unhappy victim is glad to drop the load and

RUB HIS ACHING LIMBS.

At the same time he probably makes a solemn mental resolve never to repeat the offence for which he has been "awarded" this dire penance.

An old naval captain—one of the old, old school—was at one time sadly addicted to stammering. He could not utter a simple sentence without a great amount of spluttering and hesitation. This was one day too much for an intrepid sailor, who was receiving an order from the captain in that official's usual halting manner, and he unfortunately burst into an uncontrollable fit of

to come right out to three days for the rash to increase in size. The change to the pustule sometimes begins as early as the fourth day, the rash on the face sometimes shrinking and drying up into thin crusts, and is shed from the face and neck often as early as the tenth day. In other portions of the body and extremities the course of lesions is prolonged. The average duration of this typical form of smallpox is slightly under 21 days.

DIFFERENT FROM CHICKENPOX.
The chief characteristics which distinguish chickenpox from the present mild form of smallpox are given by Dr. Hodgetts as follows: 1. Chickenpox is a disease chiefly confined to childhood, being only occasionally seen in adults. 2. It rapidly runs its course in a week, passing through the stages of pimple, vesicle and scab, often within twenty-four hours after the first appearance of the popular rose spot the vesicle develops. 3. The premonitory symptoms are frequently wanting altogether. 4. The temperature accompanies or follows the appearance of the rash. 5. The vesicles of chickenpox are ovoid or irregular in appearance, and attain their maximum development much quicker than those of smallpox. 6. The eruption, as a rule, appears first on the portions of the body covered by clothing. 7. After the crusts fall off they leave a red instead of a pigmented spot. 8. Does not appear on palms of hands or soles of feet.

HISTORY OF DISEASE.
Dr. Hodgetts states that the first outbreak of smallpox in the province occurred in Essex county in the fall of 1899, when 272 cases were reported with one death, the disease having spread from the adjoining State of Michigan. In the following years the disease became more widespread, the infection in many instances being traceable to the United States. In 1900-1 it made its appearance in the lumber shanties of New Ontario, breaking out at widely separated points and making rapid progress before its presence became known. "The hardy shantymen," says Dr. Hodgetts, "becoming a ready prey to the disease from the fact that nearly all were unvaccinated."
"These men had suffered from la grippe when it was epidemic, and here was a disease in most instances not so severe; true, a few 'pimples' appeared afterwards, but on the whole they felt better and work was resumed—the pimples were of no account, and it was not until February, 1901, that a case reached the notice of a physician, who recognized the true character of it, that the provincial authorities were apprized of the fact."

CASES IN FIVE YEARS.

Since the disease has spread to the older portions of the province and has been with us ever since. Following are the returns since 1900:

	Cases.	Deaths.
1900	300	11
1901	1,838	7
1902	2,797	12
1903	820	21
1904	309	4
	5,765	51

This is equal to a case mortality of 0.88 per cent.

USED TO BE MORE SEVERE.
The statistics prove that the type is not the severe character that it once was.

Coming to recent dates we find the type of the disease in the City of Montreal, in 1885-6, and of which Osler in his "System of Medicine" writes, was of a like similar character to what preceded it. There were 3,164 deaths, and of the 1,332 treated in the hospitals, 418 died, a fatality of 31.3 per cent. In Ontario, during the years 1884-99, the following is the record of cases and deaths—

Year	Place.	Cases.	Deaths.	P.C.
1884.	Hungerford township	202	67	33.0
1885.	Province, generally	146	16	10.9
1889.	Elgin Cy.	49	13	28.9
1890.	Russell Cy.	30	9	30.0
		429	105	24.45

In waiting, groom, or the great chamber, a lot of gentlemen ushers, pages of the back stairs, pages of the presence, and state pages.

MASTER OF THE HORSE.
Another sinecure, the best paying of the lot, is that of Master of the Horse, which has been bestowed on the Earl of Sefton, who takes over the job from the Duke of Portland. The latter, however, is too rich to miss the \$12,000 a year, which is the salary of the office.
The Master of the Buckhounds is another dead easy billet which is numbered among the leaves and fishes of office. It pays \$7,500 a year and can be held only by a peer or the heir to a peerage. Similar salaries are also paid to the Captain of the Gentlemen-at-Arms and the Captain of the Yeomen of the Guard—the two bodies which are supposed to do what Scotland Yard really does—guard the person of the King at big royal shows.
Some queer billets exist outside the royal household, which are included among the spoils of office. Of these the positions held by the Junior Lords of the Treasury afford the best illustrations of the absurdities that are sanctioned by the British system of party Government.
There are three junior lords, and they may or may not be real lords, though under a Tory administration they are usually sons of peers. They are paid \$500 a year each for work that they don't do, and nothing for the work that they do do.

ABOUT THE FRENCH GIRL.
She is Very Dependent on Her Parents' Plans.
To-day the French girl must submit to having her husband chosen for her exactly as did her great-grandmother, and that in every class of society.
To the average French girl the fact that she will one day be a wife, and probably a mother, is as inevitable and certain as is death itself, and from childhood she is educated with a view to fulfilling her vocation.
Again, from the day she is born her parents begin saving a dowry for her, and should they fail in amassing a sum proportionate to their means, public opinion judges them very severely. It also frequently happens that several relations join in by no means very well off, will even together to provide a small dowry for an orphan niece or cousin.
Daughters share with sons any fortune left by their parents. All this makes the position of a French-woman very secure and akin to that of the man whom she may marry. Even as a bride, she is not dependent on her husband, as is so often the British wife after years of married life.

HIM FRINCEANCE.
The Downey One—Bah Jove, y'know they used to tax men who raised moustaches in Queen Elizabeth's time. The Pretty One—Well, it appears to tax some men I know to do it now.

love and esteem of ones fellow-beings, is to seek for contradictory and mutually destructive advantages; in short, for impossibilities. The world is a market where everything is marked at an invariable price. Choose whatever good you deem most desirable; but, having made a choice, stand by it, and make the most of it—extricating all the satisfaction you can. Guard, therefore, young man, against the cultivating too many talents; only one can you hope to bring to perfection. Be a 'whole man' at one thing, and not split into two or three middling ones. Thus, and thus only, may you hope to succeed in an age of merciless competition, when success taxes all one's powers.'

NEWS BY PIPE LINE.
London and Glasgow Connected by Underground Cable.

The underground cable system between London and Glasgow, on which the Post Office Department has been at work since 1896, is practically completed and in a few weeks will be opened to the public.
The object of this underground cable has been to insure the steadiness of the telegraph system between London and Scotland, which has been frequently interrupted by storms. The Post Office Department showed a considerable amount of common sense in putting all wires underground in a conduit. As a section was finished it was opened to public use. London to Birmingham was the first section, and since then the line has been gradually extended northwards, connecting all the principle cities and towns on or near the route.
About 500 miles of pipe have been laid, and 40,000 miles of wire have been run through it.

A PERFECT HAND.
How Its Appearance Became Familiar to the Public.

The story of how probably the most perfect feminine hand in America became known to the people is rather interesting.
As the story goes, the possessor of the hand was with some friends in a photographer's one day and while talking, held out a piece of candy. The pose of the hand with its perfect contour and faultless shape attracted the attention of the artist who proposed to photograph it. The result was a beautiful picture kept in the family until one day, after reading a letter from someone inquiring as to who wrote the Postum and Grape-Nuts advertisements, Mr. Post said to his wife, "We receive so many inquiries of this kind, that it is evident some people are curious to know, suppose we let the advertising department have that picture of your hand to print and name it 'A Helping Hand.'" (Mrs. Post has assisted him in preparation of some of the most famous advertisements).
There was a natural shrinking from the publicity, but with an agreement that no name would accompany the picture its use was granted.

The case was presented in the light of extending a welcoming hand to the friends of Postum and Grape-Nuts, so the picture appeared on the back covers of many of the January and February magazines and became known to millions of people.
Many artists have commented upon it as probably the most perfect hand in the world.
The advertising dept. of the Postum Co. did not seem able to resist the temptation to enlist the curiosity of the public, by refraining from giving the name of the owner when the picture appeared but stated that the name would be given later in one of the newspaper announcements, thus seeking to induce the readers to look for and read the forthcoming advertisements to learn the name of the owner.
This combination of art and commerce and the multitude of inquiries furnishes an excellent illustration of the interest the public takes in the personal and family life of large manufacturers whose names become household words through extensive and continuous announcements in newspapers and periodicals.

reputa sailor, who was receiving an order from the captain in that official's usual halting manner, and he unfortunately burst into an uncontrollable fit of laughter. This rash laugh he bitterly repented. Capt. — was a disciple of the homoeopathic system. Making Jack stand upon the fore bridge, in full view of the entire ship's crew, the officer commanded his victim to laugh continuously for an hour and a half. This he was compelled to do, though the pitiful expression of his weatherbeaten, sunburnt visage denoted anything but a happy and contented frame of mind.
Whistling in forbidden parts of the ship has often been punished in a similar manner. The offender has been obliged to whistle his loudest, under the eagle eye of the commander, until poor Jack's lips have become so parched and cracked that he could not produce another note.

CUDDLE DOON.

The bairnies cuddle doon at nicht
Wi' muckle faught an' din;
"Oh, try and sleep, ye waukrife rogues,
Your father's comin' in."
They never heed a word I speak
I try to gie a frown;
But aye I hap them up an' cry,
"Oh, bairnies, cuddle doon!"

Wee Jamie wi' the curly heid,
He aye sleeps next the wa',
Bangs up an' cries, "I want a piece!"
The rascal starts them a't.
I rin an' fetch them pieces, drinks,
They stop awee the soun',
Then draw the blankets up an' cry,
"Noo, weanies, cuddle doon!"

But ere five minutes gang wee Rab
Cries out, frae 'neath the claes,
"Mither, mak' Tam gie ower at ance,
He's kittin' wi' his tae!"
The mischief's in that Tam for tricks,
He'd bother half the loon;
But aye I hap them up and cry,
"Oh, bairnies, cuddle doon!"

At length they hear their father's fit,
An' as he steeks the door
They turn their faces to the wa',
While Tam pretends to snore.
"Hae a' the weans been guid?" he asks
As he puts aff his shoon;
"The bairnies, John, are in their beds,
An' lang since cuddled doon."

An' just afore we bed oorsels,
We look at oor wee lambs.
Tam has his arm roun' wee Rab's neck,
An' Rab his arm roun' Tam's.
I lift wee Jamie up the bed,
And as I straik each croon
I whisper, till my heart fills up,
"Oh, bairnies, cuddle doon!"

The bairnies cuddle doon at nicht
Wi' mirth that's dear to me;
But soon the big war's cark an' care
Will quaten doon their glee.
Yet, come what will to ilka ane,
May He who rules a' aboon
Aye whisper, though their paws be bald,
"Oh, bairnies, cuddle doon!"

CHANCELLOR AT TWENTY-THREE.

Pitt was only 23 years when he accepted the post of Chancellor of the Exchequer under Lord Shelburne, having refused an office in the previous Government of less than Cabinet rank. Before he had reached his 24th year the Premiership was offered him by the King, with full authority to name his colleagues, an offer which he had wisdom and self-restraint enough to decline. But at 25 Pitt was Prime Minister and master of England, as no man had ever been before—surely an example of early fame that is quite unparalleled.

He figured out the distance
Of the stars up in the sky;
He figured out our planet's age,
And when this earth will die;

He figured out the railways
And such things with patient skill—
But he never saw the errors
In his monthly butcher's bill.

T AUTOMATIC RESTAURANT

MEALS SERVED BY MACHINERY IN GERMANY.

Put a Nickel in the Slot and Your Dinner Will Instantly Appear.

Berlin, the German capital, possesses more "Automats"—automatic machines—than any other city in the world, and they are all of some practical benefit and use. They have "automat" beer halls, where a nickel-in-the-slot brings you your stein of foaming beer; "automat" cabs, where a machine called a "taximeter" registers the fare to be paid and makes it almost impossible for the "cabby" to "knock down" on his passenger. There are "automat" theatres, where the nickel-in-the-slot starts a whole show of several acts and many scenes; "automat" restaurants; and "automat" bootblacks. These latter are peculiarly unique, and they are every-day necessities in Berlin.

The "automat" restaurant is not only a labor-saving device, but it is a headache-sparing institution, as it does away with the waiters, who make you do the waiting, and gives an instantaneous service. You are your own waiter; and consequently there are no fees, for you cannot conscientiously tip yourself, however self-gratulatory may be your mood. You select what you want, drop your nickel in the slot, and—

THERE YOU ARE!

Of course this Automat of the Dinner Table is an unintelligent mechanism of man's invention, ingeniously worked by electricity. Cabinets with glass fronts line the walls, and through these glass fronts are to be seen rows and rows of little elevators, with the slots and mechanism for working them. On one side of the restaurant is fitted an "automat" bar where, by dropping the indicated price into the proper slot, the wished-for drink comes to the waiting customer. Shelves all around, on the little elevators, bring up hot soups, hot roasts, cold meats, pies, sandwiches, tea, coffee—in fact whatever is on the menu, and that is changed daily. All the customer has to do is to decide what he wants, drop his coin in the little opening, and wait results. In less than a minute up comes his meal, raised by electricity from the kitchen in the basement; and it comes either steaming hot, or ice-cold, just as ordered, and clean, fresh and sweet, with no dirty-handed waiter, with black cuffs and greasy napkin, to take your appetite away while handing it to you. The beverages—milk, tea, coffee, syrups, and mineral waters—are served from tanks or kettles. The dropping of the coin into the proper slot opens the faucet only long enough for the right quantity to run into the cup or glass, which is conveniently placed to receive it.

THE "AUTOMAT" MACHINES

are divided into three classes—"hot-food" machines, "cold-food" machines, and "liquid" machines; and they all work nearly alike. In the hot-food machines you drop your coin and receive, in exchange a metal check. The coin falls to the kitchen where the chef sees it in a tube indicating a particular order. The dish is prepared by one of the under-cooks; and the chef, after glancing to see that it is all right and appetitich, puts it on an automatic dumb-waiter, which, by its own mechanism, goes up to the waiting customer. He sees his order inside one of the glass receptacles, drops in the check he holds, and the dish is lowered automatically to an opening below, where he lifts it out, and carries it to a table.

The cold dishes are released at once, when the coin is dropped in, just as you get a piece of tutti-frutti or a caramel or a cigarette from the penny-in-the-slot machine. The "drinks" machines work similarly; but they have a self-measuring

STARVING MILLIONAIRES

HISTORY OF THE MEANEST MEN IN THE WORLD.

Riches Possessed But Not Enjoyed Is Certainly Not a Normal Condition of Things.

"Riches possessed but not enjoyed" is certainly not a normal condition of things in a world whose gates are ever open to the golden key. Few of us, being rich, prefer to be poor; it is so terribly easy to be poor.

Recently an old man died in the County Hospital at Brighton, England, whose occupation, year in and year out, was to wander about the public thoroughfares picking up any discarded trifles which he could find there, from cigar and cigarette ends to stale crusts. Some said that he was seventy; others said that he was nearer eighty, and his bedraggled, unkempt figure was as well known upon the streets as the lamp-posts.

RICH IN ALL BUT FRIENDS.

He lived in a fairly large house in a street just off the Marine Parade. The blinds were always down. The windows were so coated with dirt that the passerby would hardly have been able to see through them had the blinds been up. Presently he fell ill, went to the hospital, and died as he had lived—without a friend or relation by his bedside at his last hours.

They talked a while of laying him to rest in a pauper's grave. But presently the hospital authorities began to search his tattered, dirty garments to see whether they could find a hint of living relatives. What they found instead was a savings' bank book, a pass-book on Barclay's Bank, and other documents, which showed that he was worth, at least, \$7,500!

A man hardly less penurious in his riches was Tynan, the Australian multi-millionaire—the meanest man in all Australia. With all his riches, he hardly ever gave away a penny, wandering about in clothes as shabby as those of the beggar who passed him by, living as if all he had in the world was the means of providing himself with the barest necessities. He never made a will, and passed away unfriended, unwept, unhonored, and unsung, leaving a vast crowd of distant relatives to divide the spoil of his long years as they would, or could.

Thousands of people pass No. 61, Pentonville Road, London—at one time 16, Winchester Place—without knowing that once lived there one of the most depraved and degraded men who ever laid up treasure on earth—Thomas Cooke. Cooke was the son of an itinerant fiddler of Windsor, began life as a porter, obtained employment in the Excise, and came to London with eight shillings in his pocket.

WORTH \$635,000, BEGGED INK!

Presently he ingratiated himself into the good opinion and confidence of a rich brewer, and went into the business; and when the brewer died, he persuaded the widow that the only chance she had of keeping the trade together was to marry himself. This she consented to do, and Cooke became a wealthy man.

His eccentricities, which were really cloaks for his meanness and his frauds, were regarded as a freak of Nature, and, as Cooke seemed worth cultivating, presents of geese, turkeys, horses, wines, and other things rained upon him. He begged his ink from offices. When he became ill he dressed himself in rags, and beseeched physicians to take pity on his poverty. When he died he left \$635,535, mainly to the Shore-ditch and Tottenham almshouses. When he was buried the mob threw cabbage-stalks at his coffin!

A parsimonious man of another and better sort was the one discovered by the collectors of the public subscription for the Bathurst Hospital.

FEDERAL LIFE ASSURANCE CO. OF CANADA.

The Twenty-fourth Annual Meeting of the Shareholders was held at the Head Office of the Company, at Hamilton, March 6th, Mr. David Dexter, President, in the chair, Mr. W. H. Davis, Acting Secretary, when the following Report was submitted:

DIRECTORS' REPORT.

Your Directors have the honor to present the Report and Financial Statement of the Company for the year which closed on the 31st December, 1905, duly vouched for by the Auditors.

The new business of the year consisted of two thousand four hundred and fifteen applications for insurance, aggregating \$3,532,579, of which two thousand three hundred and twenty-eight applications for \$3,329,537.08 were accepted.

As in previous years, the income of the Company shows a gratifying increase, and the assets of the Company have been increased by \$275,140.54 and have now reached \$2,423,913.93, exclusive of guarantee capital.

The security for Policy-holders, including guarantee capital, amounted at the close of the year to \$3,293,913.93, and the liabilities for reserves and all outstanding claims, \$2,213,698.75, showing a surplus of \$1,080,215.18. Exclusive of uncalled guarantee capital, the surplus to Policy-holders was \$210,215.28.

Policies on seventy-eight lives became claims through death, to the amount of \$156,886.00, of which \$8,911 was re-insured in other companies. Including Cash Dividends and Dividends applied to the reduction of premiums, with annuities, the total payment to Policy-holders amounted to \$236,425.35.

Careful attention has been given to the investment of the Company's funds in first-class bonds, mortgage securities and loans on the Company's policies, amply secured by reserves. Our investments have yielded a very satisfactory rate of interest.

Expenses have been confined to a reasonable limit, consistent with due efforts for new business.

The results of the year indicate a most gratifying progress. Compared with the preceding year, the figures submitted by the Directors for your approval show an advance of nearly thirteen per cent. in assets.

The assurances carried by the Company now amount to \$17,294,136.11, upon which the Company holds reserves to the full amount required by law, and, in addition thereto, a considerable surplus.

The field officers and agents of the Company are intelligent and loyal, and are entitled to much credit for their able representation of the Company's interests. The members of the office staff have also proved faithful to the Company's service.

Your Directors are pleased to be able to state that the business of the Company for the past two months of the current year has been better than in the corresponding months of last year, and that the outlook for the future is most encouraging.

DAVID DEXTER,
President and Managing Director.

Total Insurance in Force.....	\$17,294,136.11

Mr. David Dexter, President and Managing Director, in moving the adoption of the report, said:—I beg leave to submit for your consideration and adoption the report of the Company for the year ending 31st December, 1905. In doing so I am pleased to say that it is the most satisfactory your Directors have had the privilege of placing before you. As compared with the preceding year it shows a gain of seven per cent. in premium income, thirteen per cent. in interest earned, twelve per cent. in total income, ten per cent. (\$319,038) in amount of new assurances placed, 7 per cent in amount of assurances in force, 12 per cent. in assets, 14 per cent. in reserves held to provide for the payment of Policy contracts now in force, and 43 per cent. in the surplus over all liabilities.

The profits paid to policy-holders also show an increase of 16 per cent. and the payments made to policy-holders 18 per cent. in excess of the previous year.

The reserves now held to meet Assurance obligations as they mature are in excess of the present requirements of the Insurance Act, additions being made from year to year to meet the higher standard of reserves on assurances written prior to the year 1900, which the Act requires that we shall hold at the expiration of a term of years. All policies of assurance written since the year 1899 and many previous thereto are secured by reserves on 3½ per cent. and 3 per cent. basis.

The profits to the policy-holders have been maintained in so far as it was possible to do so in the face of the incroads thereon from various sources, which may be summarized as follows: The increased cost of new business owing to the methods adopted by competitors, particularly some of the American companies; the fees and taxes charged and levied by Provincial Governments; the greater privileges and advantages granted to the policy-holder under the modern policy contract.

I would here remark in explanation of the last item that these additional privileges and benefits are increased privileges of travel, residence, occupation and continuance of policy, the same becoming non-forfeitable after three

when the coin is dropped in, just as you get a piece of tutti-frutti or a caramel or a cigarette from the penny-in-the-slot machine. The "drinks" machines work similarly; but they have a self-measuring contrivance that is certainly complicated. In serving the liquid, the glass or cup is filled with mathematical precision; and the moment the holding vessels are emptied, an electric bell gives such notice in the cellar-room below, and the tanks are refilled. The machines all work automatically, and there are, and can be, no mistakes. The only employees are the manager, the girl who makes change and hands out the napkins, and one or two boys who remove the empty plates and wipe off the tables.

"Put a nickel in the slot and get your boot polished"—this is the invitation of the Berlin

MECHANICAL BOOT-BLACK.

There is a platform whereon is a sort of cylinder containing brushes which revolve in several different directions, and among which you insert your foot. Upon the platform is a metal foot-rest which works up and down in a slot under a central opening in the cylinder. Upon mounting the platform, you drop your nickel in the slot, and move the handle, just as in other machines; this starts the wheels in motion. You place your foot upon the rest, and move it in among the brushes, two of which smear the boot with polish. Then you press your foot down, and the rest sinks below the level of the polish-laden brushes, and into a nest of swiftly-revolving brushes, which put a "shine" upon the boot in almost less time than it takes to tell you about it.

At the sides of the machine are hand-rails by which to hold on while you balance yourself upon one foot and submit the other to the tender mercies of the brushes. These machines are made single, for polishing ordinary boots; or triple, with stands side by side, and labels designating one for patent leather, another for ordinary black leather, and the third for tan shoes. Electricity operates these machines, the dropping of the nickel and the moving of the handle serving to close a switch which starts a small motor.

Some time ago a machine for polishing shoes by electricity made its appearance in New York and was expected to do wonders; but though it frightened the bootblacks at first, they soon recovered, and now regard the electrical shiner as a bogey to laugh at, not to fear.

AN OLD-TIME ILLUMINATION.

At the Coronation of George II. In the Year 1727.

In these days of electric lights, with all their capabilities for brilliant illumination, it is amusing to read what the subjects of George II. considered a dazzling effect. A Frenchman visiting in London at the time of the coronation of that monarch in 1727, writes enthusiastically in praise of the lighting of the city, as well as of a banquet display.

"Most of the streets," writes Monsieur Saussure, "are wonderfully well lighted; in front of each house hangs a lantern, or large globe of glass, inside of which is placed a lamp, which burns all night. Large houses have two of these, suspended outside the doors by iron supports. Some even have four."

How one eye might have dazzled the good people of that day!

"When the coronation procession entered Westminster Hall," the writer continues, "the light of day was beginning to fade. Forty chandeliers, in shape like a crown, hung from the ceiling, each having thirty-six wax candles."

"On the king's appearance all suddenly lighted, and every one in the room was filled with astonishment at the wonderful and unexpected illumination. Little cords of cotton wool, imperceptible to the eye, saturated with sulphur of saltpetre, spirits of wine and other ingredients, had been prepared and arranged so as to carry the flame rapidly from one candle to another. The arrangement had been so skilfully prepared that scarcely a candle failed to take fire."

he was buried the mod throw cabbage-stalks at his coffin!

A parsimonious man of another and better sort was the one discovered by the collectors of the public subscription for the Bethlem Hospital. They arrived at the door of a mean house, and when it was opened heard the man rating his servant-girl for throwing away a match without having used both ends. From such a man the collectors expected nothing, and would not have been surprised if they had got it. But he asked them inside, produced a bag of gold, counted out from it

FOUR HUNDRED GUINEAS.

and shovelled the money towards them with his open hands. Naturally, they could not disguise their amazement. "Gentlemen," said he, "I keep house and save and spend money in my own way. The one furnishes me with the means of doing the other."

Daniel Dancer, born at Weald, near Harrow, was another man who preferred his poverty to his riches. He was mean. His father was mean. His grandfather was meaner than either. Dancer was born with a silver spoon in his mouth. He lived in a splendid house on Harrow Weald Common, amid eighty acres of ground. Too greedy to keep it in order, he allowed it to go to rack and ruin, till the gates fell off their hinges. Yet his property at this time brought him \$15,000 a year.

He slept on a sack for years, till Lady Tempest, pitying his crazy parsimony, presented him with a bed. This won the old man's heart, and one day when he was dying, he sent for her, made a will in her favor, put the document into her hands, and gave up the ghost at seventy-eight, deeply lamented by none who knew him.

But even Dancer's rich penury is as nothing compared with that of John Elwes, who was born into \$250,000, and was mean enough to be worth only two cents. His mother taught him all he knew, for, though her husband left her \$500,000, she practically starved herself to death.

MISERLY TO THE LAST.

He managed his own accounts, and was dragged into every wild-cat scheme going, till the sum total of his losses was \$750,000. But as he had had two fortunes left him since he was born to the first one, the loss did not hurt him.

He became member for Berkshire, but stood the racket of contest only on condition that he was returned free, gratis, and for nothing. He began to put up property all over Marylebone. When one of his houses was empty, he used to go and live in it, to save the expense of a caretaker. When he had advanced in years he went to live with his son, taking with him five shillings, which he said was all he had in the world; and he hid the money, for fear anybody should steal it. He died, leaving estate valued at \$4,000,000.—London Answers.

TOWN OF MARBLE.

The town of Carrara, near the famous quarries of that name is literally built of the white statuary marble. The paving stones are composed of this material and where these are not used the roadway is made up and covered with marble chips. The population of the town is about 12,000, and its adult male inhabitants are practically all employed in connection with the adjoining quarries, which furnish to sculptors the finest statuary stone in the world.

YOUTHFUL KNOWLEDGE.

"Don't you know where little boys who smoke go to?"
"Yus. Terbackernists."

the greater privileges and advantages granted to the policy-holder under the modern policy contract.

I would here remark in explanation of the last item that these additional privileges and benefits are increased privileges of travel, residence, occupation and continuance of policy, the same becoming non-forfeitable after three years, until the reserve thereon is exhausted in payment of premiums. It will be readily understood that some of the causes which I have mentioned have tended to increase the cost of assurance, and others to impair the sources from which profits formerly accrued.

The shareholders who provided the paid-up and additional guarantee capital for security to policy-holders when such a provision was necessary have in no way encroached upon the profits to policy-holders, but have much less in return for their cash investment than the average rate of interest earned by the Company on investments.

Your Directors have always endeavored to the best of their ability to select safe as well as profitable investments for the funds entrusted to their care and the securities held will bear the most rigid inspection.

Your Directors decided to erect a first-class office building on the very desirable site owned by the Company and situated on the north-west corner of James and Main Streets, to meet the Company's requirements. Competitive plans were obtained for a steel frame fireproof building of eight storeys. Tenders were received and a contract let for the construction of such a building, to be completed in August next. We are confident that the building will prove to be a satisfactory investment, affording a reasonable return in office rentals as well as desirable offices for the headquarters of the Company.

Lieut.-Col. Kerns seconded the motion, which was unanimously carried. The retiring Directors were re-elected, and at a subsequent meeting of the Directors Mr. David Dexter was re-elected President and Managing Director. Lieut.-Col. Kerns and Rev. Dr. Potts were re-elected Vice-Presidents.

Grand Prize Competition

A FOUR-YEAR UNIVERSITY COURSE, A TRIP AROUND THE WORLD, OR \$1,000 IN CASH.

In addition to these prizes there are many others. Every competitor can win. A cash commission will be given on every subscription taken, every one being paid for his own work.

THE BUSY MAN'S MAGAZINE is unlike any other, its contents are a careful selection from the best that appears in the leading publications of the world. It is published by the proprietors of The Canadian Grocer, Hardware and Metal, Canadian Machinery, The Dry Goods Review and other successful papers—and who are Canada's leading publishers.

Subscriptions are not hard to secure—a bank clerk in Ontario took 25 in one week by writing to his friends.

"THE BUSY MAN'S MAGAZINE is the best I have ever had the pleasure of reading." S. W. WYNN, Editor, Yorkton, Saskatchewan.

Send postal for particulars of competition to our nearest office. DO IT NOW. It may be a glorious change in your career.

The Busy Man's Magazine

HOW HE WON THE CROSS.

Lord Robert's Account of His Narrow-est Escape.

An article of unusual interest recently appeared in the Pearson's Magazine, dealing with the most thrilling moments in the lives of famous people. In most cases the descriptions are by the heroes of the adventures themselves—a fact which considerably adds to their interest. Here is Lord Robert's account of his narrowest escape, which took place during the Indian Mutiny:—"I rode (he relates) a little to the left, with Younghusband's squadron. As we galloped along, he drew my attention with great pride to the admirable manner in which his men kept their dressing. On the line thundered, overtaking groups of the enemy, who every now and then turned, and fired into us before we could be cut down.

"The chase continued for nearly five miles, until daylight began to fail, and we appeared to have got to the end of the fugitives. Then the order was given to wheel to the right, and from up on the road. Before, however, this movement could be carried out, we overtook a batch of mutineers, who faced about and fired into the squadron at close quarters. I saw Younghusband fall, but I could not go to his assistance, as at that moment one of his troopers was in dire peril from a Sepoy, who was attacking him with his fixed bayonet, and had I not helped the man, and disposed of his opponent, he must have been killed.

"The next moment I descried in the distance two Sepoys making off with the standard, which I determined must be captured, so I rode after the rebels and overtook them, and while wrenching the staff out of the hands of one of them whom I cut down, the other put his musket close to my body and fired. Fortunately for me it missed fire, and I carried off the standard."

It was for these two acts that Earl Roberts was awarded the Victoria Cross.

Some people may not believe it, but it is a fact, nevertheless, that there are no millionaire poets.

AMBUSHED THE RUSSIANS.

Story of the Cunning of the Baltic Revolutionists.

Of recent happenings in Russia's Baltic provinces a correspondent writes:—"Here is an instance of the Letts' daring and resource. One day a revolutionist dressed in the uniform of a policeman rode after sunset into a village where the dragoons were stationed, bringing news that at a village ten miles off the peasants had looted the police station and set the prisoners free and were preparing to attack a neighboring country seat. The officer at once gave orders to start, the disguised revolutionist offering to be their guide, but, instead of leading them to the village, he led them into a marsh, and suddenly disappeared from the eyes of the dragoons. Then, a few minutes later a murderous fire was opened on them from all sides. Hither and thither they rode, making frantic efforts to get at the unseen enemy, or find their way out of the marsh, and all the time one saddle after another was being emptied. A few only escaped to tell the tale of treachery."

THE CATCH OF THE SEASON.

Working Boots.

Men come here, if you want good, solid, working boots.

We have some splendid lines to show you.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market. When buying Flour ask for Dafeo's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT Flour always on hand. **FEED GRINDING** a specialty, with the best feed mills known to the trade. A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE, 16th January, 1906.

Wall Paper.

We have our stock all in now, and can say, we have never had so large, so varied, so artistic, so good a stock of Wall Paper, as we have this spring.

We have New papers from 5c. to 75c. per roll.

Don't be led to believe ANYONE can compete with us.

We have the stock on hand. We take back any unused paper.

A Gift to Ladies.

To the first married lady, or young lady over eighteen years of age, who will fill in the words of which the capital letters running down the column on this page are the beginning, and mail or hand same to us, we will give a two dollar bottle of her favorite perfume.

Note.—Answers received before Tuesday, March 13th will not be considered and in the last issue of the Express for this month the correct reading will appear. Watch this issue and see if you are right. The Medical Hall.—Fred L. Hooper.

The Salvation Army Emigration.

Blank application forms for farmers who wish to apply to The Salvation Army for farm help may be had at this office.

Camden East.

Rev. McTear, Rector of Bath will conduct Divine service and preach as follows, Sunday, March 25th, (D. V.)—Newburgh—St. John's church at 10.30 a. m., Holy Communion and Sermon. Camden East, St. Luke's church at 3 p. m., and Yarker—St. Anthony's church at 7 p. m. Collections at all the churches for the Divinity Students fund.

Robbery at Newburgh.

A daring robbery took place at Newburgh on Monday night when Ryan's general store and postoffice was entered. The burglars knocked the combination off the safe and used nitro-glycerine to blow it open. The office was not seriously damaged and the burglars secured only about \$36.00. They left town on the B. Q. R. section men's handcar which was found at Napanee Tuesday morning.

Caught in The Storm.

The degree teams of Argyll Lodge No. 212 journeyed to Odessa on Wednesday evening to confer degrees on members of Odessa Lodge. A very pleasant and profitable time was spent at Odessa and at 2 a. m. the teams started for home. On the way the heavy roads played out the horses and by borrowing a horse the party arrived within a couple of miles of Napanee, and from there they had to walk home, arriving in town at 8 a. m.]

Lennox Boy Honored.

The Brooklyn, N. Y. Eagle, contains a lengthy account of a dinner given in honor of Dr. David F. Lucas, at the Montauk club in that city. Dr. Lucas has completed his twenty-fifth year in connection with the Brooklyn Central dispensary, during all of which time he was on the medical staff of the dispensary. There was a large attendance of representative medical men, and the spread was an elaborate one. Dr. Lucas is an old Camden boy, a graduate of Napanee high school, and brother of D. W. Lucas, Napanee, C. N. Lucas Selby, and J. B. Lucas, Moscow.

Won the Suit.

The suit brought by Mr. J. S. Hulett against the Merchants Bank to have the his pendens placed against his property removed, was heard in Toronto

Canadians are Proud

and rightly so, to have in their own Ontario such a large and up-to-date firm as the Dale Estate Florists, of Brampton. Their greenhouses which cover 14 acres and contain 600,000 sq. ft. of glass are the largest on the American continent. The Medical Hall has the agency for this enterprising estate for Napanee, and will be pleased to supply anything in the line of cut flowers or floral designs, such as wreaths, pillows, crosses etc. on the shortest notice. Leave us your order for Easter Lilies. —FRED L. HOOPER.

Hall—Perry.

At her mother's residence, John street Napanee, on Wednesday afternoon, Miss Madeline Augusta Perry, eldest daughter of the late J. Rud Perry, and one of Napanee's most popular young ladies, was united in marriage to Mr. Edwin Barr Hall, Mining engineer, of Princeton, B.C. The ceremony was performed by Rev. Emsley in the presence of a few relatives and intimate friends of the contracting parties. The bridesmaid was Miss Pearl Perry, sister of the bride, while the groom was assisted by Mr. Chas. Templeton. The flower girl was little Miss Violet Perry.

The bride was given away by her uncle, Mr. Wm. Templeton. The bride's costume was of Dresden silk, with chiffon and lace trimmings with cream leghorn hat trimmed with roses and ribbon and carried a shower bouquet of white sweet peas. Miss Pearl Perry was gowned in a Dresden silk with lace and pink velvet trimmings and leghorn hat and carried a bouquet of pink carnations.

The bride's going away dress was a navy blue tailor-made costume, trimmed with black braid and persian velvet with blue sailor hat to match.

The happy couple left on the afternoon train for the west, stopping off at Toronto, Winnipeg, Calgary, and other points. The presents received by the bride were exceptionally numerous and beautiful.

Lennox And Addington Old Boy's Association.

On the afternoon of Tuesday, March 20th, a very enthusiastic meeting was held in Council Chamber, Napanee, for the purpose of forming a Lennox and Addington Old Boys' Association. The unanimous decision was that an association be formed, and a working committee was appointed to promote the interests of the association until the next regular general meeting which will be held in the Council Chamber, Thursday evening, March 29th at 7.30 p. m. At this second meeting it is desirous that every member of the committees, appointed by the various bodies throughout the counties make a special effort to be present, and any others who take a special interest in the matter will be welcomed.

Will every person, who reads this notice or who hears of it, make a list of all the persons, they know of, who formerly lived in these counties and who do not at present live here, give the present address of each and forward the list, either, to the Public School teacher of your section or to the Secretary of the association, F.C. Anderson Napanee, Ont.

The matter will be an advantage, not only to those who may wish to visit Napanee during the summer, but to all those who may wish to visit any part of the counties, as reduced rates may be obtained by all. The hearty co-operation of every resident of the Counties is depended upon.

Good Paint.

Ramsay's Paints (Unicorn Brand) will not crack, peel or scale, like other paints some of which are offered at lower prices and some higher. We recommend "Jamieson's Floor Enamel" for floor because it's much superior to paint, this stands scrubbing.
Sole agency for Napanee.
WALLACE'S RED CROSS DRUG STORE!

PERSONALS

Miss Vera Shorey left on Monday for Watertown, where she will enter an hospital as a nurse-in-training.

Mr. Dennis Spratt accompanied by his father and mother, and two other members of the family left this week for Kamloops, B. C.

Mrs. Allan Gerow, Orillia, is visiting friends in town.

Mr. and Mrs. Ira B. Hudgins, Selby, were guests of Mr. and Mrs. J. S. Hulett on Monday.

Miss Freda Holmes left last week to visit her sister, Mrs. Fowler, Scranton, P. A.

Mrs. A. McNeill entertained a number of friends on St. Patrick's Day.

Mrs. F. L. Smith is confined to the house with an attack of pleuro-pneumonia.

Mrs. F. Girdwood was here this week removing their household effects to Renfrew, where Mr. Girdwood has a good position. Her mother, Mrs. Dr. Sprague, accompanied her.

Mr. John Hamley McDonald, was a caller at our office on Wednesday.

Mr. P. E. R. Miller, Switzerville, was a caller at our office on Tuesday.

Messrs. J. C. and Arthur Hardy left last week for Cornwall, Ont. where they expect to remain several weeks.

Mr. Albert Root was in Kingston on Monday.

Mr. Geo. Burch left last week for the South to assume his position as advance agent with Griswold's Co.

Mrs. J. Goodbury, Yarker, spent last week with friends in Deseronto.

Mr. D. McClew, of The Deseronto Tribune, left last week to take charge of the Alexandria Glengarian at Alexandria, Glengarry County.

Mr. E. Parrott, of Bond & Co., Odessa was a caller at our office on Wednesday.

Mr. and Mrs. J. Dryden, Deseronto, were in town on Thursday.

Mr. Robert Mill has purchased Mr. D. Prayn's house.

LAPUMS WEST.

The heaviest snowfall of the season arrived here on Monday and Tuesday, plenty for good sleighing.

Mr. and Miss Shannon of Glenburnie were visiting at Jas. Huff's and Mr. Love's on Monday.

Mrs. W. Lapum and son were visiting her sister, Mrs. Henzy, in Kingston on Saturday.

Mr. Wilbur Love had the misfortune to break his elbow recently while unloading a load of wood, he is doing nicely under the care of Dr. Oldham.

Walter Bush was visiting at his brother's near Camden East, last week.

Carbo Magnetic Razors are giving entire satisfaction, take one on trial free for a month.

BOYLE & SON.

STRATHCONA.

While Mr. P. Boyer was assisting in putting some new machinery in the paper Mill, one of the large rollers gave way and falling to the floor with a crash. Mr. Boyer who was standing a little to one side went to jump out of the way just as he jumped the roller struck him on the hip and shoulder. Mr. Boyer had a narrow escape from death. The roller weighing over one ton.

An occurrence happened one day last week by which Mr. John Milne might have lost his life. He was helping in tearing down the Cement Works and in some way the floor gave way and fell to a distance of twenty five feet. He had presence of mind for to grab a rod to which the machinery was attached and in this way he managed to free him self of being thrown to the ground. We hope that it will be a lesson to the other workers for to be more careful where they step while being engaged at such dangerous work.

Wm. Wilson is all moved into his new home at Strathcona.

Mrs. McCoy is spending the week visiting Mrs. M. Lott of Strathcona.

Mr. Wm. Cooper is busy getting up his summer supply of wood.

Mrs. Murphy is no better.

Mr. J. Lasher is visiting his brother Mr. Wm. Lasher of this place.

The farmers are taking the good of the sleighing and the merry sleigh bells can be heard once more.

Coughs, colds, hoarseness, and other throat ailments are quickly relieved by Cresolene tablets, ten cents per box. All druggists

ENTERPRISE.

The services in the Methodist Church Sunday evening were the crowning success of a series of evangelistic meeting held during the past three weeks under the direction of the Rev. Mr. Scott, assisted by the pastor, Rev. Mr. Allen. Nearly thirty penitents went forward to the penitent bench and professed conversion. The spirit of evangelism was also manifest in a marked degree in the Sunday School over fifty boys and girls giving their hearts to Jesus. Mr. Scott goes on Tuesday to Centreville to start meetings there.

Mrs. Mellow's little daughter is recovering nicely from quite a severe attack of scarlet fever.

Miss Hattie Wagar who spent a couple of weeks in Kingston General Hospital undergoing an operation on her foot, returned to her home on Monday. She is able to around again.

Mr. Sid Huffman still continues very poorly.

Mr. Melbourne Low left on Friday for Edmonton.

Mr. Cephas Bell and Henry Scofield left Monday for Assiniboia.

Miss Sid Wagar spent Thursday, and Miss Minnie Hamilton Saturday, in Napanee.

Mrs. William Clancy and Mrs. Cornelius Clancy called on Mrs. Sid Wagar on Monday.

Mr. Pat Murphy and Mr. Edmund Clancy were in Napanee Monday.

Mr. Henry Miligan has bought that fine brick house belonging to Mr. A. Davey. We expect they will be here to take possession soon.

A. S. KIMMERLY has a full stock Herbageum Oil Cake, Ground Flax Seed, International Stock Food and Bibby's Cream Equivalent for calves.

Why Tea Quality Varies

YOU know how the quality of strawberries from the same patch will sometimes vary from one day to another.

One day sweet, compact, well ripened, well colored, richly flavored—next day it rains, is cloudy,—following picking is soggy, sour, green, coarsely-flavored, poor.

Tea, also, on account of its volatility of flavor, after picking and during the curing process is very susceptible to weather changes. A few hours of sunshine or bad weather after picking may make the difference between good and poor tea.

So that while one picking may be first class, the next from the same garden may be very poor.

I select only the pickings which come up to the Red Rose standards of richness and strength in Indian, and delicacy and fragrance in Ceylon teas, and thus that "rich, fruity flavor" of Red Rose Tea is produced and maintained.

Red Rose Tea

is good Tea

J. B. Sanderson purchased three fine wolf skins at Flint last week.

Ira Davison shot a large lynx, weighing twenty-five pounds, in Guy Simons swamp.

Alfred Babcock has moved from Sharpton into the house vacated last fall, by his son.

A number of Englishmen, in some cases with their families, have settled in our neighborhood this spring.

Miss McCammon, Kingston, is visiting her niece, Mrs. R. K. Owens.

Mrs. Bernard Mills has received the sad news of the death of her only brother, Thomas Tisdale, in Fredericton, N. B. Deceased spent a year ago last summer with Mrs. Mills. Much sympathy is felt for her in her bereavement.

The special meetings, which have been conducted with much success for five weeks in the Methodist church, closed last Tuesday.

The hour for service in the Presbyterian church has been changed to 7.30 for the spring and summer months.

CASTORIA.

Bears the Signature of *Chas. H. Fletcher* The Kind You Have Always Bought

A. S. KIMMERLY has a full stock Herbageum Oil Cake, Ground Flax Seed, International Stock Food and Bibby's Cream Equivalent for calves, Clover and Timothy Seed, bought and sold. Full stock all kinds field and garden seeds, bran, shorts, cracked corn, corn meal, rock salt. Our prices on flour below all others.

DENBIGH.

Mr. Paul Stein has returned from a business trip to Napanee, Tamworth, and Tweed and made use of the occasion to visit old friends at Cloyne, Northbrook, Roblin and Forest Mills on his way.

Mrs. G. Adam who went to Philadelphia some weeks ago to attend the funeral of a very intimate friend, was taken sick there herself and could not return home when intended. She has just arrived home but is very weak yet from the effects of her illness and the fatigue of the journey.

Miss Ida John, of Napanee who, was called home during the last illness of her late brother Edward and remained a few weeks with her parents, has returned to Town to resume her former position.

Mr. Geo. Fox has left Denbigh to move with his family to the Northwest. Although he offered his 400 acres at a very low price he failed to make a sale.

Mr. Willet Haines who sold his 190 acre farm to Mr. Geo. W. Penneck has finished moving his effect from the estate and prefers living on a rented farm near town to being a Land owner in the backwoods.

The Northwest moving fever seems to spread, as quite a number of our best citizens mostly young men are effected by it and are making preparations to remove permanently there in the near future.

Most of our young men who were away working in distant lumber camps during the winter have just returned home but hardly any of them intend to remain very long as Denbigh is too quiet and unprogressive for them.

Miss Louise Fritsch late of Kingston, has also returned home and intends to remain during the summer to assist her mother and brother.

Women Angrily Aroused ALL OVER THE DOMINION.

Information from various Provinces of Canada points to the fact that many women have been deceived and unscrupulous manufacturers to imitate the popular DIAMOND DYES.

Our Canadian women, thoroughly aroused, after loss of time, money and valuable materials through the use of muddy, blotchy and weak dyes have directly laid the blame for their losses on the retail merchants who sold them the deceptive dyes.

This action of indignant women has caused many of our retail and wholesale dealers to pack up and return to the manufacturers responsible, their worthless and dangerous dyes.

MORAL:—When ladies decide to do home dyeing work, it pays to use the celebrated and popular DIAMOND DYES, which have been the home friends of the ladies for over 25 years. When buying, see that each package handed to you bears the words DIAMOND PACKAGE DYES. Users of DIAMOND DYES soon become experts in the fascinating work of home coloring, and find that a ten cent package will renew the life of any faded and dingy suit, dress, skirt, blouse, jacket, cape or husband's or son's coat, vest or trousers. Allow no dealer to offer you the something he calls "JUST AS GOOD." No other dyes equal the DIAMOND DYES.

Send your name and address to Wells & Richardson Co., Limited, Montreal, P.Q., and you will receive free of cost new Dye Book, Card of Dyed Cloth Samples and Booklet in verse, entitled "The Longjohn's Trip to the Klondike."

COLLARS ! COLLARS ! COLLARS !

for Saturday at 10 a. m.

NEWS IN GENERAL.

A large lynx was shot near Fuller, in Hastings county.

Susan Diamond, an old woman is charged with poisoning her daughter-in-law.

The sale of The St. Thomas Journal by Mr. A. S. Smith to a local company is reported.

The money and diamonds stolen by Banwell have been turned over by the police to the Crown Bank officials.

Adam Lloyd is charged with killing his wife, and afterwards setting fire to her clothes to try to hide the crime.

The first division in the Legislature resulted in a Government majority of 38. There were a number of pairs.

Walter Baxter, a young man of Downie township, committed suicide by hanging himself in his father's barn.

The local option clauses of the new license law were denounced by the convention called by the Dominion Alliance.

Three murder cases are on the docket for the assizes, which opened in Belleville, on Tuesday, before Justice Falconbridge.

Mr. Duncan C. Fraser, Justice of the Supreme Court of Nova Scotia, has been appointed Lieutenant-Governor of that Province.

The \$10,000 libel action of Robert Coyle, sen., against The Globe, tried at Cobourg resulted in a verdict for defendant, with costs.

George Barington, a twelve-year-old Ottawa boy, was shot and seriously wounded by a companion while the two were hunting in the woods.

The third case is that of old Ferdinand Kleinbeil, who beat his wife to death on March 5th. Almost 200 jurymen and witnesses are subpoenaed.

Charles Moran, arrested for trying to dynamite the Bliss building in New York, has confessed, implicating walking delegates of the interested unions.

President John Mitchell presented the miner's wage ultimatum to the coal operators yesterday, and the uncertainty as to the course of action is nearly over.

Geo. W. Perkins, former Vice-President of the New York Life Insurance Co., was arrested on the charge of grand larceny. It will be made a test case.

The government inspector, from Ottawa, last Friday, shot three horses belonging to Malcolm Townsend, Moscow, which were affected with glanders.

The Grand Jury at Belleville brought in a true bill for murder against Mrs. Diamond. The Kleinbeil case was postponed to next Assizes at the request of the defence.

Chatham colored citizens have petitioned the License Commissioners for a license for a colored men's hotel. They say they can get liquor at the existing houses, but no accommodation.

Fishery Inspector James O. Weldon seized twenty cases containing 684 pounds of pickerel at the Grand Trunk Depot at London. All the fish were under the fifteen inches required by the act.

The Government have signed a five-

20 Dozen Only EMBROIDERED LINEN WASH COLLARS, very new style, and very appropriate for summer wear. Three distinct patterns, all washable, and extra special for Saturday

7 Cents Each.

DRESS FABRICS FOR SPRING AND SUMMER.

For exclusive designs, the newest patterns, and the newest colorings in the Famous Priestly Fabrics. Our enormous stock is now being shown to the best advantage.

THE WASH GOODS DEPARTMENT.

This week we call your attention to the famous Shamrock Brand Dress Linens, having control of this particular make, which is manufactured in (Belfast, Ireland,) and sold with a guarantee. Our Dress Linens are being shown in various grades and weaves, and are most suitable for summer dresses. Ask to see our complete stock of Table Linen and Napkins, Towels, etc., in this reliable brand, (the Shamrock Brand.)

THE SMALLWEAR DEPARTMENT.

The department of novelties, with a section specially equipped such as this, we doubt not; in saying that it is the most up-to-date in Central Ontario. With our buying facilities, and your interests considered, with sole control in Napanee of each and every novelty bought, we are in a position to supply you with only the latest and newest in Ladies' Gloves, Belts, Collars, Etc., Etc.

..... CARPETS

In the ground floor Department with the best and brightest light the new Carpets are gathered for your inspection. Never was such art displayed in these new designs, and never were the colorings so artistically blended before. Exclusive patterns every one of them and above everything else dependable. Carpets cost a heap of money; too much for you to afford to buy an inferior grade, even at a few cents a yard less in price. The best real values and the most reliable Carpets are the kind we offer. If you pay less than our FAIR prices there's something wrong with the Carpets.

You shouldn't do any Carpet buying without first seeing the Extensive and Handsome Display we have here.

under the fifteen inches required by the act.

The Government have signed a five-year contract with the Allan Steamship Company for the Atlantic mail service, which has been held in abeyance for some time.

Edwin St. George Banwell, the defaulting Crown Bank teller, was sentenced to four years in penitentiary. His wife pleaded guilty to receiving stolen property, and was allowed to go on suspended sentence.

Hamilton iron founders asked the moulders to submit to a reduction in their pay, owing to the founders suffering from American competition in the Northwest. Instead of doing so, the moulders decided to ask for a ten per cent. increase.

Alexander Patterson, who was found guilty of assault with intent to do grievous bodily harm to his wife, Frances Patterson, was also sentenced. Judge Deroche said the law should provide the lash for men of that sort. He sentenced him to six months in the Central Prison.

Belleville, Ont., March 26—Robert Mitchell, who pleaded guilty to stealing \$150 worth of valuable articles, from the summer residence of Charles Merryday, a retired English gentleman, now with his family in England came up for sentence to-day before Senior Judge Deroche. He was sentenced to two years in Kingston penitentiary. He took his sentence without a flinch.

In Parliament on Tuesday Hon. C. S. Hyman announced a Federal policy for water powers, which will prevent the export of energy developed at Niagara to an extent to starve Canadian industries. The Premier, discussing to make easy the suspension of coasting regulations to meet such cases as that of Pelee Island, disapproved of that method, and thought a better one could be found. Early in the afternoon the House had some amusement, in a speech of Mr. Foster on the Yukon runmaker.

In parliament on Wednesday Hon. H. R. Emmerson introduced a bill, the feature of which is the placing of telephone rates under control of the Railway Commission. The Minister of Justice announced the Government's intention of making this control as effective as that now exercised over railway and passenger rates. The evening was spent on Mr. W. F. Maclean's bill to put express companies under the jurisdiction of the Railway Commission and to make the railway passenger rate two cents per mile, and occasion was taken by several Conservatives to express very frank criticism of their fellow-member.

New Century, Sunlight and Handy Washers, sold on approval.

OBITUARY.

ELECTA PENDELL.

Relict of the late Abram Pendell passed away at Watertown N.Y., on Sunday 25th March, aged sixty three years and nine months. Deceased usually made her home in Napanee with her son, Mr. Josh Pendell, and at the time of her death was visiting her daughter in Watertown. The remains were brought to Napanee and the funeral took place from the residence of Mr. John Pendell, on Wednesday afternoon.

CHRISTINA SINCLAIR.

Relict of the late John Gunn and a pioneer resident of the Township of Richmond passed away on Thursday last at the family residence on the Deseronto Road, aged eighty-five years and four months. Deceased leaves a large family of grown up sons and daughters, some in Winnipeg and other distant parts. The funeral took place on Tuesday, with services at the house thence to the Western Cemetery vault.

FRED HOLMES.

W. F. H. Holmes, eldest son of Capt. Holmes, died at St. Luke's Hospital, New York City, on Saturday last, of Bright's disease aged forty-two years. Deceased was well known by a large number of Napanee citizens, though he had been a resident of New York for a number of years. He had been ill for some weeks and at one time hopes were entertained that he would recover, but a few days before his death a change for the worse occurred which carried him off. The remains were brought to Napanee and the funeral took place to the Eastern Cemetery vault.

DR. R. T. WALKER, K. C., KINGSTON.

Dr. Richard T. Walker, K. C., died at 2 o'clock last Friday morning, after a long illness of pernicious anemia. He was at his office two weeks ago, but since that had been confined to bed. The deceased was one of Kingston's oldest lawyers, practising here since 1865. He is survived by his wife daughter of the late Dr. J. A. Henderson, Q. C., Local Master in Chancery here; three sons, Hugh, in Montreal; Knox and George, in Vancouver, B.C. and one daughter, Mrs. Henry Joseph, Montreal. His brother, Joseph B., was his law partner. Another brother is Chief Justice Walker, of the Supreme Court, British Columbia. The funeral took place on Monday.

JAMES PERRY.

One of the pioneers of Napanee and a most respected resident passed quietly away at his home, on Bridge street on Sunday, aged 74 years 4 months. Deceased had been in declining health for some time but was not considered seriously ill. His son Mr. George Perry was in his room on Saturday evening and his father did not appear particularly ill, but hearing a noise an hour or so afterwards he went to his father's room and found him dying. Deceased

THE OPENINGS.

A very large turn out of the fair sex of the town and country, gathered at the various Millinery and Dry Good stores on Saturday to view the latest millinery creations and the latest and newest fabrics in wearing apparel and household furnishings. The stores were crowded all day, and especially so on Saturday evening.

MISS M. BRUTON.

Very dainty and spring like was Miss Bruton's beautiful millinery parlor, which was opened to the public for the first time on Saturday, March 24th.

Flowers, ferns and mosses, were banked in every conceivable nook and crevice, which when, combined, only Nature herself could rival in beauty and conception of color.

The effect of the early English furnishings combined with the green and gold draperies was charming, showing evidence of the truly artistic.

Lovely hats were legion, one most noticeable and striking was a small French sailor in the beautiful Raspberry shades, trimmed with drape of ribbon and roses banked in on bandeau. Another lovely creation was of black lace made in Derby style with long plume and shell buckle, tiny pink roses and tulle finishing bandeau.

Shades in violet were used for still another chic little round hat, a high side back bandeau tilting it well over the face, the crown was woven with tulle and at the base was wreathed shaded roses, a pretty aigrette at left side with tulle and roses on bandeau, completed this jaunty little model.

The many visitors to the Parlors at the opening were well pleased with the display.

DOXSEE & CO.

An important event to the ladies of Napanee was the annual Spring Millinery Opening of Messrs Doxsee & Co. The fair sex who had been looking forward to it with eager expectation came out to behold the latest creations, and styles decreed by dame fashion. They were not disappointed; here, exclusive styles imported direct from gay Paris are most in evidence, while a large number of the dainty and striking New York designs are also shown. There is a great variety of colors, including Burgundy, Raspberry, Greens, Vieux Rose and Pinks. Blues of all shades promise to be very popular. As great a variety almost, is noticeable in the shapes. Flowers, ribbons, tulle and chiffons are the leading trimmings. Among the flower hats, small flowers such as rose buds, cow slips, lilacs and hyacinths, and the larger flowers such as American Beauty roses for trimming leghorn and chip hats. It would be impossible to give any adequate idea of the millinery display, so numerous and indescribably beautiful are the styles. But a few representative hats may be mentioned. One very pretty summer hat was a medium sized hat, straight brim, made of white mohair braid, lined with pink tulle, draped around crown in deep folds with a cluster of shaded roses. A pink ostrich feather under the brim on the left side falling over the hair and finished on right side with bows of Tulle in same shade. The newest

For some time but was not considered seriously ill. His son Mr. George Perry was in his room on Saturday evening and his father did not appear particularly ill, but hearing a noise in his room and found him dying. Deceased had been a life-long resident of Napanee having conducted the Woollen Mill business here for a long number of years, and was closely identified with the early business history of the town. The funeral took place from his late residence on Tuesday afternoon, services being conducted at the house, after which the remains were placed in the Eastern Cemetery vault.

Pocket Electric Flash Lights will sell at \$1.00 each.

BOYLE & SON.

The world is full of people who are in constant misery from the racking pains of rheumatism, neuralgia, hum-bago and kindred diseases. From Mis- es. They would give ery to any money to get relief, Comfort. but having tried various remedies and been disappointed they have become discouraged and sceptical of all remedies. Does that describe your case? If it does, let us tell you that there is a cure for your trouble, a remedy that will not disappoint you. It is Tuck's Rheumatic Bone Oil. It never disappoints. As its name implies it goes straight to the bone, or joint, the seat of the disease, scatters the poisonous acid, relaxes the stiffened joints, allays the inflammation and effect a sure and speedy cure. It gives comfort where there was misery, a fact for which we have hundreds of letters from those who have been sufferers. This oil is for internal and external use and while it is also good for other kinds of inflammation, such as croup, bronchitis and quinsy. It is the most remarkable remedy of the age and should be in every home. Sold by all medicine dealers at 50c a bottle or sent by mail prepaid by The Tuck Bone Oil Co., Limited, Smith Falls. Money refunded if not satisfied.

Rag Carpets and Dyeing.

Colors are everything in a rag or wool carpet. Dyes that are true to color, will not fade nor crack are the only satisfactory dyes to use. We are agents for the new dyes Dy-co-la and Rexall which dye either wool or cotton, also Diamond and Turkish Dyes. 3 packages for 25 cents. Try our cheap dye for Black, Brown, and Yellow. The Medical Hall.—FRED L. HOOPER.

Gettin' Wisdom

is a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'ded' with glasses on."

We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling.

Headaches in children are suspicious. We are also the best people to guarantee the quality of our frames, it being part of our jewelry business to acquire that ability and knowledge.

F. CHINNECK'S

white mow-lair braid, lined with pink tulle, draped around crown in deep folds with a cluster of shaded roses. A pink ostrich feather under the brim on the left side falling over the hair and finished on right side with bows of Tulle in same shade. The newest and most extreme style is the small straight sailor with crown almost meeting the brim. One of these were shown in pale blue tulle brim, with two blue plumes falling over the front. Large straight brim hats promise to be very popular for young ladies.

A charming display of children's hats is shown of which the granny bonnet in all colors is the most popular shape. One in pink was very much admired.

MADILL BROS.

Grand opening display occurred on Saturday evening. The looked for event being in every respect most successful, the general public availing themselves of the opportunity of seeing the massive display of general Dry goods, Carpets and Housefurnishings. During the entire evening vast crowds thronged the isles of Napanee's most popular store. The management and their efficient staff are certainly to be congratulated on the tasteful appearance throughout the store, each and every Department being exquisitely arranged especially for the occasion. The Dress Goods and Silk Department being arranged most tastefully with an artistic combination color scheme, showing the newest dress Tweeds, Mohairs, Trimmings, Silks and Lacees, the Wash Goods Department being most summer like, amazing and attractive, everything being carefully arranged and displayed to the best advantage. The Linen Department, which is always of interest to the House-wife was arranged in proper Irish style, the Shamrock brand being very prominent. A special feature at this counter was a neat show case containing this particular brand of Linen in every stage from seed to the finished product. Next the Ready-to-wear Department which was complete in every detail. Ready-to-wears in great profusion, garments of the latest fashion fable. Amongst the most prominent were the Silk and Embroidered Waists, Ladies' Lingerie wear, Tweed and Covert Coats in various styles, Silk Underskirts and Goggles. The Novelty Department, which is extensively equipped with Silent Salesmen, show counters, most appropriate for this line of goods, was arrayed in real artistic style, each and every line being prominent. During our inspection visit an Embroidered Linen Belt Sale was in progress and owing to rush we are unable to give further details. Last but not least, the Carpet and Housefurnishing Department, this department being exceptional in detail, everything looked charming, the richness of quality, blending of colors and the general elaborate display, was one long to be remembered by the citizens of Napanee. During the successful opening, special music was rendered on a Kam Pianauto, much to the enjoyment of the massive crowd of interested Public.

Messrs. Madill Bros. are certainly to be congratulated on the able manner in which everything was carried out.

A CONSCIENCELESS AGE

The Lack of Conscience Is a Menace of Present Day Life.

Herein do I exercise myself, to have always a conscience void of offence toward God and toward men.—Acts xxiv., 16.

Conscience is a compound of two Latin words signifying self-knowledge. It is an inner light which shows the way of duty. It is a secret voice which forbids the wrong and commands the right. Hence it points to a seat of authority out of ourselves—that is, it witnesses to a God.

Conscience, however, must be taught. An uneducated, misguided conscience is one of the most terrible forces resident in man. And herein comes the necessity of revelation. When a man is acting as impelled by the authority of God he should know what God wills. Hence the human conscience must be enlightened by the word of God.

There are many imperfect and defective consciences from which the grossest errors and wrongs result. There is, first, a false conscience—one that has been mistakenly educated, that sees harm in things innocent, that confounds abstinence with temperance, that forbids what God has meant to be enjoyed, that mistakes austerity for piety.

This makes conscience play the role of a harsh, severe and bigoted censor, altogether foreign to its true intent. There are few things worse than

A FALSE CONSCIENCE.

Again, there is a legalistic conscience. This takes hold upon externals. If the outward life be correct, if the reputation be kept moral, if visible conduct be blameless, if duties be regularly discharged, it is self-satisfied. But it overlooks the fact that the real seat of conscience is in the inner life. The most faultless legalism is utterly shallow and vain until it springs from the heart. The works of such formalists are but done to be seen of men and have their reward.

There is the double conscience—one for the private and another for the public life. Some men feel in honor bound to do uprightly by their families and friends. They are patterns of moral correctness in their personal relations. But as members of some corporation or trust they freely, and apparently without blush, commit acts and sanction practices which are no less than robbery. Even members in good standing in

Christian churches have thus besmirched the church's fair name by flagrant dishonesty.

And then again, there is the one-sided conscience. Paul's conscience in the text had the two necessary sides. "Herein do I exercise myself, to have always a conscience void of offense toward God and toward men."

The conscientiousness of many only embraces men, but quite ignores God, their Maker. They have morality, but lack religion; and thus they disregard the supreme obligation of the ethical sense. God not only will not be ignored but He wants the first concern. Wrote Ruskin truly:

"God will put up with many things in the heart of man, but one thing He will not put up with—

THE SECOND PLACE.

He who gives God second place, gives Him no place."

No more important theme could be suggested for our time than this. We are in danger of incurring that most terrible of indictments—a conscienceless age. Thinking, upright minds are shocked at the revelations showing utter lack of conscience in wide ranges of present day life. We need, then, a revival of the conscience. We need to emphasize the imperative necessity of heeding it. The disregard of conscience brings remorse to the individual and disaster to society.

Conscience wounded becomes an adder's tongue that will sting to the death. Let no man hope to evade the Nemesis that follows the ignoring of this divine monitor.

No tortures which the poets feign Can match the fierce, intolerable gain He feels who, night and day, devoid of rest, Carries his own accusers in his breast.

A life without conscience toward God first and toward man because of God is the worst of failures. No gold can gild, no glamour of position or power can fill it with success.

But a good conscience is true riches—a patent of genuine nobility, a breastplate against all adversities and a light of inner peace and joy that will sustain us until we reach Our Father's house.

THE STORY OF NICKEL

A VISIT TO THE LARGEST NICKEL DEPOSIT IN THE WORLD.

How The Ore Is Removed From The Ground—Before It Reaches the Smelter.

To realize in some measure what has been accomplished since the discovery of the nickel deposits at Sudbury it is necessary to recall that in 1886 Copper Cliff was still a wilderness. The ground was covered with a tangle of fallen trees and thick underbrush, through which projected the spectral skeletons of charred pines that bore testimony to the terrible destructiveness of the forest fires of forty years before. At the present time perhaps five thousand people directly or indirectly draw their living from the ores discovered in this wilderness. From Sudbury as a centre a circle of twenty miles might be described to the north and west that would contain almost all the nickel to be found on the North American continent.

The only evidence which the ore gives of its presence beneath the surface is a red dusty stain on the rocks, known as "gozzan," or, as the German's call it, "iron hat." This is caused by the rust of the iron ore, which has stained the gravel and cemented it into a conglomerate in which the pebbles are imbedded like raisins in a pudding. The glaciers long ago scraped away great quantities of this ore, and spread it over the country to the south. Under this capping of "gozzan" the unalloyed ore is revealed as

A BRIGHT SHINING MINERAL

in the black diorite. The ore occurs in large masses, often several hundred feet in width, which lie usually between the black diorite on the one side and the red granite on the other.

As a rule most of the nickel deposits around Sudbury are worked as "open pits," which means simply that a hole is dug in the ore, and that around this hole air drills are set up, preparing the way for the use of dynamite. The ore as it is broken off from the side by the explosions of dynamite falls to the bottom, where it is loaded into tram cars and carried to the shaft, which is sunk on one side of the ore pit. This shaft serves to hoist the ore to the surface and to the top of what is known as the "rock house." As you stand on the rock at one side of the Creighton mine, the largest deposit of nickel in the world, you see before you an immense pit funnelled like the mouth of a volcano. From this pit arises an incessant clacking and throbbing. Clinging to the sides you see the men at work with air drills. At the bottom you see what at the distance looks like a small army of pigmies, loading the ore into the tram cars. Beside you rises up a towering structure not unlike a grain elevator. This is the "rock house." An inclined railway leads from the top of this structure and disappears into the shaft which is cut through the rock beside the ore. As you watch a square bucket, or "skip" as the miners call it, emerges from the pit and starts up the incline. As it passes up it touches a lever,

A SHRILL WHISTLE SOUNDS,

and a second after you hear the rattle of the ore as it falls from the overturned "skip" into the top of the rock house. Another second and the "skip" rattles down again and disappears into the earth, and every few minutes the process is repeated. Meanwhile the drills are at work on the sides of the open pit. As you watch there comes a sudden rush. Men are seen scrambling up the pit sides and removing the drills. A few minutes more and you see the men running to cover behind railway cars or under trestles. Then somebody calls "fire!" A tremendous explosion follows, which reverberates like the discharge of

is reduced from 25 per cent. to from ten to twelve per cent. The sulphur fumes are fatal to vegetation, and for miles around the landscape presents a scene of naked desolation. It is said that sufficient sulphuric acid escapes into the atmosphere every day to supply the whole of Canada. As yet the problem of securing this waste and converting it to commercial use has not been solved.

SPAIN HONORS ENGLAND

MARRIAGE OF KING AROUSES PRO-BRITISH FEELING.

Hope Prevails That New Queen Will Relax Austere Etiquette of the Court.

One striking effect of the approaching royal wedding is the widespread love of everything English. Several politicians and writers have insisted, however, that British popularity is not a recent feeling in Spain, quoting in support of this statement a popular refrain of the eighteenth century, when French Court influence was strongly resented: "Con todo el mundo guerra y pas con Inglaterra" ("War with all the world and peace with England").

PLEA FOR ENGLISH CUSTOMS.

The following passage from an important periodical indicates the general feeling regarding England and the royal wedding:

"There will arrive in Spain with Princess Ena the currents of British life, by means of which Spain will be known better and esteemed more by that master of liberties, the lord and arbiter of the mercantile existence of the whole world, and whose modern influence is strongly felt in naval and Government circles in sports, clothes, fashions, horses and carriages."

The royal stables contain some fine English and Irish horses, bearing such names as Fly, Pretty, Big Ben. Football has now become quite popular, not only among the sons of aristocracy, but in popular schools. The King offers a cup for the annual championship. Polo has been played for the first three years. Since the visit of Princess Ena to Biarritz gold has leapt into favor; hitherto the game was unknown here.

COURT ETIQUETTE.

It is hoped that the rigid Court etiquette maintained by Queen Christina will be relaxed by the English Queen. Spanish ladies especially wish for more personal freedom.

The principal shops have placed large orders for ribbons, neckties and handkerchiefs in English colors. "Princess Ena" fancy cakes and pastries are also being sold. For the carnival, beginning on Sunday, many fancy costumes as English tourists have been ordered.

English literature, too, is coming into fashion in this country.

THE CZAR'S EXISTENCE

DAILY LIFE IN PRACTICAL EXILE, MOST UNHAPPY ONE.

Quarrels With the Grand Dukes Frequent Features of His Dreary Routine.

An interesting light is thrown on the Czar's life at his Palace of Tsarskoe-Selo in a private letter from an officer of the Imperial Bodyguard who has been attached to the Czar's entourage for the past two years.

"Ever since 'Red Sunday,' he writes, 'the Czar's existence has been one unending series of anxieties, which have told very heavily upon him. Only among his family does he apparently

THE S. S. LESSON SOCIETY WAS ARRAIGNED

INTERNATIONAL LESSON, APRIL 1.

Lesson I. The Two Foundations. Golden Text, James 1. 22.

EXPLANATION.

15. "False prophets"—Religious teachers false at heart and deceitful. "In sheep's clothing"—Accomplished hypocrites wearing the appearance of guilelessness and truth, while in reality seeking the destruction of those whose confidence they endeavor to win. Such indeed are ravaging wolves.

16. "Do men gather grapes of thorns, or figs of thistles?"—Note the cogency of the argument throughout this passage, verses 15, 16, 17, 18, and 20.

17. "Corrupt tree"—Decayed, dwarfed, or otherwise imperfect. "Evil fruit"—Imperfect fruit.

19. "Is hewn down"—Orientals even to-day value trees only as they bear

BISHOP DELIVERS A SWEEPING INDICTMENT.

Mr. Carpenter, a Poet, Blames Habit of Acquisitiveness for Social Whirlpool.

The west end of London is in quite a flutter about two sweeping indictments which have been hurled recently against society and its manner of living. One was by the Bishop of Birmingham criticising the extravagance of modern social life and the other a condemnation of modern civilization as a whole by Mr. Edward Carpenter, a poet and lecturer at Trinity Hall.

Why was it, asked Bishop Gore, that the requirements of income were so very much smaller in Germany and France than in England?

It was in a very large measure because the English scale of expenditure on entertainment was absurdly and needlessly higher. There was no reason why a man

sage, verses 16, 17, 18, and 20.
17. "Corrupt tree"—Decayed, dwarfed, or otherwise imperfect. "Evil fruit"—Imperfect fruit.

19. "Is hewn down"—Orientals even to-day value trees only as they bear fruit.

21. "Saith unto me, Lord, Lord"—Verbally confesses my name or goes through the outward formalities of worship. "Doeth the will"—Obeys, lives a life in harmony with the recognized will of God.

22. "Have we not prophesied?"—To prophesy here means to reveal truth, hence to preach or teach the truth. It does not necessarily mean a revealing in advance or foretelling.

23. "I never knew you"—I never recognized you as my disciples.

24. "Therefore whosoever heareth these sayings of mine, and doeth them"—Both classes, the doers and those who fail to do, hear the Word, and in so far as alike. In like manner the two houses mentioned later have externally the same appearance. The test lies not in the hearing, but in the manner of hearing, and in the application of that which has been heard in daily life. "A (the) rock"—The use of the definite article before rock indicates that the reference is to the general substrata of rock which lies underneath the sand on the surface, and not to "a rock" apart by itself.

25. "On the sand"—Without going to trouble of digging down under the surface to find a solid foundation.

29. "Having authority"—Himself a lawyer, his word of teaching was not merely an expansion or amplification of the old law, nor yet simply an interpretation of such amplification made by any particular rabbi. "The scribes"—Sopherim. A class of literary men originating in the time of Ezra, who busied themselves with copying and teaching the sacred Scriptures.

QUESTIONS ON THE LESSON.

To what portion of the Sermon on the Mount does our lesson belong? What is the theme of the sermon as a whole? Give its principal divisions of thought. Show the connection between this passage and the portion preceding. Is the fruitage of a man's life always a correct indication of his character? Explain the intended teaching of each of the two parables, v. 24-29.

NATIVE RISING IN NATAL.

Trouble Tearing on the Borderland of the Zulul Country.

There is much agitation and unrest in Durban, Natal, at the disposition of certain home politicians, as shown by the emigrants, to intervene in regard to the preventive measures against a possible spread of native difficulties in the colony.

The press is voicing strenuous complaints against home interference, and a grave crisis unquestionably confronts Natal, and, with Natal, South Africa generally, unless these symptoms of rebellion are checked with a strong hand. The whites are outnumbered by ten to one in Natal, and there is no Geneva convention among the natives, who would yield to the first savage impulse for rape, murder and wholesale destruction.

There is evidence that sedition is still active, and trouble is hourly expected at Mampulo, on the Zululand border, where a strong column of cavalry and artillery, with Maxim and searchlights has taken up a position. The Zulul show every appearance of loyalty, and possibly recourse will be had to their assistance. Native levies are beating the forest haunts of the refractory tribes there.

All is quiet in mid-Natal, where the shooting of two natives recently had a profound effect upon the natives of the district. It is believed that if the commandant of the column there acted with more firmness, the lack of which is conjectured to be the result of comments in England, the natives would be pacified permanently. Action should be taken at the principal that by grasping the cattle tightly injury is avoided.

much smaller in Germany and France than in England?

It was in a very large measure because the English scale of expenditure on entertainment was absurdly and needlessly higher. There was no reason why a man should not have a dinner with his friends without that amount of expenditure that was at present considered necessary in high circles on costly wines and other matters. This applied to the women as much as to the men.

Referring to this, the London Daily Mail says:—"A casual glance around the restaurants of London and the luncheon and dinner tables of modern country houses and a brief study of the dress-makers' bills which are revealed periodically in law court cases will certainly confirm Bishop Gore's statements."

The Mail then proceeds to add that a remarkable feature which has not yet received its due meed of notice is the increasing number of costly and luxurious restaurants which are attached to the new hotels in provincial cities.

NO TERRORS FOR GOURMETS.

Life at the modern hotels in Liverpool and Manchester has no terrors now for the most fastidious gourmet. His bills might cause a millionaire to look twice at them if, in the slang of the day, he had been "doing himself well."

In the English country houses it is the same tale, with the additional cost, by the enormous waste of catering for a dozen people, instead of for a hundred, and the higher prices paid for small quantities of food.

The late Duchess of Rutland once alleged that the men and women in a Scotch house where she was staying during the shooting season ate eleven meals a day. It is, of course, notorious that the chefs in several private houses to-day receive salaries of £800 (£4,000), £1,200 (\$6,000), £1,500 (\$7,500) and in one case £2,000 (\$10,000) a year, and would think a dinner fit only for a work-house feast if its material, including fruit and wine, has cost much less than £35 (\$175) or £10 (\$200) for a score of guests.

One of the best known young English peeresses, whose husband has an income of £300,000 (\$1,500,000) a year, was so disgusted with the waste of rich food with which she was confronted in the principal of her new homes that she dismissed the chef and engaged a woman cook for £65 32s a year, and she now alleges that she, her husband and her guests are all much better fed for a third of the former cost.

MR. CARPENTER'S INDICTMENT.

Turning now to Mr. Carpenter's indictment, which is preceded by an appeal for a simple life, he said:—"There has arisen a mass of the most futile society that probably the world has ever seen. I do not say the most wicked, or the most criminal, for it has not sufficient spirit to be either; but the most useless, the most vulgar and perhaps the dullest society the world has ever seen. Every one is complaining of the complexities of life, of worries and anxieties that overburden modern existence; brain fever is abundant, suicides are more frequent than they have ever been before, the lunatic asylums are so full that when our own time comes, there will be no room left."

The blind habit of acquisitiveness that possesses humanity was Mr. Carpenter's explanation for this bewildering social whirlpool.

BARBAROUS MANNERS.

"Waiter," called a man who, after rushing into a restaurant, seated himself at a table and proceeded to tuck his napkin under his chin; "can I get lunch here?"

"Yes, sir," responded the dignified waiter, "but not a shampoo."

PROGRESSION IN RUSSIA.

"What do you think will come next?" asked one Russian official.

"I don't know," answered the other. "My vocabulary is about exhausted. We've had a strike, a riot, an insurrection and a revolution. What comes after revolution?"

pit sides and removing the drills. A few minutes more and you see the men running to cover behind railway cars or under trestles. Then somebody calls "fire!" A tremendous explosion follows, which reverberates like the discharge of a battery of artillery. The ore, which has been displaced by the dynamite, rattles down the sides of the pit with a noise like thunder. Then the men return and again take up the work of loading the train cars.

Let us climb to the top of the trestle and see what is going on inside the rock house. The building shakes as you ascend the stairway that rises on the outside. A crunching noise fills your ears. As you enter the building by a little doorway all seems darkness. As you peer through the gloom somebody yells at you.

YOU JUMP INTO A CORNER.

A second later the building trembles as the ore car, which you had been watching outside, dumps its load of a ton or so of broken rock on the spot where you had been standing. The house is lighted up with a million sparks from the concussion. As the car disappears on its downward journey half a dozen men rush forward with shovels and feed the ore into the gaping maw of the insatiable crusher which throbs and pulsates like a thing alive. As you peer below you see the ore falling in fragments from the size of a man's fist to that of a boy's marble into a revolving screen. This screen is perforated with holes of various sizes which serve to separate the ore and classify it, dropping each size into the bin prepared to receive it. At a lower level under these bins are openings at which workmen from time to time, by operating levers, allow the ore to fall into flat cars which pass along in sections to receive their loads. As you watch these cars you notice that about two-thirds of them are filled with coarse ore about the size of the anthracite coal used in the furnaces of dwelling houses. One or two cars will be filled with a smaller size, about as large as English walnuts. This, the foreman tells you, is called "raggins." If you ask why it is called "raggins" he tells you

HE DOES NOT KNOW.

Three or four cars of the train are filled with a much finer ore. It is almost like dust. This is called "fines," and you can guess the derivation for yourself.

The ore is taken direct from the mines to the "roast yards" at Copper Cliff. These lie about a mile to the north of the village and present perhaps the most depressing scene of earthly desolation to be found in Canada. Students of Dante and Milton will find no difficulty in selecting appropriate quotations. Most of all, perhaps, it recalls pictures of the Valley of the Hinnon, that awful dethle of Old Jerusalem, in which it is said great fires were kept constantly burning to consume the refuse of the city. From this Valley of the Hinnon is derived the word Gehenna, which is usually translated "Hell." On one side of a line of railway used for the transportation of ore rise great hills of barren rock, covered here and there with giant skeletons of white birch and tamarac, all dead—one is tempted to quote with Charles Lamb:

"All silent and all damned."

On the other side huge windrows of ore in square beds stretch in seemingly endless extension. Dense yellowish-white clouds of smoke rise from these piles and drift lazily to the horizon. These are the roast yards, where the sulphur is roasted out of the ore. The ore as it is taken from the mine contains about twenty-five per cent. of sulphur. When it reaches the roast yards it is unloaded on foundations of cordwood about eighteen inches thick. Each bed carries from 1,500 to 3,000 tons of ore. The coarse ore forms the bulk of the pile. On top of this is placed the "raggins" and on top of this again the "fines." The wood is then ignited. The ore soon takes fire, and if left alone will burn for nine months or a year. As a rule the ore is left to burn from three to four months before it is taken to the smelter. By this roasting the percentage of sulphur

for the past two years. "Ever since 'Red Sunday,'" he writes, "the Czar's existence has been one unending series of anxieties, which have told very heavily upon him. Only among his family does he apparently forget the menace of the revolution, threatening news of which reaches him with the merciless regularity of the ticking of a clock. These are, indeed his only

MOMENTS OF HAPPINESS

and relaxation from the worries and cares of State, with perhaps the rare exception of a walk or a ride in the park, which, however, has become a very rare occurrence of late.

"His Majesty invariably spends almost the entire day and night in his private cabinet, either in consultation with his councillors, whom he often summons to his presence at any hour of the night in order to ask their advice, or in work upon projected measures of reform. He writes often for hours at a stretch.

"At other times the sentries placed at his door hear him pacing restlessly up and down the room till the early hours of the morning, waiting anxiously for reports from his representatives in the provinces. At intervals he will despatch a message, and then, suddenly throwing open the windows, gaze out upon the quietness of the night through which his millions of subjects slumber while their unfortunate ruler is still at work.

ABHORS SOCIETY.

"His Majesty," the latter continues, "was never a lover of social functions, but now he appears to abhor society more than ever.

"The Czar himself seems to be the only person at court who actually realizes the dangers of the present situation, and it is to this fact that the misunderstandings between his Majesty and the Grand Dukes owe their cause. The Czar alone recognizes that a genuine revolution is agitating Russia, and the more closely he notes the symptoms and compares them with those of the French Revolution, the more his anxiety appears to increase, and the more often are his noble eyes dimmed with the mists of sorrow."

BEARS ROUT SOLDIERS.

Inventory of French Cathedral Successfully Blocked.

The townspeople of Constance devised a novel plan to defeat an attempt of the authorities to make an inventory of the property of the cathedral there. Being notified that a Government inspector was coming, they bought three black bears from a traveling showman. The animals were kept without food for two days in an adjoining cellar. They were released in the cathedral, hungry and angry, when the inspector reached the town.

The inspector, with a military escort, upon arriving at the cathedral was surprised to find that his entry was not resisted, but he was no sooner inside than the door was shut and fastened outside. The inspector had time to speculate upon the meaning of this before he saw the bears hastily shuffling down the centre aisle to investigate the newcomers. Thereupon the man frantically tried to reopen the door, amid the derisive laughter of those outside.

Realizing that he was trapped, the inspector made a bee-line for the nearest confessionnal and clambered to the top of it, while the soldiers ran helter-skelter in every direction, seeking refuge, which they found in the side chapels. The townspeople then negotiated with the inspector through a window and obtained a very ready promise that he would quit if he were released.

The showman captured the bears, which were fed while the inspector and his escort escaped. The animals are being kept in the cellar against the next attempt at taking an inventory.

Nothing delights some people so much as to be asked favors; it gives them so much pleasure to refuse.

There is only one place in the world where you can live a happy life, and that is inside your home.

THE BABY MOON.

"Good-night, and go to sleep."

"Good-night, and go to sleep."

OLD BLIND FAN.

gentle and patient.

**CALGARY, THE CAPITAL OF THE
CANADIAN CATTLE COUNTRY.**

The New Country Is More Romantic

and Picturesque Than Early

Days in the West

If you want to see a live frontier town come to Calgary, writes Frank G. Carpenter, from Calgary, Alberta, to the Chicago Record-Herald. It is the ranching capital of the Canadian cattle country, and it has for years been a sort of Keeley cure for the younger sons of English lords and dukes. Lying in western Canada, a hundred miles or so north of the American boundary, it is a sort of a cross between Denver and Cheyenne, peppered with the spice of Monte Carlo and London. There is no more "sporty" town on the American continent. It is business from the word "go," but at the same time cowboys gallop through its streets, and fine-looking Englishmen in riding trousers, leather leggings and Norfolk jackets play polo on the outskirts.

There are a number of hotels, and every hotel has a well patronized bar. There are two clubs, one known as "The Ranchers" and another as "The Alberta." The Ranchers' Club is largely composed of the sons of rich English families. It is independent and ultra fashionable. The Alberta Club is mostly business men, comprising the real estate dealers, merchants, wholesale and retail, and other prominent characters who want to make Calgary great. As for the Ranchers they do not care a cent for Calgary, and are more interested in polo than politics.

RANCHERS FROM NOBILITY.

Among the characters of Calgary are the remittance men. They are the younger sons of wealthy or noble English families, who are out here to make their fortunes and grow up with the country. Some have come because their people did not want them at home, and others because they liked the wild life of the prairies, which, until recently, has corresponded somewhat with Kipling's description of "the country east of Suez."

Where the best is like the worst—
Where there ain't no ten command-
ments
And a man can raise a thirst.

These remittance men get a certain sum of money every month, or every quarter, and most of them spend it in drinking and carousing. Many are "heir do wells," and they sink lower and lower, relying entirely on their remittances to keep them going. I know, for instance, one son of an English lord whom you may see almost any day here hanging over the bar, and another who will gladly borrow a quarter of you if he strikes you in the lean days prior to the next remittance.

Others of these men keep themselves straight. They bring money with them, invest it and make it breed like Australian rabbits, but at the same time they are full of sport, and spend freely. One of these is a son of an admiral of the British navy. His name is Cochrane and he is said to have made a fortune of his own in ranching and other investments. He has one big range near Calgary on which he keeps 6,000 of the wildest of Canadian cattle. Every year or so he brings in a new instalment of tulls from Scotland, giving his agents at home instructions to send him the wildest and fiercest animals that can be secured.

The stories of how some of these remittance men take in their parents are interesting. They are sent out here with the idea that they may make their fortunes, and they frequently bring large sums to invest. As soon as they arrive they go into crazy speculations and wild extravagances, sending back to their parents for more money from time to time. One character of this kind was Dickie Bright, the grandson of the man for whom the "disease of the kidneys

mentioned the fact to the editor, and the two again heard the story.

It was a full details of details that they concluded it was true, and they went with the old miner to his shack, far away from the railroad in the wilds of the foothills. When they reached there they found an Indian with a rifle guarding the cabin, and saw unearthed two big bars of gold. They were made to believe that the Indian meant business, and that if the gold was not taken as per contract their lives would probably be lost. The result was that they paid over the \$12,000 and took the bricks back to Calgary. Before describing their find they carried the gold to an assayer, who reported upon it as pure. They then announced their discovery, but others suspected that there might be a trick, and at their suggestion the gold was tested again. The second assay, by a new scientist, showed that the bricks were nothing but copper, with a thin wash of gold on the outside. The first assayer had been fixed, and the supposed Indian was merely one of the swindlers dressed up for the occasion. As a result the manager of the bank lost his job, and I have been warned not to mention the words "gold brick" in the editor's hearing.

Fashion Notes.

VOGUE OF THE PRINCESS' GOWN.

Some of the Empire Princess gowns are a bit extreme for good taste. They are mere slips, waistless and sheath-like, and one thinks of nothing but a lag in contemplating them. One such model, which might be tolerable on a Hebe or a Venus, but which would make an ordinary woman look like a slightly draped beanpole, was a white broadcloth reception gown, made walking length. The skirt was ample around the hem, but exceeding scant everywhere else, being simply a sheath from shoulders to knee. A group of four stitched folds trimmed the skirt, and above and below the bands were Empire wreaths heavily embroidered on the cloth. There was a guimpe and collar of white lace, and the sleeves, two small puffs and a cuff which ended at the elbow, were entirely composed of lace. A narrow shawl collar of black velvet trimmed the pointed decollete, and bordered the lace cuffs. This would have been a beautiful gown if the waist had been slightly draped, or the plain lines relieved in some other way.

NEW WAIST MODELS.

A feature of the new models is the embroidered yoke which appears in the back as well as in the front, in contrast to last year's yoke, which was seen only in the front. Last year the waists were quite plain, except for a few tucks in the back, while the entire front was profusely ornamented. This year the back is to receive as much, or almost as much, attention as the rest of the waist. The Dutch neck seems to be a favorite. One sees many neat and lace waists without collars, and also some lovely mull and tanskerchief linen ones.

Some unusual combinations are seen. A lovely waist of embroidered net had a yoke, deeply pointed in the front and more rounding in the back, of sheerest mull, embroidered in a design of lilies of the valley. The mull collar had a touch of Valenciennes, and the full net sleeves had deep cuffs of alternated rows of Valenciennes insertions and narrow strips of embroidered mull. A double frill of Valenciennes lace finished the sleeves, which, of course, extend no farther than the elbow.

ANOTHER NET WAIST.

Another net waist, a soft cream color in tone, was trimmed with straps, almost tailor-like in their severity, of batiste, trimmed with a line of raised embroidery. These straps were put on the deep, round yoke in a design, and the waist below was trimmed with medallions of embroidered batiste combined with Valenciennes.

Lace in combination with net is seen in the handsomest waists. All-over Valenciennes was the foundation of a typical model. It had a yoke of Duchess

DRINKING MILK

There is a right way and there is also a wrong way to drink milk, and the great majority of people drink it in the latter way. This is the real reason why milk disagrees with so many people—at least, it is one of the chief reasons.

Milk contains all the elements necessary for maintaining the physical health of those who know how to use it properly. Indeed, most people would be better off physically if milk and entire wheat bread formed their principal diet. Especially is this true of delicate persons, whose powers of digestion have become enfeebled. Persons suffering from nervous prostration are not able to digest meat, and will find great benefit from a purely milk diet, but the milk must not be imbibed like draughts of water; it must be sipped slowly, a mouthful at a time.

There is a scientific reason for drinking milk very slowly, and in very small quantities; it is this: Milk curdles as soon as it comes in contact with the juices of the stomach. If a long draught of milk is taken into the stomach, the result is a large curd, through which the gastric juice cannot really penetrate and act with solvent power. A small sip of milk makes a tiny curd, so if a tumbler of milk is taken sip by sip, it will readily be seen that the result will be a number of little curds, each one of which can speedily be acted upon and digested by the gastric juices of the stomach.

Where special nourishment is desirable, as in the case of very weak persons, or convalescents from wasting diseases, beef and wheat peptones may be added, or some one of the infant foods which are known to be absolutely free from starch.

It is unwise to add starchy foods like arrowroot or farinaceous foods to the milk for weak people or invalids, under the impression that the foods are very delicate and easily digested, for they are on the contrary, very difficult of digestion. Milk alone is far better for persons who have weak digestive powers, but the one great need which must be imposed on every one is the need of drinking slowly and in very small sips with intervals between the sips. In nine cases out of ten milk drunk in this manner will agree with people, unless there is some fault with the milk. The milk of a healthy cow, that has free range on good pasture and all the pure water she needs, is the only sort of milk that is wholesome.

ANEMIA

Anemia means a condition in which the blood is deficient either in quality or quantity. It is a question among physicians whether there is ever an actual permanent reduction in the total amount of the blood. The quantity may vary, of course, from hour to hour, according to the amount of fluid that is drunk, and the amount that is lost by perspiration and in other ways, but it is probable that the average remains about the same from day to day, except in cases of actual starvation and deprivation of water.

Anemia, then, is mainly a question of the make-up of the blood, that is, of the number of its red corpuscles, or cells and the relative amount of hemoglobin—the coloring matter—which these contain. The blood is a complex fluid, but in simple terms it may be said to be a salty solution, containing two kinds of cells—the red and the white corpuscles. The white ones are the scavengers of the body as well as the policeman and soldiers. They protect the body from the disease-germs which threaten its existence. The red corpuscles, on the other hand, are the commissary department. They bring to the tissues the oxygen which they need and remove the gaseous waste products.

If the red corpuscles and the substance

they see a poor old horse, they ask the owner if it be as kind as they were to Fan, and sometimes the men are more gentle and patient.

BLOWN AWAY.

"I'm tired of everything, mamma. Do tell me what to do!" said Beth Lincoln, coming into the room where his mother was sitting.

"Why not play basketball with me?" "With you, mamma? I didn't know you could play basket ball."

"Why not? I have balls in the yarn basket, and I am going to weave the yarn in and out over this ball," said Mrs. Lincoln smiling and holding up a wooden ball, over which she stretched the heel of Madge's little stocking.

"You and your friend Nellie had a nice time yesterday playing you were a sewing society; and why may I not play that my real work is play—basket ball, for instance? I will toss the ball to you."

Beth caught the ball, and said, as she came close to her mother: "But mamma, without joking, what can I do? I am tired of everything and everybody. Please tell me what I can do."

"Is my daughter really tired of herself?" asked Mrs. Lincoln, with a slight emphasis on "herself."

"Why, yes. Didn't I say so, mamma?"

"How would it do to stop trying to please self, of which you are so tired?" "Mamma, what do you mean?"

Just then dear little Madge came toddling into the room and said wistfully: "I haven't any one to play with."

Mrs. Lincoln gave Beth a meaning look and said:

"How would it do for my big girl to get away from self and amuse my little girl?"

Mrs. Lincoln was called from the room and she found two happy children when she returned half an hour later. What were they doing? Beth was blowing soap bubbles and Madge was trying to catch them. Mrs. Lincoln stood for a moment in silence, thinking: "What a beautiful picture!" Beth looked up and saw her mother, and said:

"Aren't the bubbles beautiful, mamma, and isn't Madge a dear?"

"I have two dears now, but what has become of that tired self?"

"Blown away, mamma, with the bubbles," laughed Beth.

WIDOW OF KING IN A CONVENT.

Duchess of Braganza a Nun in Isle of Wight.

The rumor that the Queen Mother of Spain will take the veil after the marriage of King Alfonso calls to mind the fact that the widow of an ex-king is at the present moment in a convent in the Isle of Wight.

The royal nun was born Princess Adelaide of Lowenstein-Wertheim-Rosenberg. She married in 1851 Miguel Duke of Braganza, who occupied the throne of Portugal from 1828 to 1834. In the latter year he abdicated under compulsion, and died in 1866.

His widow entered the Benedictine Convent at Solesmes, in France, in 1897, and when the community was banished from France she went with the rest of the sisters to Northwood in the Isle of Wight.

Within the last few weeks the community has bought the Isle of Wight College, near Ryde, where their home will be in the near future.

Since the royal nun's arrival in England she has received visits from King Edward and several other members of the royal family.

Another, but younger member of the same family of Lowenstein-Wertheim-Rosenberg is also a nun in the same Isle of Wight convent, and a third is one of the Poor Sisters of St. Francis.

In giving away your money, avoid giving away how you got it.

Life is like a game of cards, in which a good deal depends upon a good deal.

Advertising is a great deal like making love to a widow—it cannot be overdone.

A woman's idea of good luck is to find a pair of socks in the pile that doesn't need darning.

they go into crazy speculations and wild extravagances, sending back to their parents for more money from time to time. One character of this kind was Dickie Bright, the grandson of the man for whom the "disease of the kidneys" was named. Dickie's father was rich, and he had supplied Dickie with money and sent him out here to grow up with the country. Dickie invested in a ranch and asked for large remittances from time to time on the plea of increasing his live stock.

At the same time he sent home florid stories of the money he was making and how he was fast becoming a cattle king. Shortly after one of his most enthusiastic letters he received a despatch from New York saying that his father had just arrived there and that he was coming out to see him. The boy was in despair. He had spent his remittances in riotous living and had no cattle to speak of.

GET MONEY FROM HOME.

Adjoining him, however, was one of the largest cattle owners of the West. He confided in him and persuaded him to lend him 1,000 head of his best stock for one night. When he made this request his neighbor asked what he wanted to do with the cattle. He replied:

"I shall put them in my corral, and when the old man comes I will show them as my herd. Dad can't stay but a day, and I will see that they are driven back safe to you the next morning."

The rancher was something of a sport himself, and he finally consented to help the boy out of his trouble. The cattle were sent over. Old Dr. Bright duly arrived, and he was driven out and shown the herd which Dickie said was only a sample of his stock, which he had brought in to show to his father. The boy added, however, that it was not good to keep the cattle penned up, and that they must go back upon the range right away. The old doctor was delighted and gave Dickie a check for \$10,000 to increase the business before he left. When he returned to England he boasted about the clubs how his boy had built up one of the biggest stock ranches in the Canadian plains. In the meantime Dickie was luxuriating on his \$10,000. It soon disappeared, and a little later he wrote to his father for more, saying that cold and disease had ruined his herd. As a result he was called back to England.

Scores of such have been sent out from England to the United States and Canada to learn farming. There are men who make a regular business of drumming up such students. They go to the rich families in different parts of Great Britain, and persuade them that there is great money in ranching and undertake to teach their sons the business for a consideration. The boys are charged all the way from \$1,000 upward a year for their instruction, and in some cases they are made to do the dirty work, to clean up the stables, wash the dishes and labor early and late. As soon as they find out the deception they run off, but the money has been paid in advance, and the agent always comes out ahead. I heard of one young pupil farmer who was met the other day by a man who knew him when he first arrived in Calgary. He asked the boy how he liked the work and if he was still studying. The reply came quick:

"I am not. I chucked that job six months ago, and I now have two pupil farmers myself."

FOOLED BY GOLD BRICK.

As a rule order is good in the ranch country and confidence men comparatively scarce. The old-stagers here are on the outlook for swindlers, but nevertheless some of the best of them are badly taken in. A recent story is told concerning the selling of a gold brick to a bank manager and newspaper editor of Calgary for the sum of \$12,000. The Canadian bankers are the shrewdest of their kind, and the manager of this branch at Calgary has been long in the business. Nevertheless, when an old man came into the bank a few months ago and told how he had discovered a gold mine in the Rockies and taken therefrom enough dust to form two large bricks, he listened. He also

embroidered batiste combined with Valenciennes.

Lace in combination with net is seen in the handsomest waists. All-over Valenciennes was the foundation of a typical model. It had a yoke of Duchess lace elaborately put together with hand-fagoting. Another net waist, almost plain, was made with a bolero of baby Irish crochet, threaded with pale blue velvet ribbon, which drew the bolero into shape over the bust.

LITTLE TIGHT LACING.

It has been said in criticism of the princess empire modes that they do not suggest the waistless figure, and are therefore not empire at all. The fact is women who wear empire gowns should wear also empire corsets. But few women are willing to sacrifice their waists. There is comparatively little lacing done now-a-days. Women may not be any more sensible than they were in the days of the nineteen-inch waist-waisted beauty, but they are more artistic in their inclinations, and they know that a laced-in figure is ugly. Nevertheless, few women are willing to dispense with some kind of a waist. The ladies of the first Empire, of course, wore no corsets at all, and very little lingerie of any kind or description. They were after looking like ancient Greek statues, and tolerated nothing but the slightest of draperies. The real Empire fashions would not be tolerated now-a-days, but it is true that a short-waisted gown over long-waisted lingerie is something of an incongruity.

AS TO THE SKIRT.

Those of us who do not wear princess gowns will substitute for the circular skirt worn through the fall and winter an eleven-gored skirt, which gives the same effect as the circular, and does not sag so distressingly. Almost all the circular skirts have had to be sent back to the tailors twice at least, the only exceptions being those which were allowed to hang for a week or so before the hems were turned up. Skirts made in this leisurely fashion keep their shape if the materials are firm enough.

FOR AFTERNOON WEAR.

Cloth in a rich shade of plum-color was used for a princess gown for afternoon wear. The skirt was laid in box pleats, which were stitched flat almost to the knees. The pleats were close together at the waist, and widened gradually until the stitching ran to a point at the end of the pleat. The bolero was draped from the shoulders, and under the arms, and was cut in a deep square décolleté in front. This was outlined with a fine velvet galloon embroidered with silver and light violet shades. Four fancy buttons trimmed the front of the bolero, seeming to close it, but in reality the gown fastened invisibly on the shoulder and under the left arm. A guimpe of cream lace was worn.

MANY RUSSIAN JOURNALS.

Crop of New Papers Under the New Freedom.

A St. Petersburg correspondent writes to the London Daily News—"There was never before such journalistic activity in St. Petersburg as there is at present. New, radical and revolutionary papers are appearing on the scene every day to take the places of those that have fallen under the displeasure of the law, and such is the republican enthusiasm of the young men who run these periodicals that in some of the offices there is no 'boss,' everybody from the editor to the printer's devil, being on a level, and all measures being submitted to a meeting of all the employees. The names of the papers which the police have so far seized may be interesting—Renovated Roma, Our Voice, National Freedom, a paper printed in Finnish and called Vusui Inkeri, a paper printed in Lettish and called the Helven Worker, the Petersburg Avises, the Poison, the Mirror, the Arrows, the Swashbuckler, the Fiddle, Young Russia, the Working Week, the Mountebank, Machine Gun, Labor and the Red Laugh."

istence. The red corpuscles, on the other hand, are the commissary department. They bring to the tissues the oxygen which they need and remove the gaseous waste products.

If the red corpuscles and the substance of which they are most largely composed, the hemoglobin, are reduced in amount, the tissues suffer for lack of oxygen, and there is a lowering of all the vital processes. The lessened proportion of hemoglobin accounts for the paleness which is the chief outward sign of anemia.

It is common to speak of two forms of anemia—primary and secondary. Primary is the term used when the anemia can be traced to no definite cause, but seems to be a disease in itself. Secondary is the word used when the anemia is evidently the result of some other condition, such as wasting diseases or poor nourishment. It is then only one of the symptoms of such underlying state.

Among the chief causes of secondary anemia are drains upon the system by frequent losses of blood, or by diarrhoea or other wasteful discharges, chronic poisoning by lead or mercury, by the essential poisons of certain diseases, such as rheumatism and tuberculosis, and by poisons formed in the body and not promptly removed, which is called "auto-intoxication," and finally the destruction of the red corpuscles by a micro-organism, as in the case in malaria.—Youth's Companion.

WHERE MAN'S INFLUENCE IS FATAL.

Man is the only animal which is always accompanied by disease, except those creatures that are his companions and share his patronage. There is reason to believe that the denizens of the forests, the veld, the rivers and the ocean, so far as they escape man's influence, live, with hardly an exception, healthy lives. Chronic ailments begin with man's protection in the dairy, stable and kennel. Man has created artificial conditions with which the "thousand" (his that flesh is heir to) are associated. It is now his supreme task to bring these conditions into harmony with the laws of his being. Sickness and debility are not to be regarded as natural and inevitable parts of our heritage, but as the fruits of rebellion against nature's laws, and therefore to be got rid of. If the human family dwell in ventilated houses, breathe pure air, lived temperately, with little or no alcohol, and took daily exercise in the open, it would perhaps know little more of gout, rheumatism, cancer, fever, lumbago, dyspepsia, asthma, and the host of infectious troubles than do the lower animals.

DEEP BREATHING.

Dr. G. Norman Meachen, in his lecture at the Institute of Hygiene, London, made some interesting remarks on this subject:

"Deep breathing, if persistently practiced, in season and out of season, in the street and at the office, for a few minutes at a time, would soon bring the color back to the faded cheeks, and dissipate the sallow complexion. Lung diseases, especially the dreaded scourge of consumption, would become less prevalent if people would carry out this simple exercise, which is merely an imitation of nature's method with primitive man, who in running and leaping, unconfining by clothing, develops excellent lung capacity, and uses it to the full."

ALMOST A SHOCK.

Uncle Charles—"I don't know as you will thank me for interfering, Ellen, but they tell me this Mr. Mashman you are going to marry is utterly worthless."

Ellen—"Why, Uncle Charles?" Uncle Charles—"Not in a pecuniary sense, you know—he's got money enough—but from an intelligent point of view."

Ellen—"Oh, Uncle Charles, you don't know what a turn you gave me."

A pessimist is a man who is always looking for trouble and isn't satisfied when he finds it.

VAST IRRIGATION PLAN

IT IS NOW UNDER WAY IN THE PROVINCE OF ALBERTA.

1,500,000 Acres of Arid Land Are to Be Changed to Fertile Territory.

By all odds the biggest irrigation project on the North-American continent is now under way in this province of Alberta. In 1902 all the irrigated lands of the United States did not amount to 10,000,000 acres. By this scheme Canada will redeem a million and a half acres of semi-desert, and that by private parties without government aid, writes Frank G. Carpenter, from Calgary to the Chicago Record-Herald.

The work has been undertaken by the Canadian Pacific Railroad, which has exchanged a part of its land grant for 3,000,000 acres lying between here and Medicine Hat. Of this 1,500,000 acres will be put under water, and the balance will be sold to the irrigated land owners for pasture and mixed farming. This tract of irrigated lands is almost as great as all the irrigated land of Colorado or California. It is more than twice that of Utah, Idaho or Wyoming and many times that of any other western state.

This work is now going on. One hundred and ten thousand acres are now ready for the turning on of the water, and double that amount will be added this year. The project will be handled in blocks of 1,000,000 acres each, and it will be continued until the whole tract is redeemed and settled. Altogether it means supplying homes to something like 30,000 families and with the towns and other industries which will be built up along the line it ultimately means the addition of about 300,000 people to Canada's population.

IN GREAT AMERICAN DESERT.

The lands to be redeemed are a part of what was once known as the Great American Desert. This runs northward through the western part of the United States and on into Canada. There is more water here than in our tributary country, but there are dry seasons, when make the lands unfit for ordinary farming, although winter wheat is now being raised on much of it. For the past fifteen years the Canadian government has had engineers at work taking the levels, measuring the streams and locating reservoirs. From such surveys it has been found that there are 10,000,000 acres of semi-arid land which need irrigation occasionally if they are to be used for farming. The government engineers estimate that 9,000,000 acres can easily be reclaimed, and that they will have an unlimited supply of water from the Saskatchewan and its tributaries in the proper works are made.

The land of the Canadian Pacific scheme lies in a solid block on both sides of the railroad between Calgary and Medicine Hat. It is flat or slightly rolling prairie, and is now used for grazing. The strip is 130 miles long, running back for some miles on each side of the track. The water is to come from the Bow River, a beautiful mountain stream. It will be fed by other rivers, which flow northward from the United States through the Belly and Bow into the Saskatchewan and thence on to Hudson's Bay.

The Bow River flows by Calgary. A party of us drove out to look at the ditches, already excavated, and to examine the irrigation project as far as it is completed. Taking carriages, we went for miles over the prairie, riding at times along the embankments of the main canal, which is sixty feet wide at the bottom, ten feet deep and takes from the Bow something like 20,000 gallons of water every second. At many places the men were working, and the scene was much like those I saw on the Panama Canal. There were hundreds of horses scooping up the prairie, then

self, has represented those people in the territorial legislature, and has known them from the time they came to Canada. He says they make excellent citizens and are conforming to the Canadian laws in every respect.

In connection with these irrigated lands of southern Alberta a rather serious international question has arisen. The St. Mary's River which supplies the water for the territory settled by the Mormons and others, rises in St. Mary's lakes, which are situated in northwestern Montana, about twelve miles from the international boundary. These lakes are twenty miles long and one mile wide. The lie high up in the Rocky Mountains, and are fed by the heavy snowfalls and glaciers. They give St. Mary's River plenty of water, furnishing an abundant supply for the 130 miles of canals which the Canadians have built and have under way, and by which they expect to reclaim something like 630,000 acres. As it is now, the water flows through the St. Mary's into the Saskatchewan and goes off into Hudson's Bay.

Within a short distance of St. Mary's lakes and not more than twenty-seven miles from St. Mary's River flows the north fork of the Milk River, which runs northward into Canada, and then, turning south, flows for hundreds of miles through the United States into the Missouri and on into the Gulf of Mexico. By making a canal inside our boundary from the St. Mary's to the north fork of the Milk River the waters of these lakes could be thrown into the Milk River and be finally used to irrigate lands in northern and eastern Montana, and especially the lands which lie above the Fort Belknap Indian reservation.

BOTH CLAIM RIVER.

Such a canal would give enough water to redeem thousands of acres of good American soil, and the citizens of Montana claim that it ought to be so used. They say that the waters fell in the mountains of the United States and they ought to water the United States. The Canadians naturally object. They say that the water having fallen in our country is no reason that we should keep it, for it may have evaporated from Canada, and they have a common right to it, since it has been flowing through its present course for thousands of years. I understand that the two governments are now in consultation regarding the use of these lakes, and that an amicable arrangement may be expected.

In the meantime the Canadians say that the Milk River runs for a hundred miles or more through Canada before it goes back into the United States, and that if the Americans disturb their irrigation works here the waters of that river might be materially diminished by being spread over Canadian lands.

COMMONS' POOREST MAN

THE TROUBLES OF AN ENGLISH LABOR MAN.

A British M. P. on Less Than Twelve Dollars a Week—State Should Pay.

Pity the pecuniary sorrows of the labor member! There is even one who he other day confided to a representative of the London Daily Express that only a paltry fifty shillings a week saved him from the workhouse.

This was Mr. John Ward, the herculean, genial, and altogether delightful member for Stoke-on-Trent, who secures his pittance of £2 10s. a week as secretary of the Navvies' Union.

There was open to him wealth beyond the dreams of avarice in the shape of £200 a year allowed to members recognized by the Labor Representation Committee. But Mr. Ward did not altogether see eye to eye with this com-

IN MERRY OLD ENGLAND

NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

Occurrences in the Land That Reigns Supreme in the Commercial World.

The Great Yarmouth Town Council has decided to run municipal flower shows. In a case heard at the Croydon County Court the plaintiff was described as a "lady blacksmith." She was also stated to be a traction-engine proprietor and a confectioner.

The Manchester Ship Canal has had a prosperous year, with expenses amounting to only 55 per cent. of its receipts. In 1900 the proportion was 71 per cent. The turnover for 1905 was just on £450,000.

Earl Ducie, Lord-Lieutenant of Gloucestershire, recently unveiled in the Gloucestershire Cathedral a window erected to the memory of the five hundred Gloucestershire officers and men who fell in South Africa.

In a case heard at the Wandsworth County Court, London, a costermonger, who for some years has had a fruit stall in Battersea Park road, said that he always reckoned on making a profit of seven pounds on a Saturday.

Royal Sovereign strawberries grown by Middlesex forcers have been sold in Covent Garden at 32s. a pound. As two fruits go to the ounce, the berries at this price are worth one shilling each.

Field-Marshal Lord Roberts, who, on his recent visit to Manchester, inspected the local Postal Telegraph Messengers' Corps, has presented the boys with a set of miniature air rifles and patent targets.

When the plaster was being removed during the restoration of Hardingham Church, Norfolk, an ancient arched tomb was discovered on the wall, and two Greek crosses were also found in the stone floor.

Thomas Bryant, a Crimean veteran, who died at Paigrove, Suffolk, a few days ago, belonged to a family four generations of which have fought in the British Army in various countries during a period extending over a hundred years.

A cotton mill has been erected in the village of Westhorn, near Burnley. As a result of the present cotton trade prosperity several mills have lately been erected in Lancashire, and Westhorn is now in a prosperous condition as a result of the revived industry.

Judge Smyly has the gift of tongues. At the Shoreditch County Court recently he heard a case in French, corrected a Yiddish interpreter, and translated an Italian's evidence. On another occasion he chatted fluently with a German litigant.

An Indian Mutiny veteran has passed away at Clacton in the person of Surgeon-General James Pattison Walker, at the age of eighty-six. He went to India in 1845, and was sanitary officer of Agra during the ten months that it was besieged. He and his late wife went through the whole mutiny, and remained in India until his retirement in 1877.

The manor house at Salfleet (Lincolnshire) has what is said to be the first wallpaper used in England. It is cream-colored and covered with a bold chocolate design, and has the appearance of blotting paper. The pieces, which measure about twenty inches by eighteen, are nailed on with small tacks.

At Burton-on-Trent a locksmith and his son were called in to examine a safe lock. In examining the lock from inside the safe the son got locked in by the accidental closing of the door. The father worked frantically for nearly an hour before he could open the door, and then he found his son in a state of

FOE OF DRINK IS FOUND

DRUNKARDS MAY BE WEANED BY HEALTHY PLEASURE.

Britons Say Theatres and Bicycling Will Do More Than the Reformers.

Dr. Emil Reich, who has recently been giving a series of lectures at Claridge's Hotel, London, England, on Plato's Philosophy, appears to be in agreement in his views on drunkenness and its prevention with Rev. Stanley Parker, a Wesleyan pastor at Plumstead.

Mr. Parker has gone one better than Rev. Dr. Samuel Thackeray, who had taken over the Fish and Eels Inn at Hoddleston, with a view of reforming the drunkard. Mr. Parker has organized a brass band, which he marches through Plumstead in the evenings in an endeavor to induce half-drunken people away from the public houses to an impromptu sing-song in the Central Hall of the town; and, what is more, he is succeeding.

SALOON MEN ARE ANGRY.

The publicans laughed at first, but now are angry, and one night Mrs. Parker was treated to a drenching with a bucket of beer. But that did not dampen the ardor of the little pastor. He does not try to preach to his audience in their half-drunken state. When he gets them together he simply tells them to sing what they like.

The result may be better imagined than described, but in the morning they have a distinct impression of having spent a merry evening, and so they come and come again, and that is just Dr. Emil Reich's theory, too, for the prevention of drunkenness. Here is what he said in the course of his lecture the other evening:

"Can you imagine the signing of a bit of paper, known as a pledge, will curb human passion? What do men drink for? Why do they drink so much, especially of the wretched stuff consumed by the ordinary drinker? I will tell you—want of amusement.

TWO ARE RELATED.

"Between the amount of amusement given to a nation and the quantity of drink consumed by that nation there is a clear and almost fixed relation. France seldom drinks to drunkenness, but she has plenty of amusement.

"When will these temperance and teetotal people learn that their efforts to suppress drink by the methods they adopt are futile? The bicycle has been the greatest foe of the drink traffic. It has accomplished infinitely more than all the talk of the teetotaler and far more sanely and beneficially.

"Open your theatres on Sunday to the people, encourage cycling, the love of theatre, the love of amusement, and the occupation of temperance and teetotal orators is gone. Take away a glass of drink from a man and he will get another, and if he cannot get that he will resort to opium."

TEA, ALSO, HELD BAD.

Then, with a twinkle in his eye, the lecturer created a merry peal of laughter by adding: "Or, what is ten times worse, tea; because the passion is from within, and counteractives of a depraved order will never do. They have always failed us.

"Government statistics show beyond cavil that the number of murders among teetotalers is far greater than that among even confirmed drunkards. Some people ascribe all crime to drink. I agree with them if you make that drink water."

WORKED FOR PENNY AN HOUR.

What a London Woman Got on an Army Contract.

of water every second. At many places the men were working, and the scene was much like those I saw on the Panama Canal. There were hundreds of horses scooping up the prairie, there were great steam shovels gouging out the earth and loading it upon cars, and there were long train loads of excavated material moving on the temporary tracks from one place to another.

SOIL HARD TO EXCAVATE.

The soil is harder to work than that of the Culebra cut. Culebra is made of a shaly rock, and a single blast may loosen many tons. Here the earth is a conglomerate of sticky clay and gravel. Lowers, which have a consistency something like soft taffy or ham-worked putty, it gives little resistance and some parts have to be blasted over and over again. The stuff is of such a nature that the steam shovels cannot work it until it is loosened, so that the cost of excavation is great.

I have talked with J. S. Dennis, the manager of this irrigation project, and also with the civil engineer in charge of it. He tells me that they have taken out about 4,000,000 cubic yards, when as I figure it, would be just about enough to fill a line of two-horse wagons, at a ton to the wagon, reaching clear around the world. Altogether 20,000,000 cubic yards will have to be excavated before the whole area is under water, and the engineers say that the cost of this will be just about \$6,000,000. It is an enormous undertaking, but it will pay in the increased value of the lands and in the traffic which will come to the railroad through the settling of the country.

The railroad has given over the first 110,000 acres, now ready for settlement to an American syndicate, which has already made big money in selling tracts of spring wheat lands to immigrants from Minnesota, Dakota, Iowa, Illinois and other states. These American agents have colonization offices at Calgary, and they are formulating schemes by which they expect to canvas the irrigated sections of the United States to induce or good farmers to come here and buy these lands as fast as they are opened up.

INTRODUCED BY MORMONS.

The practical possibility of an irrigation of Canada was suggested by the Mormons. There are about 5,000 of them now living on irrigated lands near Lethbridge, between here and the United States boundary. They have established towns, have built up a beet-sugar factory, with a capital of a million dollars, have one flour mill, with an output of a carload a day, and they are, altogether, one of the most thriving peoples of the new Canada.

These Mormons produced more than a million bushels of wheat last year, and they are now shipping flour direct to Japan and China. They come from the irrigated states of Utah and Idaho. The farm on tracts of about eighty acres each, and I am told that they raise two or three times as much on such farms as can be raised in the non-irrigated sections.

During my stay in Canada I have visited this Mormon country. It is reached by the line of the Alberta Railway and Irrigation Company, which is used largely to carry coal from Lethbridge down to Montana. The lands are almost dead flat, and are cut up by canals fed by St. Mary's River.

Seventy-five thousand acres are already under cultivation and the railway and irrigation company above referred to has altogether almost a million acres yet to redeem. The company received a concession for a part of these lands for opening up the coal mines and building the railroad, and looked upon them as fitted only for grazing until the Mormons came in and proposed to irrigate them. As it is, the irrigation works are only five years old, and they have the town of Raymond, which has a population of 2,000, situated in the heart of them, and smaller settlements along the line of the railroad.

I talked with Peter L. Naismith, the manager of the company, and C. A. Magrath, the land commissioner, about its character and possibilities. They tell me

THE LANDS ARE EXCELLENT and that they are being rapidly settled. Mr. Magrath, while not a Mormon him-

self, still stands in the same attitude of £200 a year allowed to members recognized by the Labor Representation Committee. But Mr. Ward did not altogether see eye to eye with this committee in all its ideas, and so he denied himself the allowance of £200 a year.

"I am the poorest man in the House," he said yesterday. "I have a wife and four children, and with my brother, who is a navy, have to support my mother. And beyond the fifty shillings a week that I draw from the union I have nothing to fall back on."

NO TERRACE TEA FOR HIM.

"Yes. If you like to put it so, this is really an injustice. It is impossible without great hardship for a man to be a member of Parliament on this allowance, and maintain his position."

"I am not going to give you the details of my expenditure. Numerous people have asked me how much I spend a week on food, and how much a week goes on train fares and from my home in Wandsworth. But these thrilling details I am going to give to the House of Commons firsthand myself."

"Very soon there will come up for discussion the question of the payment of members, and about that I think I am more qualified than any one to speak. I should be able to tell the House from my own personal experience what a struggle it is for a man to keep up appearances in the House of Commons on £2 10s. a week."

"There are what are called 'the amenities of the House.' Tea on the terrace? No, I am afraid that is not included. There will be no tea on the terrace for me on fifty shillings a week."

STATE SHOULD PAY.

It was here suggested to Mr. Ward that the ultimate goal of Socialism—up to the tenets of which Mr. Ward subscribes—is a fixed minimum wage for everybody. At this the member took-on-Trent laughed.

"That is an old-fashioned idea," he said. "What we maintain is that every man should earn what he is worth, and am worth more to the nation as a member of Parliament than I should be if I were, say, loading wagons."

"Moreover, I can see no reason why, in my present capacity I should be burdened to any particular body for my maintenance. I am doing the work of the State to the best of my ability, and it is by the State I maintain I should be paid."

JOHN BURN'S SALARY.

There was a scene in the House recently when Mr. Claude Hay was howled down for referring to Mr. John Burn's salary.

He asked Mr. Burns to say what was to become of the 34,000 unemployed in the London area who could not get work under the Unemployed Committee, and brought into his speech a statement printed originally in the "Express" to the effect that Mr. John Burns accepted the salary of £2,000 a year, although he had previously said no man ought to live more than £500 a year.

"Withdraw!" shouted the Liberal ranks. "Withdraw!" echoed the Irish.

Mr. Hay started to speak, but volleys of "Withdraw!" mingled with hisses, drowned his words, and for some minutes there was an uproar.

Mr. John Burns, in his reply, showed how he earns his £2,000 a year.

"Between midnight and four a.m. I have been down under the Waterloo arch, and at the Medland Hall, and at other places where the poor congregate, seeing how their lot might be ameliorated and their numbers reduced."

"I daresay I made the remark some time ago that certain men were not worth more than £500 a year. I must have had the hon. member in mind," said Mr. Burns, and Mr. Claude Hay joined in the general laughter.

In his early days Mr. Justin McCarthy, who is seventy-five years old, had a great ambition to become a barrister. The first story he ever wrote was centred round a hero named Parnell.

He said the son got locked in by the accidental closing of the door. The father worked frantically for nearly an hour before he could open the door, and then he found his son in a state of collapse, almost suffocated.

The St. Pancras Borough Council proposes to encourage swimming among the school children of its district by the provision of scholarships in the proportion of one to each boys' and girls' department in each school, tenable for one year. The scholarship will take the form of a free pass for one year to the first-class baths belonging to the council.

An interesting discovery has just been made in Church street, Stoke Newington, during the excavations by the Metropolitan Water Board. On the foundation of the New River Company the water pipes used were made of huge tree trunks, which were hollowed out, and, being pointed at one end, fitted into one another, forming a continuous waterpipe. Many of them were found to be in excellent preservation.

The transport "Ionian" brought home from India, a short time since, upwards of 1,300 troops, including 400 officers and men of the 1st Battalion East Yorkshire Regiment, absent from England for twenty-one years. While the battalion was journeying from Irrawaddy to Rangoon Color-Sergeant Williams fell overboard, and notwithstanding a plucky attempt of Sergeant Rogers to save him, was drowned.

A funeral, unparalleled in the history of Aldershot garrison, took place recently, when the body of Miss Fitzgerald, who died in the Cambridge Hospital, where she was discharging her duties as a military nurse, was buried in the military cemetery with full military honors. The coffin, with the Union Jack and some beautiful flowers, was conveyed on a field gun, six members of the Royal Army Medical Corps walking beside as pall-bearers. The band of the corps went first, playing funeral marches.

An incident occurred in London recently which would have shocked the military officer of a century ago. A battalion of the Irish Guards, led by two mounted officers, was marching along Oxford street to the merry accompaniment of a life and drum band. Suddenly, with a flourish of drumsticks, the music ceased, and for a little time the soldiers tramped along with a solemn and steady tread. A boy came up a side street whistling the song of the moment, "My Irish Molly, O." A soldier in a fit of abstraction joined in. The refrain was immediately taken up by the others, and it flew to the front and rear ranks, until presently the whole battalion marched to its own whistling accompaniment.

SAYS MARQUIS IS INSANE.

Is Kept Under Guard by His Bride of Ten Months.

A sensation in London is the detention of the Marquis of Townshend by his bride of ten months, who declares the marquis is not mentally sound and keeps him under lock and key. The marchioness is a pretty blonde, the daughter of Thomas Sulherst, a barrister, who is said to have paid the marquis \$135,000 for making his daughter a marchioness. The marquis' mother and friends are trying to have him released from the restraint his wife has placed on his movements, and secure for him the freedom of association he desires with a man friend for whom he has great affection. They say he was cruelly treated by his wife on the honeymoon—that the was locked in his room and subjected to other indignities. The marchioness, on the other hand, while not denying that he was kept in his room, says he "was in the seventh heaven" during the honeymoon trip. The marquis is 38, but has the physique of an underfed boy of 12. He had long been on the matrimonial market, when he fell into the hands of some speculators, who, it is said, arranged for the marriage with the barrister's daughter. He is a nephew of the Duke of Fife.

WORKED FOR PENNY AN HOUR.

What a London Woman Got on an Army Contract.

The sensational story of Mrs. Thorogood, the Lambeth woman who told the local guardians that she "finished" Volunteers' trousers, supplied to the War Office by a contractor, for payment which averaged less than a penny an hour, was reported to the guardians to be true.

The case has been mentioned in the House of Commons, and the Secretary for War has promised to make inquiries about it.

Mrs. Thorogood applied to the Lambeth Guardians for out-relief, on the ground that she was unable to earn a living wage, and told the guardians that she was paid 2½d. for "finishing" each pair of trousers, the work occupying three hours per pair. She had to provide the necessary thread and silk out of the money she earned.

Mr. Fielder, who has investigated the circumstances on behalf of the guardians, stated at a meeting of the Board recently that he had seen a record of the woman's work, and found what she said was correct.

He said that for years she had risen at 3 o'clock in the morning, worked until 8, and then gone to the factory, where she has been engaged until night. Working all those hours she has only been able to earn between 8s. and 9s. a week.

FIGHTING "GREEN MONSTER."

Swiss Have Awakened to Dangers of Absinthe Drinking.

Absinthe has been responsible during the past few months for so many terrible crimes in French Switzerland that an active crusade is being made to prohibit the sale of the liquor.

In the Cantons of Vaud and Geneva over 100,000 signatures have been obtained to a petition urging the Government to suppress the distilleries in the Canton of Neuchatel, and make the sale of the "green monster" an unlawful act.

Most of the absinthe is sold in small cafes at 2 cents a large wineglassful, and is made from chemicals and raw alcohol. Good absinthe is the same as good whiskey, but the terrible combination of raw chemicals and raw alcohol can be made very cheaply, and the poor people, on account of its low cost, prefer it to wine and beer.

The Canton of Neuchatel depends for its revenue chiefly on the manufacture and sale of absinthe, and naturally in this quarter there is much opposition to the crusade.

Not only the men, but the women, and to a less extent the girls and boys, have developed the absinthe habit, which threatens to sap the manhood of the Swiss in the French Cantons.

INSTRUMENTS OF TORTURE.

Birmingham Still Produces Them—Idols Another Product.

One of the most peculiar trades imaginable is that of the manufacturer of instruments of torture. They are manufactured in large quantities in Birmingham and other towns, and they can be bought in London. In the catalogue of the firm who trade in London can be found the prices of disciplines of knotted cords and steel, of hair shirts, and of crosses with protruding spikes. Although such things in the twentieth century may sound strangely mediaeval, yet the trade in them proves that there is a decided want for such articles.

Birmingham also carries on the peculiar trade of idol-making. Large quantities of idols are made for sale in Africa. In addition there is the manufacture of man-traps, those terrible engines 7½ inches long from end to end about 3 feet high. These will catch a man above the knees, and it requires two men to set the traps owing to a strong spring which is fixed at either end. Any person caught in one of these traps is naturally held a close prisoner.

BRITISH ARMY SCANDALS

CULPABLE WASTE IN THE WAR IN SOUTH AFRICA.

Hundreds of Thousands of Pounds Went to Contractors by Repurchase.

ASTOUNDING revelations of army waste, muddle and inefficiency, following on the close of the war in South Africa, by which hundreds of thousands of pounds have been lost to the nation, are made in the report of the Comptroller and Auditor-General on the British army appropriation account for 1904-5.

At the outset the Comptroller states that similar cases to those mentioned in his last annual report have been noticed, in which surplus supplies sold to contractors and resold by them to other contractors have been repurchased from the latter by the army at considerably enhanced prices. These cases are to be brought under the notice of the Royal Commission now enquiring into the system of sales and repurchases, and therefore he does not consider it desirable to give details of the cases.

The revelations, however, are sufficiently remarkable without these details, and a few of the cases are given below.

LOSSES BY REBATES.

Duty-paid supplies, purchased from the army in the Transvaal by Messrs. Meyer, Limited, were resold to the army in the Orange River Colony, also duty-paid to that colony. A cheque for £2,999 0s. 6d. was paid to Messrs. Meyer by the Director of Customs of the Orange River Colony, in January, 1904, as Customs rebate. This cheque, it is stated, should have been paid to army funds, Messrs. Meyer being only entitled to a rebate from the Transvaal on exportation. Action is being taken to recover the amount due to the army.

A contractor for bread supplies in the Orange River Colony received Customs rebates on the imported flour used to the amount of £955 4s. 11d., which should have gone to the army. In another instance the contractor was allowed to import duty free flour which was sold to the army at duty-paid prices. The loss to the army in this case was £1,208 12s. 6d.

A double payment of £800 has apparently been made to Mr. J. Noreen for cattle captured by him when employed in the Intelligence Department in South Africa. Efforts to recover this sum have proved unsuccessful, and the treasury, refusing to sanction the extra expenditure, have left the responsibility for the transaction to the Army Council.

WINE UNDER-PRICED.

As many as 68,953 bottles of port wine, stated to be of defective quality, were sold at 15s. a dozen, instead of at the contract sale price of 26s. This transaction is one of the most remarkable recorded.

It appears that certain contractors purchased the whole of the port at Pretoria and Maitland for 26 shillings a dozen. Then they produced expert opinion as to defective quality of unlabeled bottles, and on September 3, 1903, offered the lower rate of 15s. a dozen for such wine. Their offer was not then accepted, and they were instructed to return the wine to Pretoria.

On September 10 the General Officer Commanding in South Africa cabled to the War Office for authority to sell 1,200 cases of so-called port wine of a very low grade, for which he had an offer of 15s. a dozen in Johannesburg, and stated that he was having the wine analyzed and inquiries made as to its source of supply.

The War Office cabled approval, and on the following day the contractors were informed that their offer of September 3 was accepted, although the report of the analyst had not then been received. This report, dated October 7, stated that the wine was genuine port and fit for hospital use.

JAPS SELF SACRIFICE

CHANGES WAR BROUGHT IN WOMEN'S HAIR-DRESSING.

Enormous Sums Have Been Subscribed By These Sturdy Little People.

Of all her earthly possessions a Japanese woman most values her hair. It is her crown, her veil, the mark of her womanhood, that which tells her and others what she is. The country title for the house mistress is "O Kami San," "she of the honorable hair," and next to the binding of the obi, which is the mark of modesty, nothing is of such importance as the care of the hair, few sacrifices so great as the relinquishment of the proper dressing thereof.

As for dressing her hair herself, no Japanese woman can do that, and all, except the most miserably poor, have been in the habit of paying 30 sen (14 sen) a month to the hair-dresser to take care of it for them. Since the beginning of the war this sum has been almost universally laid aside to hand over to the war fund, and, coming regularly from millions of women, has amounted to a very respectable whole.

The result has been a curious change in the appearance of these sturdy little patriots, says Mrs. Hugh Fraser in the London Times. When I was in Japan before I hardly ever saw a woman with her hair down; now there are hundreds in the streets, their silky locks being merely turned back from the forehead with a comb and hanging down in a beautiful mantle.

FAR BELOW THEIR WAISTS.

The methodical self-sacrifice practiced by all classes during the war has caused the amount furnished by private subscriptions to attain an enormous figure. The multi-millionaires, Iwasaki, the Mitsui family and other great financiers and manufacturers have given nobly out of their vast revenues. Banking corporations have done the same.

The great nobles have done as much in their way, but at the magnitude of their contributions, bought with the sacrifice of inestimable heirlooms, the world can only guess. The stone walls, iron shuttered storehouses, built well away from the palatial home, so as to avoid the rise of fire, yet near enough to be under the watchful eyes of master, steward and stout retainers—these have given up the hoarded beauties and riches of centuries.

What it must have cost the silent pride of the grim Japanese grandee to have the unique kakemono unrolled for the dealer's inspection, to look over for the last time the incredibly exquisite gold articles of some fifteenth century Princess's dressing table, the storied blade won by a warrior ancestor from a conquered enemy—what shades must have hovered round, what pictures must have passed before the eyes of the descendant who drew these treasures from their hiding places and gave them over to the modern creaking dealer—to sell—for Japan! If the price of the gift be what it costs the giver the Japanese nobles have passed all computation in the offerings they have

MADE FOR THE WAR.

No one will ever know the whole tale of private endeavor, private sacrifice, which has gone to make up the great result. Poor old women who had lost an only son in the field brought their tiny savings. "Let it go to the boy's comrades," they said, "it will help them to fight a little longer." The fisherwives and shell gatherers at Enoshima collected great bundles of the seaweed which the Japanese make into succulent soup and brought it to the district commissariat office for the soldiers. Tobaccoists, great and small, sent large periodical provisions of cigarettes; the biscuit makers—their trade is one of the most flourishing in Japan—contributed

SUNLIGHT SOAP

Wash oilcloths and linoleums with warm water and Sunlight Soap, rinse clean and wipe dry. The colors will be preserved and the surface unharmed.

Common soaps fade the colors and injure the surface. Sunlight Soap cleans, freshens and preserves oilcloths and linoleums.

Sunlight Soap washes clothes white without injury to the most delicate fabrics, or to the hands, for it contains nothing that can injure either clothes or hands.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way (follow directions).

Equally good with hard or soft water.

LEVER BROTHERS LIMITED, Toronto

Grand Prize Competition

A FOUR-YEAR UNIVERSITY COURSE,
A TRIP AROUND THE WORLD,
OR \$1,000 IN COLD.

In addition to these prizes there are many others. Every competitor can win on a cash commission will be given on every subscription taken, every one being paid for his or her work.

THE BUSY MAN'S MAGAZINE is unlike any other, its contents are a careful selection from the best that appears in the leading publications of the world. It is published by the proprietors of The Canadian Grocer, Hardware and metal, Canadian Machinery, The Dry Goods Review and other successful papers—and who are Canada's leading publishers. Subscriptions are not hard to secure—a bank clerk in Ontario took 25 in one week by writing to his friends.

"THE BUSY MAN'S MAGAZINE is the best I have ever had the pleasure of reading." B. W. WYNN, Editor Yorkton Notary-At-Law. Send postal for particulars of competition to our nearest office. DO IT NOW. It may be a glorious change in your career.

on the following day the contractors were informed that their offer of September 3 was accepted, although the report of the analyst had not then been received. This report, dated October 7, stated that the wine was genuine port and fit for hospital use.

It has since been ascertained that the wine had been sent out from Woodwich, where it had been passed by approved trade experts, and it is stated to have been superior to that used in civil hospitals in London.

ORDERS IGNORED.

Thus, though the War Office had only given permission for 1,200 cases, or 12,000 bottles, to be sold at the lower price, the whole 68,953 bottles were actually sold at that price. The War Office, moreover, were not aware that the offer of 15s. a dozen came from the contractors who had already agreed to pay 26s. for the identical wine.

Under the heading of sales that realized less than the amount of special customs levied some extraordinary transactions are revealed.

For instance, £2,519 14s. was paid in duty on tobacco which was sold for £708 13s. 4d. The loss to the army was therefore £1,811 0s. 8d. The following are some further examples: Jam, duty paid, £5,054 5s. 4d.; sale value, £1,642 16s. 16d.; loss to army, £3,411 8s. 10d. Port, duty paid, £4,596 16s. 0d.; sale value, £4,007 17s. 10d.; loss to army, £588 18s. 2d. Chillies, £16 0s. 6d.; sale value, £1 0s. 2d.; loss to army, £12 0s. 4d.

In the report of the comptroller on the store accounts of the army it is announced that all the emergency rations at stations at home and abroad have been condemned, and are to be destroyed. The total number is 360,000 at home, and about 50,000 at stations abroad, the original cost being about £23,000. They have been in store more than three years.

KOREAN PATRIOTISM.

When the Japanese protectorate over Korea was declared recently many Koreans grumbled, and some even went the length of committing suicide in order to mark their displeasure. According to the Korea Daily News the Emperor has conferred posthumous honors upon several of these suicides. One of the misguided men, who poisoned himself with opium was a minor official of the educational department, but the Emperor raised him to the rank of vice-minister of education, and an official of that department was despatched by the Emperor to inscribe the title upon his coffin. Another man, a private in the army, who committed suicide at the same time and for the same reasons, had also had posthumous promotion conferred upon him.

which the Japanese make into succulent soup and brought it to the district commissariat office for the soldiers. Tobaccoists, great and small, sent large periodical provisions of cigarettes; the biscuit makers—their trade is one of the most flourishing in Japan—contributed tons of their wares, the blanket weavers did the same, those who could not give any money gave in kind, generously, to their own deprivation.

The little girls made thousands of the white caps with red crosses, a familiar sight now, as the invalids are moved, a hundred at a time (each in his separate jirikisha, with the coolie extra well dressed to do the heroes honor), from one depot or hospital to another. The object of which the invalid is most proud and which will go back with him to his home to be treasured by his descendants is that flat white cotton cap

WITH THE RED CROSS ON IT.

Why is the cap such a treasure? Because the clever Japanese surgeons, hurrying over the field piled with dead and dying, fearing to miss some sufferer in the darkness and the confusion, bethought themselves of inventing a sign which the advance party who went ahead to find those in need of help could place on such to distinguish them from the poor fellows that were past it. Whenever the scouts found a man still breathing they dropped the big white cap on his head—or on his body if his head were laid open—and wherever the surgeons saw this sign it will shine out crudely and clearly even on a dark night, they knew there was a man to be tended, a life to be saved for the country.

WHISTLE TELLS WEATHER.

How California Fruit-Growers Are Warned of Frost.

In some parts of the United States, where the weather conditions are of vital importance to the fruit-grower, the Weather Bureau has endeavored to reach everybody interested by means of whistle signals. A code has been devised, and where used locally it is published in the newspapers, so that at a given hour any one may learn of the latest weather forecast without taking the trouble to go out of his way. A preliminary blast of from fifteen to twenty seconds' duration is first sounded at a pre-determined hour to attract attention. Weather conditions are indicated by combinations of long blasts, and temperature conditions by short blasts. The long signals are from four to six seconds' duration, and the shorter ones from one to three.

GEO. WEGENAST, Manager.

DIRECTORS' REPORT.

INSURANCE ACCOUNT—The volume of new business was 3,637 Policies for \$6,014,576, being an increase over 1904 of 185 Policies for \$966,408. With the exception of \$65,000 written in Newfoundland, the new business was all written within the Dominion of Canada. The total amount of assurance in force is \$44,199,954 under 29,788 policies, being an increase over 1904 of \$3,782,964.

INCOME—The total income for the year was \$1,946,518.91, derived from Premiums, \$1,547,506.49; Interest and Rents, \$407,583.04, and profit from the sale of Real Estate, \$1,448.59.

PAYMENTS TO POLICYHOLDERS—The payments to Policyholders consisted of Death Claims, \$231,924.10; Matured Endowments, \$159,450; Purchased Policies, \$4,168.88; Surplus, \$87,928.85, and Annuities, \$9,422.56; being a total of \$552,914.19. The Death Claims which fell in during the year amounted to \$269,214, and though slightly in excess of those in the preceding year, were very light, and much below the expectation.

THE EXPENSES AND TAXES were \$348,491.76, and Profit and Loss \$1,519.18, making a total of \$350,010.94, or 17.8 per cent. of the total income.

ASSETS—The cash assets at the close of the year were \$8,846,658.42, and consisted of mortgages, \$4,265,533.86; Debentures and Bonds, \$3,245,401.89; Loans on Policies, \$988,670.39; Premium obligations, \$25,810.60; Real Estate, including the Head Office building, \$56,281.08, and cash in Banks and at Head Office, \$261,960.60. Adding to this the due and deferred premiums, \$272,121.08, interest and rents due and accrued, \$177,312.65; the total assets amount to \$9,296,092.15. It will be observed that, as in the past, we still continue to invest our funds in securities of a non-speculative character, and that we hold them on our books at their net cost.

The interest on our investments has been very well met, especially in the city of Winnipeg, where on mortgages amounting to \$745,555, the interest in arrear at the close of the year was only \$227. In the province of Manitoba and the West generally there is a tendency to defer payment of instalments of principal on account of the desire to purchase more land. All payments, both for interest and principal, have, however, been very well met, and were quite equal in that respect to the previous year. In Ontario and elsewhere the Mortgage collections have been exceptionally good, and at the close of the year there was interest in arrear of only \$16,317, the largest part of which fell due in the closing days of the year, and has since been paid. The active demand for money during the year kept our funds well employed at good rates of interest. The average rate realized on our funds was 5.1 per cent.

THE LIABILITIES were again computed on the same standard as in former years, viz.: Combined Experience Table with 4 per cent. interest for all business up to January 1, 1900. From that date to January 1, 1903, on the Institute of Actuaries' Table, with 3½ per cent. interest, and thereafter on the same table with 3 per cent. interest. The reserve computed upon this standard of valuation amounts to \$8,210,064.24, and the total liabilities are \$8,342,091.03. The Surplus over all liabilities on the Company's standard of reserve, as above mentioned, is \$954,001.12, being an increase for 1904 of \$181,928.25. On the Government standard of valuation our surplus would be \$1,263,905.

On behalf of the Board, R. MELVIN, President.

Send to Head Office, Waterloo, Ont., for booklet giving proceedings at Annual Meeting, March 1st, 1906, list of claims paid, list of securities held, and other valuable information.

W. H. RIDDELL, Secretary.

TURNED TO STONE.

Men Afflicted with a Rare Disease Became Petrified.

There has just died at the hospital of Ueberlingen, on the borders of Lake Constance, in Switzerland, a stone man. His name was Brend. He was afflicted with the very rare disease known as "myositis ossificans."

The extraordinary feature of this disease is that ossification gradually sets in all the muscles and tissues of the body, the disease invariably ending in death.

Brend was 66 years of age. He was the son of a well-to-do farmer of Baden-Baden. He was first afflicted with the disease at the age of 17. His feet first became hard and almost as heavy as stone. Gradually the dread

disease rose and ultimately reached his chest, hardening the lungs. Up to a few years ago Brend was able to read and write, but he had to give up this occupation when his arms and legs became afflicted and he was no longer able to move them. The tissues of his throat were petrified but he was able to speak, though his voice assumed a curious metallic sound.

Although obliged to remain riveted to a sofa chair, he always displayed the best of humor and was fond of making jokes. He was known throughout the district as the petrified man.

The petrification ended by reaching the brain, and Brend has just died, after nearly fifty years of suffering.

King Edward made his first public speech at Newcastle, when only ten years old.

Miss Twicewedd—Bertie, I've brought you a new papa!
Bertie—Gee! Is that the best you could do? You ought to have got double trading stamps with that!

The Taking Cold Habit

The old cold goes; a new one quickly comes. It's the story of a weak throat, weak lungs, a tendency to consumption. Ayer's Cherry Pectoral breaks up the taking-cold habit. It strengthens, soothes, heals. Ask your doctor about it.

The best kind of a testimonial—

The contrast in ability, grasp and
comprehensive understanding of public
affairs long observed between the
upper and lower branches of the
Legislature, has become
more marked since they have
been joined. Defects and weaknesses
of the former in the irresponsibility of
action, and the lack of insight into the
policy which the Province is made
responsible for, are now apparent.

THE BANWELL CASE.

In the Banwell case the public seems

mineral wealth adjacent for the benefit
of the people. This is the way to prove
the possibilities of Government owner-
ship. Col. Matheson is not a good
borrower when he enters up that road
and its wealth of land, timber and
minerals as a deficit.

Toronto Star.

Pirates have seized near Canton a
launch owned by the Standard Oil

Brockville Times.

Let us hope that it is the intention
of the Government to include in its
contemplated reform of our educational
system a remedy for the excessive
home work now imposed upon our
children by the present system. It is a
constant and sincere complaint, by
parents that the public school children
and high school pupils have too much
home work, and that their immature
brains and bodies cannot stand the
strain.

Twenty Years Ago.

I've wandered to the village, Tom
and tried to find the tree
On which we carved our names one
day when we were happy, free;
But there was nothing doing, Tom;
the tree'd been stricken low
By the village lumber company—
since twenty years ago.

The little old red schoolhouse, Tom,
that stood upon the hill,
Is gone, and in its place a sign
"reads—Try a Purple Pill."
Where once stood gnarled old apple
trees, with fruit a-bending low,
They've built a modern brewery,
Tom—since twenty years ago.

Do you remember Geraldine—she of
the sunny hair?
None in the village, Tom, was half
so sweet or fair.

I lost my heart completely, Tom,
and tried to be her beau—
She's fat, red-faced, six children
Tom—since twenty years ago.

I wandered to the village green,
where we, when heedless boys,
Played one-old-cat and pull away and
knew so many joys;
And, Tom, that green is on the bum;
it really grieved me so
To find potatoes growing there—since
twenty years ago.

'Tis sweet to dream of all those things
that we in boyhood knew—
The school, the green, the meadows
where the fragrant blossoms
grew;

And, Tom, I'm not a knocker; but
don't pay our hard-earned dough
For railroad fare to visit scenes of
twenty years ago.

THE CENTAUR COMPANY, NEW YORK CITY.

poured volley after volley into the
room where the children of the friendly
Sioux daily were assembled.

It was not the fault of Crazy Wolf
that on that day there was not a
slaughter of the innocents. A teacher
had seen the feathered heads showing
among the willows by White Clay
creek and, taking the alarm, had hur-
ried the children to the cellar.

The raiding band went northward.
There was cavalry at the post to take
up the pursuit, and the fugitives suc-
ceeded in reaching the main body of
Indians, who by this time were sur-
rounded by the troops of General Miles
and were being gradually forced into
the agency.

Crazy Wolf, when he saw the sur-
render of his brethren was coming,
mounted his pony and made for the
Bad Lands. He foresaw the end of the
uprising and the complete subjugation
of his people, and he laid it at the doors
of the tepees of the Sioux who had re-
fused to join the braves on the war-
path.

Crazy Wolf made up his mind to kill
Little Scar. He nearly starved in the
Bad Lands, and his pony was dead. A
week after the surrender he started for
the agency on foot. His ammunition
was gone, and he had nothing but his
knife. He ate willow bark and roots.
Hunger took his bodily strength, but
his heart purpose was unweakened.

Crazy Wolf, starving, lay on the bank
of the White Clay creek. The tepee of
Little Scar was only 300 yards away.

Albert College Belleville,

THE BANWELL CASE.

In the Banwell case the public seems to have been guided by its heart rather than by its head. The offence has been regarded as a contest between a pair of young lovers and a bank, and some people have almost sorry that the bank won. Grave business men have been heard to remark, in a regretful tone, on the folly of the young couple going to an island under British jurisdiction and staying there long enough to be caught.

The sentence given by Judge Winchester was not severe, and made due allowance for the youth of the offender. And now that it is over and that newspaper comment cannot prejudice the case, it may be said that this public attitude of humorous toleration is hardly wise, nor in the long run kind to young men in Banwell's position. It is not wise to urge the smallness of his offence in his defence, and virtually to say that if a young fellow is receiving \$650 a year and is very eager to marry there is nothing very bad in his helping himself to \$40,000. Perhaps the salary was too small. But from time immemorial there have been young men whose means would not allow them to marry, and there always will be such cases. There are hundreds, perhaps thousands, of teachers much older than Banwell and earning much less than \$650 a year. It is well to try to bring salaries up to a higher level; it is not wise to encourage the notion that small salaries may be eked out by methods that end in a prison cell.

AN OLD INDIAN FEUD

THE WAY IT WAS ENDED BY THE ACT OF A LITTLE CHILD.

Story of the Long and Bitter Enmity Between Crazy Wolf and Little Scar. The Incident That Paved the Way to Peace.

Crazy Wolf was a warrior of the Sioux nation who held to all the savage traditions of his race. For years he refused to receive rations from the hands of the whites, and this marked him singular among all the Sioux. His deadly enemy was Little Scar, who had made lasting peace in his heart with the whites and who had yielded little by little to the allurements of civilized living.

The enmity of Crazy Wolf and Little Scar dated from the day of the great battle with the Pawnees.

When the remnant of the stricken Pawnees had turned to fly Crazy Wolf and Little Scar quarreled over the right to take a scalp, and a hand-to-hand combat ensued. The chiefs parted them and said that neither must die, for the nation had need of all its men. Though the hands of Crazy Wolf and Little Scar were stayed by the chieftains, hatred still lived in their hearts.

It was ten years after the battle with the Pawnees and at the Pine Ridge agency, where a portion of the Sioux had been gathered, the government erected a schoolhouse for the Indian children. Instantly a division occurred between the fathers of the tribe. One-half of the warriors wished to send their little ones to the school. The other half declared that the teaching of the whites should never have place in the minds of their children. The children of Little Scar went to the school. The children of Crazy Wolf were kept in the wigwam.

Runners came to Pine Ridge from Standing Rock and the Rosebud. They told of the coming of the Messiah, that the buffalo were returning and that if the southern Sioux would put their ears to the ground they would hear the thunder of the hoofs of the oncoming herd.

One-half of the warriors at Pine Ridge were seized with the Messiah craze. They danced the ghost dance and put on the ghost shirts. The one-half stampeded from the agency, and with it went Crazy Wolf, as savage in heart as he was when he fought the Pawnees on the frontier of Nebraska. Little Scar stayed at the agency.

One day after the battle of Wounded Knee had been fought a band of twenty Sioux braves broke away from the main body for the sole purpose of raiding Pine Ridge agency and killing the children who were gathered in the schoolhouse—the children of their brothers who had succumbed to the white man's ways. In the band was Crazy Wolf, his heart full of the lust of killing.

The warriors came within sight of the schoolhouse. It stood on a bluff and on one side was absolutely unprotected. Crazy Wolf knew the location of the room in which the little ones gathered daily at their lessons. The mounted warriors made a headlong rush down the valley skirting the ridge, and as they whirled by the school they

Crazy Wolf, starving, lay on the bank of the White Clay creek. The tepee of Little Scar was only 300 yards away. Crazy Wolf was famished, but he lay there in the bushes waiting for night and vengeance. He looked down to the water's edge, and there he saw a little girl with a willow basket full of food. The little one looked up and saw the famished eyes of the warrior. She smiled at him and held out her basket. Crazy Wolf knew his strength was going fast. It might not last him till the hour of revenge. He ate the proffered food. The child was molding clay. Suddenly she turned and offered Crazy Wolf the model of a peace pipe. "You have eaten," she said; "now smoke."

Crazy Wolf took the pipe and blew an imaginary cloud of smoke away from his lips. The little one smiled at him again.

"Whose child are you?" asked Crazy Wolf.

"The child of the great warrior Little Scar," was the answer.

Crazy Wolf had eaten the bread of Little Scar and had smoked the pipe of peace. He had never broken a tradition of the Sioux race.

Crazy Wolf walked into the agency, and a little child was leading him.

For Thin Babies

Fat is of great account to a baby; that is why babies are fat. If your baby is scrawny, Scott's Emulsion is what he wants. The healthy baby stores as fat what it does not need immediately for bone and muscle. Fat babies are happy; they do not cry; they are rich; their fat is laid up for time of need. They are happy because they are comfortable. The fat surrounds their little nerves and cushions them. When they are scrawny those nerves are hurt at every ungentle touch. They delight in Scott's Emulsion. It is as sweet as wholesome to them.

Send for free sample,

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

As a General Rule, They Came From the Smaller Countries.

Portugal is a small country, with a land area one-third less than the state of New York, but it has turned out in its time celebrated navigators, Cabral and Da Souza among them.

It is a somewhat peculiar circumstance in the history of ocean navigation that the chief navigators of Europe have usually been natives of minor kingdoms and without the advantages which would naturally accrue to a representative of one of the larger governments.

Christopher Columbus, as every schoolboy knows, was a native of Genoa at the time when the Italian peninsula was subdivided among numerous petty governments. John Cabot was a Venetian, who sailed in the service of England, as Columbus had sailed in the service of Spain. Amerigo Vespucci was a Florentine, who sailed originally in the service of Spain and afterward transferred himself to the Portuguese service and then went back to the Spanish service for a second time.

Vitus Bering, after whom Bering strait was called, was a Dane by birth, who served under the naval flag of Russia. Magellan, after whom Magellan strait was named, was a native of Alemejo, in Portugal, and was the first to complete the circumnavigation of the globe, in 1522.

Verazzani was a Florentine, whose voyages of discovery were undertaken under the protection of the flag of France. Hendrik Hudson was an Englishman, and it seems surprising to many persons in this day familiar with the pre-eminence of England as a maritime nation that he should have been in the service of the government of Holland when he discovered Manhattan Island.

Bottles.

Ancient bottles of glass, stone and metal have been found in many parts of Europe, Asia and Africa. Perfume bottles of glass have been discovered in great numbers in the tombs of wealthy ladies of Egypt. Many bottles, tumblers and other drinking vessels have been dug from the ruins of Pompeii. The most common bottle of the ancients, however, was of leather, the skin of a calf, goat or ox being taken off the carcass with as few cuts as possible and made into a receptacle for holding water or wine. The largest glass bottle ever blown was made at Leith, in Scotland, in 1747-48. Its capacity was two hogsheads.

Bad Habit.

"So you lost your position?" we ask of our young friend, who has demanded our sympathy.

"Yes; the firm told me I would have to quit."

"What reason was given?"

"I smoked cigarettes."

"Why, that seems hardly a sufficient reason for such drastic action."

"Yes, but I was smoking the boss' cigarettes, and he caught me at it."—Judge.

Matrimonial.

Three Germans were sitting at lunch recently and were overheard discussing the second marriage of a mutual friend when one of them remarked: "I'll tell you what. A man what marries de second time don't deserve to have lost his first wife."—Life.

"The highways of literature are spread over," says Holmes, "with the shells of dead novels, each of which has been swallowed at a mouthful by the public and is done with."

CORSON'S COUGH CURE

By Suse Clements Willis

Copyright, 1906, by Beatrix Reade

It was not the first time that Corson had wished Grandma Bradley never had been born to leave a recipe book to her descendants. As a boy his earliest recollections were of vile tasting messes recommended in Grandma Bradley's book for various infantile ills, but even then he had never hated the time worn volume as he did now that he was asked to carry a whole quart of her invaluable cough sirup to his mother.

It was very good of Aunt Betsy, who was the custodian of the precious volume and compounder of its prescriptions, to send the gift, but a whiskey bottle done up in a newspaper does not match a brand new winter overcoat, and there was certain to be some one on the train to recognize him and pass the story on.

For a moment he contemplated sending the bottle by express, but the appearance of the train prevented that, and, assuming as much dignity as his burden would permit him, he clambered aboard.

There was no parlor car on the suburban train, and the smoker was filled with laborers returning from their day's work up the road. Corson hated the smell of a pipe, let alone a half hundred, and he beat a hasty retreat to the next car.

He started forward with a word of greeting as his glance took in Eunice Barbour; but, to his surprise, that young woman favored him with a glance so chilling that he was glad to sink into the nearest seat.

He could tell from her glance that it was the bottle which was responsible for the cut, but he could not imagine Eunice ignoring him because he carried a package done up in a newspaper. He wondered what sudden freak had induced her action.

He was still puzzling over the matter when a man across the way leaned forward.

"Let's have a swig, partner," he shouted hoarsely. "I ain't had one in an hour."

Corson tried to pretend he had not heard, but his bibulous traveling com-

panion, and he leaned a little closer.

"Surely I should have the right to defend myself," he pleaded. "I am ignorant of my offense."

This time she noticed him. With flashing eyes she turned to face him. "If you persist in speaking to me," she said firmly, "I shall appeal to the man in the car to rid me of your very unpleasant attentions."

In her intensity she spoke more distinctly than she knew, and a brawny hand shot across the aisle and shook Corson's shoulder. "See here, young fellow," warned a hoarse voice. "You quit mashin' or off you go, and I won't be particular as to whether we are at a station when you get off, either."

Corson looked helplessly at the girl, but her face was adamant except when she thanked her companion with a smile. It is evident that there was no appeal to her, and Corson wisely concluded to let the argument wait until a better time.

It was hard, though, to sit quietly beside the girl he had proposed to five days before and be denied even the right to make an appeal. He could imagine nothing except his appearance

with the bundle, but surely Grandma Bradley's cough medicine was innocent enough in appearance if not in taste.

He glanced across the aisle. The giant appeared to be sleeping, but as Corson turned toward Eunice the man roused to sudden watchfulness, and Corson skillfully changed his notion to suggest that he was merely trying to look out of the window. The man was suspicious still, but not belligerent, and for the rest of the trip Corson kept his eyes fixed on the bell rope and betrayed no interest in his companion.

He was hoping there would be an opportunity at the station after the giant had gone his way, but the giant showed a very evident intention of squirling Miss Barbour to the car, and they moved down the station platform in single file, Eunice first, Corson following and the giant bringing up the rear, ready to pounce upon Corson at the slightest chance.

Corson boarded the same car as did the girl, and the giant swung himself on to the back platform. It was evident that he was thorough in whatever he undertook, and Corson was not anxious to give him an excuse. Corson was not a coward, but he knew how little chance he would have against a man who quite evidently was used to rough and tumbles, so he sat on the edge of the seat and stared at the ceiling, while his busy brain worked at several problems, all looking toward an immediate understanding with Eunice. They had had a quarrel once before, and he had been made miserable for days. He was resolved to end this as quickly as possible and to that end followed her off the car when her street was reached.

If he had hoped to escape his escort he was mistaken, for the giant got off, too, and in the same order as at the station they proceeded down the street. Half a block along the Barbours' big Newfoundland came rushing up the street to welcome his mistress and, perceiving a friend in Corson, threw his huge bulk against that young man.

There was an exclamation as the brute dislodged the bottle in Corson's arms, and the dog went flying up the street alarmed at the noise.

At the sound Eunice turned, her face flaming with anger, in belief that Corson had struck the dog, but the bottle at his feet told its own story, and she glanced curiously at the dark, viscous fluid slowly creeping across the sidewalk. There was a familiar odor in

NERVOUS DEBILITY CURED

Exhaustion and indigestion are the cause of more sorrow and suffering than all other diseases combined. Aversion to the victims of vicious habits on every hand; the pale, pinched face, dark circled eyes, stooping form, stunted development, listless, melancholic countenance and timid bearing, proclaim to all the world his folly and lead to his ruin. Our treatment positively cures all weakness by overcoming and removing the effects of former indiscretions and excesses. It stops all losses and drains and quickly restores the patient to what nature intended—a healthy and happy man with physical, mental and nerve powers complete.

For over 25 years Drs. K. & K. have treated with the greatest success all diseases of men and women.

If you have any secret disease that is a worry and a menace to your health consult the established physicians who do not have to experiment on you.

We guarantee to cure Nervous Debility, Blood Diseases, Eruptions, Venereal, Kidney and Bladder Diseases. Consultation Free. If unable to call, write for a Question Blank for Home Treatment.

DRS. KENNEDY & KERGAN, 48 Shelby Street, Detroit, Mich.

HEART DISEASE

RELIEVED IN 30 MINUTES

AND THAT IS NO IDLE STATEMENT TO CATCH THE UNWARY, BUT A THOUSANDS OF TIMES OVER PROVEN AND VOUCHERED FOR FACT—AND THE MYSTERIOUS POWER OVER THIS DREADED DISEASE LIES IN THE FORMULA OF

Dr. Agnew's Cure for the Heart

A cure that has stepped to the bedside of a sufferer in the clutch of death. A cure that has unloosed the grip and stopped the pain in 30 minutes and gently led the heart-wracked soul out from the darkness and despair to the brightness and happiness that comes to one whose heart beats true, whose blood tingles with life and vigor. Dr. Agnew's Cure for the Heart is not heralded as a miracle worker, but it has many miraculous cures to its credit.

Weak heart—weak blood—weak nerves travel hand-in-hand, and you find the symptoms in such sensations as palpitation, fluttering, shortness of breath, weak and irregular pulse, smothering spells, chilly sensations, fainting spells, swelling of feet and ankles, weariness, tired feeling; all these presage heart disorder and you cannot afford to neglect them. Dr. Agnew's Cure for the heart is a tried remedy—the sure remedy—the quick acting remedy—a real life saver.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIR,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

"YOU QUIT YOUR MASHING OR OFF YOU GO."

panion was not to be denied. "Go ahead. Be generous," he implored. "You know how it is yourself."

His voice rang through the car, and the contrast between Corson and the other was too much for the rest of the passengers. They shouted with glee, all except Eunice, who rose with white lips and made her way to the next car. Corson stood the chaff as long as he could, but at last the man's persistence won, and, with flaming face, he followed the girl.

There was a vacant seat beside her, and Corson took it. She moved over to be as far distant as possible, but it is not easy to be exclusive when sharing a narrow seat. Neither could she evade Corson's low spoken words.

"What have I done?" he pleaded.

A TRULY IDEAL WIFE HER HUSBAND'S BEST HELPER

Vigorous Health is the Great Source of Power to Inspire and Encourage—All Women Should Seek It.

One of the most noted, successful and richest men of this century, in a recent article, has said, "Whatever I am and whatever success I have attained in this world I owe all to my wife. From the day I first knew her she has been an inspiration, and the greatest helpmate of my life."

Mrs. Bessie Ainsley

To be such a successful wife, to retain the love and admiration of her husband, to inspire him to make the most of himself, should be a woman's constant study.

If a woman finds that her energies are flagging, that she gets easily tired, that dark shadows appear under her eyes, she has backache, headaches, bearing-down pains, nervousness, irregularities of the blues, she should start at once to build up her system by a tonic with specific powers, such as Lydia E. Pinkham's Vegetable Compound.

Following we publish by request a letter from a young wife:

Dear Mrs. Pinkham:

"Ever since my child was born I have suffered, as I hope few women ever have, with inflammation, female weakness, bearing-down pains, backache and wretched headaches. It affected my stomach so I could not enjoy my meals, and half my time was spent in bed."

"Lydia E. Pinkham's Vegetable Compound made me a well woman, and I feel so grateful that I am glad to write and tell you of my marvelous recovery. It brought me health, new life and vitality."—Mrs. Bessie Ainsley, 611 South 10th Street, Tacoma, Wash.

What Lydia E. Pinkham's Vegetable Compound did for Mrs. Ainsley it will do for every sick and ailing woman.

If you have symptoms you don't understand write to Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, at Lynn, Mass. Her advice is free and always helpful.

glanced curiously at the dark, viscous fluid slowly creeping across the sidewalk. There was a familiar odor in her nostrils, and the expression in her face turned from anger to mirth as she came toward him.

"Why, Jimmie Corson," she cried, "was that really some of your grandmother's cough sirup?"

"It was," he confirmed. "I was out to visit Aunt Betsy, and she made me bring in the winter supply."

"I had forgotten she lived out of town," she laughed, "and I thought it was whiskey. Why didn't you tell me?"

"A lot of chances you gave me," he declared in an injured tone. "How could I tell you that I was more sinned against than sinning when you almost raised a riot when I tried to ask what the matter was?"

"Will you forgive me?" she asked softly, coming closer.

"On one condition," he bargained—"that you say 'Yes' to the question I asked you Wednesday."

"You said then you would give me a week," she pleaded.

"Circumstances alter cases," he declared. "Is it 'Yes?'"

It must have been, for Corson said "Darling!" so impulsively that it reached the ears of the giant, who had drawn apart in the faint hope that there might yet be an excuse for breaking the little dude in pieces, and as he wandered back to the car his sentiments were anything but the "bless you, my children," appropriate to the circumstances.

The Welcome Guest.

Who is he? The man who calls on a woman when he is at his very best and who never stays too long. Oh, that masculine visitors knew the peril that lies in an extra half hour! Almost every woman likes to entertain men at her own home and to receive the delicate compliment of a personal call, but unless two people have the same hobby or are engaged to be married (or are about to be) any call that lasts over an hour is filled with dire threatenings. "I know two men," sighed a young woman to her best friend, "who are both handsome, intelligent, courteous and altogether delightful. One comes at odd intervals and stays until 11 o'clock. Helgho! The other arrives periodically, chats, laughs, tells the news—and leaves in half an hour. I shudder when the first comes and sigh when the other goes."

There are more things than letters that should be just long enough to make the recipient "wish there was more of it," and a call is not least among them.

Mystery of Lost Kerchiefs.

"Obviously there is a vast difference between the lost and found columns of the handkerchief market," said the woman shopper. "Everybody loses handkerchiefs, but who finds them?"

"I lose a handkerchief every time I go downtown," is the familiar plaint of women, but who ever heard of one saying, "I find a handkerchief every time I go downtown?" Nobody says it, because nobody does such a thing, and somewhere about town many yards of linen and lace done up in handkerchief form are blown about daily, seeking owners. Eventually they are picked up by the street sweeper, but by that time they are so tattered and soiled that he can scarcely recognize them as handkerchiefs. Anyway, not being a philosopher, he would not stop to wonder how they happened to be there. It would be interesting, however, if he or somebody else would figure out why, in view of the many handkerchiefs that are lost, so few are found."—New York Press.

Front Fences Are Strong All Around

The laterals of a Frost Fence are High Carbon No. 9 Hard Steel Cold Wire, thoroughly galvanized—that can't be broken until the strain reaches from 1750 to 2200 pounds.

The stays are No. 7 or this same No. 9 wire.

And the two wires are laced with the Frost Locks.

That braces the fence in all directions—up down and diagonally.

We are so sure that Frost Fences are the strongest and best that we guarantee to repair, free of charge, any fence that goes wrong. That's fair, isn't it? Frost Wire Fences are for sale by

TO THE PUBLIC—

Our Spring Goods have now arrived and we are able to show exceptional values and patterns in Crum's Print, Satcen Prints, Dress Ducks, Organdies, Priestley's Lustre and Silks.

We have a full supply of Groceries, Flour, and Feed, Patent Medicines, Boots and Shoes, and Hardware, in fact everything kept by a general store.

We are able to compete with any general store in the province.

We pay Highest Price for all Farm Produce.

S. BOND & CO., ODESSA.

The Tip of the Alligator's Tail.

A great delicacy in Florida, according to the Cleveland Leader, is the tip of an alligator's tail. It tastes like frogs' legs, though a bit more gamy. Alligator tails are best just after the geese season. The big alligators feed in the water with only their eyes showing. When they see a flock of these fat, juicy little birds they dive to the bottom. Their long, wide snout scoops up some of the loam, and they float to the surface again with just the rich soil showing. The birds think it is an island. They alight upon it. When the whole family is there the big reptile turns suddenly. Just as the birds scramble off he opens his mouth once. They are gone. The birds are neat little feeders, and the alligator is an epicure at this time of the year. The geesebird diet makes the tip of his tail, of which he is most vain, tender and sweet.

A Famous Dwarf.

Geoffrey Hudson, the famous dwarf of Charles I., was introduced at court during the festivities attending the coronation. By an odd conceit he was concealed in a cold pie, the crust of which being removed disclosed the dwarf fully dressed and making his bow to the king and queen. At the age of twenty he was eighteen inches

high, but before attaining the age of thirty he grew several inches additional. Geoffrey, like most dwarfs, was of limited intelligence, but of intense vanity and large self conceit. It is asserted by many scientific authorities that this is a characteristic of dwarfs.

The Theater of Dionysus.

What was probably one of the earliest theaters built was the theater of Dionysus, which was begun five centuries before Christ. The seating capacity of this remarkable building is said to have been 30,000. The theater of Dionysus was erected when Greek art and literature were in their prime. Here were presented to appreciative spectators the wonderful works of Aeschylus, Sophocles and Euripides.

The Burglar's Grasp.

"Did it ever strike you that a burglar of all men is most sensitive to the fitness of things?"

"Can't say it ever did. How do you make it out?"

"He always throws light on his shady transactions with a dark lantern."

A MURDEROUS WEAPON.

The Explosive Harpoon, the Whale Hunter's Chief Reliance.

The explosive harpoon, which is the modern whale hunter's chief reliance, is a truly murderous weapon, six feet in length and strong in proportion, made chiefly of malleable iron and admirably designed for the slaying of the immense creatures. Its most striking feature next to the bomb head, which is operated by a time fuse and explodes in the vitals of the whale, is the anchor-like device that prevents the harpoon "drawing" out of the body again under the terrible strain of the wounded monster's frantic efforts to free itself. This consists of four hinged barbs, which lie along the shaft before it is fired, but which are forced apart and imbed themselves in the whale's body after he is hit, so that if the prize escapes, which sometimes occurs, it is only by breaking the rope.

When "fish" are numerous and there is a chance of killing more than one in a day a novel method is adopted with the first victim. When it is seen to be dead a hole is bored through its back into its stomach and air is pumped into it by a pipe from the steamer's engines until it is inflated like a great balloon. The orifice is then closed with a wooden plug, and a man is left alongside in a small boat to establish ownership, while the whaler steams off in quest of other prey. As many as five whales have been killed by a ship in one day, four is not an unusual "bag," and three and two are commonly got. A single ship killed twenty-two in a week, and the record year's work for one is

238, an amazing number when it is remembered that on stormy days it is impossible to cruise at all, as the sprays bury the gun, and that during the winter months fishing is abandoned. During that period the whales "strike off" the coast to escape the ice floes, to which the orquals are not partial, being in this respect unlike their arctic congeners, whose habitat is now the remotest section of Hudson bay and the channels which strike north from its farthest bounds into the polar sea itself.

LINCOLN'S CARELESSNESS.

His Hat His Favorite Receptacle For Letters and Papers.

When Lincoln was postmaster of New Salem he used to tuck the letters inside his hat and deliver them whenever he happened to meet the persons to whom they were addressed. As this is a fair example of his business system, it may readily be imagined that the office of Stuart & Lincoln was not a model establishment, where there was a place for everything and everything in its place. And it was not. Indeed, as a managing clerk the junior partner would have been a hopeless failure, and as an attorney, in the technical sense of the term, he would never have distinguished himself. He disliked everything connected with the drudgery of legal routine, hated drawing the declarations and pleas, despised the artificialities and refinements which were even then beginning to creep into the pleadings and disregarded forms whenever it was possible to do so.

There was nothing mechanical, precise or methodical about the man, and in all those housewifely virtues which characterized the careful, orderly, exact solicitor he was utterly deficient. He never knew where his papers were, and apparently the only attempt he ever made to better the disorder was to write on one of his bundles of papers which littered his desk, "When you can't find it anywhere else, look in this." But that was long after the firm of Stuart & Lincoln had dissolved, and even then we find him explaining to a correspondent that he had placed his letter inside an old hat and had thus neglected answering it, which shows he had not wholly outgrown the habit of his postoffice days. Indeed, his hat continued to be his favorite receptacle for papers as long as he lived, and he never acquired any sense of order.—Frederick Trevor Hill in Century.

MOON CURE FOR BALD HEADS.

The superstition in agricultural communities that the phases of the moon affect the germination and growth of seed has a parallel in a queer belief that the moon also influences the growth of hair on the head. Here is an old recipe. The baldheaded should take "two ounces of boar's grease, one dram of the ashes of burned bees, one dram of the ashes of southern wood, one dram of the juice of a white lily root, one dram of oil of sweet almonds and six drams of pure musk. Make an ointment of these and the day before the full moon shave the place and anoint it every day."

The One Thing He Dreaded.

Mrs. Benham—Are you afraid to die? Benham—I wouldn't be if I felt sure that I wouldn't meet your mother.

A friendly thought is the purest gift a man can afford to man.—Carlyle.

WHAT CAUSES HEADACHES?

Blood Poisoning, Always!

The blood is poisoned by retained tissue waste, due to defective action of the bowels, kidneys or skin. The tissue waste, or dead cells, circulating in the blood, irritates the nerves and brain, and headaches and neuralgia are bound to arise. Headache powders and opiates of any kind do harm, by aiding the retention of the blood poison in the system. To cure headaches, purify the blood by opening the bowels, and by stimulating the kidneys and skin to increased action.

Testimonial of Mr. Bert. Cornell, Taylorville, Ont.

Chronic Headaches Cured by Fruit-a-tives

To Fruit-a-tives Limited.

OTTAWA, Ont.

"I was a sufferer from fearful headaches for over two years, sometimes they were so bad I was unable to work for days at a time. I took all kinds of medicines, was treated by physicians, and yet the headaches persisted. A short time ago I was advised to try 'Fruit-a-tives' and I did so with, I must confess, very little faith, but after I had taken them for three days my headaches were easier and in

a week they left me. After I had taken a box of the tablets my headaches were quite cured. My appetite was also poor and my stomach was bad and now my appetite is splendid and my digestion is excellent. I have been taken in all three boxes of 'Fruit-a-tives,' am exceedingly grateful to 'Fruit-a-tives' for curing me and I give this unsolicited testimonial with great pleasure.

(Sgd.) BERT. CORNELL.

"Fruit-a-tives" cure headaches and neuralgia because they purify the blood by their splendid action on the liver, kidneys, bowels and skin, and thus remove all poisonous material from the system.

With these eliminating organs all active and working as nature intends them to work, there can be no poisons in the blood, and there can be no headaches or neuralgia.

A week's treatment will PROVE how thoroughly and quickly "Fruit-a-tives" cure.

50c. a box or 6 boxes for \$2.50. Sent prepaid on receipt of price if your druggist does not handle them.

Manufactured by FRUIT-A-TIVES LIMITED, Ottawa.

THREE SPECIES OF MOOSE.

They Are the European, the Eastern American and the Alaskan.

There are supposed to be three species of moose—the European moose or elk, found in northern Europe and adjoining parts of Asia; the common moose of eastern America, distinguished chiefly from its European congener by the skull being narrowed across the maxillaries, also by its greater size and darker color, and the Alaskan moose, separated by its giant stature, its narrow occiput, broad palate and heavy mandibles.

Expressed in external features as illustrated in the adult male (always best for differentiating species):

The Scandinavian elk is a small gray animal with little palm and many spikes on its antlers.

The Canadian is a large black animal with much palmation and always a separate brow bunch of spikes. I have seen hundreds of Canadian moose antlers, but never a pair that did not show a well developed separate group of prongs in front of each brow. I have seen a score or more of Swedish elk, but never saw one that did have a

ed farther east than the land of the Nile. Wherever they come from, they are a separate people, a tribe quite by themselves.

They appeared in England about 1505, and twenty-six years later Henry VIII. ordered them to leave the country in sixteen days, taking all their goods with them. "An outlandish people," he called them. The act was ineffectual, and in 1562 Elizabeth framed a still more stringent law, and many were hanged.

"But what numbers were executed," says one old writer, "yet notwithstanding, all would not prevail, but they wandered as before, uppe and downe." They got into Scotland and became an intolerable nuisance. Both in that country and in England legislation proved quite ineffectual. The acts gradually fell into desuetude. Under George IV. all that was left of the ban against the gypsies was the mild law that any person "telling fortunes shall be deemed a rogue and a vagabond."

"Gypsies are no longer a proscribed class," says a recent writer. "Probably the modern gypsy does little evil beyond begging and petty theft, but his determination not to work is as strong as ever, and it seems curious that an

Vapo-Cresolene

Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

Vapo-Cresolene is a long established and standard remedy for diseases indicated. It cures because the air rendered directly inhaling is carried over the diseased surfaces of the bronchial tubes with every breath, giving profound and constant treatment. Those of a consumptive and cough, or sufferers from chronic bronchitis, find immediate relief from coughs or inflamed conditions of the throat.

Vapo-Cresolene is sold by druggists or sent prepaid on receipt of price.

A Vapo-Cresolene bottle is included with a bottle of Vapo-Cresolene, sent for free on receipt of price. A bottle of Vapo-Cresolene, sent for free on receipt of price.

Who Makes

We do. For over 60 years we have been making them—the best liver pills

A friendly thought is the purest gift
a man can afford to man.—Carlyle.

Who Makes Liver Pills?

We do. For over 60 years we have been making them—the best liver pills ever made. They are used in every civilized land on the face of the globe. All vegetable, sugar-coated, gently laxative. Ayer's Pills. Ayer's Pills. We have no secrets! We publish the formulas of all our medicines. J. C. Ayer & Co., Lowell, Mass.

DR. HENNEQUIN'S INFANT TABLETS

"Please hurry along Hennequin's Infant Tablets, as we cannot get along without them."
M. E. PARKS,
Keene, Ont.

"I believe Hennequin's Infant Tablets to be the best medicine for babies teething and troubled with worms. They should be tried by all mothers. They are just lovely."
MRS. GEO. A. SMITH,
Hayworth, Quebec.

"After 14 years' experience in treating infantile ailments in our home, we have found Hennequin's Infant Tablets superior to any other remedy we have tried."
W. C. WEIR, Pastor Baptist Church,
Carleton Place.

They solve the problem, and where used produce healthy children, placing them in a condition of attaining the highest conception of perfect manhood and womanhood. Hennequin's Infant Tablets are based on scientific facts, and is the only Dr. Hennequin preparation offered to the public. Positively no drug taste—perfectly safe. The genuine Tablet is stamped with the letter "H." Beware of imitations. Price 25c per package, 5 packages for \$1—postpaid to any address. Send us \$1 for 5 boxes and if, after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter.

DENBIGH.

A special meeting of our Municipal Council was held on the 19th inst. Several Municipal Officers were appointed; some uncollectable arrears of taxes were cancelled and a final settlement with the Collector for 1905 was effected. Notice was given of a by-law to be passed next session to close up an almost impassable piece of road which is used very little, and the repairs of which would come very high; and provision made for the proper establishment of other roads, the land for which had been purchased or obtained from private owners. A petition to the Provincial Legislature has been forwarded asking that the land in the adjoining Township of Ashby may be thrown open for location as free grants, and added to the free grant district.

Our Assessor Mr. Joseph Rahm has nearly completed his arduous task for this year.

Mr. Lockwood, of Maribank, is paying a visit to his brother Albert, and may equip and operate the Denbigh cheese factory again, if he can make suitable arrangements and meet with reasonable encouragement regarding patronage.

Our roads are fairly alive with teams that are making the best possible use of the few inches of snow we got and which made possible if not good sleighing.

The gristmill is kept busy. Lumbermen and their jobbers are endeavoring to get as much stuff as possible yet out of the woods to their landing places; and our local sawmill owners are also getting a much needed addition to their heretofore very slim supply of sawlogs.

Paints, Oils and Glass, Ready Mixed Paints, White Lead and Colors, Elephant Brand.

MADOLE & WILSON.

ODESSA

Congratulations to our townsman, Lieut.-Col. Clyde, who has been promoted brigadier of the second division of cavalry of Eastern Ontario.

Died on Sunday morning, at his home here, James H. Powley, aged seventy years. He was only sick five days. Death was due to pneumonia. The funeral was held Tuesday afternoon, by the Rev. J. A. McCamus. The remains were placed in Cataract vault.

Austin W. Fraser spent this week in Toronto, delegate for A.O.U.W.

Mrs. Ida Benjamin, who has been visiting her sister, Mrs. William Jones, has returned to Brandon, Man.

Mrs. George Burnett is very sick, also Capt. McFadden.

CENTREVILLE..

The weather still continues very cold and snow has made its appearance again.

Mrs. Fletcher, Manitoba, has returned home, after spending the winter with her father, George Clancy.

George McFarland is home from the General Hospital, Kingston; he is improving slowly.

Charles Whalen has leased his farm to John Dann, Newburgh. Mr. Whalen intends moving to Belleville.

Frank Hinch has started a flour and feed store in our village.

William Murphy, Erinsville, intends moving in to E. J. Perry's house, this week.

Rumor says that the post office will be moved back to the village again.

MOSCOW.

Owing to the fall of snow the farmers are very busy drawing hub timber, logs and wood.

The sugar making has been suspended.

A number of people here have telephones in their houses. A wire was put up between H. A. Baker's, this week.

John S. Bradford has sold his farm to Howard Ritchie, and Wellington Craig has sold his to Wm. Ritchie.

Malcolm Townsend had three horses shot last week because of tuberculosis.

The Hand That Wards Off Coughs, Colds, Grip And Restores Nervous, Dyspeptic Catarrh Wrecks.

LIKE A DEMON grip has crossed the country, leaving behind scores of physical wrecks.

Victims of catarrh of the head, catarrh of the throat, catarrh of the lungs, catarrh of the stomach, catarrh of the kidneys, catarrh of the pelvic organs, are to be counted by hundreds of thousands.

Grip is epidemic catarrh, and sows the seed of chronic catarrh within the system.

This is so true that few grip sufferers are able to make a complete recovery until they have used Peruna.

Never in the history of medicine has a remedy received such unqualified and universal eulogies as Peruna.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

La Grippe Victims Restored by Pe-ru-na.

Miss Alicia Newell, 6 Stanley street, Montreal, Can., charter member Societe Francaise Bienfaisance, writes:

"We had a siege of la grippe in the family and I, as well as some of my friends, was a victim of the malady.

"Three bottles of Peruna assisted me to complete recovery, and some of my friends regained their health by even less.

"La grippe, as a rule, leaves one debilitated and nervous, but I noticed in every case where Peruna was used, the recovery was not only complete, but the medicine seemed to infuse new life and vigor."—Alicia Newell.

P. resident La Pharmacie Latonluse Recommends Pe-ru-na.

Mr. J. A. Goyer, President La Pharmacie Latonluse, 1033 St. Denis street, Montreal, Can., writes:

"I can highly recommend your estimable preparation, Peruna, to all those who suffer from the bad after-effects of la grippe.

"Two bottles of Peruna have brought to me a complete cure of that sickness, and it has acted as the best tonic for the system that I have ever experienced."

—J. A. Goyer.

Prostrated With Grip—Cured by Pe-ru-na.

Miss J. A. McGibbin, 871 William street, London, Ont., writes:

"I was prostrated with the grip last winter and it left me with a severe bronchial affection and catarrh of the larynx.

"The doctor's prescriptions seemed powerless and I was going from bad to worse, until I was advised to try Peruna.

"I took four bottles and it entirely removed the complaint. Words cannot express my appreciation for the good that Peruna did for me."—J. A. McGibbin.

EARLY CREEK HISTORY.

In the Time of Cortes the Tribe Life Was Idyllic.

The Creeks are an entirely different race of people from the Cherokees and other northern Indians. They are of Aztec, or, rather, Toltec, origin, and in a teocallis, or pyramids, temple, located in a secluded wild of the Creek country, the same religious rites and ceremonies are performed today that were performed in the imposing teocallis located on the bank of the beautiful Lake Tezcucan in the days of the

Hiram Utroode for the seventh was about to fall. He called in an expert accountant to disentangle his books. The accountant after two days' work announced to Hiram that he would be able to pay his creditors 4 cents on the dollar. At this news the old man looked vexed.

"Heretofore," he said, frowning, "I have always paid 10 cents on the dollar."

A virtuous and benevolent expression spread over his face.

"And I will do so now," he resumed, "I will make up the difference out of

wealthy parents develop remarkable strength and personal power. Young men, too, sometimes surprise everybody when suddenly left to carry on their father's business unaided. They develop force and power which no one dreamed they possessed.

We never know what we can do until we are put to the test by some great emergency or tremendous responsibility. When we feel that we are cut off from outside resources and must depend absolutely upon ourselves we can fight with all the force of desperation.

The trouble with working for others is the cramping of the individuality—

to Howard Ritchie, and Wellington Craig has sold his to Wm. Ritchie.

Malcolm Townsend had three horses shot last week because of tuberculosis. Mr. and Mrs. Levi Huffman spent Saturday and Sunday near Napanee. They were attending the funeral of the late Mrs. Herrington.

Mrs. Hubert Wagar, Enterprise, has been visiting friends here for a week.

John O'Neil and family will leave the village soon to go on a farm. In losing them the people lose a first-class blacksmith.

Robert Asselstine is visiting at Silsbyville.

Miss Ward, Colebrooke, made a number of calls here on Monday.

Miss Florence Asselstine spent Sunday at Timworth, the guest of Mrs. C. H. Rose.

Milk Cans.

Second to none, best of tin, best of trimmings and workmanship, most improved bottom.

MARPLE & WILSON.

NEWBURGH.

Miss Grace Dougan was sworn in as assistant postmistress on Wednesday.

There will be special Lenten services in St. John's church next week, every evening except Saturday, at 7.30.

Rev. J. F. Mears spent Monday with Rev. W. H. Ensley, Napanee.

Miss Beaman, of the N. H. S. staff spent Saturday and Sunday, the guest of Miss Connolly, Yarker.

James Fox has returned home from the General Hospital.

Kingston.

Mrs. W. E. Moore has returned after a visit to Mrs. Walker, Hinchinbrooke.

Miss Elsie Moore spent Sunday in Yarker, the guest of Miss Lizzie Winter.

Isn't it strange that so many people remembered perfectly on Tuesday morning, seeing suspicious looking strangers on Monday.

C. H. Finkle shipped four cars of vehicles last week to Indian Head, N. W. T., and one car to Ottawa.

Mr. Turner, former trimmer for Mr. Finkle, spent Sunday in the village.

The hide of Lord Dundonald's famous charger is on exhibition at the Newburgh pharmacy. Mr. Courtney, our local tanner, did a fine job.

DESERONTO ROAD.

Mr. John Girvin's sale of 15th inst was well attended the crowd being large the amount realized being very satisfactory to the proprietors.

Messrs John and George Girvin have moved to Deseronto in the house lately occupied by Mr. Deline in the east end of the town. George is going to try his luck in the west and will be leaving in a short time.

Mr. Andrew Bowen who has been working Mr. Ed. McCaul's farm for the past year has moved to Deseronto in his own house and intends to go back at his old job on the R. R. in the section gang.

Mr. Bradshaw and family living on Mr. H. Aylsworths farm are away visiting out north in Carlow township.

The fall of snow which recently came, although small, is being used by the farmers who are busy hauling logs and wood.

Mr. Frank and Mr. Arthur Reid are busy moving from out north on Mr. Levi Sager's farm which was recently vacated by John Girvin.

Austin Kimmerly has the brick hauled and piled ready for veneering his house in the spring, which will add much to its appearance.

Notice.

We are getting a lot of new dishes to at given away for coupons to customers that buy here. Why not get some by dealing at R. J. Wales GREY LION GROCERY.

country, the same religious rites and ceremonies are performed today that were performed in the imposing teocallis located on the bank of the beautiful Lake Tezcucio, in the days of the ill starred Montezuma II. The archives of the nation are here preserved in hieroglyphics, beautifully painted on shells, strung together on deer tendons. Here are also preserved their most cherished relics, the air green jasper altar and a life sized image of their great war god, both brought from their former home near Vera Cruz, Mexico.

At the time Cortez made his appearance in that neighborhood, bent upon a career of conquest and plunder, the Creeks, as they are now called, were living a peaceful, idyllic life in a land made sacred to them by having been the home of their ancestors for untold thousands of moons; and containing the ashes and bones of their wise and loved old men through many generations. Gathering their warriors together, they gave battle to the invaders, but weapons of stone and flint could make but little impression upon the steel clad warriors of Spain, and they were defeated with terrible slaughter. Gathering wives and little ones together and taking with them their most cherished possessions, among which were the records of their race, the jasper altar and their war god, holding in his extended right hand the sacrificial knife of flint, they made their weary way to the capital of Montezuma, the sacred city of Mexico, where they were warmly welcomed by that unfortunate monarch and where they fought bravely in defense of the devoted city. They assisted Gauto-mazin, the chieftain nephew of Montezuma, in his glorious, if ill fated, attempt to regain the throne of his ancestors, and upon its failure and the attendant death of that young chieftain by torture, after the manner of the ancient Israelites, they determined to seek a land that man knew not, where they might provide homes for their families and worship the gods of their ancestors.—Exchange.

POINT ED PARAGRAPHS.

The man who loves his joke is usually unpopular.

Put your self in the other man's place and you may stop abusing him.

It is commendable to save your money, but it is not commendable to look at it.

We worry as if we had to go through a whole year tomorrow instead of just one day.

The cares and worries of life look pretty good, after all, to those returning to town through the cemetery gate.

When a soldier returns from a battle his story of the fight is more interesting and less truthful if he returns alone.

Of course friends are a good thing, but when misfortune comes to you which do you wish you had more of—friends or dollars?

Cold Feet.

Never go to bed with cold feet; never try to sleep without being perfectly certain that you will be able to keep them warm. To lie one night with cold feet gives such a strain to the system as will be felt seriously, perhaps ending in a fit of sickness. Cold feet show an unbalanced circulation. The very best thing to do is to warm them by exercise, if that be practicable; if not, by dipping them in hot and cold water alternately two or three times and then using vigorous friction. If that does not warm them and keep them warm, heat them before the fire, drying them thoroughly, and then correct your habits or improve your health, for be sure that one or the other is wrong, perhaps both.

lar."

A virtuous and benevolent expression spread over his face.

"And I will do so now," he resumed. "I will make up the difference out of my own pocket."

WORK FOR YOURSELF.

Then You Will Have a Chance to Develop Your Individuality.

It is well known that long continued employment in the service of others often cripples originality and individuality. That resourcefulness and inventiveness which come from perpetual stretching of the mind to meet emergencies or from adjustment of means to ends is seldom developed to its utmost in those who work for others. There is not the same compelling motive to expand, to reach out, to take risks or to plan for oneself when the programme is made for him by another.

Our self made men, who refused to remain employees or subordinates, are the backbone of the nation. They are the sinews of our country's life. They got their power as the northern oak gets its strength, by fighting every inch of its way up from the acorn with storm and tempest. It is the hard schooling that the self made man gets in his struggles to elevate and make a place for himself in the world that develops him.

Some employees have a pride in working for a great institution. Their identity with it pleases them. But isn't even a small business of your own, which gives you freedom and scope to develop your individuality and to be yourself, better than being a perpetual clerk in a large institution, where you are merely one cog in a wheel of a vast machine?

The sense of personal responsibility is in itself a great educator, a powerful schoolmaster. Sometimes young women who have been brought up in luxury and who have known nothing of work when suddenly thrown upon their own resources by the loss of property or compelled even to support their once

from outside resources and must depend absolutely upon ourselves we can fight with all the force of desperation.

The trouble with working for others is the cramping of the individuality—the lack of opportunity to expand along original and progressive lines—because fear of making a mistake and apprehension lest we take too great risks are constantly hampering the executive, the creative, the original faculties.—Success.

Cap'n Bill's Explanation.

After the visitors to the island of Nantucket had covered the course over which sightseers are always conducted, says a writer in the Boston Herald, one of the ladies of the party requested that the drive be continued to "Sheep pond."

"The place where the natives used to wash the wool on their sheep in the old days," she supplemented. "Everybody goes to see it."

The driver and guide, Cap'n Bill, looked perplexed. He was evidently puzzled as to the location of this interesting sheet of water. But an old sailor and town character is rarely nonplused, and presently Cap'n Bill snapped his whip, determination in his eye. He drove to a neighboring hill and stopped his horses.

"Here 'tis," he said, with a sweep of his hand.

"I don't see any water!" was the general exclamation.

"Not now," Cap'n Bill gravely admitted. "You see, the sheep was so dirty that the bloomin' pond got filled up."—Youth's Companion.

A ROYAL KIND OF FUED LITTLE ONES ON THE ROOF

DUKE OF CUMBERLAND AND THE
GERMAN EMPEROR.

The Two Men at the Funeral of the
King of Denmark, But There is
No Peace in Sight.

One of the men upon whom the eyes of Europe are turned at present is the Duke of Cumberland. For the first time since their estrangement, the duke recently consented to meet the German Emperor at the funeral of the late King of Denmark, and now it is being asked whether the son of the last King of Hanover is not finally prepared to relinquish his claim to the lost throne of that country and to live at peace hereafter with the royal house of Prussia which annexed his inheritance.

Those who expect him to do so, however, must have forgotten that the duke promised his royal father when the latter was on his deathbed always to look upon Prussia and Prussia's rulers as his natural enemies, and he is not the man to break his pledged word. Probably, in fact, he consented to break bread with Wilhelm II. at Copenhagen only because it had been the wish of the dead King Christian, who, during his life, made several futile attempts to bring about a reconciliation between the two men. At any rate, the fact that no details whatever have been allowed to reach the public as to what took place at the meeting between the duke and the Emperor is evidence that it was purely

A FORMAL PROCEEDING.

The story of this historic feud is now such comparatively ancient history that its detail may have been forgotten by most people. It may not be amiss to explain, therefore, how the dukes of Cumberland came to sit on the throne of Hanover, and how that throne was irrevocably lost. As heiress to the crowns of England and Hanover, Queen Victoria would, under ordinary circumstances, have ruled over this kingdom of North Germany, but the salic law prevented this and so the crown went to the oldest male member of the royal house of Hanover, Ernest, Duke of Cumberland, who was Queen Victoria's paternal uncle. He, in turn, was succeeded in 1851 by his son, George, the father of the present Duke of Cumberland, and this King it was who was so ill-advised as to throw his lot with Austria against Prussia in the short but decisive war of 1866. As everybody knows, Austria was badly beaten, and King George of Hanover, dethroned and his country taken possession of by Prussia, was forced to take refuge across the Austrian border.

Here he was joined, later on, by his son, the present duke, who had fought with the Austrian forces, and who now was appointed to a colonelcy in the army of Francis Joseph. When his father died in 1878, the duke notified the various powers of his continued claim to

OUT-DOOR TREATMENT NOW FOR
BABY PNEUMONIA.

Lie in Beds on the Rooftop Even When
the Mercury Hovers Around
Zero Mark.

To those individuals who cling to the old-fashioned theories and traditions, there comes many a rude shock in these days of radical advancement. And one of the greatest shocks that some of these fogies could receive might be got by a visit to the Presbyterian Hospital in New York. There, in a pleasant spot looking down over Central Park and the East river, scores of babies and children are treated every day for the many diseases from which the little ones suffer. During the winter months there is no more dangerous scourge of babyhood than pneumonia. It is in the treatment of this disease that the doctors of the Presbyterian Hospital have turned over some leaves.

In old times, (indeed, at present, even, among old-fashioned doctors and nurses), the treatment of pneumonia included an airtight room, with blanketed windows,

A STEMING KETTLE.

temperature at about 80 F. and the room filled with friends and relations, most likely. Then the little sufferer was swathed in tight poultices and whatever else the ingenuity of the physician might devise in the way of discomfort for the baby. Most always he died, poor little chap!

A visit to the Presbyterian Hospital, a trip to the roof, where the air is cold, and fresh and astonishment will fill the soul of the old-fashioned. Several little cribs and couches are arranged about, under the clear blue sky and in the sunshine, and from each cot a little head appears. Many a smiling baby face peeps from the depths of a queer little grey hood, thick and warm and looking like the headgear of an Esquimaux. Every little one is wrapped in warm coat and blankets and underneath, although invisible, are many hot-water bottles that add warmth to the little bodies and feet.

These babies are pneumonia patients. Ten months now, the Presbyterian Hospital has employed the system of fresh air for pneumonia patients, and in all that time

ONLY ONE DEATH HAS OCCURRED.

That one case was such that the child could not possibly have recovered anyhow, it is said.

Happiness goes a long way toward health in either young or old. The change in the condition of the baby sufferer from pneumonia is noticed almost as soon as he is placed on the roof. The cool, fresh air is refreshing to fever-burning skin, and it has been learned that such a skin does not catch cold, especially when the draught comes in the face. The babies look forward to the time for going outdoors every day, and the nurses are greatly relieved in their work by the peaceful state of mind

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON

CHAPTER XXXVII.—(Continued).

Then Lady Ferndale sat herself down in the drawing-room and waited for something she expected.

Half an hour afterward Mr. Petherick was announced. He was not the visitor she had been expecting, but she was at home to him, and the old lawyer, in a state of suppressed excitement, began at once on the all-engrossing topic.

"Lady Norah—I mean Miss Norah," he said, "of course she has told you what has occurred, Lady Ferndale?" he said. "You know everything?"

"Yes," she responded, adding, mentally, as she thought of Cyril's identity, which Mr. Petherick was yet ignorant of, "and more than you know."

"I—er—I'm glad to be able to discuss the matter with you without reserve," he went on. "Of course you know that she is engaged to Mr. Burne?"

"And that they are to be married immediately," said Lady Ferndale.

"Yes, yes. Dear me!" he said. "Well, I can't say I disapprove. Of course, I've no voice in the matter, no right to express an opinion; the young lady is no longer the late earl's daughter, and they are to be married immediately?"

"It is to be kept a profound secret; I mean really a secret, not an open one which every one may know."

"Yes, yes," he nodded; "and I—er—think it is as well. I've a high opinion of Mr. Burne, and I've been making some inquiries. Of course, if she had been Lady Norah still he would not be at all a suitable match, but as it is—"

"As she is absolutely penniless, poor girl," said Lady Ferndale, with a smile, "and they are ridiculously in love with each other—"

"Yes, yes, I understand, and I hope—I hope with all my heart that they will be happy as ever you and I could wish them. But now, Lady Ferndale, I must tell you my other reason for calling on you at this unusually early hour. I have had a visitor this morning; in fact, he has only just left my office."

"Yes," said Lady Ferndale, demurely. "May I guess? It is Mr. Guildford Berton, is it not?"

"You are right, and—ahem—I must say his visit was an extremely trying one for me. It is very hard, Lady Ferndale, when one knows a man to be a scoundrel, to refrain from telling him so, and—er—requesting him to leave one's presence."

"Oh, I do hope you didn't tell him," she exclaimed, with dismay.

"Well—er—no. I didn't. I kept my temper, and—temporized. Of course, he came to inquire after Lady—I mean, Miss—Norah."

"Of course."

"My dear lady, I never saw a man so altered in so short a time. If I had not known from Miss Norah's story that the fellow was a villain, I think I could have pitied him. He looks—well, ten years older, and though he maintained his usual command over himself, I could see that he only succeeded by an effort simply—simply—superhuman."

"And you told him?"

"That I didn't know where Lady Norah was, which I did not at that moment," he said, with a faint blush. "It was literally true, Lady Ferndale, though scarcely substantially so, eh?"

Lady Ferndale smiled at this.

"What will he do next?"

"Come here," he replied, promptly.

"He will naturally conclude that she has taken refuge with you, and will, I fear, come on here and demand to see her. I shall be quite prepared for him."

well for you to see her, I must tell you as a—a friend"—the poor countess, much as she desired to fight Mr. Berton with some of his own weapons, hesitated at this piece of duplicity—"as a friend that it would be very unwise."

"But you do not know all," he said, with sudden vehemence, which he suddenly checked, his hands closing tightly on the brim of his hat.

"Perhaps not," she assented.

"I cannot lose her, Lady Ferndale. My life is wrapped up in her. My hopes of happiness are set on the chance of gaining her for my wife. I am not worthy of her—"

Lady Ferndale had hard work to keep silent.

"And I must find her."

"If you persist in seeking for her you will be sorry for it," she said quietly. "Norah has been greatly tried lately. Her father's death"—again she mentally breathed a hope of pardon for the white lie—"and your unexpected avowal have tried her nerves. Will you take my advice, Mr. Berton?"

"Please let me hear it," he said in a low voice.

"It is this—go back to Santleigh and wait patiently—"

He raised his eyes, and a smile, sinister, incredulous, curved his lips.

"Wait patiently till—what?" he said, between his teeth.

"Till she comes back," she said.

He repeated the words.

"You think she will come back?" he asked, hoarsely.

"I don't only think so, I am sure of it," she said, with quiet conviction. "I'll go further, Mr. Berton, and promise you that she will come back, and to the Court!"

He looked at her, his eyes glittering like spots of fire in their intensity. She met his scrutiny unflinchingly.

"Are you satisfied?"

He rose at once.

"I am satisfied, I will trust you," he said. "I will go back and wait. Will you tell her"—he paused, and then went on deliberately—"that I am patient and silent as death, Lady Ferndale?"

"I will tell her," she said.

"Patient and silent," he repeated.

When he reached the door he hesitated, and stood listening for a moment, then with a low bow went out, and Lady Ferndale dropped back in the chair, and covering her eyes with her hand indulged in the shudder which she had been repressing during the whole of the interview.

CHAPTER XXXVIII.

The day of the wedding arrived. Since the morning when Lady Ferndale had declared herself in favor of the speedy marriage, Norah had seemed to be living in a dream; and even now, as she stood holding her friend's hand as they waited for the carriage to take them to the quiet church of St. Cuthbert's, which lies hidden away in the serene and most placid of corners in Tyburnia, she could scarcely realize that within an hour she would be Cyril's wife.

Up to now the secret had been well kept, the greatest danger to it being Lord Ferndale's difficulty in refraining from addressing Cyril as "Arrowdale," and Lady Ferndale declared that she had never been on such tenter-hooks in her life as she was whenever the two men met in the presence of Norah. She had, too, a wholesome dread of Mr. Petherick.

"He will be sure to find it out," she as-

was appointed to a colonelcy in the army of Francis Joseph. When his father died in 1878, the duke notified the various powers of his continued claim to

THE CROWN OF HANOVER.

as well as to the duchies of Brunswick and Luneberg, and soon afterward he married the Princess Thyra of Denmark and thus became brother-in-law to the then heirs apparent of the British and the Russian thrones.

Meanwhile, the Prussian Government had sequestered, or in other words, taken possession of the entire property of the Hanoverian crown, and it was affirmed for many years that Bismarck made use of the proceeds in bribing a portion of the German press to support his policy. For many years, however, the Prussian royal family has continuously held out the olive branch to the house of Cumberland and made them every reparation in their power—short of giving them back the crown of Hanover.

These overtures were begun by the late Emperor Frederick, the father of Wilhelm II., and when the present Emperor came to the throne he sent a special mission to Gmunden, the seat of the Cumberlandians in Austria, with a commission to negotiate a settlement, and at first all went smoothly. After some correspondence between the duke and the Emperor the sequestration of the property of the Hanoverian crown was removed, the duke professed his loyalty to the German Fatherland, and his son, Prince George William, was recognized as

DUKE OF BRUNSWICK.

The Emperor, however, insisted that the duke should formally abandon his royal claims. This the latter refused to do, and so the breach came about between them which has never been healed, and probably never will be.

The Duke of Cumberland's existing honors are, however, many. As a direct descendant of George III. and a member of the British peerage, he has a right to sit in the English House of Lords, and he is a general in the British army. His family seat, Schloss Cumberland, near Gmunden, in Upper Austria, is a fine residence, happily situated, and commanding beautiful views of the Austrian Alps. And here the Duke and Duchess of Cumberland, who might have been king and queen to-day had the former's father not made so bold a break, live the lives of a country squire—and his lady, and find their pleasures chiefly in the companion-ship of their children and relations.

HER LAST WORDS.

She was a small and vacillating person of ten, and had been allowed to sit in for the late dinner only on condition that she would not speak except when one of the guests spoke to her.

The preparations for the feast had been carried on during her absence at school. When she entered the dining-room on tip-toe with excitement her gaze rested on some conical fruits, ordered from the city, and arranged in the best china dish in the centre of the table.

Her eyes fairly bulged, but remembering her promise, she asked no questions until the dinner was well underway, she had been wriggling in her chair for some moments, and at last could bear no more.

"Mother," she cried, pointing toward a particularly alluring pear, "if you'll just tell me where you got it, I'll never speak another word as long as I live!"

He was a country vicar, and he had for some time been displeased with the quality of the milk served him by the local tradesman. Although a mild-mannered man, who hated to complain, at last he determined to remonstrate with the milkman supplying such stuff. "I've been waiting to see you with reference to the milk, Jenkins," he began mildly.

"Yes, sir," answered the tradesman measily.

"I only wanted to say," continued the good man, "that I use the milk for dietary purposes exclusively, and not for christening."

that such a skin does not catch cold, especially when the draught comes in the face. The babies look forward to the time for going outdoors every day, and the nurses are greatly relieved in their work by the peaceful state of mind of each patient, for keeping the children happy during their illness is no small task when there are hundreds of them. From last May to this date, the outdoor treatment has been carried on daily, except in rain or excessive heat.

THE ROAD TO HEALTH.

Lies Through the Rich, Red Blood Dr. Williams' Pink Pills Actually Make.

Common pills purge the bowels. Dr. Williams' Pink Pills make new rich blood. Purging pills gallop through the bowels—tearing the tissues, irritating the organs and weakening the whole system. Dr. Williams' Pink Pills do not purge at all. They're tonic pills, soothing pills, strengthening pills, blood-building pills. Dr. Williams' Pink Pills actually make new blood. That is why they are the only scientific cure for all blood diseases. That is why they cure headaches and backaches, kidney troubles, indigestion, neuralgia, rheumatism, heart troubles, and the special ailments of growing girls and mature women. Purging pills get only on the symptoms of disease; Dr. Williams' Pink Pills go straight to the root of the trouble in the blood and cure. Mr. John Furke, Elmidae, P.E.I., says: "I think Dr. Williams' Pink Pills the best medicine in the world. I had an attack of pneumonia which was followed by extreme nervousness and rheumatism. I tried some of our best doctors but got nothing to help me until I began taking Dr. Williams' Pink Pills. After taking the pills some weeks I could actually feel the new blood they were making coursing through my veins, and in the course of a few weeks more I was completely restored to health." Remember that it is only Dr. Williams' Pink Pills that can make this new, rich, health-giving blood. Imitations and the so-called "just as good" medicines never cured anyone. Insist on the genuine with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper on each box. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50, by writing The Dr. Williams' Medicine Co., Brockville, Ont.

THE NEW SILKS.

The colors of the new silks and other gown materials are delightful. The coral shades, for example, are exquisite. There is a red without a suggestion of brilliancy, yet rich and satisfying. Other beautiful shades are lilac, mauve, mignonette, soft gray, and flower-like pinks and yellows. Rainbow silks are especially alluring, as are also the silks and chiffons with flower-printed borders. The latter come in sixty-inch widths, and the finest are \$8 a yard. They make the loveliest of evening and dancing gowns. A thin material known as gaze marouise, is another airy fabric which delights the eye. Mousseline de soie and tulle chiffon in shaded effects with flower borders are also lovely. These materials combine excellently with lace, and are the better for girdles and decorations of the gold and silver gauze ribbon so popular just now.

VERY PLAIN BLOUSES.

Some of the exquisite brocaded and embroidered silks seen in the best shops have been made into very plain blouses to wear under tailored jackets. They are necessarily simple, as the patterns of the brocades allow of no tucks or other elaborations. A heavy cream satin brocaded in large gold flowers made a very handsome waist. There were a few fine tucks on the shoulders to give the requisite fullness, but otherwise the waist was perfectly plain. At the collar and cuffs a little Duchesse lace showed as a finish. The gown was severe purple broadcloth, made with a long coat.

"What will he do next?"
"Come here," he replied, promptly. "He will naturally conclude that she has taken refuge with you, and will, I fear, come on here and demand to see her."
"I shall be quite prepared for him," said Lady Ferndale. "You think I am able to protect the dear girl, even from such a clever scoundrel as Mr. Guildford Berton, Mr. Petherick?"
"I think you are capable of protecting her from the whole world, my dear lady," he responded, looking at the resolute little face; "and that being so, I'll take my leave, only assuring you that if I can be of the slightest service to dear Miss Norah or Mr. Cyril Burne or yourself, you may command me," and he made his old-fashioned bow.

"And you haven't found the young earl, Mr. Petherick?" she said, demurely. The old man almost groaned, and uttered an exclamation of annoyance.

"My dear countess," he said, "the mere mention of that young man is—er—distressing to me. And when I think that all the money has fallen into his lap, in addition to the title and the estates, and that he obstinately refuses to declare himself, I feel—well, I don't think I can attempt to express my sentiments. I only know this: That, notwithstanding Lady Norah's relinquishment of the money which the earl left her, thinking her to be his daughter, I mean to make some sort of terms with the young earl, and if he doesn't act generously and liberally—well, I shall make bold to show fight, despite Lady Norah's instructions. There are times when a lawyer must consider his client's interests, even though he disregard that client's wishes."

Lady Ferndale still sat and waited, and presently the footman announced Mr. Guildford Berton.

The light fell full upon his face as he entered, and though Lady Ferndale had been somewhat prepared for the change in his appearance, she could scarcely suppress a start. He was ordinarily pale, but the whiteness of his face that morning was ghastly in its density; there were dark hollows under his eyes, and his mouth had the drawn appearance of a man who has spent long hours of sleeplessness and harrassment. But he smiled with the old smile as he made his bow and took the seat to which Lady Ferndale motioned him.

He had gone to the Court on the preceding evening, and had got Norah's note, and it had deceived him, as she had intended, until later on, when, as he sat in his gloomy room haunted by the ghost of Becca, the truth flashed upon him. He seized his hat and dashed to the Court, saw Harman, and learned that Norah had fled—she had escaped him!

It was too late to start in pursuit that night; he spent the hours passing the silent room, staring at his nails and watching the clock, and had caught the early train and gone straight to Mr. Petherick, and failing to get anything out of the cautious old lawyer, had come on to Lady Ferndale's, knowing that it would be to her that Norah would naturally think of flying for refuge.

He had expected to be informed that Lady Ferndale declined to see him, and was surprised at being admitted, and still more surprised at her apparently friendly reception of him, but he took care that his astonishment should not be visible in his countenance.

"Of course, you know why I have come, Lady Ferndale?" he said, still smiling, his eyes downcast. "Lady Noran has been here?"

"Oh, yes," she said, blandly. She saw him covertly draw a breath of relief, and listen intently for the sound of Norah's voice or footsteps.

"I am so glad!" he said. "And has she told you why—why she so suddenly left the Court?"

Lady Ferndale smiled. "You know Norah, Mr. Berton," she said. "Judge for yourself. She is reserved itself."

He drew another breath of relief. "I am very anxious about her," he said. "Can I see her? I need scarcely tell you what you must have discovered for yourself, that I love her—have loved her—"

"Yes, I know that," said Lady Ferndale, quietly. "She is out at present, and if you ask me whether it would be

had never been on such tenter-hooks in her life as she was whenever the two men met in the presence of Norah. She had, too, a wholesome dread of Mr. Petherick.

"He will be sure to find it out," she assured Cyril. "He will want to see the license or catch your real name during the service, and then there will be a scene!"

But Jack, who appeared to find a singular delight in managing the whole affair, hit upon a plan for disposing of the old lawyer, and two days before that fixed for the wedding had persuaded him to go down to Santleigh.

"It seems to me, sir," he said, gravely, "that the place ought not to be left entirely to the care of servants. Supposing the young earl were to turn up there suddenly. Some one ought to be there to receive him; besides, you can't tell what may be going on there, or what mischief that very nice young man, Mr. Guildford Berton, may be up to."
"Good gracious me, yes!" said Mr. Petherick; "but—but I wanted to be at Miss Norah's wedding, Mr. Wesley; in fact, I—I think she would wish me to be present."

"Yes, no doubt, but Miss Norah has such a lofty idea of duty, don't you know, that I fancy she would rather miss you at the wedding than have you neglect the young earl's interests."

And after a little more persuasion the old gentleman came and explained matters to Norah, presented her with a remarkably handsome bracelet, and started for Santleigh.

"We mustn't disappoint him, Cyril," said Jack, with a smile, as they watched the train off. "Suppose you write him a line as from the earl, you know, requesting him to kindly remain at Santleigh until you return."

Cyril caught at the idea at once, and nothing could describe Mr. Petherick's astonishment when, on the morning after his arrival, he received the following:

The Earl of Arrowdale will be extremely obliged if Mr. Petherick will kindly remain at Santleigh until the earl's arrival, which he trusts will be very shortly. Mr. Petherick will oblige the earl by considering this request as strictly confidential.

Having got rid of the too acute Mr. Petherick, Jack felt much easier in his mind, and able to regard the coming event with "calmness and fortitude," as he put it.

As for Cyril, he scarcely knew whether he was on his head or his heels, and spent the time which was not passed in the company of his bride-elect walking round and round Regent street and Bond street buying presents for her and Lady Ferndale.

"I don't like to make the really too dreadful remark 'Happy is the bride the sun shines on,' Cyril," said Jack, as they stood at the window tugging on their lavender gloves, and waiting for the handsom which was to convey them to St. Cuthbert's. "But I must say I'm very glad the sun does shine. A wedding is only one degree less mournful than a funeral at the best of times, and if it had rained to-day I should have been reduced to tears. As it is, the spectacle of your nervous disquietude has played havoc with my own nervous system, and, much as I love you both, I shall not be at all sorry when you drive off this afternoon. Is that the second or third pair of gloves you have utterly ruined?"

Cyril laughed nervously as he flung the torn gloves away and started on a fresh pair.

"I suppose most men are nervous when they are about to be married," he said. "Is that the handsom; I'm sure I heard wheels?—but I don't fancy many men are married under such circumstances. All last night I lay awake torturing myself with the fear that Norah would discover the trick we are playing this morning and decline to go to the church. Even now I shan't know a moment's easiness until the ceremony is over."

"That's generally when a man's uneasiness begins," said Jack, dryly. "Don't be alarmed. Besides myself and Lord and Lady Ferndale, only the clergyman knows that you are an awful swell instead of a poor devil of an artist, and the clergyman quite enters into the fun of the thing, I assure you."

"The fun!" groaned Cyril. Jack laughed. "Well, it's fun to us, if it's death to you. Seriously, my dear fellow, I should like to see Miss Norah's face when you reveal yourself. What will you do? Strike an attitude and exclaim, 'Behold! I am the long-lost Earl of Arrowdale!'"

Cyril flushed.
(To be continued).

MOTHER AND BABY.

Every mother who has used Baby's Own Tablets will tell you that they are the best medicine in the world for the cure of constipation, colic, sour stomach, indigestion, diarrhoea, sleeplessness, teething troubles, and other ailments of children. You can give these Tablets to a new-born baby with absolute safety—they always do good; they cannot possibly do harm. Their use means health for the child and comfort for the mother. Mrs. C. F. Kerr, Elgin, Ont., says:—"Baby's Own Tablets are the best medicine I ever used for stomach and bowel troubles, and destroying worms. No mother should be without a box of Tablets in the house." Get them at your druggists or by mail from The Dr. Williams' Medicine Co., Brockville, Ont., at 25 cents a box.

IN SHETLAND AND ORKNEY

SOME CHARACTERISTICS OF THE ISLANDERS.

Shetlander Scorns to be Called a Scotsman — Dislike the Orkney People.

Even among educated people in England there is a delusion that the people of Shetland are Scotch, and that Gaelic is their tongue, writes W. Holt White in the London Express. Nothing could be further from the truth. To ask a Shetlander if he is an Englishman is to be answered with a smiling affirmative. To ask him if he is a Scotsman is to rouse even his gentle and long-suffering nature to a state bordering on frenzy. A Shetlander so "insulted" will never forgive. The Shetlander hates and despises the Scotch.

ISLAND WAS PAWNED.

Of course the Shetlander is not an Englishman at all. He is a Norseman. In this respect his blue eyes and his yellow hair betray him. It is not, however, everyone who knows Shetland's tragic history, but Shetlanders know it and grumble about it to this day.

When the famous Maid of No-way was to be wedded to James of Scotland, the King of Norway was required to furnish the lady with a certain dowry, but the Norwegian exchequer was at the time in an impoverished condition. The money was not forthcoming, and so Shetland, then a Norwegian possession, was placed in temporary pawn.

NEVER REDEEMED.

Unfortunately, the pledge was never redeemed, as the compound interest on the loan now runs into the thousands of millions. Naturally, however, the Shetlanders have never forgiven the Scotch, and they still hate them.

When the English began to open up the Shetland Islands, and Norse became an inconvenient language, they adopted English, and English they speak to-day, though many odd little Scandinavian words cling to their dialect.

Gaelic they never knew. Gaelic they despise; in fact, practically the only grievance that Shetland has is that it is bracketed with Orkney as a constituency.

What kind of people they of Orkney may be I have yet to learn. To hear them spoken of in Lerwick is to imagine them the greatest outcasts on the face of the earth.

The Shetlander is a large, mild, slow man, loving truth and honesty, and having a great capacity for personal ally-

PARSON WILL NOT QUIT.

Will Run His Saloon and Resign His Chaplaincy.

The Rev. Dr. Samuel W. Thackeray, who recently acquired a public-house license in London, has been asked by the Camberwell Board of Guardians to resign the chaplaincy of the Gordon Road Workhouse on the ground that "the occupation of a publican is incompatible with the proper performance of his duties in ministering to the spiritual requirements of the inmates."

A letter officially conveying this request was forwarded to Dr. Thackeray under date of February 15, with the further request that he submit his resignation within seven days.

Dr. Thackeray, in his reply, says: "I have only to say that I decline to resign my office of chaplain of the Gordon Road Workhouse."

There the matter rests, officially, at present, but meantime Dr. Thackeray has written a letter to the newspapers, in which he defines and defends his attitude. He speaks of his high esteem for the members of the Board of Guardians, but regards them as having no locus standi in the case.

He believes that he will accomplish more for true temperance in a few months than they in fifty years of a total abstinence crusade, and in a rather long parable he likens himself to a policeman who warns thoughtless persons from the edge of a precipice, while other persons, at the base of the precipice, who have gathered there to comfort those who fall over, bellow at him to go away lest they have no victims to take care of.

The parable concludes thus: "They shout, vociferously for my resignation. I wave my red flag vigorously at them in mockery and defiance, and tell them that so long as the head superintendent of police is satisfied that I am doing my duty I care not a jot for their opinion."

GIVES TWO REAL GOOD REASONS

FOR BELIEVING DODD'S KIDNEY PILLS CURE ALL KIDNEY AILMENTS.

Cured His Backache of Twenty-Five Years Standing and Satisfied Everyone He Recommended Them to.

Economy Point, N.S., March 19 — (Special)—George S. McLaughlin, of this place, gives two splendid reasons for his belief that Dodd's Kidney Pills are the one remedy for kidney ailments. Here are the two reasons in his own words:

"I was troubled with lame back for 25 years or more, sometimes so severe that I could not turn myself in bed. One box of Dodd's Kidney Pills cured me, and I have had no return of the trouble since."

"I have recommended Dodd's Kidney Pills to a number of persons who had kidney trouble. All who have used them have been benefited or cured."

Dodd's Kidney Pills not only relieve all kidney diseases, from Backache to Bright's Disease, but they absolutely cure them. But sometimes where one or two boxes relieve it takes more to make a complete cure.

THE TEACHER'S RING.

Wore It In School Room and Ordered to Take It Off.

The London Daily Mail asks an interesting question: Is the wearing of an engagement ring a sufficiently grave offence to warrant the dismissal of a pupil teacher? The local Education Committee of Rotherham, near Sheffield, England, appears to think so.

Miss Mabel Turner, an attractive girl of eighteen, has for some time past been a pupil teacher at the local school.

PEDLAR'S STEEL CEILINGS

Designs suitable for all classes of work such as Churches, Schools, Stores, Halls. Also special designs for Houses, Kitchens, Dining-Rooms, etc. Nothing has ever been devised to equal Pedlar's Steel Ceilings for farm houses. Cheap as lath and plaster and will never crack or fade off.

Avoid Accidents by Using Pedlar's Steel Ceilings.

Made to fit any size room and can be nailed on by any mechanic. Shipped from our warehouses painted all ready to apply.

Our Catalogue, No. 14c describes many designs. Write for it. Costs you nothing. Write to-day.

RHEUMATISM

may be I have yet to learn. To hear them spoken of in Lerwick is to imagine them the greatest outcasts on the face of the earth.

The Shetlander is a large, mild, slow man, loving truth and honesty, and having a great capacity for personal allegiance.

WONT TALK POLITICS.

The Shetlander is the rarest type of elector there is. He is the man who probably thinks more about politics than any man living, but he never says anything. Two Shetlanders will sit down and solemnly read their newspapers and ponder for a long while afterwards. Then they will get up and exchange a few words about the weather. But they will never say anything about political matters. It is not their way.

You may talk to them by the hour on tariff reform or Chinese labor or Home rule. At the end of it they will say pleasantly that the weather is a bit rough.

Against this sort of thing canvassing is, of course, impossible. There is not such a thing as a canvasser in the whole of Shetland. You might just as well try to canvass a mountain.

A REASONABLE COOK.

"I have come to tell you, Bridget," said the mistress, "that I find you very hard to get along with."

"Well, ma'am," replied the cook lady, "I'll not complain so long as ye do yer test."

Consumption

There is no specific for consumption. Fresh air, exercise, nourishing food and Scott's Emulsion will come pretty near curing it, if there is anything to build on. Millions of people throughout the world are living and in good health on one lung.

From time immemorial the doctors prescribed cod liver oil for consumption. Of course the patient could not take it in its old form, hence it did very little good. They can take

SCOTT'S EMULSION

and tolerate it for a long time. There is no oil, not excepting butter, so easily digested and absorbed by the system as cod liver oil in the form of Scott's Emulsion, and that is the reason it is so helpful in consumption where its use must be continuous.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

to the teacher? The local Education Committee of Rotherham, near Sheffield, England, appears to think so.

Miss Mabel Turner, an attractive girl of eighteen, has for some time past been receiving instruction at the local Pupil Teachers' Centre. With the consent of her parents, she became engaged on January 18 and attended class wearing her engagement ring. The next day she was called up by the headmistress, Miss Hodge, and ordered to take off the ring. "I naturally protested," said Miss Turner. "As she insisted, I consulted my parents, who upheld me. On January 24 I was sent for by Mr. Howarth, the principal of the teaching centre, and told that as I had disobeyed the orders of the headmistress I must remain at home until the matter is settled.

"The next step was to summon my father and myself to a committee meeting, where he was not allowed to speak in my defence. I was then told by three Chairman of the committee that I must apologize." Her parents refused to allow her to apologize.

Although the local officials decline to give their view until the matter has been considered by the central education authority, the principal of the centre said that, as a considerable sum of money is spent in training young teachers, pupils should not be allowed to flaunt engagement rings when nominally studying for a scholastic career.

In London schools the marriage of a pupil teacher terminates her agreement. But while an engagement is discountenanced on the ground of the youth of the pupil teachers and the fact that it is likely to cause them to abandon their profession after having received a special training at the public expense, a teacher would not be dismissed or suspended for that reason alone. Several London pupil teachers are at this moment wearing engagement rings.

Stomach "Scowls." — Ever notice the seams and furrows that steal into the face of the sufferer from indigestion, dyspepsia and chronic stomach ailments? Watch the sunshine break in and the lines vanish when Dr. Von Stan's Pineapple Tablets are given a chance to show their power. One lady, in writing of their efficacy in her case, calls them "A heaven-born healer." 25 cents.—120

GRAND TO LIVE

And the Last Laugh is Always the Best

"Six months ago I would have laughed at the idea that there could be anything better for a table beverage than coffee," writes an Ohio woman—"now I laugh to know there is."

"Since childhood I drank coffee as freely as any other member of the family. The result was a puny, sickly girl, and as I grew into womanhood I did not gain in health, but was afflicted with heart trouble, a weak and disordered stomach, wrecked nerves and a general breaking down, till last winter at the age of 38 I seemed to be on the verge of consumption. My friends greeted me with 'How bad you look! What a terrible color!' and this was not very comforting.

The doctors and patent medicines did me absolutely no good. I was thoroughly discouraged.

"Then I gave up coffee and commenced Postum Food Coffee. At first I didn't like it, but after a few trials and following the directions exactly, it was grand. It was refreshing and satisfying. In a couple of weeks I noticed a great change. I became stronger, my brain grew clearer, I was not troubled with forgetfulness as in coffee times, my power of endurance was more than doubled. The heart trouble and indigestion disappeared and my nerves became steady and strong.

"I began to take an interest in things about me. Housework and home-making became a pleasure. My friends have marveled at the change and when they enquire what brought it about, I answer 'Postum Food Coffee, and nothing else in the world.'" Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville," in pkgs.

owing to smothering spells caused by Heart Disease. One bottle of Dr. Agnew's Cure for the Heart removed the trouble, and to-day I am as well as ever I was."—L. W. Law, Toronto Junction.—123.

EDUCATED INSECTS.

The Foolish One—Did you know that bees could count?

The Wise One—No, but I've heard of spelling bees.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

WENT BY THE BOOK.

Mr. Newwed—This soup that you made tastes awful.

Mrs. Newwed—That's strange. The cook book says that it tastes delicious.

Regain Your Strength by taking "Ferrovin." It's the best tonic ever compounded. It nourishes and strengthens the whole system.

Henry returned in triumph from an examination. "How did you get along, my son?" his doting parent inquired. "First-rate," answered Henry; "I answered all the questions." "Good! How did you answer them?" "I said I didn't know."

Thomas Hoskin's Nerves.—Mr. Hoskins, a resident of Durham, Ont., for a score of years, was a martyr to stomach and nerve disorders. Schooled to prejudice against "patent medicines," he started using South American Nervine as, he says, "a last resort," but six bottles of this great remedy proved to be his salvation physically. It can be yours.—124.

SO DO WE.

"I think," said little Elizabeth, who was studying her geography lesson, "that if 'Worcester' must be called 'Woolster,' then 'Rochester' should be called 'Rooster.'"

A Pleasant Feeling of relief from pain is experienced the minute you put "The D & L" Medicated Plaster on a lame back, a rheumatic joint, neuralgia, sciatica, or pain in the side.

CREWLESS TORPEDO BOATS.

Boat Is Worked From Shore By Mysterious Invention.

An engine of death, the wireless torpedo boat, which will in all probability revolutionize the navies of the world and make the extended coast line of the United States impregnable from attack by a foreign foe in time of war is the invention of Mr. Charles E. Alden, the well-known New York sculptor, but who is now experimenting at his summer home at Cottage City, on the island of Martha's Vineyard, N. J.

A boat without a crew, handled from the shore by a mysterious apparatus, the work of the inventor, and doing everything that the latest improved type of torpedo boat is capable of as far as the eye can see from shore, has been successfully operated by Mr. Alden.

Obedient to the Hertzian waves used in the different systems of wireless telegraphy, this boat weighs its own anchor, blows its whistle, starts its propeller, turns to starboard or port or keeps on a straight course ahead, turns on its searchlight, fires a cannon in its bow, drops and hoists an anchor, stops, backs and goes ahead again, lights signals, and discharges a torpedo from its tubes.

Speaking of his great invention, Mr. Alden said: "The idea came to me while standing on a pier at Cottage City during the summer of 1900, and I immediately went to work to put this idea into reality, with what success the public can determine."

The inventor was born in Boston on Sept. 14, 1864. Since finishing school he has lived the life of an art student, traveller, and student of science. He became a resident of New York city, which for years he made his headquarters.

At the time when the invention was a remote possibility, naval experts had the utmost confidence and gave their opinion as to the success of the boat.

Improved farms and unimproved wheat and ranch lands, wholesale and retail, in Manitoba, Saskatchewan, Alberta and fruit lands in Southern Okanagan Valley, B. C.

Wheat lands on Saskatchewan Plains at \$7.10 per acre, easy terms till June 1st to make selections, the finest wheat lands in the west.

Homesteads located. Selections made. Write or call for any information desired.

"Miss Phyllis," said the young man who had been calling pretty regularly during the last few weeks, with eagerness in his tone and the love-light in his eye, "may I—may I ask you a question?" Mrs. Smifkins, she replied, blushing furiously and tracing a heart in the carpet with her satin shoe—small twos—"take courage: you may." "Then," said the youth, "can you tell me whether it's correct to say, 'The public are invited,' or 'The public is invited'?" She looked volumes, but spoke not.

"A Little Cold, You Know," will become a great danger if it be allowed to reach the lungs. Nip the peril in the bud with Allen's Lung Balm, a sure remedy containing no opiates.

"There's no danger," said the doctor. "It's only a carbuncle coming on the back of your neck. But you must keep your eye on it!"

The Happiness of Health. — Exhilaration is the ripple and laughter of pure blood as it courses through the veins. South American Kidney Cure drives out all impurities and insures the richness and purity that is essential to perfect health—successful because it merits it—popular because it fulfills every promise—a Kidney medicine solely and purely. It never fails.—126

Mrs. De Blank (bride of a year)—"I don't see what has changed you so, George." George—"I have not changed." "You have. You treat me now as an ordinary man treats his wife. There was a time when I was not a mere companion. I was a pet." "Yes, dear; but then you never got in a pet."

THE NEW LIQUOR LAW

The Fees Are to Be Increased and Bartenders to Be Licensed.

The Ontario Government's promised amendments to the Liquor License Act, embracing a large number of radical and progressive temperance reforms, were introduced in the Legislature on Tuesday afternoon by the Hon. W. J. Hanna. The new bill, in its salient features, provides for a better enforcement of the law by making the regulations uniform throughout the province, by removing some of the technicalities, in regard to the first offences, etc., behind which offenders have hitherto sheltered themselves, and by making it easier to secure convictions. It provides that bartenders in cities and towns must take out an annual license, thereby giving license boards a check on the character of the men who sell liquor and making them more careful about violations of the law. It increases the penalties for various offences, and provides for more rigorous prosecutions. It gives greater protection to witnesses who give evidence leading to a conviction. It amends, in a number of respects, the local option laws, giving municipalities the privilege of appointing their own officers to co-operate with the license inspector in enforcing the law and making it compulsory for Municipal Councils to submit a local option by-law on petition of 25 per cent. of the voters. The Government takes power to cancel licenses where deemed advisable, in default of any action by the local license board. The announced policy of the Government not to increase the number of licenses in New Ontario is embodied in the bill. "Tied houses" will not be permitted henceforth.

THE ACT IN A NUTSHELL.

Regulations to be uniform throughout the province.

Bartenders in cities and towns to be licensed.

Third offence by licensee to cancel license.

No increase in number of licenses in New Ontario.

Stricter provisions regarding sale of liquor on medical certificate.

Radical increase in license fees in all municipalities. In cities of over 100,000 to be \$1,200 for tavern and \$1,000 for shop licenses.

Municipalities and province to get revenues from licenses, share and share alike.

Special census for determining number of licenses permissible, according to population, to be abolished.

No "tied" houses to be allowed.

Municipalities passing local option laws allowed to participate in their enforcement.

Votes for local option by-laws to be taken on annual municipal election days, and to be compulsory on petition of 25 per cent. of voters.

Three-fifths of vote polled to carry local option by-law and three-fifths of vote necessary to repeal it. To be in force for two years, at least, if carried.

Provision made against the adulteration of liquors.

More protection given for witnesses who give evidence to secure conviction against license-holders.

THE WORLD'S MARKETS

REPORTS FROM THE LEADING TRADE CENTRES.

Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, March 27. — Wheat — No. 2 Ontario red Winter, 76c bid outside on C.P.R., and it offered at 76½c shipped to Portland. No. 2 mixed offered at 76c outside, and No. 2 goose at 74c outside, without bids. No. 1 Manitoba Northern offered at 84c on track, Port Huron, Midland, or Owen Sound, without bids. It also offered at 82c Owen Sound, May delivery, with 81½c bid. No. 2 Northern offered at 81½c on track, Port Huron, Meaford or Owen Sound, and 79c via Mid. Point Edward, May delivery.

Flour — Ontario wheat patents are 13 bid in buyers' sacks outside for export. Manitoba first patents are quoted at \$4.30 to \$4.40, Toronto, and strong makers at \$3.90 to \$4. Toronto. Bran is very firm at \$18 to \$18.50 outside, in bulk, and shorts quoted at same price.

Peas — No. 2 offered outside at 77c, with 75c bid.

Oats — No. 2 Ontario white offered at 6c on track Toronto; 5½c bid main line, east or west, and 5½c bid on G.T.R. east. No. 2 white and rejected offered in store, Toronto, at 37c, with 35c bid.

Corn — No. 3 American yellow was 3c bid on track, Toronto, but none offered.

COUNTRY PRODUCE.

Apples — Choice stock. \$3.25 to \$3.75

ONTARIO LEGISLATURE

WHAT THE LEGISLATURE AT TORONTO IS DOING.

THE ESTIMATES.

Hon. Col. Matheson, in presenting the estimates, said the estimated receipts include \$1,339,287 subsidy, \$170,000 interest on investment and trust funds from the Dominion, \$550,000 from woods and forests, \$1,250,000 from timber dues, \$60,000 from ground rent, Crown lands \$100,000, mining licenses \$20,000, sale of timber from clearing along T. and N. O. Railway, \$50,000, public institutions \$125,000, Central Prison industries \$67,000, education department \$75,000, Provincial Secretary's department \$135,000, agriculture \$85,000, casual revenue \$115,000, succession duties \$700,000, supplementary revenue tax (62 and 63 Vic.) \$450,000, tavern and brewers' licenses \$490,000, law stamps \$70,000, Algoma taxes \$5,000, fisheries \$45,000. The total estimated receipts were \$5,921,287; cash balances 31st December, 1905, \$1,939,579, making a total of \$7,860,867.

Hon. Col. Matheson said it would cost to complete division No. 1 of the Temiskaming Railway \$270,500, and division No. 2, \$1,169,500, making a total of \$8,810,000. Thus with \$250,000 for rolling stock the figures were brought up to \$9,060,000. The total receipts for the past year were \$6,016,176 and the payments \$5,396,016, leaving a balance of \$620,159.

Referring to the recent loan he declared that it had been made on the best terms possible and arrangements made for the floating of a loan of \$1,200,000 or more in Canada.

NATURAL GAS.

Mr. Fraser, in moving the second reading of his bill to amend the Act to prevent the waste of natural gas and to provide for the plugging of the abandoned wells, stated that the natural gas business of the Niagara peninsula was now producing an annual revenue of \$370,000. The bill was intended to prevent the depletion of the wells in the Niagara district, as had been the case with the Essex County wells.

THE SAN JOSE SCALE.

Hon. Mr. Monteith, replying to Mr. McCoy, said application had not been made to the present Government for compensation for the destruction of fruit trees infested with San Jose scale. In 1905 the Department of Agriculture conducted for the benefit of the fruit growers experiments in the use of spraying materials, and carried on demonstrations at certain points in methods of spraying. The continuation of this work was now under consideration. In 1905 the department also supplied applicants with spraying materials at wholesale rates, and paid transportation charges thereon. It was no longer deemed necessary that this assistance should be given by the department.

HITS COMPANY DRUGGISTS.

Mr. Downey moved the second reading of his bill to amend the Pharmacy Act. Its intent, he explained, was to put companies engaged in the drug business on the same basis as private individuals. It proposed that every partner in a company should be compelled to qualify as a druggist before the business would be allowed to go on. Mr. Downey pointed out that a large part of the business of a departmental store pharmacy was the dispensing of poisons, and he thought the responsibility for mistakes should be more clearly placed than at present. When the present law was drafted company pharmacy was not in existence, and no provision was made for properly controlling it. It had been asserted that his bill was class legislation, but the contrary was true; it took away privileges from a certain class. This bill

POISON MYSTERY.

Hungarian Count Arrested for Murder of a Wealthy Woman.

A Vienna despatch says: A sensation has been caused in Hungary by the arrest of Count Otto Nayhaus on the charge of having poisoned his relative, Mme. de Beniczky. Mme. de Beniczky, whose estate he managed, was perhaps the richest woman in Hungary, and she died a fortnight ago under suspicious circumstances. She had taken some soup, which, owing to its peculiar taste, was sent back to the kitchen and given to the dogs. Two of the dogs died shortly afterwards, and Mme. de Beniczky died the same night, in great pain. Suspicion fell on Count Nayhaus, who had inherited \$100,000 under Mme. de Beniczky's will, and an examination of his rooms revealed considerable quantities of arsenic. He declared he bought the poison to kill wolves on the estate, and stoutly denied the charge of murder. Count Nayhaus comes of an old Prussian noble family which enjoys the privilege of being allowed to intermarry with royalty. He quarreled with his family and was disinherited.

SHOT HIS EMPLOYER.

D. J. Campbell, of Frobisher, Sask., Fatally Wounded.

A Frobisher, Sask., despatch says: A shooting affray, which will result in the death of Mr. D. J. Campbell, a resident farmer, occurred about four miles north of Frobisher, on Wednesday. From the information at hand it would appear that one Weivert Meryyon, a Hungarian in the employ of Mr. Campbell, had a dispute with him over wages, and Wednesday morning about 6.30 took Mr. Campbell's shotgun to the stable, and on Mr. Campbell's approach raised the gun to shoot. Mr. Campbell made an effort to get out of the way, but too late, the shot striking him in the region of the groin. Mr. Campbell was able to reach the house, where he sent to a neighbor's for aid. The Hungarian, after shooting his victim, started for town, where he is now in custody. Mr. Campbell is a married man, with a family of four. Meryyon, it seems, wished to leave his employer, and the latter refused to release him until his time expired, and his resentment resulted in the tragedy.

EXPLOSION IN COAL MINE

Ten Dead, Twenty-five Injured and a Large Number Missing.

A Fairmont, West Virginia, despatch says: Ten men are known to be dead, 25 injured and from 25 to 75 missing and believed to be dead as the result of an explosion of gas in the shaft of the Century Coal Company at Century, a small mining town situated 50 miles south of Fairmont, on the Baltimore and Ohio Railroad on Thursday afternoon. The Century mine, which is owned by Shaw Brothers, of Baltimore, Md., is one of the largest independent operations in northern West Virginia. Over 250 men are employed daily in the shaft, and had the explosion been an hour earlier the loss of life would have been appalling.

TORONTO TO ROCHESTER.

Part of Scheme of International Electric Railroad.

A Buffalo, N. Y., despatch says: Details of the bridging of the Niagara River for a direct trolley line from Toronto to Buffalo show that a line from Toronto to Rochester by way of Lockport is also in the scheme, and in connection with these details it was announced here on Thursday that the International Railway Company and the Toronto interests have just completed arrangements whereby cars from Buffalo and Toronto may be

Apples — Choice stock, \$3.25 to \$3.75 per bbl., and inferior qualities, \$2.25 to \$2.50.

Beans — Hand-picked, \$1.75 to \$1.80; primes, \$1.65 to \$1.70.

Honey — The market is steady at 7 to 8¢ for strained, and \$1.50 to \$2 per dozen combs.

Hops — 15 to 18¢ per lb.

Hay — Car lots of No. 1 timothy are quoted at \$8 on track, Toronto, and No. 2 at \$6.

Straw — \$5.50 to \$6 per ton.

Potatoes — Ontario stock, 65 to 75¢ per bag, and Eastern, 75 to 80¢ per bag on track.

Poultry — Turkeys, fresh killed, 14 to 15¢; ducks, 12 to 13¢; geese, 10 to 11¢; chickens, 12 to 13¢; live chickens, 7 to 8¢ per lb.

THE DAIRY MARKETS.

Butter — Pound rolls are quoted at 20½ to 21¢; large rolls, 19½ to 20¢; good to choice dairy tubs, 20 to 21¢, and inferior at 16 to 17¢. Creamery prints sell at 26 to 27¢, and solids at 24 to 24½¢.

Eggs — New laid are selling at 16¢ per dozen in case lots, and cold storage at 13¢ per dozen.

Cheese — The market is unchanged, with demand fair. Large cheese, 14¢ and twins at 14½¢ per lb.

HOG PRODUCTS.

Dressed hogs in car lots are nominal. Bacon, long clear, 11 to 11½¢ per lb. in case lots; mess pork, \$18 to \$18.50; short cut, \$22 to \$22.50.

Hams — Light to medium, 13 to 13½¢; dark, heavy, 13½¢; rolls, 11½¢; shoulders 11¢; backs, 15½ to 16¢; breakfast bacon, 14½¢.

Lard — Tierces, 10½¢; tubs, 10½¢; pails, 11¢.

BUSINESS AT MONTREAL.

Montreal, March 27. — There are no new features of interest in the local Grain Market. There is no change in the local market for coarse grains, and prices are steady all round. The market for oats seems to have reached the bottom of the present decline. Meanwhile, trading continues at about 36½¢ for No. 1, 37½¢ for No. 2, and 38½¢ for No. 3, demand being slack. Flour — Manitoba Spring wheat patents, \$4.10; strong bakers, \$4 to \$4.10; winter wheat patents, \$4.25 to \$4.50, and straight rollers, \$3.20 to \$4 in wood; in bags \$1.85 to \$1.90. Rolled Oats — \$2 to \$2.05 in bags of 50 lbs. Feed — Ontario bran, in bulk, \$20; shorts, in bags, \$20 to \$20.50; Manitoba bran, in bags, \$20; shorts, \$21. Hay — No. 1, \$8 to \$8.50 per ton on track; No. 2, \$7 to \$7.50; clover, \$5.50 to \$6; clover, mixed, \$6 to \$6.50.

Beans — Choice primes, \$1.60 to \$1.65 per bushel; hand-picked, \$1.80. Potatoes — Per bag of 50 lbs., 65 to 70¢. Provisions — Heavy Canadian short cut pork, \$21; light short cut, \$20; American short cut, \$20; American cut clear fat backs, \$20; compound lard, 6½ to 7½¢; Canadian pure lard, 11½ to 12½¢; lard rendered, 11½ to 13½¢; hams, 12 to 14¢; bacon, 11 to 13¢; fresh killed abattoir dressed hogs, \$10; country dressed, \$8.75 to \$9.25; alive, \$7.50 for selects. Eggs — New laid, 18¢ per dozen; storage and lined, 16¢, nominal. Butter — Choice creamery, 22 to 22½¢; undergrades, 20 to 21¢; dairy, 19 to 20¢. Cheese — Ontario, 14 to 14½¢.

UNITED STATES MARKETS.

Minneapolis, March 27. — Wheat May, 76½¢; July, 78½¢ to 79½¢; September, 77½¢; No. 1 Northern, 76½¢; No. 2 Northern, 75½¢; No. 1 hard 77½¢. Flour — Unchanged. Bran — In bulk, \$12.50 to \$13.75.

Milwaukee, March 27. — Wheat — No. 1 Northern 80 to 81¢; No. 2 Northern, 76 to 79¢; May, 77½¢ asked. Rye — No. 1 61¢. Barley — No. 2, 54 to 54½¢; sample, 25 to 55¢. Corn — No. 3, cash, 42 to 42½¢; May, 43½ to 44¢ asked.

CATTLE MARKET.

Toronto, March 27. — The tone of the market was firm, and even cattle which at other times would have sold as short-keeps were bought up for shipment abroad. The highest price reported was \$2.25, and good loads sold at \$4.90 to \$5.

ONTARIO'S RAILWAY.

Head of Rail Is Now 163 Miles Beyond North Bay.

A despatch from Toronto says: Hon. Mr. Hendrie has returned from a trip made over the Temiskaming & Northern Ontario Railway, in company with the commissioners. The head of rail is now in Otto township, 163 miles north of North Bay, and a train is being run to that point three times a week from New Liskeard, the terminus of the first section of the road. About 40 miles remains to be completed on the section, and the work is progressing satisfactorily. Preliminary surveys show that if it is decided to continue the line toward Lake Abitibi to join the Transcontinental Railway the extension will be easily constructed, as the grades show no great difficulties, and the line is almost straight.

On the completed portion of the road the passenger and freight traffic continues very heavy. An immense amount of mining machinery is going into the Cobalt mining area.

WAS THIS REMORSE?

Strange Suicide of Edward Lafond at Prince Albert.

A despatch from Prince Albert, Sask., says: About daylight on Wednesday morning Edward Lafond was found hanging to a beam of a log shanty on the north side of the river opposite the city. The Mounted Police were at once notified, and when they reached the spot the body was still warm, although life was extinct. All indications point to a determined case of suicide. The scene of the crime was the shanty in which the body of a woman named Linklater, supposed to have been killed the night previous, lay awaiting the coroner's inquest. The projecting beam from which Lafond hung was barely seven feet above the ground, and the dead was committed by means of a small clothes line. Deceased evidently stood on an ordinary wooden pail, and when really kicked it away, his toes just clearing the ground when found. It is supposed that Lafond was implicated in the death of Mrs. Linklater, and took this means of settling the matter.

BRITAIN'S DEMAND REJECTED.

Porte Declines to Withdraw Troops From Egyptian Territory.

A despatch from London says: It is reported that the Porte has sent a formal note to the British Ambassador at Constantinople refusing to withdraw the Turkish troops from Tabah, near Akabah, in accordance with Great Britain's request, which was based on the contention that Tabah is in Egyptian territory. The Porte insists that it is Ottoman territory. It is also reported that a British naval demonstration at Smyrna is expected.

SEEK HOMES IN CANADA.

Nine Trains Leave St. Paul For This Country.

A St. Paul, Minn., despatch says: It required nine trains to pull the home-seekers out of the depot here on Wednesday, when over a thousand left for the Canadian west.

OVER 1,000 KILLED.

Total Victims of Formosa Earthquake Number 7,000.

A Tokio despatch says: Incomplete returns from Formosa give the number killed by the earthquake as 1,087, and that of the injured as 6,183, thus justifying the worst fears. The Emperor is despatching a chamberlain to inquire into the condition of the sufferers.

leges from a certain class. This bill was referred to a committee.

STATIONARY ENGINEERS' BILL.

Mr. Carscallen's bill to enable the examination of stationary engineers and the granting of certificates of qualification was read a second time and referred to a special committee. Opinions differed with respect to the measure independent of party lines. The bill provides that certificates shall be required from engineers in charge of engines of fifty horse-power or over.

EXPORTATION OF NATURAL GAS.

In reply to Mr. Jessop, who inquired had the Government taken any action in order to stop or limit the exportation of natural gas from Ontario into the United States of America, and if not, was it the intention of the Government so to do, Premier Whitney stated the matter was now under consideration.

FUNDS MUST BE SACRED.

Municipalities which have failed to consider as sacred the sinking funds provided for the redemption of debentures received advice, which was in fact a warning, from Chairman Henry Carscallen in the Private Bills Committee. The pronouncement was given rise to by the bill of the Town of Trenton, which was reported, and which asked for the consolidation of debentures amounting to \$53,367.24. Trenton had used its sinking fund for the maintenance of a water-power plant for the benefit of the local industrial interests. "I do not say that the fund has not been expended honestly," said Mr. Carscallen, "but I feel that we ought to set our faces against the subversion of sinking funds, which are the safeguard of debenture-holders. I am in favor of giving relief to Trenton, but I feel that we ought to insert a stringent provision to prevent the recurrence of such an incident. Other municipalities, I feel sure have drawn upon their sinking funds, from time to time, and what I say does not apply to Trenton alone."

NEW RAILWAY.

The Rondeau, Ridgetown and Wallaceburg Railway was granted incorporation, subject, of course, to the revision of some changes in its clauses in conformity with the new General Railway Act. A clause empowering the company to sell surplus power was left for further consideration.

FROZEN BRIDE.

A Japanese Wedding Party Lost in the Snow.

A Kobe, Japan, despatch says: A bride and her suite of six people have been frozen to death while on their way to the wedding ceremony. They started for a house in Impetsumura, in the Asmori Prefecture, and encountered a terrific snowstorm at Nishimura, in a short time they were unable to proceed or retreat, and were covered in by the snow. As they did not arrive at their destination a search party was sent out on sledges, and the bride and her companions were found in the snow frozen to death.

TO ENFORCE REGULATIONS.

Men in Lumber, Mining and Railway Camps to be Protected.

A Toronto despatch says: Dr. Bell, Inspector of the Provincial Board of Health, has returned from an inspection of the lumber camps in the northern part of the country. He summoned seven parties who had contravened the regulation by not having contracts with doctors for the medical care of the men in their lumber camps, and for insufficient provision at the camps for the care of the sick. Convictions were secured in all the cases. In one case the magistrate gave the accused only three hours in which to make contracts. The convictions were against men at the Soo, Massey and Sudbury. The department is determined to continue the rigid enforcement of the regulations respecting lumber, mining and railway camps.

cars from Buffalo and Toronto may be sent to Rochester by the line that runs from Lockport to Rochester through Alton and intervening points.

KILLED BY HOT IGNOT.

Terrible Death of Laborer at Steel Works in Sydney.

A Halifax, N.S., despatch says: Geo. Reid, a laborer at the steel works at Sydney, met with a horrible death while at his work in the blooming mill on Wednesday morning. A hot steel ingot weighing several tons, which had fallen from a pair of heavy tongs, crashed through a steel floor, beneath which he was working, and crushed him to death, afterwards burning the body beyond recognition. He was 60 years of age and leaves a family.

NEW JAPANESE LOAN.

The Foreign Subscriptions Prove a Great Disappointment.

A Tokio despatch says: The subscriptions for the new domestic loan of 200,000,000 yen reached 324,000,000 yen (\$162,000,000). The foreign subscriptions, which were mostly from London, amount to 5,000,000 yen, which is a disappointment. Yoshiro Sakatani, Minister of Finance, will entertain Mr. Jacob Schiff, of New York, at a banquet March 28th, in recognition of his services in the flotation of Japanese war loans. The leading bankers will attend.

KING TO VISIT SULTAN.

Roundabout Report Says Edward Is Going to Constantinople.

A Berlin despatch to the New York Herald says that a confidential communication just received there from Constantinople states that preparations are being quietly pushed forward for the reception of King Edward, who is expected to visit the Sultan, coming direct by sea.

BIG LAND DEAL.

Portage la Prairie Men Buying Sixty Thousand Acres.

A Portage la Prairie despatch says: It is learned that a syndicate of Portage la Prairie men are about to pull off another land deal. They are to get 60,000 acres of Provincial Government land along the shores of Lake Manitoba. The price ranges from \$4 to \$4.50 per acre. Already blocks are being offered at \$6 and \$6.50 per acre to United States investors.

BRITISH OFFICER HAZED.

Comrades Objected to His Keeping to Himself.

A despatch from London says: A young officer of one of the Guards' regiments at Aldershot is now under a physician's care in London, his nervous system being completely broken down as the result of hazing. He is not rich, and he declared that he could not meet the usual regimental subscriptions. Consequently, he frequently absented himself from the company of the other officers and kept to his own rooms. His fellow-officers resented this, and to show their disapproval they stripped him, smeared him with motor oil, covered him with feathers and plastered his hair with jam. He escaped to his room, in which he barricaded himself. His tormentors smashed down the door, whereupon the victim leaped from a window and sought refuge in a hotel. The other officers could not find him, though they sought him, and he was reported to his superiors as being absent without leave. His physician telegraphed to the colonel of the regiment that the young officer is seriously ill. The Secretary of State for War, Mr. Haldane, has been informed of the affair, and has ordered an inquiry.

DOMINION PARLIAMENT

GOVERNOR GENERAL'S SPEECH AT THE OPENING.

TRANSCONTINENTAL SURVEYS.

Mr. Crockett was informed by Sir Wilfrid Laurier that the following portions of the route of the Transcontinental Railway had been surveyed: From Quebec to Moncton, approximate distance 1,366 miles, all surveyed, of which 395 miles have been located and advertised for tenders, and 149 miles have been submitted to the commissioners as first location, and the revision of the said location is proceeding. The location of these surveys is as follows: From Quebec Bridge westerly, 150 miles; in the vicinity of Hurricinaw River, 44.5 miles; eastward from boundary between Quebec and Ontario, 8 miles; westward from same point, 59.8 miles; the vicinity of Red Paint River, north-west of Lake Nepigon, 37.7 miles; Pelican Lake to a point about 10 miles from Winnipeg, 244 miles. Total, 544 miles. Moncton to Quebec, centre route, approximate total distance, 514 miles, all surveyed, of which 428.7 miles have been submitted to the commissioners as first location, and the revision of the said location is proceeding. These locations are as follows: Quebec Bridge to boundary, 220 miles; Quebec boundary eastward to Grand Falls, 62 miles; Plaster Rock eastward, 68 miles; west to Chipman, 20 miles; Chipman to Moncton, 58 miles. Total, 428.7 miles.

Via St. John or river route, approximate total distance 531 miles, all surveyed, of which 407 miles have been submitted to the commissioners as first location, and the revision of the said location is proceeding. These locations are as follows: Quebec to boundary between New Brunswick and Quebec, 220 miles; along St. John River between Grand Falls and Fredericton, 66.3 miles; Quebec boundary eastward to Grand Falls, 62 miles; Chipman to Moncton, 58 miles. Total, 407 miles.

MUTUAL RESERVE CO.

Mr. Martin learned from Sir Wilfrid Laurier that the Government had no information except what appeared in the press regarding the statements that the officials of the Mutual Reserve Life Insurance Company, of New York, had been charged with grand larceny in the first degree and forgery in the third degree. He assumed that the charges would be promptly investigated and dealt with in the New York courts. He was not aware of any action that could be taken in Canada in such a matter for the benefit of Canadian policy-holders.

AMERICANS IN THE WEST.

Mr. Taylor was informed by Sir Wilfrid Laurier that the Government had no information regarding the statement in a recent report of Mr. Vandussen, special examiner of the United States Department of Justice, that it was conservatively estimated that 50,000 native and naturalized citizens of the United States had taken up wheat lands in Manitoba in the last five years, many of them entering upon Government homestead lands as British subjects, while still retaining their certificates of United States citizenship and exercising such rights when in the States.

POSTMASTERS AND STAFFS.

Mr. Boyce was informed by Mr. Aylesworth that in cases where postmasters and their staffs were paid fixed salaries, the department received all the revenue collected from box rents. In post-offices where the salary was not fixed the postmaster obtained 50 per cent. of the rents, and in cases where the postmaster installed the boxes at his own expense he received the whole rent. Since 1896 the box fittings in all post-office buildings had been furnished by the Government.

CANNINGTON POSTMASTER.

Hints for Travellers

PACKING THE TRUNK.

Tack two cards on the outside of your trunk, one over the other; the under one bearing your home address, the upper one that of the place to which you are going. When the time for repacking comes, you have only to tear off the upper card.

For keeping gowns smooth, fasten common screw eyes into the inner sides of the trunk in rows, three or four in a row, and have each row about two inches apart. Draw strings of tape lightly through these, and after a skirt is folded place it in the trunk, and, with safety-pins, fasten at each end to the tape.

A good way to pack a woman's hat in the regular hat tray is to bore four holes, one in each side, near the corner, and half an inch from the bottom. Take four pieces of tape, each half a yard long, and after tying a knot in one end, run the tape through the holes, knots outside. Place a hat in the bottom and tie the tape ends diagonally opposite each other.

A simple device for an ordinary canvas telescope bag is to provide four strips of shingles, in length a little less than twice the height of the telescope. When the bag is being packed these pieces are put in each corner, and one may keep on packing as high as they stand. Then the top may be tightly strapped on, and even the fluffiest garments will not be crushed.

COMFORT AND HEALTH.

For toothache, rubbing the gum with quinine, in powdered form, is recommended. The powder should be held in the mouth as long as possible.

A sick headache is often caused by inability to get meals at the usual time. A few raisins carried in a tiny box and eaten from time to time will often avert a headache. Raisins contain a great deal of nourishment. Try eating sweet milk chocolate when meals are delayed.

To allay thirst when there is no water, or at least no good water, to be obtained, a cube of sugar soaked in lemon juice is excellent. Lemons are valuable traveling companions. Sweetened lemon juice added to water is much better for drinking than plain water on boats or trains.

Heat is one of the most powerful agents for the relief of pain. So don't forget the hot water bag. A flannel cover will serve to protect the skin from direct contact with the hot bag. In case of headache the bag may be laid at the back of the neck. The feet will probably be cold, and the bag will serve to warm them and draw the blood to the extremities. The tiny hot water face bags, too, are a comfort in case of neuralgia or an aching tooth.

SOME THINGS TO TAKE.

A rubber soap bag is better than a soap box.

A mitten made from outing flannel may be slipped on the hand and used to wipe dust from shoes.

One traveler advises a pair of fancy, dark colored blankets instead of the conventional traveling rug, on the ground that they can be used on occasion when the bed linen in a hotel is found to be damp.

Dust-cloths for trunks are useful. They may be made of China silk, cheesecloth or any other washable material. Cut them the length and width of the trunk trays. Feather-stitch the hems, and use instead of ordinary towels or tissue paper.

A package of white absorbent antiseptic cotton will be found useful in many ways when traveling. For children it may be used for handkerchief, washcloth or towel, and then thrown away. In case of accident or sickness it will be in-

HOSTILE TO RUSSIAN DOUMA

The Workmen Refuse to Vote for Delegates.

DELEGATES IMPRISONED.

A despatch from St. Petersburg says: The primary voting for delegates to represent the workmen in the final election for members of the Douma demonstrated that the State-controlled factories throughout the country are the most active centres of the revolutionary propaganda. The employees are against using their votes, and are openly hostile to the Douma. The men in the Oubouchoff ordnance foundry, near St. Petersburg, where 12,000 hands are employed under the direction of the Ministry of War, refused to choose electors. The workmen in the Government's principal cartridge factory at Tula refused to choose any of the five delegates allowed under the electoral law. The workmen in the imperial railway workshops at Wanoovo and Vosnessensk also refused to participate in the election. The employees in several of the leading independent industrial enterprises adopted the same attitude. The men in Siemens and Halske's electrical works here explained their refusal by saying that as soon as they canvassed the claims of any candidate he disappeared from the works and eventually was obliged to quit the locality.

There are numberless reports of such interference by the political police throughout the country. The elector chosen by the peasants of Simferopol is a school teacher. He was imprisoned on a political charge immediately he was elected. The peasants refused to

elect another delegate. An insignificant minority of the peasants participated in the elections in the provinces. In the Ustujna district of Nijni Novgorod only one thousand received election notices, although 8,000 were entitled to vote. A petition for an election has been prepared in this district. Where the urban workmen vote, as in factories in St. Petersburg and Moscow, the Constitutional Democrats almost invariably elected their candidates. The preliminary election passed off without incident, and attracted no attention.

ANOTHER WORKMEN UPEHAVAL.

A despatch from St. Petersburg says: The growing unrest and agitation among the Russian workmen is largely due to the Government's repressive measures in the provinces, and especially to the threatening situation in the Don and other regions. At Ekaterinoslav 16,000 men of the Hughes Iron Works are already reported to have struck, and at Moscow great agitation prevails in the industrial sections. Undoubtedly the whole movement is connected with the demand of the social democrats and revolutionists for another general political strike.

DEATH FOR THEFT.

A despatch from Riga, Russia, says: Three revolutionists were sentenced to death here on Thursday for breaking into a store and stealing ammunition.

ON THE FARM.

FEEDING HOGS FOR PROFIT.

I have been a successful hog raiser for 30 years, writes M. N. Vaughan. Raising hogs for profit is one thing and letting them grow on the farm and make what they will is another. If we expect profit from our hogs we must give them care and attention. They need comfortable quarters in winter, protection from the sun in summer, clean pens at all seasons, regular feeding, a clean place to eat, food properly prepared and some space in which to root, with no rings in their noses. Death comes to many hogs because we deprive them of that inborn desire to root, find his medicine and restore himself to health when sick. The hog knows why he roots, but we do not. Careful experiments have shown that each bushel of corn fed hogs will produce on the average about ten pounds pork. When I am ready to fatten I divide my hogs into lots of 20 or 25 each. Too many hogs together will most certainly invite contagion. I keep my hogs at all seasons in good growing condition, and it never takes me over 40 days to have my hogs round and plump and ready for the highest market.

There is no trouble in putting fat on a well-kept hog. When I am ready to fatten I hitch my horses to my feed grinder and crush and grind 50 bushels corn, cob and all, into coarse meal. I put this corn and cob meal in a dry place in barrel. I fill three or four extra barrels about half full of this corn and cob meal. I pour boiling water into these barrels until they are about three-fourths full, this water may include milk and other slops from the kitchen. I stir this mixture and let it stand two or three days till it begins to ferment. This process will soon fill

economically handled and sold. The work of sorting always comes against the shipper. As a rule, a dealer will pay more for a hundred barrels of one variety than the same number composed of several varieties. Cold storage houses in the cities are also prejudiced against the mixed consignment. As a rule they know just what temperature is required for each variety of winter fruit, but it complicates matters to store half a dozen different varieties all mixed in one lot.

But this is aside from my experiment. In the family orchard one season some choice trees were tried in a new way, or at least, my attention had not been directed to it previously. The nursery stock was received in the spring, but I began preparations for the trees in the fall. Before the ground was frozen large holes were dug for the trees. A generous amount of earth was removed averaging nearly half a yard for each tree. When the holes were deep enough they were filled with rich, well composted manure from the barn stables and packed down firmly. Over the top a very light layer of loose soil was thrown, hoping that this would keep the rains from washing the manure away. The holes thus filled were left until spring. As soon as practicable for planting trees, the manure was removed from the holes, and the trees inserted. Good, rich loam mixed with some of the manure was used for filling and packing among the roots. The rest of the manure was spread around the base of the trees.

The results of this experiment were most gratifying. The trees took on a phenomenal growth, and continued to thrive, and in time produced more abundant crops of fine fruits than any of the others in the family orchard. I am not claiming that this method of planting was solely responsible for the splendid results, but I am inclined to think that it gives the trees an unusual start. The manure must have soaked in the soil down to a depth of two or three feet, and the roots of the trees found it just where they most needed it. I have heard since that a number

in cases where the postmaster installed the boxes at his own expense he received the whole rent. Since 1896 the box fittings in all post-office buildings had been furnished by the Government.

CANNINGTON POSTMASTER.

Col. Hughes was informed by Mr. Aylesworth that the late postmaster at Cannington had been engaged as a grocer prior to his dismissal. Different residents of the village had complained against the postmaster being subsidized by the Government against them. An investigation had been made by the inspector personally, and he had reported the result to the department.

VOYAGEURS' MEDALS.

Col. Hughes was informed by Sir Frederick Borden that the Canadian Nile voyageurs, under Sir Garnet Wolseley, had been given the Soudan medal by her Majesty's Government, and the Khedive bronze star. They had not been given any scrip. They had not been recognized by the Canadian Government in any official way except as stated above.

QUEBEC BRIDGE.

Mr. Monk was informed by Sir Wilfrid Laurier that the subsidies granted by the Quebec Government and the City of Quebec for the Quebec bridge, amounting to \$250,000 and \$300,000 respectively had been paid in cash, with the exception of the provincial subsidy at the rate of \$30,000 a year, of which \$180,000 had already been paid and \$70,000 remains to be paid. The bonds of the Quebec Bridge Company, amounting to \$472,000, had been redeemed at their par value. Mr. Monk was also told by Sir Wilfrid Laurier that no inspection had yet been made by the Government of the books of the Quebec Bridge and Railway Company.

PORT COLBORNE HARBOR.

Mr. Bennett was told by Sir Wilfrid Laurier that \$142,843 had been expended to date on dredging at Port Colborne, and \$438,750 upon rock excavation. The total under-water excavation had cost to date \$581,595. The Government elevator at Port Colborne had cost to date \$76,190.

VOYAGEURS NOT RECOGNIZED.

Col. Hughes was informed by Sir Wilfrid Laurier that the Voyageurs under Sir Garnet Wolseley in 1870 had not been recognized in any official way by either the British or Canadian Governments. It had been decided by the Government of the day that these men were employed as civilians, and were not eligible for medals or scrip. They, had, in fact, been treated precisely the same as the teamsters employed at the same time. It was not intended to depart from the decision then reached.

TRENT VALLEY CANAL.

Mr. Ward (Durham) learned from Sir Wilfrid Laurier that surveys for the outlet of the Trent Valley Canal had been made from Rice Lake to Port Hope, Rice Lake to Colborne, and Rice Lake to Trenton. The Government had not come to any decision as to the proper route to be adopted. The reports of the surveys had not been submitted to the Department of Railways and Canals by the engineers in charge. The probable amount of damage caused by the break in the Trent Valley Canal at Peterborough and Kirkfield was \$2,000.

RAILWAY ACT AMENDMENT.

Mr. Lancaster's bill to amend the Railway Act was considered in committee and read a second time. It proposes to enable the owners of lands expropriated by railways to move that the arbitration proceedings be expedited. Under the law at present the railway company may pay damages into court, but the former owner of the land is unable to obtain the money until the court proceedings have been concluded, which sometimes involves great delay.

Mr. Fitzpatrick stated that he had noticed the defect in the law, and had intended to introduce a bill to remedy it himself, therefore he had no objections to Mr. Lancaster's bill.

paper.

A package of white absorbent antiseptic cotton will be found useful in many ways when traveling. For children it may be used for handkerchief, washcloth or towel, and then thrown away. In case of accident or sickness it will be invaluable.

If a small bottle of alcohol, a "silk" sponge and several pieces of clean blotting paper are carried in your bag, it will be a simple matter to remove a greasy or sticky spot from your clothing. Place the blotter under the spot and apply the alcohol with a sponge. The dirt will be carried through and absorbed by the blotter.

FOR THE WOMEN.

Women will find that wearing a black silk mob-cap, or tying a silk handkerchief over the head at night on board a train, will save much annoyance from cinders or other dust.

Let a woman avoid hooks and eyes and fancy fastenings on clothing to be worn on ship-board; remember that much of the time your head will be describing the arc of a circle, and the less toilette you have to make the better.

A woman submits that the night gown for the traveler should not be white. A black cashmere gown with stitching or other trimming of red looks well. Gowns of black India silk are the best, for they are so light and pack into such little space.

Wear a leather belt with strong buckle and hang on it a chateau bag with the front side turned to the back. By this simple arrangement it will be impossible to lose it, or for thieves to snatch it off. In this carry small change enough for a day and replenish each evening.

One's hat should not be trimmed with feathers and flowers, both of which are ruined by wet, damp and dust. Stiff ribbon bows with wings or single stiff plumes are the best garniture. Pin a piece of chamois in the back of your jacket for warmth across the shoulders and wear tight instead of a number of skirts.

ON THE TRAIN.

When writing on the train, rest your insertion of a flaxseed almost always the jar.

To remove a cinder from the eye, the insertion of a flaxseed almost always will prove efficacious.

If you expect to travel at night, take a large square of net or muslin to pin against the window-pane of your berth. Pull up the shade in the morning, and the little contrivance will enable you to dress without embarrassment even when waiting at stations.

Many mothers who consider carefully the bodily comfort of their children on a journey, forget apparently to provide for their active minds. Even very young children can be amused and the annoyances of a long trip can be reduced to a minimum by furnishing them with proper entertainment.

On a hot night fear off a piece of newspaper the size of the pillow and slip the paper between the pillow and the pillowcase. As paper is a non-conductor of heat, the pillow is kept comparatively cool. When the air in the berth is so hot that it is hard to go to sleep, partly fill a rubber water-bottle with ice water and place beneath the pillow. Turning the pillow so that the cool side may come under the neck, soon induces sleep.

SITE NEAR SANDWICH.

Rumor Respecting the United States Steel Corporation.

A Windsor despatch says: Recent activity by representatives of the United States Steel Corporation in this vicinity may be explained by a private despatch from New York to a prominent Detroit broker, which says: "Reported that the United States Steel Corporation will operate in Canada, with heavy expenditures." It is known that the options on the two thousand acres of land a short distance below Sandwich were extended the latter part of last week. There are other indications that something is on foot in that section. No definite information can be obtained from people interested in the matter.

and cob meal. I pour boiling water into these barrels until they are about three-fourths full, this water may include milk and other slops from the kitchen. I stir this mixture and let it stand two or three days till it begins to ferment. This process will soon fill the barrels to overflowing. Feeding now begins, sparingly at first, till the hogs get used to it, then I give them all they will eat three times a day. This preparation of soft mush makes an excellent laxative diet, allays the tendency to a feverish condition of the hogs' bowels, hastens digestion, gives the hog a good appetite, promotes health and puts on fat and flesh with exceeding rapidity.

I let my fatteners run on grass till the snow falls, then I house them and bed with the sweet clover hay. I find it necessary to renew the bed every two or three days as the hogs eat the bed when they can't get grass from the pasture. They are very fond of sweet clover hay. There is no waste of hay, for clover is a muscle producer and promotes the health of the hogs. The soft mush produced by scalding the corn and cob meal, I feed in long troughs on a regular feeding floor, so as to keep the food clean. This is very important. I keep a trough in one corner of the feeding floor filled with charcoal and salt for the hogs to eat just when they want it. This is a fine preventive of cholera and purges the bowels of impurities. In 40 days from the time I begin this special feeding my hogs are ready to sell and I find I have used eight bushels corn for each hog, and each hog gained on an average 160 pounds in the 40 days. Now let us count the profit: 50 hogs gained 8,000 pounds, at 5 cents per pound is \$400; 400 bushels corn 45 cents per bushel is \$180, leaving a net gain of \$220. To these figures add 7,000 pounds, the weight before fattening, and you will have the total valuation.

I make six sales of this kind a year. With 15 brood sows and one male I cleared last year \$2,270 on my hogs and don't call myself an extensive hog raiser. I did this last year and bought 2,400 bushels of corn to fatten the hogs. I find that I fatten in about half the time and with about half the feed of my neighbors. This is actual experience and not theory. I always keep on hand plenty of pigs and shotes to serve my purpose. This necessitates the keeping of about 15 brood sows and a good vigorous male. Whenever I am overstocked with pigs I easily dispose of them at weaning time at \$3 each. I never sell an ear of corn; I feed all to the hogs and other stock. Farm produce fed to stock increases the net income at least one-fourth. I always keep on friendly terms with my sows and give them proper care and treatment. As a result, I find them the most profitable investment on the farm.

PLANTING THE FAMILY ORCHARD.

In experimenting with a number of apple trees, I secured many varieties and planted them in what I called the family orchard, writes A. S. Atkinson. Ordinarily the family orchard is used to cover mistaken ideas and neglect in culture, for won't anything do for family use? It is only for market that we have to be careful. In any case more attention was devoted to the family orchard than to the commercial orchard. It was a sort of experimental orchard for me. In it were tested new varieties, and if they did well there, more were ordered for planting in the commercial orchard. As a rule, one needs great variety in the family orchard, for it adds to the pleasure of one's experience to taste and compare different varieties. In a commercial sense the many-variety orchard is unprofitable. While it is not profitable to carry all the eggs in one basket, it is also equally unwise to distribute them around in too many baskets.

Only tried varieties should be used in the commercial orchard and enough trees of each variety should be planted to make it profitable to handle the fruit. A good many dealers do not like to receive a mixed shipment of apples. A shipment of straight Baldwins, Greenings, Pippens, or other fruit is more

planting was solely responsible for the splendid results, but I am inclined to think that it gives the trees an unusual start. The manure must have soaked in the soil down to a depth of two or three feet, and the roots of the trees found it just where they most needed it. I have heard since that a number of other orchardists adopt this plan with equal success. One who favors fall planting of trees, fills the holes with manure in early spring and removes it in the late fall when the trees are put in the ground. In either case the results appear to justify the method.

FIRE IN GUELPH FOUNDRY.

Three-Storey Varnish and Paint Shop Gutted.

A despatch from Guelph says: The biggest fire this city has experienced in years was raging from 8 until 9.30 on Thursday night. About 7.45 the alarm was sent in summoning the brigade to Crowe's Iron Foundry, where smoke was issuing from the three-storey paint and varnish shop attached to the foundry. From then until 9.15 the firemen had one of the hardest fights to confine the flames to the place of origin. The foundry and numerous cottages surrounding frame and plastered cottages were for a time in great danger, but a covering of snow on the roofs put out the flying burning embers as soon as they alighted, and materially aided in preventing any spread. The paint shop was gutted. There were between 30 and 40 men employed in the burned building, and one of the departments was at work when the fire broke out. A great many piano plates in a finished and unfinished condition were destroyed. It is understood that a barrel of japan was being opened and was ignited by a gas jet, one of the men being burned about the head. The moulding shop was flooded with water, which will suspend work in that department for a few days. The loss will probably reach \$21,000, divided as follows: \$8,000 on building, \$6,000 on equipment, and \$7,000 on stock.

FIREMEN KILLED IN WRECK.

Fatal Collision on Grand Trunk Near Sarnia.

A despatch from Sarnia says: A terrible accident occurred on the Grand Trunk about three miles from Sarnia at 2.30 o'clock on Thursday morning, costing the lives of two London firemen, Richard Grapp and Samuel Hughes, and wrecking three locomotives. The Montreal express, which leaves Sarnia, left the tunnel yards at a speed of 30 miles an hour. Instead of being switched on to the Stratford division, it took the London line. The crew of the train detected a mistake when about a quarter of a mile from the switch, and applied the brakes, but too late. A double-header freight, travelling 20 miles an hour, crashed head-on into the passenger train as the latter was about at a standstill. The passenger engine was forced back several rods, and the wreckage settled with the front engine of the double-header standing upright. The forward parts of the other engines were smashed to pieces. A few slight bruises were reported to passengers on the express, but nothing serious. A couple of passengers cars were derailed, and five freight cars were thrown into the ditch. The accident delayed traffic on the road about four hours. Both engineers on the freight and the engineer and fireman on the passenger train miraculously escaped without injury, being thrown out of their engines.

LEFT SWEETHEART TO DIE.

Elmer Prutzman Was Killed By Ambushed Rival.

A despatch from Reading, Pa., says: Elmer Prutzman, aged 21 years, was shot and killed on Tuesday at midnight as he left the home of his sweetheart, Mabel Treat. Only the day before Prutzman wrote to his parents at Hamburg, this county, that his life had been threatened, and that he was afraid to venture out at night.

RUBBER TIME

We have everything in Rubbers from a foothold to a Rubber Boot, and from one of the best makers in Canada.

Ladies like our lightweight Street Rubbers. A good protection for the shoe but not clumsy. Many styles to choose from.

The Children need School Rubbers this sloppy weather. We have all sizes and styles for the little folks.

Rubber Boots===for Father, Mother, Brother or Sister.

THE **J. J. HAINES** SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR.
DAFOE'S NONESUCH
DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafe's, and patronize your home mill, thereby producing Bran, and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

SYMINGTON'S

South Side Dundas Street, Napanee, Ont.

At The Downtown Office of the
NAPANEE CANNING CO., Limited,

Lennox and Addington Old Boys' Re-Union will be held in Napanee, on the 23rd, 24th, 25th, and 26th of August.

Elecutuonary Contest.

The fifth Elecutuonary contest for Medals will be held in the town hall on Thursday April 19th, 1906.

The Secret Told.

The first one to furnish us with the correct reading of our rebus, which will be found running down the column on this page, was Mrs. H. Bridgland, Collins Bay, the winner of the prize. The Medical Hall—Fred. L. Hooper.

Try Hooper's

Buy all your bright tinware from BOYLE & SON they make the best.

The County Commissioners will meet in the County Buildings on Tuesday April 3rd, for the purpose of considering the County roads problem, also for general business.

RAIN COATS

Spring weather is always uncertain, cool to day, raining to-morrow, and sunshine the next day.

Your winter overcoat is a burden two thirds of the time. To meet all conditions own a

GRAVENETTE

an ideal and stylish rain or shine overgarment.

A LUXURY AT ALL TIMES

all sizes, with a price range from \$7.50 to \$18.00.

20 Regular \$10 Coats to Clear at \$7.50

If your size is here now is your chance as they are regular \$10 odd lines we are clearing out.

J. L. BOYES,

Headquarters for Men's and Boys' Clothing.

Hogs Wanted.

I will ship on Wednesday next, April 4th, and will pay the highest market prices for good select hogs.

J. W. HALL.

The Salvation Army Emigration.

Blank application forms for farmers who wish to apply to The Salvation Army for farm help may be had at this office.

Sacred Concert.

In the Presbyterian church, on Thursday, April 5th, Miss Cora Larke, Soprano Soloist of Sydenham street church, Miss Tandy, Contralto soloist of St. Andrew's church, Kingston, Miss Mignon Telgmann, Child Violinist, Miss Minnie Shaw, organist, and Mr. J. W. Craig, Bass soloist, will give the programme. Admission 25c.

The Hay Bay Ferry.

On Friday evening last the subscribers to the Hay Bay met in the Council Chamber and received the report of the solicitors for subscriptions. Messrs. M. S. Madole, C. A. Graham, Dr. Simpson, H. Meng, and W. T. Waller were appointed a managing committee to collect the subscriptions and get the ferry built and ready for business as soon as possible.

Banquetted

On Thursday evening a number of the young gentlemen around town tendered a banquet to Mr. Fred S. Lapum, who leaves next week for Mexico. A splendid supper was served in the Royal Hotel to which a goodly number of guests sat down, and a very pleasant evening was spent with speeches and social intercourse. During the evening the boys presented Mr. Lapum with a beautiful club bag as a token of their esteem and friendship.

Napanee vs. Kingston, A Tie.

The curling match at Kingston on Friday evening last finished a tie.

The game will not likely be played off.

The following were the players.

Kingston—J. W. Fraser, W. R. Sills, A. T. Hatch, E. O. Sliter, skip—17.

Napanee—J. E. Caldwell, W. Mabey, M. Graham, R. A. Crocker, skip—24.

Kingston—W. H. Montgomery, A. Mackie, J. M. Farrell, R. Ross, skip—16.

Napanee—F. T. Bogart, J. F. Chalmers, W. A. Grainger, C. A. Edwards, skip—12.

PERSONALS

Mrs. W. S. Herrington gave a supper for Mr. F. S. Lapum on Tuesday eve.

Mr. Charles Clark, of Westbrooke, was in Napanee Thursday.

Mr. Lewis Warner Vannest, of Verona, was in Napanee Thursday.

Mr. James Huff and Mr. Sperry Rikley, of Lapum, were in Napanee Thursday.

Mrs. Dr. Ruttan, Woodstock, spent a few days in town last week, having been called home on account of the illness of her daughter Dorothy, who is ill.

Mr. and Mrs. A. C. Parks, Hay Bay have returned from their trip to California.

Mrs. McMullen, left last week to join her husband at Duluth.

Miss Blanch Grieve, spent last week with friends in Gananoque and Almonte.

Mr. R. L. Johnston, Toronto, was in town on Monday.

Mr. DuMange, Belleville, has accepted a position with the J. J. Haines shoe store.

Mr. F. E. Wagar leaves on Thursday for the west.

Mr. E. R. McBride, Belleville, was in town on Monday.

Mr. and Mrs. A. E. Paul, spent Wednesday in Kingston.

Mr. H. E. Smith was in Picton on Thursday.

Messrs. George Botting and W. J. McKinnon, Kingston, were in town on Thursday, attending the banquet given Mr. F. S. Lapum.

Mr. and Mrs. Luman Sherwood, who have been in New York for some time, have gone to Denver, Colorado.

Mr. and Mrs. John Lowry and daughter, Mrs. E. J. Pollard, spent Wednesday in Yarker.

Mr. Rose of the Robinson Co. spent Wednesday in Tamworth.

Mr. and Mrs. J. S. Hullett spent Wednesday in Strathcona.

Mrs. Dr. Acland, Gananoque, is the guest of Mr. and Mrs. H. W. Kelly.

Mr. Hart, Lapum, Montreal, is spending a few days in town the guest of his parents.

Mr. C. H. Boyes of Kingston spent Sunday in town.

Mrs. John Charles of Yarker, spent a few days in Kingston last week the guest of Mr. and Mrs. C. H. Boyes.

Mrs. Ryan of Camden East was the guest of Mrs. A. Benjamin Yarker on Wednesday.

Canon Jarvis and Rural Dean Dibb attended the funeral of the late Dr. Walkem in Kingston on Monday.

Miss Eunice Vanalstine, Palace road returned on Saturday from a visit with her sister Mrs. Arthur Boyes, Lachine.

Mr. J. S. Ross returned last Friday from a trip to the West. He intends buying a carload of horses and going West again.

Mr. F. F. Miller spent a few days last week in Cobalt.

Mrs. A. J. Davern and two children who have spent the winter here left last week for their home in Keewatin.

Mr. Chas. Cleall, late of the Merchant Bank staff here, has been engaged by The United States Baneing Co. Mexico City and will leave for Mexico about May 1st.

Mr. W. D. Fellows left on Monday for Indian Head, Sask.

Mrs. Hattie Pope, Picton, is in Napanee, nursing her mother, Mrs. Ward, who is in her ninetieth year, and quite ill.—Whig.

Mr. Lester Moffat, Picton, left last week for Calgary.

Mrs. Fred Sheppard, Brockville, is

Ottawa, March 28—Mr. Wilson, M. P. for Lennox, will introduce a bill to reduce the sessional indemnity of members of both houses to \$1,500, and to repeal the payment of pensions to ex-privy councillors.

At The

Mr. John Chatterton, Napanee has bought the Standard bred road and carriage stallion, Prince Lawrence and is going to stand this season for service. Prince Lawrence is 9 years old 16 hands high, and weighs 1375. He is a nice rich chestnut with a fine head, small ears, long breezy neck, heavy tail and mane, well muscled and heavy boned, good feet, high gaited and can show a 2:30 clip. I think that he will be a good producer of large road and carriage horses, as our markets have called for the large road and carriage stock horse. The horse stands at the Brisco House stable and can be seen at any time. I would like to have breeders call and see him.

JOHN CHATTERTON.

Medical Hall.

ONTARIO TEACHERS.
Will Discuss Education Bill at the Approaching Convention.

The forty-fifth annual meeting of the Ontario Educational Association will be held in the University of Toronto on April 17, 18 and 19. The sixteen departments and sections of which the association is composed have each very full programmes, and many live educational questions will be discussed during the meeting.

The Programme of the Public School Department will be found thoroughly practical, and of direct personal interest to every Public School Teacher in the Province. It gains special interest inasmuch as the Government proposes some important changes along several lines indicated in the topics for discussion of this year's programme.

Some of the topics for discussion are: The Salary Question, Superannuation, Teacher Advertising, Men and Women Teachers, Organization of Teachers, Teachers' Qualification, Reorganization of Training Schools &c. &c.

The attendance and interest in these annual gatherings of the teachers of the province is increasing year by year. And the importance of this year's meeting will no doubt largely increase the attendance of Public School Teachers. Single fare rates on all Railways will enable them to attend the Convention at a minimum of expense.

An excursion has been arranged under the auspices of the association to the Ontario Agricultural College, at Guelph, on the invitation of President Creelman, for Friday, April 20. All members of the association will be entertained at luncheon, and a full programme has been arranged so that the visitors may see all the departments of the college, the Macdonald Institute, and the Consolidated Rural School.

GUNN—At Richmond, on Thursday, March 22nd, 1906, Christina Sinclair, relict of the late John Gunn, aged 85 years, 4 months.

Gave A Present.

At the A. O. U. W. grand lodge meeting, held in Toronto, last week, the members from the Kingston district presented Bro. R. W. Longmore, Camden East, the retiring D. D. G. M. W., with a gold headed cane, and an address, besides re-electing him to the office, showing the high esteem in which he United Workmen hold him.

Canadians are Proud

and rightly so, to have in their own Ontario such a large and up-to-date firm as the Dale Estate Florists, of Brampton. Their greenhouses which cover 14 acres and contain 600,000 sq. ft. of glass are the largest on the American continent. The Medical Hall has the agency for this enterprising estate for Napanee, and will be pleased to supply anything in the line of cut flowers or floral designs, such as wreaths, pillows, crosses etc. on the shortest notice. Leave us your order for Easter Lilies.—FRED L. HOOPER.

County House of Refuge.

A well attended meeting was held in the town hall, on Friday evening last for the purpose of hearing the views of the ratepayers and taking measures to have a County House of Refuge established at or near Napanee. Committees representing the town council, the Board of Trade and the various churches were present and a number of addresses were delivered by members of various committees, all being strongly in favor of the establishment of a County House of Refuge in place of the haphazard method of caring for the poor of the County. A deputation was appointed to go to Toronto next week and interview the Provincial Secretary, placing the matter before him in proper light. The deputation are Messrs. W. T. Gibbard, G. F. Rutan and H. Ming.

JAMES WALTERS,

Merchant Tailor, - Napanee.

A Good Move.

A petition was circulated around town this week asking the Provincial Government to prohibit the netting of fish of any kind in the Napanee River. The once well stocked river is almost cleaned out of fish and the way the nets have been placed in the river scarcely a fish can get up the river at all. Were netting strictly prohibited the river would again become stocked with fish.

Washington Irving.

A house in William street, New York, was Irving's birthplace on April 3, 1783. The British were soon to evacuate the city and Washington to take possession of it. Mrs. Irving, a warm hearted woman of English birth and an ardent patriot of the new land, said, "Washington's work is ended, and the child shall be named after him." The child was still in the care of a Scotch nurse when one day she saw the president, as Washington then was, enter a shop, and after him she went. "Please, your honor," said she, "here's a bairn named after you." The president laid his hand on the boy's head and gave him a blessing, which he never forgot.

A Jewel of a Wife.

The minister's wife had an unwelcome visitor in a very talkative scandal monger, so the minister went out for a stroll. Returning half an hour later, he called out, "That old cat gone, I suppose?" "Yes," said his wife, who had still her guest talking to her, "I sent it home in a basket, my dear, this morning." What do you think of that for presence of mind and absence of cat?

What Will Happen to It.

"That flimsily constructed public building is a scandal!" exclaimed the patriot.

"Never mind," answered Mr. Degraft soothingly; "it'll soon blow over."

Thankful For Small Mercies.

A man lost a leg in a railway accident, and when they picked him up the first word he said was, "Thank the Lord, it was the leg with the rheumatism."

BOYLE & SON.

TAMWORTH.

The victims of March 15th fire here have mostly got located.

W. A. Fuller, Hardware, has secured the Herkimer store for a while until he can rebuild on his own ground.

The Misses Coulter have moved into James Sau's house opposite brick yard on road to station they are now ready to comence dress making as before.

Mr. K ng has removed to Geo. Woods House.

Mr. J. Taylor and Co have bought out the Cunningham Block and will refit it up for show rooms.

W. A. Fuller has commenced to clear his ground ready to rebuild on the old sight.

We hope all will rebuild soon so as to fill up the gap made by the fire.

Michael Fitzgerald, Hotel keeper, has given contract for a large wood shed to be erected at once.

Our last snow fall has all disappeared with the heavy rain of Monday night the roads are in a bad state the heavy rain has caused nettle swail to over flow the road for a time.

Messrs. Paul and Robinson are getting ready for their seasons work by overhauling their factories and putting them in good order.

All the parties having a loss by recent fire have gotten a settlement with the Insurance Companies interested and all as satisfied with their adjustment.

John A. Hunter has engaged the services of Joseph Barrett of Enterprise to take charge of his Blacksmith shop he is a no. one man and ought to comand a good call for Hunter.

The farmers improved the last snow by drawing wood and logs to the town.

Mrs. P. F. Carscallen passed away very suddenly.

Mrs. Ed. Dawson has been very sick for a few days the effect of an ulcerated tooth she is better now.

A. S. KIMMERLY has a full stock Herbageum Oil Cake, Ground Flax Seed, International Stock Food and Bibby's Cream Equivalent for calves, Clover and Timothy Seed, bought and sold. Full stock all kinds field and garden seeds, bran, shorts, cracked corn, corn meal, rock salt. Our prices on flour below all others.

The Difference Between Expert and Unskilful Tea Blending

THE qualities of different teas prove that there is a distinct difference between expert Red Rose blending methods and the usual methods.

Several kinds of teas may be blended, but if unskilfully selected they will not combine to make a perfect blend; they will retain their original individual characteristics with their roughness and harshness emphasized.

Such tea is bitter, poorly flavored in the cup (and there is much of it in bulk and package form on the market). It emphasizes the result of inexperience, lack of knowledge of combining qualities of different teas, imperfect blending, poor selection, and the hundred and one other causes of poor tea.

But my expert Red Rose blenders select the right grades of strong, rich Indian teas and delicate fragrant Ceylon teas, and produce Red Rose Tea with entirely new characteristics—a tea with that "rich fruity flavor"—a tea so exquisitely different and better than any brand of Ceylon alone, that no one who once tries it ever goes back to Ceylon again.

Red Rose Tea

is good Tea
T. H. Estabrooks
St. John, N.E., Toronto, Winnipeg

Money Saved is Money Earned

Housekeepers and Homemakers realize the value of economy. We want them to realize the full possibilities of economy by dealing at this store

Several families are leaving for the west this spring, they will be greatly missed by their many friends.

Mr. Peter Morton was to Arden on business, last week.

Mr. Anderson has arrived in town to stay.

POOR PACKAGE DYES MAKE Women Miserable and Cross.

Diamond Dyes

Have Made Millions of Wives, Mothers and Daughters Happy and Contented.

Women who buy and use any of the adulterated, weak and worthless package dyes put up in imitation of the reliable and never-failing DIAMOND DYES, must expect to meet with sad trials and disappointments in the home.

Crude package dyes with only fancy names to recommend them, and sold by some dealers for the sake of large profits, are the direct cause of much of the feminine bad temper and irritableness manifested in many homes.

If our women and girls would avoid trouble, loss of goods and hard cash, they must insist upon getting the DIAMOND DYES whenever home dyeing work is to be done. One ten cent package of the time-tried DIAMOND DYES will always color more goods than will two packages of other dyes, and give brighter, fuller, more brilliant and more lasting shades. Once used, DIAMOND DYES become the chosen dyes for all well-regulated homes.

Send your name and address to Wells & Richardson Co., Limited, Montreal, P. Q., and you will receive free of cost new Dye Book, card of Dyed Cloth Samples and Booklet in verse, entitled 'The Longjohns' Trip to the Klondike.'

GREY LION GROCERY.

Belleville, April 4—A daring hold-up occurred near here early this morning. William Carnrite, veterinary student with Dr. Purvis with a young man named Peter Purvis, were called to attend a sick horse six miles this side of Picton. They left about 11.30 last night. At 1 o'clock when in the middle of what is known as Long Swamp, three men jumped from behind a tree. One grabbed the horse's head, while the other two came up with clubs, ordering the occupants to hold up their hands and to hand out their valuables. Carnrite happened to have a revolver, which he took from his pocket, and pointing at the men, threatened to shoot. They all took to their heels through the swamp and disappeared. Carnrite fired several shots after the men, but does not know whether they took effect. The men were tall, wearing black overcoats, and were hard-looking characters.

That New Dye called "Dyola" is sold at WALLACE'S RED CROSS DRUG STORE 3 packages for 25 cents also Diamond Dyes, Turkish, Standard or Rex all same price.

Port Arthur will this year enjoy the lowest tax rate in its history—16 mills. This rate is struck on assessment of \$85,322,111, and is made possible because of the earnings of the public franchises which show a total net profit for the year of \$23,115,900, leaving the net amount to be raised by general tax of \$31,180,10. The earnings are divided among franchises thus: Electric railway, net profits, \$5,500,10, electric light \$13,937,70; telephone, \$3,617,10. These figures are after all expenses, including interest and sinking fund, and \$3000 death claim on railway are allowed for.

Belleville, Ont., April 2.—It is now alleged that the young man, Greatrix, who was said to be suffering from a rupture of the bowels, owing to taking free samples of patent medicines, was in reality suffering with an abscess of the intestines, and that the medicine took simply made the case acute. At the present time, a doctor who attended him says he has only one chance in fifty for recovery.

Madoc, April 2.—Peter Jarvis of Kellar's Bridge was killed this afternoon in the American Madoc Company's mine, near Bannockburn. Five men were brought up the shaft in the bucket and when near the top the cable caught on something, tipping the bucket over sideways. Jarvis and John Pressick of Cordova fell out, the latter fell about 25 feet, lighting on a piece of timber, unhurt. Jarvis fell 70 feet to the bottom of the shaft. He lived about ten minutes. The other three occupants caught hold of the cable till the bucket righted itself again. Jarvis was foreman of the mine. He leaves a wife and one child.

International Stock Food, Heave Cure and other remedies. Three feeds one cent.

MADOLE & WILSON.

Will not save a diseased tree. Whatever it is that threatens the life of the tree must be discovered and attacked directly. It is the same

Pruning the Branches because the ordinary remedy instead of going at the root of the disease simply prunes the branches. The trouble is in the bone or joint and must be got at there, must be driven out. This is where the pre-eminence of Tuck's Rheumatic Bone Oil comes in over all remedies. It goes straight at the root of the trouble in the quickest and most direct way, penetrates to the bone and effects a sure, permanent and speedy cure. Here is what one sufferer says of it:—

Dear Sirs—You ask me if Tuck's Bone Oil did me any good I can tell you that it did. It cured me of rheumatism and nothing ever helped me for neuralgia until I got that. I suffered everything for years from rheumatism and at times I thought it was going to my heart and would kill me. All my neighbors know how I suffered and they all know that Tuck's Bone Oil cured me, because I tell everybody I see. I took small doses of it, about four drops in milk, and I had it thoroughly rubbed into my legs which were both affected. It seemed to penetrate right to where the pain was and even the first application gave me relief, but the grumbling pain came back in a few hours. I kept on using it and before I had used all of the fourth bottle I was completely free of rheumatism. During this time I had a terrible attack of neuralgia. I used Tuck's Bone Oil and got almost instant relief, I am willing for you to use this any way you like because I think your Bone Oil should be known of by everyone.

W. H. Dean,
Farnham, Quebec.
For rheumatism, lame back, neuralgia, sprains, coughs, colds, quinsy or bronchitis, in short for any and all kinds of inflammation there is nothing to equal Tuck's Bone Oil. A bottle should be on the shelf in every home. For sale by all medicine dealers at 50c. a bottle or sent prepaid by The Tuck Bone Oil Co. Limited, Smith's Falls, Ont.

Moved by Councillor Ming, seconded by Councillor Williams, that the meeting adjourn for two weeks to the date of the former motion. Carried.

F. C. ANDERSON,
Sec'y.

Pocket Electric Flash Lights will sell at \$1.00 each.

BOYLE & SON.

VICTIMIZED FARMERS.

George A. Booth, trader, Trenton, Ont., who was found guilty on Friday of false pretenses, was condemned Saturday morning by Judge Choquet to pay a fine of \$50 or serve four months in jail. It was Booth's intention to pay the fine, but he heard that as soon as he stepped outside the prison gate he would be again arrested. Chief Detective Carpenter says that Booth is wanted in Napanee, Ont. to answer to a charge of false pretenses, and when he leaves the jail here there will be awaiting him a warrant for his arrest on the Napanee charge. Booth may make up his mind to serve the four months here, or he may pay his fine and go to Napanee to answer to the charge against him there.

Booth sent out circulars under the name of Bond & Co., requesting farmers in different places to send him their butter and eggs, and he would sell them on commission, or purchase the produce. It was proven that he made arrangements with two or three local firms to receive any produce that was sent addressed to him, and gave them instructions to advance 50 per cent., and dispose of the goods for whatever they could get.

Booth was arrested here February 25, by Detective O'Keefe, and has been in jail here since.—Gazette, April 2nd.

At noon yesterday the Grand Jury brought in a true bill for murder against Adam Lloyd, who is alleged to have killed his wife on January 23, 1905, and then set her on fire by saturating her clothing with kerosene. The old couple lived alone. Suspicion was aroused, as the woman's hands were not burned, and she was found sitting in a chair far from the stove, with an ugly wound on her head. The case was to have come before the Grand Jury at the last Assizes, but owing to the jury returning no bill against Mrs. Diamond the authorities refused to put Lloyd's case on. Chief Justice Falconbridge fixed Lloyd's trial for Tuesday morning at 9.30.

THE HEIR OF SANTLEIGH

OR THE STEWARD'S SON

CHAPTER XXXVIII.—(Continued.)

"You will have an opportunity of witnessing the scene," he said, quietly. "Remember, I have your promise. You and the Ferndales will be at the Court in ten days from now—that's Thursday week!"

"Oh, yes," said Jack, "that's understood."

"Very well. Till then I am Cyril Burne." He suppressed a sigh. "Jack, I wish you were the earl, confound it! You'd make a much better peer than I shall."

Jack Wesley laughed cynically.

"Miss Norah wouldn't think so," he retorted. "My dear boy, don't repine. We must all bear our lot cheerfully, whatever it may be. I sympathize with you deeply, deeply; it must be so trying to be an earl with ever so many thousands a year; but you must bear your heavy trouble like a man, you know. And here's the banns on! Last."

Cyril hurried to the door as if he were going to catch a train and hadn't a minute to lose. Then he stopped short and thrust his hand into the breast pocket of his beautifully-fitting frock coat.

"What's the matter? Palpitation of the heart?" demanded Jack.

"No," said Cyril, gravely pulling out a long blue envelope. "I was wondering whether I had forgotten this," and he tapped it significantly.

"Oh, that's all right. What you'll forget will be the ring."

"No, I shan't," retorted Cyril, and he took it out gingerly from his waistcoat pocket. "Come along, come along!"

"Certainly, but allow me to lock the door. Are you afraid the church will run away, or that Miss Norah may change her mind?"

The church was still standing in its secluded corner, and Norah had not changed her mind, for after Cyril had been pacing up and down the small vestry for ten minutes, while Jack had been chatting with the clergyman—a young curate, who really did seem to enjoy the fun of this strange marriage—Lord and Lady Ferndale arrived with the bride, Cyril—and perhaps Jack, too—thought she had never looked more lovely than she did in her simple dress of quiet gray, her glorious eyes downcast, her lips just parted by the quick breaths of mingled joy and shyness.

For herself she still felt as if she were moving in some strange, delicious dream, and it was with a start she heard the young curate murmur softly "Are we ready?"

Then Cyril and Jack walked up to the altar, and Lord Ferndale drew her arm within his and followed.

There were no other witnesses than these dear and tried friends, except the inevitable pew-opener. Norah felt as if the throbbing of her heart could be heard all over the little church.

In his soft, suave voice the curate performed the ceremony; she felt Cyril's dear hand clasp hers as he slipped the "plain ring of gold" upon her finger, then, leaning upon his arm, they led the way back to the vestry.

"My wife!" she heard Cyril murmur in her ear, and as she raised her eyes to his shyly, he bent his head to kiss her. But Lord Ferndale put a hand upon his arm quickly.

"Excuse me," he said, "but I think you are trespassing upon my privilege!" and Norah, blushing and smiling, presented her cheek to him.

"That's my reward for giving her away," said Lord Ferndale, kissing her

apology" for a wedding breakfast awaited them.

It was certainly not a large party, but what they lacked in numbers they made up in happiness.

The newly-married pair were naturally too intent upon each other to need much merriment, but, though they did not need it, Jack had got a fair supply on hand, and for the first time in his life forgot to be cynical, and was content to be genial and amusing, and, as Lord Ferndale remarked afterward, displayed such a vast talent for entertaining that he might have made a fortune on the stage if he had not been in a fair way to make it as a poet.

Indeed, the breakfast could not have been a greater success if there had been half a hundred guests, with the usual complement of bridesmaids and the stock speeches.

The health of the bride and bridegroom was given by Lord Ferndale, and, though he did not make a speech, the way in which he spoke Norah's name and looked at her was worth as Jack declared, "a dozen set orations," and Cyril's "Thank you, sir; thank you, dear Lady Ferndale, and you, Jack!" spoken with a suspicious moisture in his joy-lit eyes, was pronounced by the same critic just a perfect bit of elocution.

All through the meal Lord Ferndale kept watch and guard over his tongue, and it was not until Cyril had glanced at his watch and said that the time was getting short that he said, with a mischievous twinkle in his eye:

"I suppose you won't take a very long holiday, Mr. Burne? You'll be wanting to get back to work, eh?"

And Cyril had, with a marked increase of color, murmured something inaudible, and hurried Norah out of the room. She and Lady Ferndale disappeared together for half an hour, and then they came down, Norah attired in a travelling dress and a set of sables which Lady Ferndale had produced at the last moment.

Both women were rather red about the eyes, and Norah clung to her friend until the last moment, when Cyril standing beside the cab door, held Jack's and Lord Ferndale's hands and whispered:

"Remember! The Court, Thursday week."

Then Norah tore herself away. Cyril put her gently and tenderly into the cab, and Jack and Lord Ferndale having flung a handful of rice over their nice clothes, they drove off, Norah leaning forward and waving her hand until the cab turned the corner and carried them out of sight.

"Well," said Lord Ferndale, with a smile and a sigh, "There goes the prettiest and sweetest girl in Christendom!"

"And the best and warmest-hearted man!" responded Jack, loyally.

"God bless them both!" said Lady Ferndale, with a sob, and she ran in and up to her own room that she might enjoy the "good cry" she had fully deserved.

The two men went to the smoking-room, and mixed themselves a soda and brandy, and talked over the strange history of the young couple and the surprise which awaited one of them; but presently Jack grew very silent and thoughtful, and Lord Ferndale, noticing it, said:

"A penny for your thoughts, Wesley." Jack raised his head, and there was a grave earnestness in his handsome, intellectual face.

"A penny for my thoughts? You shall have them for nothing. But stop. I'll give you a guess."

"Well, er—not very poor as incomes go," he said. "You know what Lord Newall is going to pay me for the pictures I am finishing? And there are plenty of commissions in hand. No, I rather think we shall be—well tolerably off."

"Do you know, I am not so glad as I ought to be? I had set my heart upon proving myself a miracle of economy and management. But never mind; at any rate, we shall have to be careful, I suppose!"

"Well—er—yes!" he said, and at once began to talk about the journey of the morrow.

They started quite early the next day, and Norah cast a wistful glance at the sunny watering place as the train moved out of the station. She had been so supremely and perfectly happy there, you see. It was a long journey, and they did not arrive at Santleigh until late in the afternoon.

"Shall we stay at the Court or the inn, or are we going to Ferndale?" asked Norah, with a smile. "You are very mysterious in your movements, sir!"

"It all depends," replied Cyril. "Anyhow, here is the Court brougham. Would you mind staying at the Court, or would you prefer to go on to Ferndale?"

Norah was puzzled by his manner, but kept her promise, and refrained from asking any questions.

"I should like just what you like to do," she replied, and, of course, he put his arm round her and kissed her.

They reached the Court, and she was stricken dumb with surprise at the sight of the Ferndales and Jack, who, with Mr. Petherick, were grouped in the hall, evidently anxiously awaiting their arrival.

"Why, what does it all mean?" she exclaimed, as she flew to Lady Ferndale with a little cry of delight. "Why are you all here—why are we here? Has the earl come back? Mr. Petherick, surely; you don't mean to keep me in the dark?"

"Not for a moment, my dear young lady!" he responded, with a little cough of bewilderment. "I should be only too glad to enlighten you in respect to this—this—mystery; but I'm as much in the dark as you are. All I know is that I have received a communication from the earl—!" They had moved into the drawing-room by this time, and he stood in the centre of the group looking from one to the other. "His lordship has written stating that he has invited you and Mr. Burne and our good friends here to dinner to-night, and that he hopes to have the pleasure of meeting them. The note reached me this morning, and contains just that and nothing more!"

Norah remained silent and open-eyed, looking from one to the other.

"It's very mysterious," said Lady Ferndale, with perfect gravity. "But, at any rate, whether the missing young man puts in an appearance or not, I hope the dinner will be all right, for these young people must be terribly hungry. Come along, dear, there is barely time to dress!" And she carried Norah off.

(To be continued.)

A SPRING TONIC.

Dr. Williams' Pink Pills Make Rich, Red, Health-Giving Blood.

Cold winter months, enforcing close confinement in over-heated, badly ventilated rooms—in the home, in the shop, and in the school—sap the vitality of even the strongest. The blood becomes clogged with impurities, the liver sluggish, the kidneys weakened, sleep is not restful—you awake just as tired as when you went to bed; you are low spirited, perhaps have headache and blotchy skin—that is the condition of thousands of people every spring. It comes to all unless the blood is fortified by a good tonic—by Dr. Williams' Pink Pills. These pills not only banish this feeling, but they guard against the more serious ailments which usually follow—rheumatism, nervous debility, anaemia, indigestion and kidney trouble. Dr. Williams' Pink Pills are an ideal spring medicine. Every dose makes new, rich, red blood. Every drop of new blood helps to strengthen

REMEMBERED THE POLICE

LEGACIES LEFT THEM BY GRATEFUL PEOPLE.

A Successful Merchant Bequeathed \$2,500 to the Constable Who Arrested Him.

A certain man died a few years ago. He had been a rich man, successful in business, and honored by all who knew him. When his will was read, those who were assembled to hear its provisions were startled as these words fell on their ears: "I give and bequeath to the constable who took me into custody, and was thus instrumental in getting me eighteen months' hard labor, the sum of \$2,500, and I take this opportunity of thanking him for being one of the best friends I ever had."

The great merchant had been a young clerk once. He had been led astray, and had embezzled his master's money. Then he had tried to get away to America with some of his evil associates. Had he succeeded he would have been a hunted criminal all his days, and would probably have sunk deeper into the mire of crime. But a smart policeman had tapped him on the shoulder as he stood on the Liverpool landing stage. His sentence was a nasty dose. But it did him good. It sobered him. When he was released from prison, he made a new start, and

SET OUT TO REDEEM THE PAST.

Policemen come in for unexpected legacies sometimes. An intelligent officer who saves a rich man's mansion from being burgled, or heroically tears the rich man himself from the clutches of a gang of plundering hooligans, might reasonably expect his due reward. But it is far more piquant when the grateful acknowledgment comes from somebody whom he has helped to consign to durandane vile.

While arresting a desperate house-breaker, a policeman was so badly hurt that he had to retire from the force. For half a lifetime he was far from prosperous. Then a lawyer's letter informed him that he had been left a fortune—by a burglar.

The latter individual had served a stiff sentence, but while a convict, he had made friends with another prisoner. The pair had hit on a scheme to make money honestly. When released, they had gone abroad together, and had eventually blossomed into rich men.

"If I'd gone on cracking cribs, it would never have brought me much," ran the item in the will of the ex-burglar. "But that bobby who collared me helped me on the way to fortune, and I want him to enjoy himself."

There was a discreet hushing-up of the business when an enormously wealthy man of title died, and left a policeman enough money to make him

INDEPENDENT FOR LIFE.

The nobleman had once been very remote from the House of Lords. He had been the family black sheep—an outcast, with whom his kindred had refused to have anything to do. Wandering, homeless and penniless, about the streets of London one night, he had tried to throw himself over one of the bridges.

An alert young policeman, however, had dragged him back. Taken before a magistrate, he had refused to give his real name, and had been sent to prison. Almost simultaneously with his release, those who had stood between himself and the family title and possessions died in rapid succession. He had been saved from a suicide's fate that he might enjoy all the world could give—and he remembered the constable to whom he owed it all.

Other folk owe debts of gratitude to policemen—and pay them. "To the constable who arrested the man I was going to marry, I give and bequeath—" This was an item in the will of a beautiful woman, who had reigned as a rich and envied queen of high society.

When a girl, she had become engaged to a handsome and fascinating man.

"Excuse me," he said, "but I think you are trespassing upon my privilege!" and Norah, blushing and smiling, presented her cheek to him.

"That's my reward for giving her away," said Lord Ferndale, kissing her hand also. "God bless you, my dear, and make you and the man you have chosen as happy as we all wish you!"

While this pretty little ceremony had been enacting, the curate had been getting out of his surplice and filling in the certificate.

"I have dispensed with my clerk's services this morning," he said, making a great fuss with the blotting paper. "Now—er—Mr. Burne, will you sign, please?"

Cyril wrote his name.

"Wilfrid Avon Cyril, Earl of Arrowdale," and the curate covered it quickly with the blotting paper as he turned to Norah.

"Here, if you please, my lady," he said, then staggered and turned red. But Norah did not notice his confusion, or, if she had done so, would have attributed it to his having addressed her by the title she had borne, and, bending down, wrote her own name.

The curate folded the certificate two or three times.

"Will you—er—" he said, addressing Norah, but looking at Cyril.

"Give it to me," he said, quietly, but with downcast eyes. "I have some papers of importance here; I'll put it with them. It will be sure not to be lost then," and he took the envelope from his pocket, inclosed the certificate, and fastened the envelope securely.

As he did so he drew a breath of relief, and glanced at Jack, who smiled significantly, and softly clapped his hands.

Then they went back to the carriage, and were called out to Grosvenor Square, where what Lady Ferndale called "an

Give full address | write plainly.

Jack raised his head, and there was a grave earnestness in his handsome, intellectual face.

"A penny for my thoughts? You shall have them for nothing. But stop. I'll give you a guess."

"You weren't thinking of the young people—your face was too grave for that," said Lord Ferndale. "Let me see, were you thinking of that scoundrel, Guildford Berton?"

"Well, yes, partly," said Jack. "To tell you the truth, I was thinking of some one else. I was asking myself a question that has worried me a great deal lately. I was wondering at the moment where that young girl Cyril was supposed to have run off with could be. The question that bothers me is: 'Where is Decca South?'"

"Beca South!" said Lord Ferndale. "Ah, yes. Hidden away somewhere, I suppose. Perhaps here in London—and quite near us. I'll be bound," and he smiled. "That fellow Guildford Berton knows."

"Yes," said Jack, grimly, as he lit another cigar. "Yes, I think Mr. Guildford Berton knows."

CHAPTER XXXIX.

Nine days later Cyril and Norah were walking along the parade at Torquay. It is summer and sunshine at this English Naples, when the rest of England is cowering before the wintry blast, and these two young people walked arm in arm under the bright rays of King Sol, sauntering as slowly as if the month were June instead of November.

Nine days of perfect happiness will work miracles, and in these nine days Norah had lost all her pallor, and was as blooming a bride as even the most passionate of lovers could desire. In deed, it was not the Norah who watched, pale and weary, beside the sickbed of her supposed father, nor the Norah flying from the Court and crushed by the fear of Guildford Berton, who walked with springy step and erect head; but quite a different Norah, with the rose of health on her cheeks, and the light of happiness in her eyes as she leaned upon her husband's arm.

"And you don't ask me why I want you to go back to the Court so suddenly, dearest?" Cyril said.

"No," she replied, turning her lovely eyes upon him trustfully. "Why should I? Didn't I promise to obey—and obedience means asking no questions. If you don't wish to tell me why we are going there to-morrow, why—well, don't. I am quite satisfied!"

Cyril—there happened to be no one in sight at the moment—bent down—he hadn't to bend very low—and kissed the soft red lips.

"Norah, I always suspected that I had married an angel, now I know it! Will it be painful to you to go there, dearest?" Norah thought for a moment.

"No," she said, softly; "I was very happy there sometimes, and I—well, I grew to love the grand old place; and will you mind my saying that I shall feel rather sorry when I think to-morrow will be the last time I may ever see it again?"

Cyril was silent for a moment.

"Perhaps it won't be," he said, guardedly. "The new earl may—well, may be friendly, and invite us now and again—especially as you have surrendered all that money so readily."

Norah laughed gently.

"I don't know that it would be wise to be too intimate with earls and countesses, always excepting the dear Ferndales! Don't they say that professional people should keep to their own class? Perhaps if you knew too many 'swells,' as Jack calls them, you would grow lazy and discontented. You see how prudent I am becoming," and she laughed. "Cyril."

"Well!"

"When are we going to begin house-keeping, dear?" she asked, nestling closer to him, and looking up in his face with a delicious gravity in her eyes. "I can't tell you how anxious I am to begin the part of the economical wife and house-keeper. I think I shall take lessons in cookery—would you mind?—and I mean to watch every penny. Shall we be—don't laugh, sir!—shall we be very poor?—and, I don't care if we shall be—"

Cyril colored. She was treading on very delicate ground for him.

more serious ailments which usually follow—rheumatism, nervous debility, anaemia, indigestion and kidney trouble. Dr. Williams' Pink Pills are an ideal spring medicine. Every dose makes new, rich, red blood. Every drop of new blood helps to strengthen the overworked nerves. Overcomes weakness and drives the germs of disease from the body. A thorough treatment gives you vim and energy to resist the torrid heat of the coming summer. Mr. Mack A. Meuse, Sluice Point, N. S., says: "I was so completely run down that I could hardly work. I decided to try Dr. Williams' Pink Pills, as I had heard them highly spoken of, and a few boxes worked a great change in my condition. I am feeling as well and strong as ever I did and can recommend the pills to all weak people."

It is a mistake to take purgatives in the spring. Nature calls for a medicine to build up the wasted force—purgatives only weaken. It is a medicine to act on the blood, not one to act on the bowels, which is necessary. Dr. Williams' Pink Pills are a blood medicine—they make pure, rich, red blood, and strengthen every organ of the body. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

HIS ADDRESS, PLEASE.

"My husband is an inventor, you know."

"So's mine."

"Indeed. What has he invented?"

"More excuses for staying out late at night than any one ever dreamed of."

WE ARE ALL FAMILIAR with the deep, hoarse bark, grimly called "a graveyard cough." Take Allen's Lung Balm, a remedy for pulmonary trouble, highly recommended even in the earlier stages of Consumption.

NAUGHTY WILLIE.

Willie (aged five)—"I guess they think up in Heaven that I'm dead."

Mamma—"Why so?"

Willie—"Cos I ain't said my prayers for a week."

If There's a Hint of Catarrh Taint apply Dr. Agnew's Catarrh Powder without delay. It will save you suffering, heal you quickly whether you have been a slave one month or fifty years. It relieves cold in the head and catarrhal headaches in ten minutes. The Hon. David Mills, Minister of Justice for the Dominion of Canada endorses it. 50 cents.—129

ENOUGH.

Grayce—"What's the matter dear?" Gladys—"Oh, my home life is not happy."

Grayce—"But your husband seems to think you are an angel."

Gladys—"Yes, but he also seems to think that I ought to be satisfied with an angel's wardrobe."

THE CARE OF CHILDREN.

Now-a-days wise mothers do not dose their children with harsh, gripping castor oil or purgatives, nor do they give them poisonous opiates in the form of so-called soothing medicines. Baby's Own Tablets take the place of these harsh and dangerous medicines, and the mother has the word of a Government analyst that the Tablets are absolutely safe. Baby's Own Tablets cure indigestion, constipation, colic, teething troubles, diarrhoea, simple fevers, and other little ills of childhood. An occasional dose will keep children well. Mrs. R. E. Long, Peachland, B. C., says: "I have found Baby's Own Tablets unsurpassed for teething troubles, breaking up colds, reducing fevers, and other ills, and they make a child sleep naturally. I now always keep them in the house." Ask for the Tablets at your druggist or you can get them by mail from The Dr. Williams' Medicine Co., Brockville, Ont., at 25 cents a box.

Her—"My only objection to Mrs Pryor is that she's a business woman." Him—"Indeed! What business is she engaged in?" Her—"Everybody's!"

constable who arrested the man I was going to marry. I give and bequeath—" This was an item in the will of a beautiful woman, who had reigned as a rich and envied queen of high Society.

When a girl, she had become engaged to a handsome and fascinating man. Blinded by infatuation, she had declined to see any flaws in her idol. She would assuredly have married him, had it not been for the fact that on the very day fixed for the wedding—as he was going into the church, indeed—a keen-eyed policeman had recognized the would-be bridegroom as

A "WANTED" SWINDLER.

Click! and the handcuffs were snapped on his wrists. At the trial he was proven given herself to him, her life would have been a martyrdom of shame and misery.

A hard-working tradesman had a wife who was a drunkard and a thief. Many times she put herself in danger of the law, but he shielded her, although she made his life not worth living. He had ceased to love her, but he felt that he could not very well turn on her. At last, however, she was caught red-handed by a policeman, and, her evil record being brought up against her, was sent to penal servitude. After that, her husband was a lonely man, but, free from his incubus he got on in a modest way, and ended his days in peace. On his death-bed he willed all he had to the man in blue, but for whom he would very probably have died worse than a pauper.—Pearson's Weekly.

Impoverished Soil

Impoverished soil, like impoverished blood, needs a proper fertilizer. A chemist by analyzing the soil can tell you what fertilizer to use for different products.

If your blood is impoverished your doctor will tell you what you need to fertilize it and give it the rich, red corpuscles that are lacking in it. It may be you need a tonic, but more likely you need a concentrated fat food, and fat is the element lacking in your system.

There is no fat food that is so easily digested and assimilated as

Scott's Emulsion of Cod Liver Oil

It will nourish and strengthen the body when milk and cream fail to do it. Scott's Emulsion is always the same; always palatable and always beneficial where the body is wasting from any cause, either in children or adults.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

SOME "SPOOK" VISIONS

THE REMARKABLE STORY OF ARCH-DEACON COLLEY.

His Experiences With His Famous Relative, Sir George Colley, in the First Boer War.

Archdeacon Colley, rector of Stockton, Warwickshire, England, who has occasionally attracted public attention to his views and statements on the subject of spiritualism, which he unsuccessfully desired to expound before the last Church Congress, sends to the London Daily Mail a letter on "The psychical events that preceded, happened on, and followed" the death of his Excellency General Sir George Colley, at Majuba, on this date, February 27, 1881.

These circumstances, the Archdeacon writes, are of the most weird and wonderful sort. At the time of the tragedy he himself was in Natal and chaplain to Sir George Colley, who was the Governor of the Colony.

In conversation with Sir George, before he started to meet the Boer invasion, the Archdeacon mentioned some fears he had reason to entertain for his safety. Sir George, however, making light of the matter, playfully took up a Burmese curio—a praying wheel—and purposely turned it the wrong way, so that in Burmese and Chinese superstition the prayer, actuated backwards, might work a curse instead of supplying a blessing.

"Early on the then fatal Sunday morning of February 27, 1881, I, at the Deanery, Pietermaritzburg, awoke with a feeling of something dreadful about to happen, which feeling increased as the day wore on, to culminate in the sorrowful confirmation of my fears later when, leaving the cathedral pulpit at the close of evening service to dismiss the congregation with the Benediction, a hurried message came to me from Government House saying Sir George Colley had that morning been killed at Majuba."

"The youth shot the Governor of Natal from close behind, the bullet smashing out through the forehead, causing Sir George Colley to leap high in the air with hands outstretched and arms uplifted, and fall the mangled corpse of what a moment before was a courteous, brave, chivalrous gentleman, truly religious and righteous."

SCOTCH WOMAN'S "SECOND SIGHT."

"At what was probably the very moment of his upheaval and death spasm Sir George in psychic materialized, instantaneous form, was physically, or with her Scotch gift of 'second sight,' subjectively, seen by a domestic, a native of Aberdeen, whose outcry thrilled with dismay and fear the household running to her help, foreboding the sad news which the evening of that same day was brought down from the front."

"The testimony, however, of this Scotchwoman of Aberdeen is so utterly impossible of putting into words without explanations recalcitrant and of Yogi-philosophic teaching, that I must suppress it."

"But Sir George Colley's various appearances to me, and my son, and others are less perplexing, as they have the most part been on the lines of what is usual in spiritualism relative to clairvoyance, and subjective with those who are gifted with the 'discerning of spirits' and have what the Scotch call 'second sight.'"

"It is, therefore, almost always in the way of a 'military' man in high command having a hole in his forehead" that Sir George Colley comes thus to give proof of his identity."

"When this was the experience of my son he did not at first know who the 'military' man with a hole in his forehead' was until I told him in detail of the far-reaching effects physical and psychical of the circumstances that concrete to history with the bare mention now of Majuba."

"He, however, now knows who it is that comes and gives proof of his identity. Not to others, with I have said."

CURE THE MOST EXTREME CASES

STONE IN THE KIDNEYS CANNOT STAND BEFORE DODD'S KIDNEY PILLS.

Mr. S. A. Cassidy, of Ottawa, Permanently Cured After Years of Suffering by the Great Canadian Kidney Remedy

Ottawa, Ont., March 26.—(Special).—While all Canada knows that Dodd's Kidney Pills are the standard remedy for all Kidney Complaints, it may surprise some people to know they cure such extreme cases as Stone in the Kidneys. Yet this is what they have done right here in Ottawa.

Mr. A. S. Cassidy, the man cured, is the well-known proprietor of the Bijou Hotel on Metcalf Street, and in an interview he says: "My friends all know that I have been a martyr to Stone in the Kidneys for years. They know that besides consulting the best doctors in the city and trying every medicine I could think of, I was unable to get better."

"Some time ago a friend told me Dodd's Kidney Pills would cure me. As a last resort I tried them, and they have cured me."

"I could not imagine more severe suffering than one endures who has Stone in the Kidneys, and I feel the greatest gratitude to Dodd's Kidney Pills."

If the disease is of the Kidneys or from the Kidneys, Dodd's Kidney Pills will cure it.

Lord Morley is particularly fond of animals, and always has a pet dog sitting on his lap when writing in his study.

Get Instant Relief from Piles.—This most irritating disease relieved in ten minutes by using Dr. Agnew's Ointment, and a cure in from three to six nights. Thousands testify of its goodness. Good for Eczema, Salt Rheum and all skin diseases. If you are without faith, one application will convince. 25 cents.—127

PLEASE BEAR IN MIND that what is called a skin disease may be but a symptom of bad blood. In that case, Weaver's Cerate, externally applied, should be supplemented with Weaver's Syrup, taken daily.

Lord Lansdowne, the Duke of Abercorn, and Lord Verulam, are the only persons who hold at once English, Scottish, and Irish peerages.

"FERROVIM" IS A GENTLE STIMULANT to the stomach, thereby aiding digestion. As a tonic for patients recovering from fevers and all diseases lowering the vitality, it is without a rival. At all drug and general stores.

Mr. Andrew Lang once wrote to Israel Zangwill to ask him if he would take part in a certain function. He received the following reply: "If A. Lang will, I. Zangwill."

One Tablet After Eating and what a world of distress would be saved. Dr. Stan's Pineapple Tablets cure sour stomach, distress after eating, weight in the stomach, wind on the stomach, loss of appetite, dizziness, nausea, and a dozen other troubles traceable to bad digestion. One Tablet gives instant relief. A positive and pleasant cure that nature has provided. 35 cents.—128.

BRITISH HOUSE OF COMMONS.

The Idea of Building a New One Is Being Revived.

There is an unprecedented demand this session of the British Parliament for seats in the strangers gallery. This is an indication of the political awakening in the country, and the hopes and interest which have aroused. Never before was it needful for the Speaker's secretary to hang outside his office placards which warn members that all orders for the gallery have been already

PEDLAR'S STEEL CEILINGS

Designs suitable for all classes of work such as Churches, Schools, Stores, Halls. Also special designs for Houses, Kitchens, Dining-Rooms, etc. Nothing has ever been devised to equal Pedlar's Steel Ceilings for farm houses. Cheap as lath and plaster and will never crack or face off.

Avoid Accidents by Using Pedlar's Steel Ceilings.

Made to fit any size room and can be nailed on by any mechanic. Shipped from our warehouses painted all ready to apply.

Our Catalogue, No. 14c describes many designs. Write for it. It costs you nothing. Write to-day.

ODESSA HORRORS RECALLED

Leaders of the Massacre Have Been Acquitted

PANIC AND HORROR.

The London Times' correspondent at St. Petersburg cabled on Sunday: The Opposition organs express themselves in no measured terms over the acquittal of Neidhart and Kurloff on the charge of complicity in the Jewish massacres at Odessa and Minsk. They say the Judges in the Senate are mostly recruited from superannuated Governors, who naturally are biased. Moreover, Durnovo appeared as special pleader on behalf of the accused, declaring that personages like Neidhart and Kurloff had not acted contrary to the wishes of the Government, with whose intentions they were well acquainted. Professor Hensen, a prominent Jewish publicist, says the Senate's verdict will cause a feeling of panic and horror throughout the Pale. Many newspapers have begun publishing further accounts from eye-witnesses of the horrors at Odessa and Minsk last November.

MACHINE GUNS FOR PEASANTS.

A despatch from St. Petersburg says: Agrarian disorders continue to be reported at various places. Near Anatolifka, Province of Kherson, a collision has occurred between rural guards, armed with machine guns and a crowd of peasants who had begun to seize and plow property belonging to the landlords. A score were killed or wounded. In Chernigoff Province, the peasants are boasting that they intend taking possession of the land and the governor has received instructions from Interior Minister Durnovo not to spare the troops in suppressing any outbreak. In the Province of Vitebsk the peasants have risen and a punitive detachment is marching through the country.

JEWES FEAR MASSACRE.

A despatch from Kieff, Russian, says: Many Jewish families are leaving this city, frightened by the rumors of a massacre at Easter. The authorities announce that they have taken every precaution and that at the first sign of trouble the troops will be employed to restore order.

MUTINEERS PUNISHED.

A St. Petersburg despatch says. The naval court-martial on Saturday acquitted 84 of the 207 men who mutinied at Cronstadt in November, 1905. Nine of the remainder were sentenced to penal servitude, as follows: One to life imprisonment, one to 20 years, four to 12 years, two to eight years, and one to six years. The others were deprived of civil rights and sentenced to terms of imprisonment varying from one to four years, or to enrollment in disciplinary battalions.

PEASANTS STAND TOGETHER.

A despatch from St. Petersburg says: The Province of Kostroma, European Russia, is the first to have completed its elections to the Provincial Congress. 46 peasants, 19 noblemen, 18 merchants, six professional men, and three priests were returned. The results show that the "small land-owners," who in reality are only peasants of the more prosperous class, holding their property in severalty, stood together against the big landlords and chose exclusively peasants. The peasants' electors are not classified and have but one plank in their platform, namely, the distribution of land. The others are divided.

PRINCE ELECTED DELEGATE.

A despatch from Kalufa, Central Russia, says: Prince Eugene Troubetskoy, leader of the Moderates, who refused to

were found in the room with the dead men, giving evidence that every man was armed with some sort of a weapon. The police scout the Mafia theory. The murders were not committed for robbery, as much money was found untouched. In a tin box on the floor of the room was found a check for \$373, made out to Nicolò Demtri. The box also contained \$500 in Italian gold pieces and \$400 in American currency. Several satchels were also found, one being marked Nicolò Demtri. It contained the complete set of vestments of a Greek Catholic priest, even to the mitre. In this satchel were found passports in Turkish, Greek and French.

DOMINION PARLIAMENT

NOTES AND PROCEEDINGS OF THE OTTAWA HOUSE.

CONTROL OF TELEPHONES.

Hon. H. R. Emmerson introduced a bill, the great feature of which is the placing of telephone rates under control of the Railway Commission. The Minister of Justice announced the Government's intention of making this control as effective as that now exercised over railway freight and passenger rates by the same tribunal. The bill also provides for the inter-change of traffic between telephone companies, and removes a barrier to the entrance of independent telephones to railway stations by removing from consideration in settling the compensation any exclusive contract between the railway and any other telephone company. The leader of the Opposition gave assurance that he would do all he could to assist in perfecting the measure.

FISHERIES PROTECTION.

A question of Mr. Boyce's was answered by Hon. Mr. Brodeur to the effect that three inspectors and three officers on board of the cruiser Vigilant were employed for the protection of fisheries on the Great Lakes. No report had been made to the department that fish spawn lodged in Canadian waters in Lakes Huron and Superior were annually taken by American boats to American hatcheries.

PENSION SYSTEM.

Dr. Daniel learned from Mr. Emmerson that the question of inaugurating a pension system for Intercolonial Railway employees was under consideration.

SELECTION OF LANDS.

Mr. Roche learned from Mr. Oliver that the arrangement with the Canadian Pacific Railway for the final selection of its lands in the Northwest had been made in August, 1903, and that the last selections were to be made on June 30, 1904.

TRANSCONTINENTAL SURVEY.

Mr. Crockett was told by Mr. Emmerson that there were 31 surveying parties at work on the Transcontinental Railway between Quebec and Winnipeg, and three between Quebec and Moncton. It was impossible to say when their work would be completed.

MARCONI STATIONS.

Mr. Foster was told by Hon. Mr. Brodeur that \$118,542 had been paid up to Dec. 31st last on account of Marconi wireless stations.

TRENT VALLEY CANAL.

A detachment of 400 from Peterborough and other points along the route of the Trent Canal waited upon the

THE COAL STRIKE IS ON.

Companies Awaiting Developments — Hard Coal for Six Months.

A Wilkesbarre despatch says: The anthracite mine workers in this region left the mines on Saturday afternoon, carrying their tools with them and declaring that they will obey the order for suspension of work.

The companies are now merely awaiting developments. No men are being brought into the region to take the places of the men who quit work. Of this possibility a leading official of the Lehigh Valley Coal Company, declared yesterday:

"We have enough coal to supply our regular demand for six months to come, about a million and a half tons. Our customers are now well stocked, and in their cellars and yards are enough to last them some time. We are not going to rush men into this region to take the places of the workers who quit. Not that we cannot get these men—there is no trouble to do that—but because they are a cause of trouble when here."

The operators generally will be content to play the game of sit down and wait until a definite decision regarding a strike is reached. No concerted effort to mine coal will be made. In the meantime, however, the washeries at which large quantities of coal can be cheaply prepared with unskilled labor will be run, and as there are many more washeries than there were in 1902, this production will be considerable. A number of the companies have arranged for guards to protect their property and such men as want to work.

IN THE SOFT COAL REGION.

A Pittsburg, Pa., despatch says: Despatches from the soft coal fields on Sunday night indicate almost a general announcement from the operators of western Pennsylvania to pay the miners the advance of 5.55 per ton called for in the restoration of the scale of 1903. With notices posted at the majority of the mines announcing the grafting of the scale the strike in the soft coal field has lost the threatening aspect that has surrounded it since January.

LITTLE HOPE OF SETTLEMENT.

A despatch from Philadelphia says: Reports received on Monday from the anthracite coal fields state that the order of the miners' scale committee directing that mining be suspended until an agreement could be reached with the operators is being obeyed almost to the man. That a great many miners believe that a strike is imminent, and that there will be a bitter struggle between the workmen and their employers, was evidenced by the departure Sunday and Monday of scores of miners from the Schuylkill region.

FOURTEEN MINERS ALIVE

A Small Party Survive the Lens Coal Disaster.

A Lens, France, despatch says: The sudden appearance of fourteen imprisoned men on Friday night, entombed nearly three weeks ago in the great coal mine disaster, resulting in 1,200 deaths, caused stupefaction. A gang of salvagers had just completed their night's work when they were startled to see a group of miners, terribly haggard and exhausted, appear from a remote part of pit No. 2. The strongest of the party stated that they had broken out of a distant gallery, where they had been entombed since the disaster of March 10. When the rescued men were taken to the surface they were unable to see owing to the dazzling daylight. The men were able to talk sensibly though feebly. They all asked for news of relatives or friends and wished to go to their homes immediately, but were taken to a hospital instead. Large crowds besieged the mines later in the hope of hearing of further escapes. It is said that others of the entombed miners are alive and about to be brought out, their

ONTARIO LEGISLATURE

WHAT THE LEGISLATURE AT TORONTO IS DOING.

THE COUNTY COUNCILS' BILL.

In moving the second reading of the Government's bill respecting County Councils, Hon. Mr. Monteith noted that during the past year the people of the province had been given opportunity to freely discuss the proposed reversion to the old order of electing County Councils by municipalities rather than by electoral districts. General approval seemed to have been expressed. At any rate there had been no serious opposition made from any quarter. Mr. Monteith thought the new bill would tend to give a renewed interest to the work of the Township Councils and would tend to get better men for these councils. The bill would do away with the anomaly of taxation without representation. Hereafter every municipality would have its representative in the County Council.

OTTAWA MODEL SCHOOL.

Mr. May wished to know whether it was the intention of the Government to increase the salaries of certain teachers in the Provincial Model School at Ottawa, so as to place them on the same plane with the teachers in the Toronto Model School.

Hon. Dr. Prynne replied briefly that it was not the intention of the Government to make such increases during the present session.

TEMISKAMING LOAN.

In reply to an inquiry by Mr. Harcourt, Hon. Col. Matheson stated that arrangements had been made to have the Temiskaming loan to the extent of \$1,200,000 underwritten in England, but as yet no particulars had been received with respect to the firms which had underwritten the amount. The price received by the province was 96%, but of this 3% had to be paid the Imperial Government as stamp tax.

TOO MUCH PATCHWORK.

Premier Whitney, in referring to the various amendments to the Assessment and Municipal Acts proposed, entered a protest against too much patchwork legislation in dealing with these Acts. He hoped the Municipal Committee would go very slow in making any amendments. There was danger in allowing different principles for different localities.

FIREMEN'S ASSOCIATIONS.

On request of the Attorney-General Mr. Fraser withdrew his bill to aid the Volunteer Firemen's Association. The bill touches Government revenues, and as such should be introduced as a Government measure. Mr. Foy promised to look into the measure.

NEW LICENSE ACT.

On the occasion of the second reading of the new Liquor License Act the Provincial Secretary announced a few changes which had been embodied in the bill. On one or two points, too, he said, the Government held no decided opinions and some minor alterations might be made before the measure became law. On the whole, however, the bill now possesses pretty much the form in which it will be entered on the statute books. The first draft contained a clause legalizing the sale of liquors to hotel guests at the table on Sunday. This, Mr. Hanna explained, was an oversight. It was never meant to be embodied in the bill and had now been stricken out. The granting of licenses to steamers and dining cars had been selling intoxicants it will only be those sailing long distances. It is not likely, however, that the Government will press the clause, though Mr. Hanna remarked that in the past liquors had been sold on boats and dining cars in spite of the fact that such sale was a violation of the law, and as he had no

or land. The others are divided.

PRINCE ELECTED DELEGATE.

A despatch from Kalufa, Central Russia, says: Prince Eugene Troubetskoy, leader of the Moderates, who refused to accept the portfolio of education in the Witte Cabinet, has been elected by the land-owners a delegate to the Provincial Congress.

RUMORED CABINET CHANGES.

A despatch from St. Petersburg says: Rumors of impending Cabinet changes continue to circulate. The Russ declares that beyond doubt the state of Premier Witte's health will force him to retire, and also predicts the resignation of Interior Minister Durnovo and Finance Minister Shipoff.

ACTS OF DEPREDAATION.

A despatch from Odessa says: Attempts to rob private houses occur here daily. On Wednesday ten anarchists rushed into a wholesale grocery store and demanded \$1,000, threatening the clerks with bombs if they refused. A duel with revolvers followed, during which two anarchists were killed. The authorities have taken extraordinary measures to protect property.

THREATEN PREMIER WITTE.

A despatch from St. Petersburg says: Many threats have been made against the life of Premier Witte. On Tuesday he received warning that unless he left the Government in a week he would be killed.

BODIES THROWN INTO SEA.

A despatch from Odessa says: Acting under the orders of Vice-Admiral Chouknin, commander of the Black Sea fleet, the bodies of Lieut. Schmidt and his three comrades, who were shot March 19th for mutiny, were exhumed on Wednesday night, taken to the open sea, and sunk. The authorities have issued a public order that visits to the burial place of the mutineers and the placing on the graves of wreaths must cease.

STUDENTS TRY TO ROB BANK.

A despatch from Kharkoff, Russia, says: Even more daring than the robbery of the Credit Mutual Bank at Moscow recently was the attempt made in broad daylight on Thursday to rob the Volga Komuna Bank by several college boys and technological students. The youthful desperadoes quietly walked into the bank with cut-throats of the institution, drew revolvers and ordered everybody to hold up their hands. Most of the employees fled in panic, but one cool-headed clerk attracted the attention of guards outside, who immediately barred the entrances to the bank. The students finding themselves trapped, smashed the windows, jumped out to the street and attempted to escape under cover of revolver fire. One policeman was mortally wounded. Four of the would-be robbers were captured.

A FEARFUL BUTCHERY.

Sicilian Laborers Slashed Each Other to Pieces.

A despatch from Minneapolis, Minn., says: In a little two-story, ramshackle frame building on Tenth avenue six Greek or Sicilian laborers were horribly butchered some time between midnight Tuesday night and Wednesday morning. The dead are Nicolo Demtri, Kirle Demtri, Agne Karodli, Kirstan Yovke, Baakon Kapanni and Unka Naudaha. The building stands less than half a block from Washington avenue, the principal highway connecting Minneapolis and St. Paul, and a stone's throw from the station of the Chicago Great Western Railroad. In this tumble-down structure a group of men fought with knives and hatchets. The six victims were literally hacked to pieces. That the men fought among themselves, and were not murdered by outsiders for revenge, as was at first supposed, is the theory now advanced, although the police are of the opinion that there are two or three men still at large who were concerned in the fight.

Dec. 31st last on account of Marconi wireless stations.

TRENT VALLEY CANAL.

A deputation of 400 from Peterborough and other points along the route of the Trent Canal waited upon the Government on Thursday to urge the completion of that waterway. They were received in the Railway Committee-room of the House of Commons, which was crowded for the occasion.

Mr. Hall, M.P., introduced the deputation as representing the municipalities, boards of trade, and manufacturing and farming interests to be served by the Trent Canal. No such question as the north or south mouth of the canal was being considered, but the deputation was present to urge the construction of the canal at the earliest possible time.

Hon. Mr. Emmerson said the Government was still in the canal business, and he was a friend of the Trent Canal. The canals were, like the Intercolonial, making deficits, in one sense made surpluses, which were in the pockets of the people. Mr. Emmerson said Parliament had already granted him money to build the canal. The field work was completed, but the plans and estimates were not ready. The Deputy Minister was attending to the rest of the work, and he hoped soon to be able to make an announcement. When plans were ready the Cabinet would at once decide as to the route. The policy of the Government was well known, for it had already spent considerable money. The intention was to go ahead with the work.

Mr. Paterson and Mr. Hyman spoke favoring to the project.

IN PRISON IN RUSSIA.

The imprisonment of a Canadian in Russia was made the subject of a short discussion by Col. Ward, and the Government promised to draw it to the attention of the Home authorities.

PRIVATE MEMBERS' DAY.

Private members had Monday to themselves in the House and the sitting was short and uneventful. The order paper was whittled down pretty well, and the record was burdened with lengthy answers to many questions of purely local importance. One general statement of interest was the further announcement that the telephone inquiry would not be further pursued. The early adjournment again caught members arriving by day train from the west, and half a dozen or more were too late to qualify for attendance and so forfeited fifteen dollars each.

HIS CATTLE DEAD IN STALLS.

North Monaghan Farmer Charged with Starving His Live Stock.

A despatch from Peterborough says: A remarkable state of affairs was revealed in a case that came up before his Honor Judge Edmonson here. Bernard Naven, a North Monaghan farmer, was charged with cruelty to his live stock, and the evidence of the accused's neighbors showed that seven of Naven's cows had died from starvation, and others were so thin that they were lying in the stalls unable to rise. Neighbors who visited Naven's barn found the dead animals lying in the stalls, two of them partially eaten by hogs. His Honor reserved judgment.

AN ENGINEER'S SUICIDE.

Levi Trevillian Shoots Himself at North Bay.

A despatch from North Bay says: Levi Trevillian, formerly locomotive engineer on the G.T.R. running out of Allandale, discharged off the road a short while ago for some offence, shot himself in his room at Donovan's boarding house on Saturday afternoon. Dr. McMurphy was called in, and after making an examination of the wound he said the unfortunate man could not live. A new revolver of 32 calibre and a box of cartridges were found in Trevillian's possession. One empty shell was found in the revolver. It is supposed despondency was the cause of the rash deed. Trevillian is a married man.

their homes immediately, but were taken to a hospital instead. Large crowds besieged the mines later in the hope of hearing of further escapes. It is said that others of the entombed miners are alive and about to be brought out, their signals having been heard. One of the men rescued, a man named Nemy, said that for the first eight days the party ate the bark off the timbering of the mine. Later they found the decomposed body of a horse, which they cut up and ate with hay. The survivors brought out portions of the decomposed horse meat. Nemy said that after the explosion he groped his way about, stumbling over bodies and seeking refuge from the gases. Friday night they felt a draught of fresh air, which finally guided them to an opening.

The doctors have forbidden the survivors to do any further talking. Nemy's father arrived at the hospital soon after his escape became known and a touching scene followed. Vast crowds of people surround the hospital where the escaped men are being treated.

BAYONETS CHECKED MOBS

Mounted Rifles Forced to Charge on Winnipeg Crowds.

A Winnipeg despatch says: The street car strike situation is rapidly assuming grave proportions. Drastic measures were decided on on Friday by the city authorities to quell the disorders. The Canadian Mounted Rifles were called out to assist the police in maintaining order, and they marched to the subway, where they were harried all day till 6 p. m. Orders were then issued by Lieut.-Col. Billman for the 90th Regiment to parade at the Armories at 8 p. m., where they were held in readiness.

At 3.15 City Solicitor Hunt announced, under the authority of the Mayor, that citizens were warned to keep off the streets; that disorders had gone as far as could be allowed in the public interest, and that if citizens got in the way they must take the consequences. Police patrols attempted to move the masses that thronged the streets and impeded traffic, but were unable to hold the crowd in check.

The greatest disorder was concentrated at the corner of Main and Higgins Streets and also opposite the City Hall, where large crowds collected. Extra police were sent to that point to maintain order, but were unable to do so. The crowd being beyond the control of the police, the Rifles were called on to disperse them. A detective was seriously injured in an attack by the crowd, and the situation rapidly assumed the most grave proportions. Thousands of yelling, cursing and footing men thronged the streets under and about the subway, the traffic was at a complete standstill. Cars were completely blocked, and the efforts of the police to clear the congestion were futile. The crowd attacked a car just south of the subway, pulling the men in charge off, whereupon the soldiers charged several times with fixed bayonets, and drove the crowd back. Several persons were severely injured.

NO SETTLEMENT IN SIGHT.

Principal Patrick, of Manitoba College, and Principal Sparling, of Wesley College, met the directors of the Street Railway Company on Monday night and made a second attempt to arrange a settlement of the strike. Nothing has been given out. The outlook, however, is not hopeful, as the company is apparently not willing to make any concessions to the demands of the men.

STREET CAR WRECKED.

A street car in St. Boniface was badly wrecked by a mob at 5.30 o'clock on Monday evening, and a call for a squad of Winnipeg police was necessary to relieve the crew. The car was then escorted back to the barn. Cars ceased running at 6 o'clock.

GALICIANS BUYING ARMS.

Galicians have given the interesting information that a goodly portion of their number were purchasing revolvers and ammunition, with the intention of showing their resentment to the calling out of the military. They considered such tactics as savoring too much of their homeland autocracy.

sailing long distances. It is not likely however, that the Government will press the clause, though Mr. Hanna remarked that in the past liquors have been sold on boats and dining cars in spite of the fact that such sale was a violation of the law, and as he had no doubt the practice would continue in the future the province might as well have the benefit of the revenue to be got from it.

In the matter of the two-years' term for local option, the secretary stated that the Government was indifferent about the length of time, but they were emphatically of the opinion that there should be an inequality between that time and the time in which the question could be re-opened after the defeat of local option. In dealing with the clause providing that three-fifths of the vote polled must be secured to carry local option, Mr. Hanna undermined objections by quoting a number of former temperance leaders, who declared in favor of a preponderant majority in such cases.

AUTOMOBILE BILL.

Mr. Sutherland introduced his automobile bill against city sports, "with more money than brains," who course the roads regardless of safety and comfort of rural inhabitants. The bill empowers County Councils to close any road against motor vehicles if it is considered dangerous for horses to meet automobiles on the road. It also contains other provisions calculated to curb the recklessness of motor car drivers. The debate on the measure took up most of the time of Monday afternoon's session. In the end, it was referred to the Municipal Committee.

HOMESTEAD ENTRIES.

Twenty-two Nationalities Figure in the Returns.

A despatch from Ottawa says: Homestead entries to the number of 30,819, representing in all 77,550 souls, were made in Manitoba, the Northwest Territories and British Columbia during the last fiscal year. Some twenty-two nationalities figure in the returns, including 4,284 English, 1,225 Scotch and 421 Irish. Canadians from Ontario numbered 4,885, and returned Canadians from the United States, 483. There were 8,532 citizens of the United States who took out entries. That the Doukhobors are breaking away from the communal system is shown by the fact that 207 became homesteaders. The bulk of the foreigners who homesteaded outside of Americans were, Austro-Hungarians. Their strength was 1,931. The total homesteads taken cover an acreage of 4,931,040 acres. Arrivals for the last fiscal year at ocean and inland ports numbered 146,266, of whom 65,359 came from the British Isles, 37,255 from the continent and Iceland and 43,652 from the United States. Last year's arrivals of the same class were 130,330, to which total the British Isles contributed 50,374, the continent and Iceland 34,785, and the United States 45,171.

TRAIN WRECK ON C. P. R.

Gordon Elliott Killed and Several Others Injured.

A despatch from Neepawa, Man., says: One killed and about 45 injured is the record of a wreck on Friday afternoon on the Manitoba and North-western Railroad, a subsidiary of the Canadian Pacific, six miles east of Arden. The accident was due to a broken rail. Dead: Gordon Elliott, London, Ontario injured are: Mrs. James Parks, Hastings, Ont., side hurt, scar on head; Mrs. Parks, cut on head, not serious; Mrs. W. F. McVey, Melrose Junction, injuries slight; W. H. Colvell, Guelph, jaw broken, head cut, arm injured; F. Dalton, Toronto, back hurt, not fatal; John Chambers, Centralia, slight injuries; Thomas Beckett, Bruce Co., hip hurt one cut, not serious; Agnes Beckett, his daughter, arm broken, head badly cut; Finlay Beckett, his son, forehead cut and other injuries; Johnnie Beckett, son, seriously hurt, probably fatally; J. H. Gillies, traveller for Heap & Co., Vancouver, hip hurt. All the injured were taken to Neepawa Hospital.

EX-PRESIDENT YORK LOAN.

Toronto Police Magistrate Refuses to Renew the Bail Bonds.

A despatch from Toronto says: The disclosures in the investigation into the charges against Joseph Phillips assumed such a serious aspect on Friday morning that Colonel Denison had the defendant taken into custody. The evidence of George Meyer showed that he had paid Phillips money out of the profits of his printing business, but further evidence made it appear that the cash was never handed over to the book-keepers of the loan company. When these statements were made the Magistrate advanced the required bond to \$3,000. "I will consider during the day whether I shall take bail or not," he said, "for the case seems to be getting worse every minute." Mr. J. E. Jones did not think the new developments so serious as that would make it appear. The Crown Attorney, however, thought the evidence had showed that there had been stealing. There were large sums involved and many of the transactions could be described by no other name than theft.

Before the noon adjournment the Magistrate had made up his mind. He instructed the police to take Phillips into custody and the prisoner was kept in the court-room in charge of Inspector Johnson till the afternoon hearing began. He took his dinner in the room adjoining the court. In the evening Detective Twigg and P. C. Campbell took charge of the prisoner. He was searched in the detective department, but had nothing in his pockets except about \$9 in money. While waiting for a cab to remove him to the jail, he remarked to the detective, "You have a pretty hard thing to prove."

MINTO STANDS BY KITCHENER.

Approves of a Large Expenditure For the Forces in India.

A despatch from Calcutta says: A denunciation by native members of the Viceroy's Council on Thursday, during a discussion of the budget, of the enormous military expenditure demanded by Lord Kitchener, commander-in-chief of the British forces in India, which the speakers declared to be unnecessary, "now that the strength of Russia is broken," drew a warning reply from Earl Minto, the Viceroy, who said he hoped India would never be deceived into false security. He added:

"I cannot agree that Russia's reverses have minimized the danger on the frontier for all time. I am afraid that we shall be much more impelled to consider the effect those reverses will have on the pride of a high-spirited race. In time Russia will feel compelled to recover her lost prestige, and the price now paid for our army is a premium for the insurance of India."

BIG FIRE IN BUFFALO.

Times Printing Office Threatened with Destruction.

A despatch from Buffalo says: A fire broke out on the second floor of the office of the Buffalo Times, an afternoon paper, at 2 o'clock on Tuesday morning. At 2.15 the flames were bursting from the windows of the second and third floors. A second alarm, followed by a third, was sounded, when it became evident the flames had gained control of a large portion of the building. The Times is located on the east side of Main Street, a few doors north of Exchange Street. The Courier Printing Co., one of the largest lithographing houses in the United States, occupies the adjoining building on the north.

A HINT TO PARENTS.

Sir William Mulock, at Guelph Assizes, Speaks on Child Training.

A despatch from Guelph says: At the Spring Assizes, which opened on Monday morning, Hon. Sir Wm. Mulock, Chief Justice of the Exchequer Division, uttered words of warning to parents in

THE WORLD'S MARKETS

REPORTS FROM THE LEADING TRADE CENTRES.

Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, April 3. — Flour — Ontario wheat patents are \$3.05 in buyers' sacks outside for export. Manitoba first patents are quoted at \$4.30 to \$4.40, Toronto, and strong bakers' at \$3.90 to \$4.10. Bran is nominal at \$1.90 to \$2.00 in bulk outside.

Wheat — No. 2 mixed Ontario wanted at 7c outside, without sellers; No. 1 Northern, Manitoba, offered at 82c; Point Edward, May delivery, and No. 2 Northern at 80c, Point Edward, May delivery, without bids.

Oats — No. 2 Manitoba white offered at 40c North Bay, without bids.

COUNTRY PRODUCE.

Apples — Choice stock, \$3.25 to \$3.75 per bbl., and inferior qualities, \$2.25 to \$2.50.

Beans — Hand-picked, \$1.75 to \$1.80; primes, \$1.65 to \$1.70.

Honey — The market is steady at 7c. 8c for strained, and \$1.50 to \$2 per dozen combs.

Hops — 15 to 18c per lb.

Hay — Car lots of No. 1 timothy are quoted at \$8 on track, Toronto, and No. 2 at \$6.

Straw — \$5.50 to \$6 per ton.

Potatoes — Ontario stock, 65 to 75c per bag, and Eastern, 75 to 80c per bag on track.

Poultry — Turkeys, fresh killed, 15c; chickens, 12 to 13c; live chickens, 7 to 8c per lb.

THE DAIRY MARKETS.

Butter — Pound rolls are quoted at 20½ to 21c; large rolls, 19½ to 20c; good to choice dairy tubs, 20 to 21c, and inferior at 16 to 17c. Creamery prints sell at 26 to 27c, and solids at 24 to 24½c.

Eggs — New laid are selling at 15½ to 16c per dozen in case lots, and cold storage at 13c per dozen.

Cheese — Large cheese, 14c, and twins at 14½c per lb.

HOG PRODUCTS.

Dressed hogs in car lots are nominal. Bacon, long clear, 11 to 11½c per lb. in case lots; mess pork, \$18 to \$18.50; short cut, \$22 to \$22.50.

Hams — Light to medium, 13 to 13½c; do., heavy, 12½c; rcls, 11½c; shoulders 11c; backs 15½ to 16c; breakfast bacon, 14½c.

Lard — Tierces, 10½c; tubs, 11c; pails, 11½c.

BUSINESS AT MONTREAL.

Montreal, April 3. — Grain — The enquiry for Manitoba wheat from foreign sources to-day was limited, and cable offers showed no improvement. The market for oats was steady. Demand was fair and prices held at the recent range, 1c 37 to 38c for No. 4 oats; 38 to 38½c for No. 3, and 39 to 39½c for No. 2. Flour — Manitoba Spring wheat patents, \$4.50; strong bakers', \$4 to \$4.10, Winter wheat patents, \$4.25 to \$4.50, and straight rollers \$3.90 to \$4 in wood; in bags, \$1.85 to \$1.90. Rolled oats — \$2 to \$2.05 in bags of ninety pounds. Feed — Ontario bran, in bulk, \$20; shorts, in bags, \$20 to \$20.50; Manitoba bran, in bags, \$20; shorts, \$21.

Hay — No. 1, 88 to \$8.50 per ton on track; No. 2, \$7 to \$7.50; clover, \$5.50 to \$6, clover, mixed, \$6 to \$6.50. Potatoes — Per bag of 80 lbs., 65 to 70c. Honey — White clover, in comb, 13 to 14c per pound section; extract, 8 to 9c; buckwheat, 6½ to 7c. Provisions — Heavy Canadian short cut pork, \$21.50 light short cut, \$20.00; American short cut \$20.00; American cut clear fat backs, \$20; compound lard, 7 to 7½c; Canadian pure lard, 11½ to 11½c; kettle rendered, 12½ to 12½c; hams, 13 to 14½c; breakfast bacon, 16c; Windsor ba-

ON THE FARM

STOP KICKING.

A good many farmers ought to wipe their glasses, writes a correspondent.

I came across one the other day. He said he never had known hay to be so light as it was last season. "Why," he said, "you could pick up five or six hundred pounds of it and walk right off with it. Nothing to it!"

Then he went on to tell me how fast it went when he came to feed it. "Never saw anything like it in my life!" he growled. "A cow would eat a whole load of it and then look like a rail—and a slim rail at that."

When I went home I told my wife it was worse than a dose of calomel to sit and listen to that man mourn and "take on" all the evening through. Life for him seemed to be one long, dreary day, with never a bit of sunshine to lighten it up.

Why is it, do you suppose, that this is the way with so many who are really blessed beyond their ability to reckon? It is wrong. So much joy, peace and comfort, and so many things to make us happy; and still we are determined to see the shadowy side of it all!

Don't you suppose it would be a good plan to take off the green and smoky spectacles, and wipe them dry? If we wet them with tears,—the good honest tears of repentance for our ingratitude;—it would be better yet.

The most of the gray hairs we have come not through good, square, hard work, but through the nibbling and pestering of things that never had a being at all.

A man once told me how he tired a horse out that had the notion of kicking. He hung an old sheep pelt up behind the horse, just where he could see it, and let him kick till he got enough of it.

At first, no doubt, the horse thought that pelt was the worst looking thing he had ever seen in all the days of his life. He peeled his eye back at it and made up his mind that the old evil one must surely be right after him. And he kicked and he kicked.

But the more he kicked the faster the thing fell back on his heels. All night long he worked at it, till the sweat ran down his legs and he was "all of a tremble." Then he stopped; and, by the grey light of the morning, took a good square look at the miserable thing that had been worrying the life out of him.

It was nothing but an old sheepskin. It made him so ashamed to think how he had wasted so much time and strength on a thing like that, that he stopped kicking.

And after that he never kicked.

I have been riding on a railroad which was not so smooth as it might have been. As I looked out of the window at the passing objects, the trees and houses and everything else seemed to be wonderfully out of perpendicular.

But they were all right. The trouble was with the train I was in. The cars rocking from side to side made it appear that things outside were all wrong.

How many times that is true! The world looks wrong to us, and all the while, it is our own selves that are wrong and not the world at all.

Let us wipe our spectacles! It is a good time to do it now.

Then glance around and take a fair look at all that is being done for the comfort of us poor, ungrateful human beings. It is enough to make the worst of us ashamed of ourselves.

But the best plan I know to make us look at things as they really are is to go out and help some one else.

The softest, nicest handkerchief with which to wipe our glasses is the kerchief which has wiped the tears from some other man's eyes.

No more mist after that! In the place of the lament will come the song in the heart. Where we thought there was a

Speaks on Child Training.

A despatch from Guelph says: At the Spring Assizes, which opened on Monday morning, Hon. Sir Wm. Mulock, Chief Justice of the Exchequer Division, uttered words of warning to parents in reference to the training of children. In addressing the jury, his Lordship reviewed the three criminal cases before him, and particularly urged the necessity of parents and guardians paying stricter regard to the bringing up of their children.

FOREMAN KILLED BY FALL.

Fatal Accident in a Mine in East Hastings.

A despatch from Madoc, Ont., says: Peter Jarvis, of Kellar's Bridge, was killed on Monday afternoon in the American Madoc Mining Co.'s Mundie Mine, near Brantockburn. Five men were being brought up the shaft in the bucket. When near the top the cable caught, tipping the bucket over sideways. Jarvis, foreman of the mine, and J. Pressick, of Cordova, fell out. The latter dropped about 25 feet, lighting on a piece of timber unhurt. Jarvis fell 70 feet to the bottom of the shaft. He lived about ten minutes. The other three occupants caught hold of the cable till the bucket righted itself again. Jarvis leaves a widow and one child.

PITCH QUITS FOR MAYOR.

Two Brothers-in-Law Who Polled a Tie Vote.

A despatch from Ida Grove, Iowa, says: Robert Lipton and W. J. Anderson, brothers-in-law and partners in the banking firm of Anderson, Lipton & Co., who were candidates for Mayor and came out even in the returns, with 229 votes each, will pitch a game of quills with the Mayorality at stake. It is rumored that some years ago, when the men were nothing but friends, they courted two sisters, but were undetermined as to which should have his choice. The story goes that they then pitched quills and abided by the decision, which proved a happy one to both.

SASKATCHEWAN LEGISLATURE.

First of New Province Opened and a Speaker Elected.

A despatch from Regina says: The first Legislature of Saskatchewan was declared open on Thursday afternoon, by Lieut.-Gov. Forget. The opening ceremonies differed but little in regard to official form and ceremony from the summoning of the Territorial Assemblies. Thomas McNutt, M.P.P. for Saskatchewan, was elected Speaker. The speech from the throne made special reference to projected railway development, and announced the consolidation and revision of the laws now in force.

FELL DYING FROM HIS BUGGY.

Prominent Physician of Cobourg Stricken Driving to a Patient.

A despatch from Cobourg says: Dr. W. J. Douglas, a prominent Cobourg physician, was suddenly stricken down on Thursday while in the performance of his professional duties. About 11.30 a.m., he left his office to visit a patient in the country, and, contrary to his usual custom, was driving alone. When about three-quarters of a mile east of his residence he was seen by occupants of two other vehicles to lean out of his buggy, and then to fall out. They immediately went to his assistance, in answer to a question he spoke once and soon afterward expired.

TWELVE NATIVES SHOT.

Natal Government Carries Out Death Sentence on Rebels.

A despatch from Pietermaritzburg, Natal, says: The twelve natives condemned to death for the murder of policemen during the uprising in February against the collection of the poll tax, the postponement of whose execution led to a dispute between the Imperial and Colonial Governments, were shot on Monday morning.

The United States naval bill provides for the expenditure of almost \$100,000,000.

Anna W. Hopkins, school teacher at Utica, N. Y., fell in a faint and broke her neck.

Earl Grey, as the guest of honor at the Pilgrim's dinner in New York, delivered a speech of international interest.

The Westinghouse works at Pittsburg have produced a new type of electric locomotive capable of hauling a train at seventy miles an hour.

George W. Perkins, former Vice-President of the New York Life Insurance Co., was arrested on the charge of grand larceny. It will be made a test case.

Hattie Kohn, a stenographer, fell seven storeys from No. 41 West 24th street, New York, and a cornice broke her fall. Her arm was broken, but she will recover.

Cub. Watts and Joe Watts, twins, of Abbeville, Georgia, shot and killed C. R. Burch and George and James McDuffie because they wanted to write a realistic book describing actual murder. They are boys.

The funeral of Mrs. J. Worth, who weighed 400 pounds, took place at Wilmington, Delaware, on Tuesday. When the pall-bearers tried to carry the casket out, it stuck in the doorway, and after an hours hard work enough bricks were torn away to permit the passage of the body.

GENERAL.

The new Japanese tariff is retaliatory and decidedly protective. The average rate of duty is 13 per cent.

The League of Russian Writers will try to prevent the impending massacre of Jews at Eastern.

CAR HURLED INTO RIVER.

Collision on Canadian Northern Bridge at Red River.

A despatch from Winnipeg says: One car hurled bodily into the river and three more smashed to matchwood were the results of a collision on the C.N.R. bridge crossing the Red River, a little after noon on Thursday. Engineer Cowley, with engine 200, was bringing in a freight from Rainy River, when, owing to misplaced signals, he ran into a yard train on the bridge. No one was killed or injured, but the loss will amount to over \$5,000. The bridge is impassable, and one side has sagged down several feet.

BRITISH REVENUE GROWS.

An Increase During the Fiscal Year of \$3,481,010.

A despatch from London says: The revenue of the United Kingdom for the fiscal year ending on Saturday shows \$769,394,920, an increase of \$3,481,010. During the year the customs revenue decreased \$6,315,480, and the excise revenue \$2,314,110, while there were increases of \$5,400,000 in the postal telegraph revenue, \$3,299,740 in estate duties, and \$2,400,000 in stamps. The surplus balance in the exchequer at the close of business on Saturday was \$24,396,450.

NATAL MINISTRY REVOLTS.

On Account of Recent Interference of Home Government.

A Pietermaritzburg, Natal, despatch says: The interference of the Colonial Office in London with matters which the Natal Government considers to be outside of the Imperial jurisdiction led on Thursday, to the resignation of the Ministry, headed by Charles John Smythe. The latter had confirmed the death sentence imposed on twelve natives who took part in the murder of policemen during the recent uprising in this colony. (Vinson Churchill, Under Secretary of State for the Colonies, cabled to Premier Smythe, ordering a suspension of the executions pending the home Government's consideration of the sentences. The Premier curtly refused to do so, and the Governor, Sir Henry McCallum, postponed the executions. Thereupon,

heavy Canadian short cut pork, \$21.00 light short cut, \$20.00; American short cut \$20.00; American cut clear fat backs, \$20; compound lard, 7 to 7½; Canadian pure lard, 1½ to 1½½; kettle rendered, 12½ to 12½; hams, 13 to 14½; breakfast bacon, 16; Windsor bacon, 15; fresh killed abattoir dressed hogs, \$9.75 to \$10; country dressed, \$8.75 to \$9.25; alive, \$7.50 to \$7.75 for select. Eggs — New laid, 17c per dozen; storage and limed, 13c, nominal. Butter — Choice creamery, 22 to 22½; undergrades, 20 to 21c; dairy, 19 to 20c. Cheese — Ontario, 13 to 13½c.

UNITED STATES MARKETS.

Milwaukee, April 3. — Wheat — No. 1 Northern, 80 to 81c; No. 2 Northern, 76½ to 79½; May, 76½; Rye — No. 1, 65 to 66c; Barley — No. 2, 55c; sample, 37½ to 53c. Corn — No. 3 cash, 41½ to 42½; May, 44c asked.

Duluth, April 3. — Wheat — No. 1 Northern, 76½; No. 2 Northern, 74½; May, 77½; July, 78½; September, 77½.

St. Louis, April 3. — Wheat — Cash 82c; May, 74½; July, 74½.

Minneapolis, April 3. — Wheat — May, 73½; July 78½ to 78½; September, 77½; No. 1 hard, 77c; No. 1 Northern, 76½; No. 2 do., 75c. Flour — Unchanged, Bran — In bulk, \$14.

LIVE STOCK MARKET.

Toronto, April 3. — There was a good active trade for choice cattle at the Western Market this morning and prices held steady to firm. Inferior cattle were less in demand. Sheep and lambs were firmer and hogs unchanged.

Export Cattle — Choice are quoted at \$1.95 to \$2.25, medium to good at \$4.30 to \$4.70, others at \$1 to \$4.25, bulls at \$3.50 to \$4 and cows at \$2.75 to \$4.

Butchers' Cattle — Picked lots, \$4.75 to \$5.10; good to choice, \$4.40 to \$4.65; fair to good, \$3.75 to \$4; common, \$2.50 to \$3; cows, \$2.75 to \$4.25; bulls \$3 to \$4; canners, \$1.50 to \$2.

Stocks and Feeders — Short-keep feeders are quoted at \$4 to \$4.50, heavy feeders at \$3.85 to \$4.15, medium at \$2.50 to \$3.50, bulls, at \$2 to \$2.75, good stockers run at \$3 to \$3.65, light at \$2.75 to \$3, rough to common at \$2 to \$2.75, and bulls at \$1.75 to \$2.50.

Milk Cows — The range of prices offering is quoted unchanged at \$30 to \$60 each.

Calves — Quotations are unchanged at 3c to 6½c per lb.

Sheep and Lambs — Export sheep are quoted 25c to 50c per cwt. higher at \$5.25 to \$5.75 for ewes and \$4.50 to \$5.40 for bucks. Lambs are quoted at \$6.75 to \$7.50 for grain-fed and \$5.50 to \$6.50 for mixed. Spring lambs are also firm at \$4 to \$7.50 each.

Hogs — Prices are quoted unchanged at 87 per cwt. for choice lightweights and \$6.75 for select and \$6.75 for lights and fats.

A FATAL EXPLOSION.

One Man Killed, Another Dying—Were Plugging Hole.

A despatch from Winnipeg says: As a result of the premature explosion of a virile at Stewart's camp at Riddell, just east of Hawk Lake, one man has died and another is possibly fatally injured. The two men had about finished plugging a hole with the deadly explosive, when by some means it went off, injuring Peter Magnusson so badly that he died soon after reaching the hospital. Atel Johnston's system was so permeated with it that pneumonia has set in and his life is hanging in the balance.

FARMER SHOTS HIMSELF.

Aged Resident of Downie Township Commits Suicide.

A despatch from Stratford says: James Dunseith, an elderly man living in the Township of Downie, committed suicide on Monday by shooting himself in the forehead with a gun. No cause is assigned for the act, and he was apparently in good health.

Municipalities in western Ontario have been invited by Mayor Coatsworth, of Toronto, to participate in a delegation that will meet Premier Whitney on April 11 and discuss the power question.

The best, most successful method with which to wipe our glasses is the kerchief which has wiped the tears from some other man's eyes.

No more mist after that! In the place of the lament will come the song in the heart. Where we thought there was a sore we shall find a beauty spot. Service for a poor fellow-mortal takes away the shadows and cures all the hurts we thought we had.

"Stepping off on to nothing" is not very encouraging business. We have been doing that altogether too much. We have had many a tumble in consequence of this tendency. Our shins have been sore and our hearts weary from the falls we have had that way.

Let us not do it any more, fellow farmers. Let's get the solid rock under our feet and let the shadows be shadows.

THE NEW CALF.

When the new calf puts in an appearance do a little thinking for the sake of the calf—and yourself. Remember that it is a stranger to everything that you know.

If you are to raise the calf, after the first milking take it away from the mother and put it in a nice, dry, warm stall, with plenty of straw. Don't save a calf that has not at the start at least six teeth all well cut through. This shows good vitality. If the calf has five or six teeth, that is another mark of a good cow by and by.

After the calf is twenty-four hours old, feed it two quarts of milk just from the cow. At first give it your finger then gradually slip the finger out. Some times you can do this at the first feed ing; sometimes you can't. There is a difference in calves, just as there is in folks. Be patient about it.

Next time feed the calf a little more warm milk. If things have worked all right, the calf will then be drinking without the finger. But keep cool; things do not always work right. You know how things ought to be done; the calf doesn't. You must use brains for the calf—and for yourself.

Practise this for three weeks, especially the part that relates to patience. Liftle by little give the calf more to eat till you have reached four quarts twice a day.

Then take out some of the new milk and add sweet skimmilk, decreasing the proportion of new milk each day for a week. By that time the calf will be on skimmilk diet. It will then begin to eat a bit of bright hay and be well started on the way to cowhood.

COWS IN SPRING.

In the spring there is almost always more or less trouble with the udders of cows. Best way to avoid this is to feed no heavy rations for a few weeks before they begin to give milk. Then wheat bran should be about the only grain ration. If the bag becomes caked rub it often with quite warm water. If very bad, drop a little camphor into the water. Vaseline is also very good. But keep the rubbing up till all the bunches are gone.

If the bowels are inclined to be constipated before cows come in a good dose of Epsom salt will be beneficial. You must be the doctor and all else for your cows at this time of the year. They can not do for themselves.

LIVE STOCK NOTES.

Do not allow a rough, noisy man around the stables. The fellow who works for his board is often expensive help.

Do not neglect to examine the horse's mouth frequently. A sore mouth is the cause of many unpleasant habits. Be careful how the bits are fitted. The placing of the bit in the horse's mouth has a great influence on his manner of going.

You can always depend on the pure bred fowl for uniform growth. Take a mongrel hen, and her chickens will vary. They never grow fast, and one or two in the bunch will be ready for market before the others. Not only that, the pure bred are uniform in looks after dressing, and sell higher on this account for breeding and hatching purposes. Their eggs and themselves sell higher than the market price for either.

We Trust Doctors

If you are suffering from impure blood, thin blood, debility, nervousness, exhaustion, you should begin at once with Ayer's Sarsaparilla, the Sarsaparilla you have known all your life. Your doctor knows it, too. Ask him about it.

Unless there is daily action of the bowels, poisonous products are absorbed, causing headache, biliousness, nausea, dyspepsia, and thus preventing the Sarsaparilla from doing its best work. Ayer's Pills are liver pills. Act gently, all vegetable.

The new County Council bill does away with the present system, and provides that the council shall be composed of reeves and deputy reeves. Every municipality will have one representative, and where there are more than 1,000 names on the voters' list a deputy reeve, and a deputy reeve for every thousand up to 3,000.

The Toronto News has it that some Ontario officials, displeased with the attitude of the opposition on the salary question, want to get even by re-

Halifax Chronicle.

If it were possible to introduce a decimal system, founded on our present English units and nomenclature, that might be quite an admissible proposition. But the other—the Franco-Greek gibberish and the Age of Reason unit, the one-ten-millionth of the imagined distance from the equator to the north pole on the meridian of Paris—not any of it for us.

Bruce Times.

Liberals and Conservatives alike have been greatly incensed over the increased indemnity bill passed by the Dominion Government last session. While the members by supporting the bill have gained financially, yet, we believe, each and everyone of them has lost in popularity. The voice of the people is heard from one end of the Dominion to the other shouting against the measure.

Montreal Gazette.

Ottawa police insist on the bill posters covering with paper the legs of figures in Highland costume used for theatrical advertising purposes. It must be somewhat painful for ordinary folk to live with people of susceptibilities so fine that the sight of a pair of bare knees gives them a moral shock. Perhaps the M.P.'s in ways not elsewhere appreciated earn that extra indemnity they voted themselves.

Ottawa Free Press.

A Province without any other bonded debt, with illimitable prospects and great resources, should have at least sold her bonds at par instead of at 96, the figure of the new loan. It was at least important that the first leap of the Province should make a good mark and if this could not be attained it would have been better to delay it until better terms could be arrived at. The injury which has been done the Province is an irreparable one, which will affect the credit of Ontario for the next forty years.

Windsor Record.

In a few years death has converted a Conservative majority into a Liberal majority the Senate the result is a body whose great majority is subservient to the Commons. No better argument perhaps could be advanced for the abolition of the upper Chamber, as having ceased to perform that function of restraint and regulation which theory assigns it. This condition is inseparable from party politics, and it is difficult to see how it can be mended and retain the Senate, whose usefulness depends on that independence which the constitution cannot confer.

SUNDAY OBSERVANCE.

Nelson News:—Strictly enforced, this bill will prove an endless source of aggravation and annoyance to the great majority of Canadians, who are law-abiding, and who believe in the proper observance of the day of rest. Petitions are pouring into Parliament against the bill, and it is to be hoped that such pressure will be brought to bear upon the Minister of Justice who has charge of the bill, and upon members on both sides of the House, as will result either in its withdrawal or such thorough emasculation as will render it innocuous.

Catholic Register:—We are glad that the Dominion of Canada will assert itself as a Sunday-observing country. Whatever sacrifice it may place upon the few, it brings rest and relief to the many, and the benediction of the Most High upon the country

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. not again be covered with hair, so never will I change or conform to your wish!" Maximian ordered a goat's skin to be nailed to Hipparchus' head and then jeeringly claimed that the condition was fulfilled. But Hipparchus remained obdurate and speedily died on the cross.—London Chronicle.

He Was Absentminded.

The absentminded man is at it again. He had been reading the egg story and decided to try the trick. The first thing to do was to boil the egg. How many minutes? he asked himself, and, going to the stove with the egg in one hand and his watch in the other, he dropped the latter in the hot water. Then, placing the egg on the table, he sat down to read until the time was up. At the end of five or six minutes he was surprised to find the egg lying there before him, but, supposing that he had himself taken it from the kettle and cooled it, he proceeded to crack and peel it. The consequence may be imagined. Finally he missed his watch. The house was searched high and low, and it was not till the following morning that the cook found it in the kettle, where it had been boiling for hours.—Exchange.

Whales.

Whales, though they are mammals, are fitted to live like fishes in water. The true whales are of two kinds of families—the spermaceti whale, which has teeth in the lower jaw, and the baleen whale, which has none. Of

be transformed into vital force and who have died for want of proper

The Toronto News has in it some Ontario officials, displeased with the attitude of the opposition on the salary question, want to get even by revealing former departmental "secrets." Let them. If there is none more serious than the Matheson-Coates story no one will be hurt.

Mr. Preston of South Brant, in the course of his speech on the budget directed attention to the Whitney Government's announced intention to amend the election law so as to authorize the Government to appoint as returning officers other persons than the Sheriffs and Registrars who have for many years acted ex officio in that capacity. The change proposed cannot be too generally or too strongly denounced. A partisan returning officer can favor his own party, and will be expected to do it; responsible county officials, no matter what their political sympathies may be, are under no inducement to deal unfairly by either side. The law as it stands has worked admirably, and nothing short of a sinister purpose can account for the proposal to change it. Against such attempted legislation the Opposition will be justified in making the most strenuous and determined fight possible.

WHAT OTHER PAPERS SAY.

Toronto Mail.
If a bill can be passed forbidding treating it will only be necessary to pass another measure, prohibiting the lone drink in order to bring on the millennium for which the Dominion Alliance is working.

Toronto Globe.
Col. Matheson regards Mr. Harcourt's connection with Coates & Co. as suspicious. He is any more suspicious than Col. Matheson's alliance with the men to whom he sold the gold dollars of the Province for 95 cents?

CAUGHT COLD
ON THE C.P.R.

A. E. Mumford tells how Psychine cured him after the Doctors gave him up

"It is twelve years since Psychine cured me of galloping consumption." The speaker was Mr. A. E. Mumford, six feet tall, and looking just what he is a husky healthy farmer. He works his own farm near Magnetawan, Ont.

"I caught my cold working as a fireman on the C.P.R.," he continued. "I had night sweats, chills and fever and frequently coughed up pieces of my lungs. I was sinking fast and the doctors said there was no hope for me. Two months treatment of Psychine put me right on my feet and I have had no return of lung trouble since."

If Mr. Mumford had started to take Psychine when he first caught cold he would have saved himself a lot of anxiety and suffering. Psychine cures all lung troubles by killing the germs—the roots of the disease.

country, whatever sacrifice it may place upon the few, it brings rest and relief to the many, and the benediction of the Most High upon the country adopting it and the people obeying its reasonable provisions.

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dread disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature to do its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Sold by all Druggists.
Take Hall's Family Pills for constipation.

A Problem in Wizardry.

We want to know why persons who believe in wizards, or, at all events, consult wizards, nearly always prefer to believe in men or women who are of a race inferior to their own or in circumstances which prove that their occult powers are of no use to themselves. The rule is not invariable, for there have been great wizards like Paracelsus, Roger Bacon, Michael Scott and Cagliostro, who were acknowledged by those who consulted or feared them to be in all ways their superiors, but it is seldom broken. In all the letters on country superstitions which we have published the "wise" man or woman has always gypsy blood or some peculiarity of appearance marking out him or her unfavorably from their kind. The wizard of India is usually a naked savage, while those who resort to him are civilized beings clothed carefully in muslin. The reverence of the whites for the black obeah man or woman in the West Indies is the subject of countless narratives, especially in the French islands.—London Spectator.

Solid Emery Wheels.

In the production of solid emery wheels the best cement that can be employed is one that binds the emery together with that degree of strength which will resist the centrifugal strain due to the high speed at which emery wheels cut best—about 5,000 feet speed per minute. It must not soften by frictional heat or glaze or burst or become brittle and break with cold, nor must it hold the cutting grains until they are too dull to cut nor release them so readily as to waste away the wheel too fast. It must be capable of being thoroughly mixed evenly with the grain emery, so that the wheel may not have either hard or soft spots and be out of balance, and must also be capable of being tempered to suit different kinds of metal or work. Great care and skill are required in the matter of selecting only pure and strong chemicals for these cements.—Cassier's Magazine.

The Bald Head.

A bald head is a less familiar (and nowadays less true) representative of the unchangeable than the Ethiopian's skin or the leopard's spots, but it was cited in this character with impressive pathos by Hipparchus, one of the seven martyrs of Samosata. After they had been subjected to severe tortures they were at last confronted with seven crosses, and the Emperor Maximian offered them a last chance to recant. But the aged Hipparchus put his hand on his bald head and cried, "As this, according to the order of nature, can-

CASTORIA.

The Kind You Have Always Bought

The true whales are of two kinds of families—the spermaceti whale, which has teeth in the lower jaw, and the whalebone whale, which has none. Of the first named there are two species, the cachalot and the sperm, which when full grown measures from seventy to eighty feet. The capture of this animal is attended with greater danger than that of the whalebone or Greenland whale on account of its formidable teeth.

Crabs Helped in Rabbit Hunt.

On a property where the rabbit shooting was strictly preserved upon the southern coast of England a boy was caught with two dead rabbits in his possession and nothing that would account for their decease. A search of his pocket revealed nothing but two live crabs of small dimensions, the end of a candle and a box of matches. Under promise of release the urchin was persuaded to disclose his method of procedure. First he selected a likely burrow and then stripped off his clothes, putting his coat over one hole, his trousers over another and his shirt over the third. He lit the candle end, dropped a little grease upon the crab's back and stuck the lighted candle thereon and then put the crab at an unoccupied opening. Straightway the frightened torchbearer fled sideways into the darkness and explored the innermost depths, while the boy, expectant as a terrier, awaited events outside. Presently a rabbit bolted into the coat. As it did so that boy was after it like a shot, and boy, rabbit and coat all rolled over together, the boy rising from the fray with the rabbit in his clutches.—Korea News.

Priceless, Yet Costless—Pure Air.

There is no menace to vitality and to the sum and the value of the products of vital energy so continuously imminent, so insidious, so effectively active as are the invisible wastes of the body. The dead by the weapons of the world's battlefields are few compared with those whose lives have been either blighted or prematurely ended because of failure to maintain the body in a correct relation to the atmospheric source of abundant energy waiting to

The Better Way

The tissues of the throat are inflamed and irritated; you cough, and there is more irritation—more coughing. You take a cough mixture and it eases the irritation—for a while. You take

SCOTT'S EMULSION

and it cures the cold. That's what is necessary. It soothes the throat because it reduces the irritation; cures the cold because it drives out the inflammation; builds up the weakened tissues because it nourishes them back to their natural strength. That's how Scott's Emulsion deals with a sore throat, a cough, a cold, or bronchitis.

be transformed into vital force and who have died for want of proper breath. He who would live at his best must breathe air at its purest. There is no material necessity to life greater than that of pure air. There is nothing so priceless and yet so costless as air. There is no financial investment which does or can yield so sure and so large returns as money wisely expended for pure air.—Professor S. H. Woodbridge in Good Housekeeping.

Villages That Cut Corks.

Thousands of men, women and children in the mountains of Spain and Portugal are employed in cutting cork. It is a domestic trade, and it occupies whole villages. Agents from the factories and export houses of Seville and Lisbon go through the mountain villages each year buying up the corks in enormous quantities. It is not unusual for an agent to purchase 5,000,000 on one journey. The corks as purchased in the native villages are of all sizes and qualities. They are sorted in the cities and, after being packed, are shipped by the ton. Once here many of them are recut by hand at the rate of twenty gross a day. So fastidious are some bottlers that the cork importers have to keep in their employment several cork cutters to recut such corks as do not suit customers.

Arabs and Portraits.

An artist who found it difficult to get pictures of Arabs in Morocco writes: "I once tried to sketch some Arabs in Algiers. They constantly evaded me, and at last an old Moor, with whom we were on the friendly terms produced by constant bargaining for embroidered rags, spoke to me on the matter like a father, for my good. 'It is not,' he said, 'that any harm will ensue to those whose picture you make. It is you yourself will suffer inconvenience in the next world. Allah will say to you: "Following your own will and pleasure, you have made those figures. I now command you give them souls." And where, my friend, will you be then?"

Woman Was Made From an Elm Stick

In the Scandinavian myth of the origin of woman Odlin, Vill and Ve, the three sons of Bor, were walking along the sea beach when they found two sticks of wood, one of ash and one of elm. Odlin and his brothers were gods, of course, but the sight of the stick caused them to wish that they could carve other gods from the inanimate wood. They forthwith set about the task, with the result that they made a living man out of the ash stick and a female, being in godlike form, equally as lively as the man, out of the elm billet.

Injurious to the Memory.

Besides inattentive reading there are other things injurious to memory. One is the habit of skimming over newspapers, all in a confused jumble, never to be thought of again, thus diligently cultivating a habit of careless reading hard to break, says Home Chat. Another is the reading of trashy novels. Nothing is so fatal to reading with profit as the habit of running through story after story and forgetting them as soon as read.

Suspicious Directors.

"Our cashier seems to be a frugal chap."
"How so?"
"Always brings his lunch with him and eats it at his desk."
"Hum. That may be frugality and it may be fear of leaving his books. Better have him investigated at once."
—Philadelphia Bulletin.

The Romance of a Slipper

By Virginia Leila Wents

Copyright, 1906, by E. C. Parcells

When Miss Graham had finished her letter and laid her pen down, she sauntered indolently to the small window and looked across at the pine woods. It was one of those country windows to open which demands strength which is as the strength of ten and which, when opened, refuse to be closed again save with the archaic force of a battering ram.

"Even though I do live in a Harlem flat," pondered Kitty Graham, "I've been accustomed to windows that remained up without any visible means of support. Since I've come to the Berkshires I've learned better. Seems to me that one volume of Thackeray doesn't keep the window up high enough." She gazed searchingly about the room. "I reckon one of my high heeled slippers will about do it," and she inserted that bit of personal property with no mean skill, so that the heel raised the sash two or three inches higher.

"That isn't much," she concluded, a trifle warm with the exertion, "but it's something. And how delicious that pine fragrance is!" She bent her pretty head so that her little nose drew in long breaths of the sweet air. Then, picking up her letter, she went downstairs.

"Mrs. Barnes," came Miss Graham's silvery voice from the hall, "shall I leave my letter here on the table? Or is it too late for the butcher?"

"Sakes alive! Yes. He was here 'fore you was up," returned Mrs. Barnes cheerfully from her rocking chair on the front piazza. "But maybe there'll be somebody along presently on the way to North Adams. You might stick it in the railing in case anybody does come," she added.

Kitty sauntered to the fence and leaned over the railing. But no one was in sight.

"Suppose I walk over to North Adams myself," suggested she. "Is it far?" She tapped the belated envelope against her small white teeth.

"Land, yes, child! It's—"

The gate of the "other house" creaked as it was pulled open. They could always hear that gate creak. Mrs. Barnes stopped rocking and looked up the road.

"Here comes Professor Thornton!" she said placidly. "But, of course, we couldn't ask him."

"H'm!" murmured Kitty absently. "Why not?"

The professor was a tall, aristocratic looking man of middle age. As he approached, followed by a handsome collic, Kitten went to the gate and held out her letter with a frank, winning smile.

"If you're going to the village would you mind mailing this for me?" said she gravely. "I should be very much obliged."

Mrs. Barnes from the rocker on the piazza looked at the girl with mild reproach, but met no glance of apology. Kitty's wide gray eyes were following Professor Thornton's aristocratic figure down the road and evolving some questions. She turned abruptly.

"Who is he? Why did you hesitate about asking him? Don't you think

ed the small and active insects which went pottering about the needles and moss of soft earth.

"Oh, it's delicious and restful—no restful!" sighed she, stretching her arms above her head.

That night, instead of lighting her bedroom candle, she went to the window through whose uncurtained frame the moonlight poured in. It was still upheld by the volume of Thackeray and by the high heeled slipper. The October night air was quite chilly; there was too much of it. Kitty thought, while she was getting ready for bed, she'd close it from below and profit afterward.

So, staying the sash with her right shoulder, she tried to extricate the slipper and the book, but, alas, the slipper eluded her and tumbled heel first into the path below.

Kitty's first thought was to run and fetch it back, but she was utterly sleepy. "Oh, pshaw!" yawned she. "What's the use? I'll get it in the morning. It isn't going to rain; the sky's cram full of stars."

The next morning, very early, Prince, the big collic, came running in to his master, waving his tail excitedly, and dropped something at his feet. Then, flopping his tawny length upon the hearth rug, he eyed him expectantly.

Professor Thornton looked at the thing which Prince had deposited at his feet without touching it.

It was a slipper, he saw now, but how incredibly tiny it looked on his expanse of floor, how helpless and lost! He picked it up a bit gingerly. Why, it was absurdly tiny. What queer little feet women must have! He set the slipper upright on his big brown hand—an airy suede bridge across his broad palm.

He'd seen things like this—hadn't he?—on blocks in shop windows. No, not precisely like this, either, for this had little curves—a dozen of them—of individuality. Pretty little thing, but what nonsense for a shoe!

He hesitated a second, then softly opened the top right hand drawer of his desk. "Maybe some one will call for it," thought he. "Then I'll be sure to know where it is."

He thought of this drawer several times during the day, but did not open it. It was queer no one missed it. That night, however, he set the tiny thing up on his big blue blotter. It shone under the student lamp in shimmering daintiness, so soft, so smooth, with such curves! Why, it looked almost warm.

The professor leaned back in his revolving chair and looked around his room, dim save for the desk's circling light. The room seemed empty in spite of its furnishings—great cases of books, rugs, antlers, a favorite gun and a generous pipe rack, and in the midst of a circle of light a lonely man and a suede slipper.

Yes, the professor felt lonely. He picked up the slipper, turning it over and over. Suddenly he cried:

"Why, there's K. G. just as plain, right on the lining, in silver letters!" Prince sniffed at this illuminating discovery.

Next day as the professor was passing Mrs. Barnes' place he saw a dainty little figure in white at the gate. She raised her lovely tired eyes in recognition.

"Would you mind inquiring for my mail?" she asked. Both her manner and her words were of a disarming simplicity. "Miss Graham is my name—Kitty Graham."

"Miss Graham—Kitty Graham," repeated he gravely, with a courtly bow. Then he stopped short and regarded the girl with absorption, a wonder

That "Rich Fruity Flavor"

RESULT of expert blending of strong, rich Indian Tea with delicate, fragrant Ceylon Tea. That "rich fruity flavor" has made Red Rose Tea the table beverage of thousands of homes.

It distinguishes Red Rose Tea from all other teas.

It makes it different from and better than any other tea—it's a flavor you won't forget. It makes

DR. AGNEW'S HEART CURE GIVES RELIEF IN 30 MINUTES

questions. She turned abruptly. "Who is he? Why did you hesitate about asking him? Don't you think he'll mail it all right? It's to mother, and it's very important, and you don't think he'll drop it, do you?"

And what Mrs. Barnes thereupon told her was in substance if not in words something like this:

He was Professor Hamilton Thornton of New York city, serving as his mistress star eyed science. But of Woman (with a capital W) and her Ways (another capital W) he was totally ignorant. The icest of iced water was warm, so rumor had it, to the look he bestowed upon women.

"And how ever you braced up spunk enough to ask him to mail that letter," concluded Mrs. Barnes, rocking way back, "I don't know."

"Ho! Hum!" yawned Kitty. "Well, the woods for mine." And with a nod of farewell she passed out of the gate.

Over the slippery needles she went till she reached a tall tree whose shaft went straight up, not bothering itself with branches for thirty feet. Here she threw herself down and leaned back in the embracing roots, pitying the people in towns and heaving a sigh of satisfaction.

"If only dear mother could be with me, though," said she mentally, "but of course it's impossible. Oh, this poverty stricken workaday world!" She couldn't help thinking of the pretty little estate in Virginia which yielded nothing and of the subsequent hardship which she and her frail, delicate mother were enduring.

"Well, the doctor said if I'd stop fretting and would try to enjoy every moment of my month here in these fragrant hills I'd be all right for my winter work, so I'm only going to think of pleasure and—bracing things." And while the resinous bark gave forth its spicy smell, reclining against the roots of the pine tree, she lazily watch-

DIED SUDDENLY

OF HEART DISEASE.

How frequently does a head line similar to the above greet us in the newspapers. The rush, push and strenuousness of the American people has a strong tendency to lead up to valvular and other affections of the heart, attended by irregular action, palpitation, dizziness, smothered sensations and other distressing symptoms.

Three of the prominent ingredients of which Dr. Pierce's Golden Medical Discovery is made are recommended by some of the leading writers on *Materia Medica* for the cure of such cases. Golden Seal root, for instance, is said by the UNITED STATES DISPENSATORY, a standard authority, "to impart tone and increased power to the heart's action." Numerous other leading authorities represent Golden Seal as an unsurpassed tonic for the muscular system in general, and as the heart is almost wholly composed of muscular tissue, it naturally follows that it must be greatly strengthened by this superb, general tonic. But probably the most important ingredient of "Golden Medical Discovery," so far as its marvelous cures of valvular and other affections of the heart are concerned, is Stone root, or *Collinsonia Can.*, Prof. Wm. Paine, author of Paine's Epitomy of Medicine, says of it:

"I, not long since, had a patient who was so much oppressed with valvular disease of the heart that his friends were obliged to carry him up-stairs. He, however, gradually recovered under the influence of Collinsonia (medicinal principle extracted from Stone root), and is now attending to his business. Heretofore physicians knew of no remedy for the removal of so distressing and so dangerous a malady. With them it was all guess-work, and it fearfully warned the afflicted that death was near at hand. Collinsonia, under such circumstances, affords relief in such cases, and in most instances effects a cure."

Stone root is also recommended by Drs. Hale and Ellingwood, of Chicago, for valvular and other diseases of the heart. The latter says: "It is a heart tonic of direct and permanent influence."

"Golden Medical Discovery," not only cures serious heart affections, but is a most efficient general tonic and invigorator, strengthening the stomach, invigorating the liver, regulating the bowels and curing catarrhal affections in all parts of the system.

Dr. Pierce's Pellets cure Constipation.

peated he gravely, with a country boy. Then he stopped short and regarded the girl with absorption, a wonder growing in his eyes. "Miss Graham," said he, "do you ever wear slippers?" "What a question to ask a girl!" laughed Kitty some weeks later. "And what an amusing way to begin a courtship!"

Burma and Buddhism.

Burma is a country dominated by an idea, or, rather, a set of ideas, which owe their origin to the influence of Buddhism. The Burman holds the view that this life is a sorry thing at the best and that the wisest course is, therefore, to get through it with as little care, worry and anxiety as possible. The world is nevertheless at the same time full of good things, which all can enjoy. Therefore why toil for wealth, which brings only a burden of care in its train? Why strain every nerve when possession means the anxiety to hold and preserve. The bounteous earth supplies rice for the needs of all her children, and while there are love and laughter and gaiety to solace us, while leisure can be secured and peace maintained, let us enjoy and be happy. Here we strike the keynote of the life of the Burmans. Strangers call them lazy, but they are not idle except on principle. They can work splendidly when they choose, but they have long ago decided that to turn the world into a workshop, to toil incessantly for a mere subsistence or in order to gather up riches, is folly, as doing so destroys the pleasure of existence. As soon as a farmer has made a little money by selling his crop he gives a play, or pwee, to his town or village.—*Cornhill Magazine.*

A Spanish Custom.

No one exactly knows the origin of the time honored prerogative enjoyed by the natives of the Spanish village of Espinosa, who for centuries have possessed the curious monopoly of watching over the slumbers of the ruler of Spain. Every night at 11 o'clock the gates of the royal palace at Madrid are ceremoniously closed by a gorgeously appareled functionary armed with an ancient lantern and a huge bundle of keys and escorted by servants, officers and soldiers, and from that time forth until 6 o'clock in the morning, when the gates are opened again with similar ceremony, the guardianship of the interior of the royal dwelling is confided to what are known as the monteras de Espinosa. Each one of them is a pensioned lieutenant or captain of the army, and while two are stationed in the antechamber of the sleeping apartment of each member of the royal family, remaining throughout the night, not sitting, but standing, leaning on their halberds, the others patrol the corridors of the palace, two by two, until the morning, crossing each other at every point, never sitting down and never uttering a single word.

Nicotiana Affinis.

Nicotiana affinis, the border flower, which opens about 6 o'clock and gives a powerful and pleasant fragrance during the night, takes its name from the botanical term for the tobacco plant, *nicotiana*, which was named in honor of John Nicot of Nismes, ambassador from the king of France to Portugal, who procured the first seeds from a Dutchman, who had them from Florida.

His Plans.

"Did the architect carry out your plans?"

"Guess he must have. I haven't been able to find any of them about the house."

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIR,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

FROST LOCKS

Make a Fence of Strength

The heaviest, strongest wires made can't make a strong fence unless the locks are as strong as the wires. A fence, like a chain, is only as strong as its weakest spot. The New Frost Lock and Frost Wedge Lock are the most unyielding parts of a Frost Fence. They make the whole fence as strong as the strongest wire.

We guarantee to repair—free of charge—any Frost Fence that goes wrong

THE MAELSTROM.

How It Feels to Be on the Edge of the Great Whirlpool.

Off the coast of Norway, between two islands of the Lofoden group, is the largest whirlpool in the world. Its name, Maelstrom, means "whirling stream," and the title is well earned.

The great Maelstrom is no longer held in superstitious fear, and maritime charts have taught the sailors of the world where the danger lies and how to avoid it, so that accidents rarely occur, never except through ignorance or a previous disaster that has rendered a vessel unmanageable.

Several years ago the captain of a sailing vessel, desirous of seeing the famous whirlpool at close quarters, was assured by his Norwegian pilot that he might venture near enough for examination without danger. And here is what the captain saw:

"I went on the main topsail yard with a good glass. I had been seated but a few minutes when my ship entered the dish of the whirlpool. The velocity of the water altered her course three points toward the center. This alarmed me extremely for a moment. I thought destruction was inevitable. But she answered her helm nobly, and we ran along the edge, the waters foaming round us in every form.

"The sensations I experienced are difficult to describe. Imagine an immense circle running round of a diameter of one and a half miles, the velocity increasing as it approximated the center and gradually changing its dark blue color to white, foam, tumbling, rushing to its vortex, very much concave as much as the water in a

funnel when half run out. The noise, too, hissing, roaring, dashing, all pressing on the mind at once, presented the most awful, grand and solemn sight I ever beheld. We were near it about eighteen minutes and in sight of it two hours. It is evidently a subterranean passage. From its magnitude I should not doubt that instant destruction would be the fate of a dozen of our largest ships were they drawn in at the same moment. The pilot says that several vessels that had become unmanageable have been sucked down and that whales have also been destroyed."

THE SHOW WINDOW.

Don't neglect the upper part of the window.

Don't stick to one style of trimming. Branch out.

Don't skimp on elbow grease in cleaning the glass.

Don't wait till a trim is fly specked before changing it.

Don't overlook the utility of a certain number of fixtures.

Don't be afraid to try something new in the way of a display.

Don't fill a sunny window with goods that the sun will discolor.

Don't let the window stand too long. A week is about the limit.

Don't be afraid to spend a little money on the trim. It will come back.

Don't fail to call the local newspaper's attention to each nice trim that you make.

Don't prolong the trimming unnecessarily. A quick change will impress the public more.

Don't copy. But you can elaborate or change some one else's ideas without being open to the criticism of copying. —Exchange.

A Wonderful Faculty of the Triton.

The triton, a spotted, lizardlike reptile found in almost every state in the Union, has a most wonderful power of reproducing amputated parts. Bonnot, the great French naturalist, experimented on the little creatures by amputating their legs and tails and by so doing found that their powers of reproduction were almost unlimited. In one instance an amputated leg was reproduced twelve times in three years, and in another an eye was gouged out and reproduced in less than twelve months. The loss of a tail does not appear to discommode a triton except to give him a sort of unbalanced gait. Tails clipped from the specimens Bonnot kept to experiment on were invariably reproduced in from five to nine weeks.

The Donjon.

The donjon, or keep, of the castle was a tower within, much stronger than the rest of the structure and designed as a last resort for the garrison when the walls and other portions of the fortification had fallen into the hands of the enemy. The donjon was generally provided with a secret exit, a tunnel being constructed, often many hundreds of yards in length, leading to some concealed outlet through which the besieged could receive succor or, in time of necessity, escape.

Rather Mixed.

"Say, Jack, what have you that string tied around your finger for?"

"Oh, that is to remind me that I forgot something my wife told me to be sure to remember."

HOW HE BEAT THE STREET CARS

A Torontonian keeps a record of Fares he never paid.

A small account book was picked up in the street recently showing a systematic record of the number of times its owner got ahead of the street railway company. The blank pages of this book are ruled off in ledger form and each account headed with the name of a street car route in Toronto. For instance there was "Church Street" with a debit on the left hand side and a credit on the right. "Boor and McCal" the same—and so on over the entire system. Evidently when the owner of this book paid a fare he charged it up against the car line he patronized, and whenever he saved a fare he credited himself with five cents.

At first glance it might appear that the owner of this account book was in the habit of dodging the conductor's box, but this was not the case. The fact is the fares were saved by riding a bicycle instead of paying the street car company for comings and goings and the fares were contributed on rainy days when wheeling was unpleasant. On August 6th, 1905, he made an entry against "Boor and McCal" as follows: "One fare—the last of a quarter's worth of tickets bought: June 2nd." The total of fares were unpaid amounted to nearly thirty dollars in seven months.

THE HORSE SHOW.

The Canadian Horse Show is an event which has done much to benefit one of Canada's most important agricultural industries, the breeding of horses. This year witnesses the Twelfth annual renewal of the Show, which will be held in the Toronto Armouries on Wednesday, Thursday, Friday and Saturday, April 25th, 26th, 27th and 28th. The sum of \$8000 will be distributed in cash and plate. There are ninety-five classes for which the entries close on Wednesday, April 11th. They should be addressed to the Secretary, Henry Wade, Parliament Buildings, Toronto. The Show will be opened on Wednesday, April 25th, by H. R. H. Prince Arthur of Connaught, who will be present for two days. Reduced rates are offered on all railways within a convenient radius of Toronto.

LAPUMS WEST.

The roads here have been in a very bad condition for the past two weeks.

Mr. and Mrs. J. E. Boulton entertained a few of their friends on Tuesday

CATARRH

The true Cause and the true Cure.

How and why "Fruit-a-tives" completely eradicate this disease from the system.

Catarrh means inflammation. Ordinary catarrh is inflammation of the nose cavity opening into the throat. This cavity receives all the air going to and from the lungs. Food and drink passes through it to the stomach. And the prime cause of catarrh is indigestion.

Because indigestion means an irritated stomach. This irritation spreads to the throat and nose. Belching gas keeps up the inflammation. The blood is impure and badly nourished. And nine times in ten, there is Constipation and poor skin action.

The only way to cure Catarrh is to cure the cause of catarrh. Digestion must be improved—inflammation in stomach soothed—blood purified—and the liver strengthened so it will give up enough bile to make the bowels move regularly every day.

Fruit-a-tives

or Fruit Liver Tablets

will always cure Catarrh of the throat and nose because these marvellous fruit tablets cure indigestion—sweeten the stomach—and eradicate all impurities from the blood by its stimulating and invigorating action on liver, bowels, kidneys and skin.

Leave sprays, atomisers, powders and snuffs alone. Take "Fruit-a-tives" regularly—be careful of your diet—and catarrh will soon be a thing of the past.

One 50c. box of "Fruit-a-tives" will prove how effectively these tablets relieve catarrh—and will do you so much good that you will gladly continue the treatment until cured.

One, a box or 6 boxes for \$2.50 Sent prepaid on receipt of price, if your druggist should not have them.

FRUIT-A-TIVES LIMITED, OTTAWA.

NERVOUS DISEASES.

NERVOUS DISEASES.—The exigencies of modern life are producing an ever-growing amount of nervous diseases. The most common symptoms are depression of spirits, timidity, irresolution, general irritability and restlessness, headache, insomnia, numbness of extremities, failing memory, lack of power of application. Causes—Overstrain, lack of exercise in open air, warm, stifling atmosphere, high living, anxiety, overwork of brain or body. Precautions—For brain workers, avoid excitement, take proper rest proportionate to labor, avoid worry, get lots of fresh country air, avoid sedentary occupation. Taking

Vapo-Resolene

Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Whooping, Asthma, Diphtheria

Resolene is a boon to Asthmatics

This is a well established and standard remedy for all the above mentioned diseases because the air resins which are contained in it are absorbed over the diseased surface of the throat and lungs, giving relief to every breath, giving relief to every breath, giving relief to every breath. Those of a consumptive nature, who have chronic bronchitis, find this a most valuable and efficient condition of

Daily. All other rains run daily. Sundays excepted.

WALTER RATHBON, President. H. B. SHERWOOD, Superintendent. D. A. VALLEAU, Asst. Superintendent.

The roads here have been in a very bad condition for the past two weeks. Mr. and Mrs. J. E. Boulton entertained a few of their friends on Tuesday evening.

Will Brown went to Deseronto on Monday, where he has engaged for the summer with R. Bell.

John Brown is starting work here this week with Jas. Huff.

Mr. and Mrs. Alva Emberly and family from near Tamworth moved on the farm here, lately owned by A. Sagar which he purchased recently.

Jas. Judge of Yarker has purchased and moved onto the other farm here lately owned by Mr. Sagar.

Jas. Huff and A. Reddan, were in Kingston on Saturday.

Mrs. F. Brown accompanied by Mrs. C. Bash, Thompsonville were in Napanee on Saturday.

Wm. McGorman has returned to his home at Wm. Pringle's after spending the winter at Jas. D. Huff's.

Fred Brown, is working at Cambridge Bakery Yarker this week and last.

Messrs Winkie and Wm. Pringle are making arrangements to handle their crop of Straw Berries, which they expect to be nearly double, last years.

Milk Cans.

Second to none, best of tin, best of trimmings and workmanship, most improved bottom.

MADOLE & WILSON.

The Prague Clock.

Since the middle of the fifteenth century the city of Prague has possessed a remarkable clock, the machinery of which is most complicated. The dial, which is between six and eight feet across, has a number of hands, which mark not only the minutes and the hours, but also the days, months, years and centuries. Of this clock a poet tells us:

At the left of the dial a skeleton stands, And aloft hangs a musical bell in the tower, Which he rings by a rope that he holds in his hands In his punctual function of striking the hour. But the funniest sight of the numerous sights Which the clock has to show to the people below Is the holy apostles, in tunics and tights, Who revolve in a ring or proceed in a row.

Wonders About Skin Pores.

Each square inch of the human skin contains no less than 3,500 sweating tubes, or perspiration pores. Each of these tubes, although wonderfully minute, is about one-fourth of an inch in length. Each of these sweat tubes may be likened to a tiny drainpipe. We find that the average adult has about 2,000 square inches of skin on the surface of his body. Each square inch of this outer cuticle is, as we have said, literally permeated with its 3,500 quarter inch perspiration ditches. If we could put each of these little tubes end to end we would find that they would extend a distance of not less than 201,136 feet. Had you ever before stopped to consider the fact that the aggregate length of the little ditches for draining the human body is almost forty miles?

FITS CURED

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEIBIG CO., 170 King Street W., Toronto, Canada. All druggists sell or can obtain for you

LEIBIG'S FIT CURE

living, anxiety, overwork of brain or body. Precautions.—For brain workers, avoid excitement, take proper rest proportionate to labor, avoid worry, get lots of fresh country air, avoid sedentary occupation. Taking these precautions, along with Psychine three times a day, and restoration to health will follow quickly.

PSYCHINE gives a ravenous appetite, increases the weight, promotes rest and sound sleep, and gives nerve tissue to the impoverished nervous system. Get a bottle from your druggist.

Canadians are Proud

and rightly so, to have in their own Ontario such a large and up-to-date firm as the Dale Estate Florists, of Brampton. Their greenhouses which cover 14 acres and contain 60,000 sq. ft. of glass are the largest on the American continent. The Medical Hall has the agency for this enterprising estate for Napanee, and will be pleased to supply anything in the line of cut flowers or floral designs, such as wreaths, pillows, crosses etc. on the shortest notice. Leave us your order for Easter Lilies.—FRED L. HOOPER.

A TRaine

After Years of Experience

Regard to T

Mrs. Martha Pohlman of 55 Chester Avenue, Newark, N.J., who is a graduate Nurse from the Blockley Training School at Philadelphia, and for six years Chief Clinic Nurse at the Philadelphia Hospital, writes the letter printed below. She has the advantage of personal experience, besides her professional education and what she has to say may be absolutely relied upon.

Many other women are afflicted as she was. They can regain health in the same way. It is prudent to heed such advice from such a source.

Mrs. Pohlman writes:

"I am firmly persuaded, after eight years of experience with Lydia E. Pinkham's Vegetable Compound, that it is the safest and best medicine for any suffering woman to use.

"Immediately after my marriage I found that my health began to fail me. I became weak and pale, with severe bearing-down pains, fearful backaches and frequent dizzy spells. The doctors prescribed for me, yet I did not improve. I would blout after eating and frequently become nauseated. I had pains down through my limbs so I could hardly walk. It was as bad a case of female trouble as I have ever known. Lydia E. Pinkham's Vegetable Compound, however, cured me within four months. Since that time I have had occasion to recommend it to a number of patients suffering from all forms of female difficulties, and I find that while it is considered unprofessional to recommend a patent medicine, I can honestly recommend Lydia E. Pinkham's Vegetable Compound, for I have found that it cures female ills, where all other medicine fails. It is a grand medicine for sick women."

Money cannot buy such testimony as this—merit alone can produce such results, and the ablest specialists now agree that Lydia E. Pinkham's Vegetable Compound is the most universally successful remedy for all female diseases known to medicine.

When women are troubled with irregular, suppressed or painful periods, weakness, displacement or ulceration of the female organs, that bearing-down feeling, inflammation, backache, bloating (or flatulence), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excitability, irritability, Lydia E. Pinkham's Vegetable Compound

CENTREVILLE.

Mrs. McGill and Connors are doing a good business in Dry Goods line. Mr. John Clancy's teams are drawing sand to Enterprise.

The road in this vicinity are in a horrible state a new council seems to be necessary to deal with the matter.

Mr. Samuel Long has moved to Mr. Wm. McGill farm.

We are supposed to have good boys around Centreville since Rev. Mr. Scott is holding revival meetings.

Centreville lack now a new inspector to look after the hotels so that married men will go home in reasonable hours.

Mr. Chas. Whiton has rented his farm to Mr. John Dunn for five years.

Mr. Geo. McFarlan is still under the doctor's care, with not much improvements.

There is some talk of changing the mail carrier though our present carrier is all that could be desired.

Paints, Oils and Glass, Ready Mixed Paints, White Lead and Colors, Elephant Brand.

MADOLE & WILSON.

HARROWSMITH.

On March the 29th a very pretty wedding took place at Mr. A. Hughes' of this place when his daughter Myrtle was united in marriage to Mr. Percy Shibley, of Wilton. The bride looked charming in a beautiful dress of grey silk and carried a bouquet of carnations. Miss Gracie Hughes, sister of the bride acted as bridesmaid, while John Henderson did duty as groomsman. Only the immediate relatives of the bride and groom were present. The ceremony was performed by the Rev. Mr. Service, Methodist minister of this place. The groom's present to the bride was a gold locket and chain and to the bridesmaid a pearl pin, and to the groomsman a gold chain and charm.

After the ceremony was performed the bridal party sat down to a very sumptuous repast. The bride was the recipient of some beautiful presents. The happy couple took the train going north for Montreal and other places.

We all join in wishing them much happiness in their future home.

NEWBURGH.

Lenten services were held in St. John's Church last week.

Born on Saturday March 24th to Mr. and Mrs. John R. Sharpe, a daughter.

Master Ernie Finn is seriously ill with cerebro-meningitis.

The book committee of the public library selected the books to be purchased, and the new volumes will soon be placed on the library's shelves. It is hoped our citizens will rally to the support of this institution.

C. H. Finkle shipped a cushioned-tire run-about to Dr. H. E. Paul, Fort William, last week.

Harold Fairbairn is taking an engineering course in Montreal.

Simon Fitzmartin is laid up with a sprained ankle.

Miss Eda Grant is visiting her aunt, Mrs. D. E. Rose Tamworth.

Mr. Ryan shipped his safe to Galt to have a new door put on.

Mrs. Shorey spent a few days last week with her son, J. E. Shorey, Caniffon.

Rev. J. P. Mears is conducting special services at Strathcona.

Miss Anna Sutton and Miss Marion Sutton spent Tuesday with Mrs. D. A. Vallean, Nanaimo.

A cement floor is being placed in the cheese factory.

Mr. Robinson, employed in Finkle's carriage work, received the sad intelligence on Wednesday of the death of his sister Mrs. John Walker in Caniffon.

HOW TWO BEAUTIFUL WOMEN ESCAPED PELVIC CATARRH BY AID OF PE-RU-NA.

Female Weakness Is Usually Pelvic Catarrh. Pe-ru-na Cures Catarrh Wherever Located.

MRS. MABLE BRADFORD

Mrs. Mable Bradford, 13 Church street, Burlington, Vt., Secretary Whittier Oratorio Society, writes:

"Peruna is certainly a wonderful medicine for the ills of women. I have heard it spoken of in the highest praise by many, and certainly my experience is well worthy of a good word.

"I began to have severe pains across my back about a year ago, brought on by a cold, and each subsequent month brought me pain and distress.

"Your remedy was prescribed, and the way it acted upon my system was almost too good to be true. I certainly have regained my health and strength, and I no longer suffer periodical pains and extreme lassitude."—Mable Bradford.

Thousands of Women Cured Every Year by Correspondence—This Is What Dr. Hartman Proposes to Do For You Without Charge.

Women who suffer should read the evidences presented here. We have thousands of letters from grateful friends who tell the same story.

Half the ills that are peculiarly woman's own are of a catarrhal character. Female weakness was not understood for many years.

Dr. Hartman deserves the credit of having determined its real character. He has made catarrh and catarrhal

diseases, including pelvic catarrh a life long study. Peruna cures catarrh, whether of the pelvic organs or any other organ of the human body.

Pe-ru-na, a Natural Beautifier.

Peruna produces clean, mucous membranes, the basis of facial symmetry and a perfect complexion.

The women have not been slow to discover that a course of Peruna will do more toward restoring youthful beauty than all the devices known to science.

Many a girl has regained her faded beauty, many a matron has lengthened the days of her comely appearance by using Peruna.

Mrs. Lizzie Redding, 3134 B Clifton Place, St. Louis, Mo., writes:

"I found after trying many different medicines to restore me to health, that Peruna was the only thing which could be depended upon. I began taking it when I was in a decline, induced by female weakness and overwrought nerves.

"I began to feel stronger during the first week I took Peruna and my health improved daily until now I am in perfect health and enjoy life as I never did before."—Lizzie Redding.

MRS. LIZZIE REDDING

In Peruna these women find a prompt and permanent cure.

Thousands of testimonials to this effect are received by Dr. Hartman every year. The good that Peruna has accomplished in this class of cases can scarcely be over-estimated.

If you do not derive a simple and satisfactory result from the use of Peruna, write at once to Dr. Hartman, give a full statement of your case, and he will be pleased to give you a special treatment.

Address: Dr. Hartman, President of The American Sanitarium, Columbus, Ohio. All correspondence held confidential.

A MOHAMMEDAN FUNERAL.

Ceremonies With Which a Body Is Consigned to the Grave.

When the life of a Mohammedan is ebbing away a distinguished reader of the Koran is summoned to recite aloud its chapter on the resurrection, so that the spirit of the person, on hearing it, may have an easy death. The Mohammedan believes that the vital principles of the whole system are concentrated in the head, when death is the result. The watchers at the bedside also read some passages, and then a drink of short is given to the pa-

usual demands, looked puzzled. Made Krudner would smile graciously and pity them for their ignorance of the new novel, thus turning them all into eager readers of "Valerie." Then, laden with purchases, she would drive off to another shop, pretending to search for that which existed only in her imagination. Thanks to these maneuvers, she succeeded in exciting such ardent competition in honor of her heroine that for a week at least the shops sold everything "a la Valerie." Her own friends, the innocent accomplices in her stratagem, also visit-

Milan, and one day in the year 1854 his neighbors found him lying dead among a confused heap of Cremonas. The old man had amassed a collection of some 250 instruments, the result of a thirty years' "hunt," and, although he had started life a penniless carpenter, he died worth about £12,000.—Cornhill.

Arctic Mosquitoes.

The presence of mosquitoes in myriads within the bare, uninhabited arctic circle is surely in some degree a mystery. The mosquito is a blood-sucker, but in these unvisited plains he is for the most part, and of strict

cheese factory.

Mr. Robinson, employed in Pinkley's carriage work, received the sad intelligence on Wednesday of the death of his sister Mrs. John Walker in Cannifton.

A Sure Sign.

The honeymoon may very properly be said to be over when the wife suggests to her husband that he'd better have his trousers pressed by a tailor.—Detroit Free Press.

In Methuselah's Time.

Kind Old Lady—What ails the baby? He looks healthy, I'm sure. The Nurse—Oh, he is, the little dear! But he's peevish today on account of cutting his whiskers.

A small teaspoonful of powdered gum arabic, with the same amount of glycerin, stirred into a tumblerful of cold water and drunk slowly, will often work wonders in quenching thirst.

ED NURSE

ice, Advises Women in
their Health.

nervousness, sleeplessness, melancholy, "all-gone" and "want-to-be-left-alone" feelings, blues and hopelessness, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound at once removes such troubles.

No other female medicine in the world has received such widespread and unqualified endorsement.

The needless suffering of women from diseases peculiar to their sex is terrible to see. The money which they pay to doctors who do not help them is an enormous waste. The pain is cured and the money is saved by Lydia E. Pinkham's Vegetable Compound.

It is well for women who are ill to write Mrs. Pinkham, Lynn, Mass., The present Mrs. Pinkham is the daughter-in-law of Lydia E. Pinkham, her assistant for many years before her decease, and for twenty-five years since her advice has been freely given to sick women. In her great experience, which covers many years, she has probably had to deal with dozens of cases just like yours. Her advice is strictly confidential.

Sound Succeeds where Others Fail.

hammedan believes that the vital principles of the whole system are concentrated in the head, when death is the result. The watchers at the bedside also read some passages, and then a drink of sherbet is given to the patient to lessen the pangs of death. As soon as the spark of life has fled, the two great toes are tied together with a thin strip of cloth, the mouth is closed, and incense is burned near the body.

The internment follows a few hours after death. The "washers" are men and women who wash and shroud the body and dig a hole in the earth to hold the water, so that it cannot spread very much, as it is considered unlucky to tread on this water. The washing is a great ceremony, and when finished the body is shrouded with even more ceremony. If there is a widow of the deceased, she returns the dowry her husband had given her. If the deceased's mother is present, she says, "The milk with which I suckled thee I freely bestow upon thee." Thus she resigns the debt of the deceased to her. When flowers have been placed on the body it is carried to the grave on a bier or, if the relatives can afford it, in a coffin. At the grave four creeds are recited, and the body, with the head to the north and the face looking toward Mecca, is laid on its back in its tomb. The grave is about seven feet long for both sexes, but the depth for a man is measured by the distance between his feet and chest; for a woman, between her feet and waist. If the body is too long for the grave, it is believed that the deceased must have been a great sinner.

Before the body is covered the Mohammedan takes a little earth and, throwing it into the grave, says, "We created you of earth, and we return you to the earth, and we shall raise you out of the earth on the day of resurrection." Then a mound is built to keep the earth in the grave from eroding the body, and water is sprinkled on it in three lines. Special prayers for the safe voyage of the deceased are offered after the burial. As in the case of a Hindoo funeral, the poor are not forgotten, both remembering the needy by distributing money, salt, rice and wheat among them after the funeral.

ADVERTISING A BOOK.

How the Author of "Valerie" Captured Parisians Long Ago.

We had some notes a little while ago on the methods which some authors have adopted for the advertisement of their books. A correspondent sends us an example of this sort of thing, which is the better worth quoting because we have never seen it quoted in this connection before. It is taken from a life of Mme. de Krudner, whose novel "Valerie" appeared shortly after Mme. de Staël's "Delphine." "You know quite well," the author wrote to a friend, "that neither talent nor genius nor the excellence of one's intentions is sufficient to insure a success. Everything demands some charlatanism." And the biographer proceeds to tell us how she translated her doctrine into action.

During several days, he writes, she made the round of the fashionable shops incognito, asking sometimes for shawls, sometimes for hats, feathers, wreaths or ribbons, all "à la Valerie." When they saw this beautiful and elegant stranger step out of her carriage with an air of assurance and ask for fancy articles which she invented on the spur of the moment the shopkeepers were seized with a polite desire to satisfy her by any means in their power. Moreover, the lady would soon pretend to recognize the article she had asked for. And if the unfortunate shopgirls, taken aback by such un-

hivers, she succeeded in exciting such ardent competition in honor of her heroine that for a week at least the shops sold everything "à la Valerie." Her own friends, the innocent accomplices in her stratagem, also visited shops on her recommendation, thus carrying the fame of her book through the Faubourg Saint-Germain and the Chaussee d'Antin.—London Academy.

HUNTING VIOLINS.

Tariso Was Found Dead Surrounded by Valuable Instruments.

Violin makers now and again come upon pieces of wood of phenomenal resonance and beauty, and when they do we may be sure they give special care to the making and finishing of the instrument formed of the wood. Stradivarius, at any rate, did. In 1716 he had a piece of luck in this particular, and his luck went into an instrument with which he fell so much in love that he absolutely refused to sell it or allow it to be played upon by any hands but his own. He kept it locked up, and when he died at the advanced age of ninety-three he bequeathed it to his sons. By and by an enthusiastic collector named Salabue got on the scent of this instrument, and about the year 1760 he acquired it—at what figure is not known—from one of the great man's sons.

Salabue cherished it until his death, about 1827, and then a strange character appears on the scene as purchaser. This was an eccentric old fellow named Luigi Tariso, who, abandoning his trade as carpenter, had started collecting old violins and was now searching in every nook and corner of Italy for the treasures of Cremona. He could neither read nor write, this enthusiastic collector, but he could tell a valuable fiddle the moment he saw it, and he estimated the worth of the Salabue "Strad" so well that after he had acquired it he kept it to himself with all the loving care that its maker had already shown for it. Tariso lived entirely alone in a wretched garret in

The presence of mosquitoes in myriads within the bare, uninhabited arctic circle is surely in some degree a mystery. The mosquito is a blood-sucker, but in these unvisited plains he is for the most part, and of strict necessity, a vegetarian. A few birds excepted (and the birds are furnished with impervious feathers), there is no local life whatever. The Lapp in summer drives his reindeer to the sea, and no native crosses the field if he can help it. Yet in this region, "seemingly the most unsuitable for its effective working," the mosquito flourishes, "a primeval and enduring curse, inexplicably developed to its utmost."—London Chronicle.

Land of Surprises.

New Zealand is not exactly contiguous to or a part of Australia, as many seem to imagine, there being a slight difference of some 1,700 miles between them. Things go by contraries in the "land of the kangaroo." The farther north you travel the hotter it is—125 degrees in the shade in Queensland. Lignum vitae, which sinks in other waters, floats in Australian wafers. The Christmas dinner is eaten in Melbourne and Sydney when it is over 100 degrees in the shade.

What You Do.

Where you are is of no moment, but only what you are doing there. It is not the place that ennobles you, but you the place, and this is only by doing that which is noble.—Home Notes.

"Let the GOLD DUST TWINS do your work"

"Your Servants, Madam!"

The Gold Dust Twins are always ready to work; they are certainly artists in the cleaning line. There's nothing cleanable which

Gold Dust Washing Powder

will not clean—and do it better, more quickly and more economically than anything else can. You are not serving your best interests if you're trying to keep house without GOLD DUST.

OTHER GENERAL USES FOR GOLD DUST | Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil cloth, silverware and tinware, polishing brass work, cleansing bath room, pipes, etc., and making the finest soft soap.

Made by THE N. K. FAIRBANK COMPANY, Montreal, P. Q.—Makers of FAIRY SOAP.

GOLD DUST makes hard water soft

DON'T WORRY OVER DOCTRINES

Find That Which Is Good, That Which Is Worth Holding Fast.

Prove all things; hold fast that which is good.—1. Thess. v., 21.

He who does not doubt is damned. Intellectually and morally nothing is possessed until it is put to the proof. If you do not test things for yourself they will be tested for you by adversity and necessity. There is no virtue in taking things for granted. There is a greater reason for putting the things of religion to the test since it is to take the supreme place in the life.

Doubt is not disbelief; it is not rejection without examination. Neither should it be the habitual dwelling in a fog of uncertainty. It is inquiry and examination; it is the mental process through which all things must pass; it is a road that leads to faith. It is the attitude of mind that says: "I have been endowed with reasoning powers; it were an irreligious act to refuse to use them on all things."

The man who is too indolent to investigate, too impoverished of intellect to examine doctrines and philosophies, to appreciate truth and eradicate error—that man finds it easy and convenient to exercise his credulity and call it faith. To him it is a reprehensible thing to unsettle established beliefs, for it means that they must be carefully reconstructed and this involves

UNNECESSARY LABOR.

If he wants peace a man would better steal a kingdom than breathe one word against the petrified formulas of the fathers. No offence can be greater than that of disturbing them and causing them to do their thinking all over again. To them their creed is a key to unlock the gate of heaven; to change its shape in the minutest degree would be to destroy its usefulness, and even to inquire whether there might not be another key is to manifest the depravity of one who would enter in as a burglar.

All discoverers have been doubters. They have refused to accept the last word of the stay-at-homes as to what might be abroad. Their doubt led to faith, a faith so strong and sublime that it compelled them to leave ease and face hardship, to forsake friends and face

loneliness and hatred. Often the bravest of all men is he who confronts ancient opinion with the sword of an interrogation.

The only doubts we need to dread are those of the professional doubter, the man who seeks darkness rather than light, or the man who delights in erecting intellectual stumbling blocks that he may show how easily he vaults them. Sometimes it would seem as though the religious world were divided into two parties—those who hope for salvation by blindly believing everything and those who seek fame by blatantly denying all things.

But between the two there is the course of the sane man who uses the reasoning power he has, who doubts all things only that he may prove them, that good may be thrashed

FROM BAD AND WORTHLESS.

To him doubt is a path and not a terminus, a method and not a product; he comes at last, through the testing of doubt, to certainty, to faith founded on facts.

The wise man leaves many perplexing problems to themselves. There are difficulties not worth the solving, mere matters of idle speculation, becoming diminutive beside real duties. There are difficulties which, when laid away, like a tangled skein, seem to unravel themselves. Problems of history and of speculation come to have little weight as compared with the proving of the daily questions of present duty.

The great thing is to find that which is good, that which is worth holding fast; and that is found not by speculative inquiry, but by plain doing of the best we know. Don't worry over doctrines. Do the deeds of the best life. If there are things you cannot believe, forget them; go right on with the business of building the life on the things that are good, on the lines laid down by the life that ever has been the light of men. The practice of his precepts leads to the possession of his principles. With these at base life comes out of the shifting uncertainty and takes on form, order, and meaning, and finds enduring firmness.

THE S. S. LESSON

INTERNATIONAL LESSON,
APRIL 8.

Lesson II. Jesus and the Sabbath.
Golden Text: Exodus 20:8.

LESSON WORD STUDIES.

Note.—These Word Studies are based on the text of the Revised Version.

The Lord's Day.—The Lord's Day, or Christian Sunday, was not intended from the first to be a substitute for the Jewish Sabbath. Sacred in the thought and memory of the apostles and their successors as the day on which Jesus had risen from the dead, it was consecrated almost from the time of the resurrection as a day on which the disciples gathered together, for the purpose of worship and for the breaking of bread. But as a matter of fact, the Jewish Sabbath also was observed for a long time after Christ, even in Christian circles, the two days being clearly distinguished from each other down to about the close of the third century after Christ. Gradually the observance of

Accuse him—Before the ecclesiastical authorities for false teaching.

11. In the other synoptical gospels the argument of this verse is slightly different. "Is it lawful to do good on the Sabbath days, or to do evil? to save life or to kill?" Matthew here states the argument as it bears specially on the Jewish law (comp. also Luke 14: 5).

14. Took counsel against him—Mark mentions the fact that the Herodians joined the Pharisees in this council (comp. Mark 3: 6-12. Luke 6: 11.)

Destroy him—Destroy not only his influence, but his life—that is, get rid of him.

THE DISHWASHING GAME.

On Monday, before I go to school, I wash the dishes—it's mother's rule, So Bridget can sort the clothes. To help me get them quickly done, I've made up a game that's lots of fun.

THE STORY OF NICKEL

FROM THE ROAST YARD TO THE FURNACE OF THE SMELTER.

Average of a Thousand Tons of Ore a Day Are Melted Down 365 Days in the Year.

IV.

In the last letter the nickel ore was traced from the Creighton mine to the roast yards at Copper Cliff. The only evidence of life in this dismal region is furnished by a string of large gondola cars alongside of which a great steam-shovel is at work. At first sight this looks not unlike some prehistoric monster as it buries its nose in the ore bed, withdraws it again, champs its gigantic jaws as if sampling a morsel, grovels in the ore again, emerges with a mouthful of four tons or so of ore, which it deposits in the waiting car. The ore by this time is burned to a charred cinder.

Let us follow a train of ore from the roast yards and see what becomes of it. The last car is filled. The brakeman gives the signal. You climb up beside the engineer, by special permission. The air is filled with sulphur smoke. It gets into your eyes, your nose, your throat, your lungs. The engineer notices that you are a tenderfoot, and that the conditions are new to you. "If you fold your handkerchief over your mouth, hold your nose and breathe through the handkerchief," he tells you, "you will be all right." You take his advice, and find that he knows what he is talking about. A few minutes brings you out of the smoke of the roast yards to the side track which leads to the smelter.

The smelter stands on the edge of a hillside, about fifty feet above the lowland. It is an

IMMENSE WHITE BUILDING

700 feet long, and perhaps 70 feet high. At a distance it appears to be built of marble or white stone. A nearer approach shows that it is constructed of wood covered with asbestos board. As the train reaches the building we find ourselves on a trestle beneath which yawn huge pockets over which the train comes to a standstill. The engine feels its way carefully into the proper place over the bins which are marked by numbers over the wall. The brakemen operate levers by means of which the bottom appears to drop out of the train, and the load is discharged into the bins below. It takes but a short time to unload several hundred tons.

Let us go down to the stairway leading from the top of the building, and see what next becomes of the ore. From each end of the long building a covered structure curves away in an immense oval suggesting a race-track. This curved shed covers two lines of trolley track. As you watch a train of ore cars rattles into view, the motorman clanging his gong incessantly as he approaches. Behind the motor trail a dozen hopper-shaped cars holding three to four tons apiece. The cars come to a stop under the ore bins, men operate levers which open the bottoms of the bins, and soon the cars were loaded with the ore which we had just seen brought in from the roast yards. The little train moves again, stops beneath a coke bin, receives a load from there, and off again to pick up a car or two of white quartz rock. Then off to the scale house, where each car is weighed in turn. When the signal is given from the weigh-house that the proper weight of ore, rock and coke have been adjusted, the bell clangs again and away the train rattles around the curve to the furnace.

WE FOLLOW.

On either side the curving walls of the trolley way we notice hydrants and coils of fire hose. Warnings in French and English, to beware of the trolley wire, which, indeed, is only a few feet above our head, are freely scattered about. Here passes a man with a mop

Your guide informs you that brick alone would never stand the heat that is required night and day, 365 days in the year, in these furnaces. "Brick alone would melt down, just as the ore does; so the walls of these furnaces are really nothing but water. The iron plates that form the frames of the furnaces are barely half an inch in thickness. Left to themselves they would melt in a minute. But if we take two iron plates and place them three or four inches apart, fill the space between with water, and keep that water in circulation, then we can keep the plates from melting, and so build a furnace in which the molten metal is confined by water. Thus we get what is known as the water jacket furnace." The story of the smelting will be continued in the next paper.

IN THE BRITISH HOUSE

PAYMENT OF MEMBERS AND CHANGE OF HOURS.

An Indemnity in Parliament Was Once Paid by the Constituencies.

Startling innovations are impending at Westminster, where the overwhelming vote cast by the House of Commons in favor of the payment of a salary to its members has been followed by a demand for the removal of the brass grating which shuts off the occupants of the ladies' gallery from the view of all others in the Lower House, while a movement is now in progress which has for its object the change of the hours of the session from the evening and night to the morning and early afternoons. England's Parliament, the parent of all Legislatures now in existence, is invested both by history and by popular sentiment with as many associations of the hoary past as the venerable Abbey of Westminster nearby, writes a London correspondent.

All the laws both written and unwritten, by which its procedure is governed, are relics of olden times, dating in some cases back many hundreds of years. There always has been reluctance on the part not only of Parliament itself, but also of the people at large, to introduce any innovations, the suggestions of which were regarded in much the same sacreligious light as those of the most modern restorations of the grandest masterpieces of art and architecture of the middle ages. The new democracy, however, in England, as in other countries, is disposed to look at matters from a utilitarian and matter of fact point of view.

FORMERLY PAID THEM.

That the practice of paying salaries to members of the House of Commons formerly existed is apparent from an entry in the famous diary of Samuel Pepys in which he states "all concluded the bane of Parliament hath been the leaving off of the old custom of the places allowing wages to those that served them in Parliament, by which they chose men that understood their business and would attend it, and they could expect an account from which now they cannot, and so Parliament has become a company of men unable to give account for the interests of the place they serve for."

Moreover, Lord Campbell, the eminent jurist and Lord Chancellor, in his "Lives of the Lord Chancellors," has placed it on record that according to laws which stand unrepealed to this day members are entitled to recover wages from their constituents for their attendance in Parliament.

LATE HOURS KEPT.

By degrees the various constituencies, with the object of saving money, adopted the practice of selecting as their representatives in Parliament territorial magnates and rich men willing to serve in the House of Commons without re-

Resurrection as a day on which the disciples gathered together, for the purpose of worship and for the breaking of bread. But as a matter of fact, the Jewish Sabbath also was observed for a long time after Christ, even in Christian circles, the two days being clearly distinguished from each other down to about the close of the third century after Christ. Gradually the observance of the Jewish Sabbath fell into disuse among the Christians, while at the same time the sacredness of the Lord's Day increased to them. It is not quite accurate therefore to consider the Christian Sunday to have been intentionally substituted for the Jewish Sabbath. Rather must we consider the latter to have been abolished in the Christian church and the Lord's day to have been given the preference as a day of rest and worship. As one commentator puts it: "The observance of the first day of the week is an analogous institution (analogous to the Jewish Sabbath which had been abolished), based on the consecration of that day by our Lord's Resurrection, sanctioned by apostolic usage, and accepted by the early church,—the day being set apart for similar objects—rest from labor and the service of God,—in a manner consonant with the higher and more spiritual teachings of Christ, and to be observed in the spirit of loyal Christian freedom, rather than by obedience to a system of precise statutes." It is necessary to hold these facts continually in mind in order to appreciate the true significance of the Christian Sunday and its actual relation, which is that of similarity only, to the Jewish or Old Testament Sabbath.

Verse 1. The sabbath day.—It was the Jewish Sabbath or seventh day of the week on which Jesus with his disciples went through the grain fields. These were not in those days as now in many places of our own land separated from each other by strong fences, but simply, if at all, by small footpaths. Sometimes these paths went through the centre of the grain fields also.

Ears.—Heads of wheat and barley.
2. That which is not lawful.—The crushing of heads of grain in the hand to separate the grain from the hull or chaff surrounding it was interpreted as being a form of harvesting and threshing, and therefore was unlawful on the Sabbath day.

What David did.—In Sam. 21. 1-7, we find an account of the incident in David's life here referred to. David in fleeing before King Saul came to Nob to Ahimelech the priest, who gave to him and his furnished companions the showbread which was considered sacred and was eaten ordinarily by no one save the priests who officiated in the tabernacle.

3. Showbread.—Literally, the bread of setting forth, so called from being set forth in the sanctuary, called also consecrated bread because perpetually kept in the sanctuary before the Lord. Twelve loaves or cakes placed in two piles on the table of showbread each Sabbath day (Lev. 24. 5, 6; Ex. 25. 30; Lev. 24. 6-8).

4. Profane the Sabbath.—By the labor necessarily connected with their duties in the sanctuary. Among these were the removing of the showbread, the preparing the fire for the sacrifice and officiating at the regular temple services. In these cases, Jesus points out, Sabbath labor was not only countenanced by the law, but actually commanded.

5. One greater than the temple.—Note the exalted claims of Christ involved in this statement.

7. I desire mercy . . . and not sacrifice.—Quoted from Hosea, 6. 6, and quoted again by Matthew in chapter 9. 13. The law rightly understood is an expression not of God's severity but of his love to man. This being true, the law itself is subject to modification in higher manifestations of God's love. Such a higher manifestation was the satisfying of the hunger of David, and in this case that of the disciples. In both cases this involved a setting aside of the law itself, or at least of the law as commonly interpreted by the religious teachers of the time.

8. Son of Man.—A title used by Jesus of himself as the typical or representative member of the human race.

10. Withered hand.—A paralyzed hand which had withered away because of disease.

THE DISHWASHING GAME.
On Monday, before I go to school,
I wash the dishes—it's mother's rule,
So Bridget can sort the clo'es.
To help me get them quickly done,
I've made up a game that's lots of fun,
And here is the way it goes:

The forks are voyagers, and their wives
Are the tablespoons and the silver
knives;

The teaspoons are babies wee;
Each plate, saucer and cup's a boat
In which from the dish-pan port they
float—

They're shipwrecked when out at sea.

The soap-sud breakers dash fierce and
high.
But all hands are saved and rubbed till
dry;

The wrecks are towed into shore;
In closet harbor they safely stay
Till sailing date on another day.
They bravely embark once more.

And washing dishes in this way
Is nothing but fun. And I always say—
And mother agrees with me—
"If work's on hand it's a splendid plan
To do it in the jolliest way you can."
Just try it yourself and see.

THE LETTERS MOTHER SENT.

It was a rainy day and the children were lonely. Bobby had drawn his little cart up by the fire, and sat looking into the flames, wondering if the feeling he had was what sister called "homesick." It seemed queer if one could have it right in one's own home. Molly was drumming on the window-pane, and there was no doubt in her mind about the matter; she knew it was homesick. The boys, Tom and Ned, were in the woodshed, whistling out a boat for Bobby. They did not seem to mind.

The reason for this cloud on the house was that mother had gone away, and would not return until the next day. At first they had amused themselves by saying, "Now she has reached the station." "Now she has stepped into the train," and after a long time and much discussion, "She is at grandma's now." Somehow when they reached this point in the journey this strange loneliness had settled on the house. They knew she would be back the next day; but that was to-morrow—and to-day it was raining.

When this moment of the afternoon had come and the shadows were getting a little longer, Molly saw the postman coming up the walk. She almost flew to the door, although she thought it could not be possible mother had written a letter!

"Here are letters enough for two postmen," said the man, fumbling the pile he had in his hand and counting off five letters. "I guess you can find out who they are for."

Molly took the letters and began to jump up and down in delight. "Run and call the boys," she told Bobby, and he hurried away as fast as his fat little legs could carry him.

Soon they were all seated by the fire. And what do you think they found?

Each envelope bore the address in the lower corner, but at the top was a photograph of one for whom the letter was intended. There was a picture of Bobby drawing his cart across the lawn. There was one of Molly standing by the greenhouse. The boys were taken coming through the gate; Ned's letter showed him tossing his cap, while Tom's picture looked as if he were walking right down the envelope. There was one of nurse holding a tray of cakes. Molly ran to call her in.

Mother had made snap-shots of them long before, when they had not even guessed it, and had made the plans to surprise them while she was away. Somehow, it took away all the loneliness to find that mother had realized just how it would be, and that her love had looked forward to this very minute, when they would need the letters so much. And then it came out that nurse was in the secret, for while they were reading the letters and looking at the picture the door opened, and there she stood with the tray of cakes, looking just like her photograph.

WE FOLLOW.

On either side the curving walls of the trolley way we notice hydrants and coils of fire hose. Warnings in French and English, to beware of the trolley wire, which, indeed, is only a few feet above our head, are freely scattered about. Here passes a man with a mop and pail. "That chap," your guide tells you, "does nothing all day but clean windows." But what has the cleaning of windows to do with the metallurgy? you are tempted to ask. You are informed that if a place is allowed to look dirty men are likely to become careless in their attendance on the furnaces, and a furnace is as critical about attendance as a society dame. Here are two men with ladders who do nothing year in and year out but paint the building and attend to broken glass. These things may look trivial to you, but you will notice that the floor is kept as clean as it is possible to keep it. And you will notice too that the men seem to take a certain pride in keeping up the appearance of things, all of which means good work, and good work pays.

But here are the furnaces. There is little to be seen except two brick stacks, about 18 feet long and 8 thick, on either side of which iron doors hang down to the floor. At one end a peephole admits a view of the interior. A few feet down from the floor on which we are standing we see a dull black mass, from which lambent flames, blue, purple, and violet, rise and flicker. There is little to indicate the tremendous activities below. The ore train, which has preceded us, stands at one side of the furnace. As you watch a man turns a valve, the iron door at the side of the furnace rises slowly, revealing the cavernous maw of the pit. The men spring to one side of the ore train, and tilt over a car, out of which the

COKE POURS IN A STREAM.

which, as the car moves along, is spread from end to end of the furnace. A car of quartz, spread along in the same way, follows the coke.

"What is the meaning of this?" you ask.

Your guide proceeds to enlighten you. "You see, this ore has plenty of iron, but very little rock in it. If we were to melt it without the quartz we would get what we call a 'bad slag.' That is to say, the rock which is in the ore would melt and form a thick, pasty metal, which would hold up and retain a large percentage of the nickel and copper which we are trying to get out. In order to make this slag thin and fluid so that it will not hold up the metals, we have to add the barren quartz which comes from the quarry at Naughton, nine miles away."

After the quartz has been put in the brickmen dump in the ore—four cars of ore, each carrying 3,000 pounds, of 12,000 in all, at each charge. Each furnace takes about 400 tons of ore a day. With this ore goes into the furnace again a lot of rich metal which has already gone through once. So that the total daily charge for both furnaces is about 1,000 tons. To melt down this immense mass the furnaces require about 120 tons of coke a day, worth about \$700 dollars. When you realize what \$700 a day for coke alone means you will begin to form some idea of the extent of the operations.

Let us now go down to the lower floor and see what becomes of all this mass that has been poured into the furnace. As we go down we see the furnace platform, a solid brick and stone construction

ABOUT TEN FEET HIGH.

On this stand the two furnaces. A third is approaching completion, and no doubt is completed as this article appears. Curiously enough there is no sign of heat, except where at one end of each furnace a stream of molten metal about the size of a man's arm pours forth in a dense orange cascade into a brick-lined iron tank about sixteen feet in diameter. Icicles hang in stalactites from the corners of the furnaces which are exposed to the chill winds that sweep in through the open ends of the building.

"What is all that water doing here?" you ask.

from their constituents for their attendance in Parliament.

LATE HOURS KEPT.

By degrees the various constituencies, with the object of saving money, adopted the practice of selecting as their representatives in Parliament territorial magnates and rich men willing to serve in the House of Commons without remuneration and to bear all the expenses in connection with the representation and the maintenance of the dignity of the office.

It was only natural that a house thus composed, and receiving no remuneration for its services, should suit its own convenience rather than public interest in the selection of the hours for the sittings, and thus it came that after spending the small hours of the morning in gambling and carousing, the members were naturally disinclined to rise ere the afternoon, and parliament, in lieu of meeting in the morning, found it impossible to assemble for business ere 4 or 5 in the afternoon. Another drawback of the mode of life led by the British legislators of the seventeenth and eighteenth centuries was that, frequently embarrassed by reason of their losses at cards, and no longer in receipt of the stipend which, according to the law of the land, should have been paid to them by their constituencies, they became an easy prey to the temptations of bribery, which attained absolutely fantastic proportions.

WEALTHY MEMBERS.

So outrageous had the condition of affairs in that respect become that the House at length was compelled in deference to popular clamor to enact drastic reforms in the matter of corrupt practices, and the legislation which rendered a seat in the House of Commons immeasurably less profitable than when the Walpoles, for instance, were at the head of the government, brought into Parliament a new class of legislation, namely, those with professional callings and rich merchants and manufacturers. To these men, who had their own business to attend to during the day time, the evening sessions of parliament were the most convenient, being, indeed, the only time that they could spare to devote to the affairs of the nation without pay.

Parnell in a way revived the pay system by granting the Irish members a salary from the Home Rule fund. Labor members also now receive allowances from their unions.

WANT TREASURY TO PAY.

What Parliament voted the other day by a majority of 238 was that salaries should be paid to its members not by the constituencies, but by the national treasury, and before this vote can become law the question of the responsibility of the constituencies in the matter will have to be determined by the legal advisers of the crown. The members would, of course, vastly prefer to place the obligations upon the exchequer to imposing them upon their constituencies. For not only would any demand upon the purses of the electors render them unpopular with the latter, but the constituencies could not, if the old time laws were invoked, be compelled to pay more than the medieval rate of 5 shillings a day, which would, of course, be entirely inadequate.

WOULD EXPERIMENT.

"Eating a large portion of roast pork, sausage and suetkraut at this time of night? Won't that upset your stomach?" "Can't tell you that till to-morrow."

FALLS IN REAL DANGER

TO SAVE THEM PROMPT ACTION
MUST BE TAKEN.

Waterways Commission Presents Re-
port — Privileges Already
Granted.

If Niagara Falls is to be preserved as one of the wonders of the world, immediate action by the United States and Canada is required, according to the findings of the American members of the International Waterways Commission, which has for the past year been studying the conditions at the Falls and in the tributary great lakes. This report is signed by General O. H. Ernst, chairman, and the other American members of the commission.

After a brief description of the physical conditions, the report gives a detailed account of all the corporations now engaged in the development of power, with the quantities of water which they are actually using, amounts they are preparing to use, and the amounts which they are authorized under their charters to use. It includes not only corporations taking water directly from the Niagara river, but also those drawing water for power purposes from the Erie canal and the Welland canal; also the Chicago Drainage canal, and also furnishes a list of all franchises granted and not perfected.

WILL DESTROY FALLS.

The report says: "The total quantity of water taken from the river by works now authorized is 60,900 cubic feet per second. Of that amount 26,700 cubic feet is to be taken on the American side, and the remainder, 34,200 cubic feet on the Canadian side. That is 27 per cent. of the average discharge and 33 per cent. of the low water discharge of the Niagara river will cease to pass over the Falls when these works are completed and in full operation. The quantity to be diverted is more than double the quantity which now passes over the American fall, which at the average stage is about 37,800 cubic feet. That this will in general have an injurious effect upon the falls seems self-evident. The volume of water to be diverted is about the equivalent of the entire discharge of Lake Superior over the Sault Ste. Marie. The amount thus far actually diverted is but 17,800 cubic feet per second, and has had an appreciable effect upon the Falls.

WILL AFFECT HORSESHOE FALLS.

"To fortify any accuracy the effects in detail of the full diversion authorized would require a more complete knowledge of the bed of the river than is now obtainable. The water taken on the Canadian side below the crest of the rapids will affect the Horseshoe Fall alone if all the water taken on the American side should affect the American fall alone it would practically leave it dry; but it seems probable that only a part of this diversion will be at the expense of the American fall. Exactly what portion that will be cannot be stated with precision, but from a study of the channels and reefs so far as they are known, a reasonable estimate is that the water will come from the two arms in about the proportion of one-sixth from the American fall and five-sixths from the Horseshoe Fall. Exactly what form the changes in the two cataracts will take, whether they will be made narrower or broken up into greater number of streams, or simply be reduced in volume, retaining in general their present form, cannot now be foretold, for the reason that there is no accurate knowledge of the forms of and depth of water on the crests.

LOSS IS IMPORTANT.

"If 60,900 cubic feet per second be diverted the loss will be important, but if the diversion be limited to this amount or receded as hereafter indicated, it may not prove disastrous. This cannot be definitely determined until the works now under construction have been completed and put in operation.

to a large extent transmitted to and used in the United States. In the negotiation of a treaty, however, the point should be considered.

CANADIANS AGREED.

"The substance of this report was submitted to our Canadian colleagues before the passage of the joint resolution, with a view to uniting in a joint report under the general law providing for the commission. There was a substantial agreement in the statement of facts, and such differences as developed with respect to their accommodations which ought to be made, did not seem insuperable, but our colleagues desired time for further consideration. We have no doubt of their sympathetic interest in carrying out that part of the instructions contained in the resolution with the members of said commission representing the Dominion of Canada, if practicable, all possible efforts for the preservation of Niagara Falls in their natural condition."

and Conflict With Foreign
Ambitions.

The history of the British colony of Northern Nigeria, where a small garrison of native troops officered by Englishmen is reported to have been massacred by tribesmen of Sokoto, is one of continual trouble with the natives, of repeated military expeditions for the suppression of risings and the abolition of savagery and barbarous native customs and practices. Many white men have met their death in the pursuit of these objects. Some have been killed in fights with natives; others have been massacred during sudden risings of tribesmen at distant outposts; while still more have fallen victims to the terribly trying climate.

The establishment of a British protectorate over the extensive territories of Northern Nigeria dates only from 1899, when the country was taken over by the Government from the Royal Niger Company, which had held a charter since 1886. The charter was obtained after years of hard work by Sir George Taubman Goldie, who in 1877 visited the Niger, and found that no lasting advance either in commerce or civilization was possible unless some government were established which would give peace and security both to natives and to white men.

RACE FOR TERRITORY.

Sir George Goldie, by keen competition, lavish presents to native chiefs, and the increase of his staff and garrisons, caused the disappearance from the Niger of French influence, which had been growing rapidly and, but for the efforts of Sir George, would undoubtedly have resulted in the establishment of a French protectorate.

In 1885 a German explorer, Herr Flapfel, set out with a great expedition to Sokoto and Gando to secure treaties with the chiefs. He was, however, anticipated by the British company, who sent out Mr. Thompson and concluded treaties with the powerful Emirs before the German emissary arrived on the scene. The next difficulty was to secure the delimitation of the boundary between Nigeria and the German Cameroons, but the energetic Sir George succeeded in getting this done.

Ten years of pioneer work followed. Inter-tribal wars had to be put down, slave-trading suppressed, pagan sacrifices stopped, and other abominations wiped out. All this time the efforts of the British colonizers were handicapped by the rivalry of the French, who, by means of semi-military expeditions, were attempting to extend the boundaries of the French Sudan. But Sir George and his able lieutenants checkmated their designs, and finally obtained the proper

Fashion Notes.

FABRICS FOR COMING GOWNS.

Burlingham silk will be chosen for street and other simple gowns, especially in the early spring. This silk is firm enough to make into the fashionable circular skirt, but since the tendency of these skirts is to sag, it is well to allow them to hang for at least a week before finishing or trimming. Very little trimming is used on Burlingham silk gowns. The fabric is rough and permits little decoration beyond folds or shirred bands of the material, tucks, and occasionally soutache braid of a matching color. The heavy laces combine well with this silk.

A LIGHTER SILK.

Rajah is a much lighter silk, approximating to the finer pongees, yet having a rougher surface. This is a silk which permits of all kinds of manipulation, and gowns and coats made of it may be as elaborate as one chooses. This silk is the one of all colors preferred for evening coats and wraps. Both Rajah and Burlingham are admired as much for their exquisite coloring as for their texture. The irregularity of the weaving serves to catch the light and gives the silk a brilliancy which is most attractive.

RADIUM SILK.

Radium silk has a beautiful successor in chiffon mignon, a diaphanous material fit for the handsomest evening gowns. Not that radium has been retired, for it has not by any means. It will be worn a great deal, made into afternoon and calling gowns. Another silk which holds over in an improved form is Lansdowne, which is really silk and wool, but has the appearance of soft silk. It is so light and lends itself so well to draping and shirring that it is always a favorite for children's wear and for young girls' party gowns. Tafetas are rather overshadowed just now, yet many travelling and walking gowns will undoubtedly be made of this useful silk.

Next to the burlap weaves in popularity come the two-toned summer silks which show the fine hairline stripes in combination with brocaded figures or large dots. Most of these are in pompadour effects, as far as designs are concerned, although the traditional pinks and blues are varied. Pin checks embroidered with pompadour flowers and figures are extremely good. These also appear in Dresden effects. Checks and hairline stripes are used even for dancing gowns. This is most unusual, but the extreme delicacy of many of the new silks justifies the innovation.

FANCY SILKS.

A dozen or more fancy silks might be described. There is a taffeta checked, with a figure in contrasting color embroidered over, and an openwork lace design between the embroideries. For example a creamery white chiffon has a ten-inch border of smoky-black, with out a suggestion of brilliance. Above this is a large design of crimson and pink roses with their bright foliage. Another has a corn-yellow ground with a brown border and a design of green and white lotus. One can imagine the most poetic gown in looking at these chiffons.

LINENS AND COTTONS.

If the spring silks are alluring, what shall be said of the new linens and cottons? Some of the latter are dangerous rivals of silk.

The color which the dressmakers and importers say will lead this spring is grey. Several shades are offered, all of them light and tending to warm tones. No color is more refined, but few colors are so trying, especially to pale or sallow complexions. The unbecomingness may be modified by a judicious use of white or black, and fortunately the present style of gimp dresses lends itself to this idea. Not many gowns carry the fabric close to the throat. Practically all have some sort of white collar, usually transparent. If a touch of color, the most becoming, be added to the collar, the palest woman may wear the fashionable grey with assurance.

A SILVER GREY.

HEALTH

TREATMENT OF ANEMIA.

The chief symptom, at least, the most obvious one of anemia, is pallor. The skin is white, the whites of the eyes are even whiter than usual, the lips are light in color, and the pink color of the nail-beds is absent. But pallor is sometimes deceptive, and may be present even when there is little or no real anemia. This occurs in certain cases in which there is an unequal distribution of the blood, the surface of the body being poorly supplied, while the central organs are congested.

Other signs of anemia are irritability of the heart, palpitation occurring on slight provocation; indigestion, loss of appetite, constipation, shortness of breath, nervousness, weakness and inability to do any hard work with either brain or muscles, swelling of the feet and ankles in the evening, headache, dizziness, ringing in the ears, and sometimes spots before the eyes. All these signs point to an impoverishment of the blood, and the suspicion is confirmed by a direct examination of a drop under a microscope.

In the treatment of anemia, which is very frequently a secondary condition, the first care is to discover and remove, if possible, the underlying cause. The cure is helped along, however, and hastened by certain measures which we may briefly enumerate. The diet of every anemic person must be carefully looked to. It is usually the quality of the food rather than its quantity that needs regulating. Tender, not overcooked meat, milk, eggs, and other albuminous articles are to be preferred to vegetables and starchy foods. The juices of fruits and of lettuce, celery and other salads, without the woody substance, are useful as promoting digestion and accelerating the nutritive changes in the body.

Next to food, fresh air and sunlight are the most powerful stimulants to the blood-making functions.

All exercise that causes fatigue should be avoided, but a quiet stroll, a drive over smooth roads, and especially sitting or lying in the open air, occasionally in the direct sunlight, the head being protected, are of great value to the anemic invalid. If sitting outdoors is impossible, the chair or sofa should be continuously by a wide-open window, and, at night, all the windows in the room should be open.

Cold douching or bathing is of great benefit, but the judicious adaptation of this curative measure to the individual needs calls for medical skill, as does also the prescription of iron and other blood-making drugs.—Youth's Companion.

TRY SINGING.

An eight-year-old girl, with a cut in her hand, was brought to a physician. It was necessary for the best results to take a few stitches with a surgeon's needle. While the physician was making preparations the little girl swung her foot nervously against the chair, and was gently admonished by her mother. "That will do no harm," said the doctor, kindly, "as long as you hold your hand still, adding with a glance at the strained, anxious face of the child, "You may cry as much as you like." "I would rather sing," replied the child.

"All right, that would be better. What can you sing?"

"I can sing, 'Give, Give, Said the Little Stream.' Do you know that?"

"I am not sure," responded the doctor. How does it begin?"

The little patient proceeded to illustrate.

"That's beautiful," said the doctor. "I want to hear the whole of it."

All the while the skilled fingers were sewing up the wound, the sweet, childish voice sounded bravely through the room, and the only tears shed on the occasion came from the eyes of the

LOSS IS IMPORTANT.

"If 60,000 cubic feet per second be diverted the loss will be important, but if the diversion be limited to this amount or receded as hereafter indicated, it may not prove disastrous. This cannot be definitely determined until the works now under construction have been completed and put in operation. When that happens, if it be found that the falls have not suffered serious damage as a scenic spectacle, it does not follow that additional water may be diverted with impunity. Additional diversion would be an experiment even more dangerous than that now being tried, and, in our opinion, should not be permitted.

STATE GETS NOTHING.

"In return for the impairment of the Falls thus far authorized, the state of New York will receive practically nothing for the 342,000 horse-power authorized on that side, and the Queen Victoria Niagara Falls Park will receive an annual rental of \$270,000, or an average of 65 cents per horse-power for the 418,000 horse-power authorized on the Canadian side. These figures do not include the 8,000 horse-power being developed by the electrical railway, nor the power developed by the Hamilton property with the water from the Welland Canal.

MANY MILLIONS INVESTED.

"Charters have been granted to corporations which propose to divert additional amounts in quantities not now limited. The sums of money invested, or being invested, in the works now in operation, or under construction, and in the industries dependent upon them, amount to many millions of dollars. It is probably not expedient to attempt the withdrawal of the rights thus utilized. The commercial value of the water-power at Niagara Falls is very great, but if compared with values set aside by wealthy communities elsewhere for park purposes, this value is not too great to be devoted to similar purposes. The place is visited annually by about 800,000 people.

MUST MAKE TREATY.

"If the falls are to be preserved, it must be by mutual agreement between the two countries. As a step in that direction we recommend that legislation be enacted which shall contain the following provisions, viz:

"The Secretary of War to be authorized to grant permits for the diversion of 25,500 cubic feet per second, and no more, from the waters naturally tributary to Niagara Falls, distributed as follows:—Niagara Falls Hydraulic Power and Manufacturing Company, 9,500; Niagara Falls Power Co., 6,800; Erie canal or its tenants, in addition to lock service, 400; Chicago drainage canal, 10,000. All other diversions of water which is naturally tributary to Niagara Falls to be prohibited, except such as may be required for domestic use or for the service of locks in navigation canals. Suitable penalties for violation of the law to be prescribed.

TO BE PERMANENT LAW.

"The foregoing prohibition to remain in force two years, and then to become the permanent law of the land, if in the meantime the Canadian Government shall have enacted legislation prohibiting the diversion of water which is naturally tributary to Niagara Falls, in excess of 36,000 cubic feet per second, not including the amounts required for domestic use or for the service of locks in navigation canals.

"It is assumed, however, that an understanding upon this subject would be reached by treaty.

"The object of such legislation would be to put a stop to the further depletion of the Falls, and at the same time inflict the least possible injury upon the important interests now dependent upon this water power. The amount to be diverted on the Canadian side, 36,000 feet, has been fixed with a view to allowing to the companies on that side the amount for which they now have works under construction.

"Such legislation would give to Canada the advantage of diverting 7,500 cubic feet per second more than is diverted in the United States. The advantage is more apparent than real, since the power generated on the Canadian side will

slave-trading suppressed, pagan sacrifices stopped, and other abominations wiped out. All this time the efforts of the British colonizers were handicapped by the rivalry of the French, who, by means of semi-military expeditions, were attempting to extend the boundaries of the French Sudan. But St. George and his able lieutenants checkmated their designs, and finally obtained the proper delimitation of the boundary.

PLOT TO EXTERMINATE WHITES.

In 1897 the British Company was faced by the great crisis in its career. For years the Foulah (or slave-trading) power had been growing. The native chiefs were banded together, and planned the expulsion or extermination of every white man in the country. But the British had been steadily preparing their forces, and took the field with five or six hundred well-drilled soldiers, led by thirty British officers, against twenty or thirty thousand natives, among whom was a large proportion of cavalry. Sir George Goldie conducted the campaign himself, and so well were his plans laid, and so rapid his movements, that Northern and Southern Nupe and Illorin, the centres of the rebellion were quickly subdued without very serious fighting. Foulah power was broken forever.

Then trouble with the French on the frontier supervened, and for some time threatened the maintenance of peace between France and Great Britain. Matters were, however, smoothed over, and the chief result of the trouble was the establishment of the West African Frontier Force, with headquarters at Jebba and strong garrisons at the various points on the frontier evacuated by the French. It was raised and organized by Sir Frederick Lugard, and consists of about 3,000 Hausas and Yorubas, and over two hundred white officers and non-commissioned officers. This is the force which has had to bear the brunt of fighting since 1898.

Early in 1900 an expedition had to be sent against the Munshi tribe, a truculent set of cannibals on the Benue River which had attacked an isolated British force. They were for the time subdued, but last month were reported to have broken out again. In 1901 an expedition was sent to Kontagora and Bida for the purpose of suppressing trouble caused by native pagan practices, and in September of the same year the Emir of Adamawa turned obstreperous, and had to be persuaded into obedience by a small force of troops.

MANY EXPEDITIONS.

The Province of Bornu was brought under control in 1902 by means of a military expedition, and in the following year Col Morland proceeded against the Emir of Kano, and took the Town of Kano, together with Sokoto and Katsena. The Sultan of Sokoto fled, but was pursued by Capt. Sword, and finally killed after some severe fighting.

In 1904 another expedition was rendered necessary against the Okolo tribe, who had murdered Capt. O'Riordan and Mr. Amvatt Burney, and, except for the reported rising of the Munships, there has since been peace and order in the country.

At the end of 1904 Sir Frederick Lugard, the High Commissioner, made a tour of the country, covering a distance of over 2,000 miles by land and 1,600 miles by water, and was able to report in the most satisfactory terms on the condition of affairs. He recorded the submission of the last recalcitrant tribes and the final disappearance of the horrible rites and sacrifices which had once been so prevalent in the country. Trade was increasing, civilization spreading, and new industries springing up.

His report provided convincing evidence of the advantage of British rule and the efficient way in which the dark places of "Darkest Africa" have been and are being opened to the light by the work of British pioneers.

QUITE CLEAR.

She—"She told me you told her that secret I told you not to tell her."

He—"The mean thing! I told her not to tell you I told her!"

She—"I promised her I wouldn't tell you she told me, so don't tell her I did."

sent style of gumpie dresses worn soon to this idea. Not many gowns carry the fabric close to the throat. Practically all have some sort of white collar, usually transparent. If a touch of color, the most becoming, be added to the collar, the palest woman may wear the fashionable grey with assurance.

A SILVER GREY.

Lansdowne in a silver grey, combined with lace tinted to match, made a charming afternoon gown. The full circular skirt was trimmed with two deep flounces shirred on heavy cords. These reached nearly to the knees. The waist had a deep pointed yoke of cream-colored Bruges lace, the collar showing a narrow band of gold-colored taffeta. The blouse below the lace yoke was shirred, and ended in a high empire girle of the yellow silk. Gold buttons closed the girle and trimmed the blouse. The sleeves were three-quarter length, and had short cuffs of yellow silk, trimmed with the gold buttons.

GREY HATS NUMEROUS.

Grey hats are numerous. The latest braid is an imitation horsehair with a very glossy surface, called pyroxylin. Two shades of grey or grey and white make a charming combination, especially when warmed with red or pink roses. A very pretty wide hat, grey above and white beneath, attracted attention at a recent opening. The brim rolled at the edge, and was turned up cavalier fashion on the left side. A scarf of grey tinalines was arranged around the crown and a large red rose was attached to the side of the crown on the right side. A grey and white ostrich plume trimmed the turned-up brim, and red roses were crushed together over the bandeau that lifted the hat on the side and back.

MEN OUGHT TO LIVE TO 140.

Medical Experts Give More Attention to Fascinating Theory.

Human beings ought to live five or six times longer than it takes them to attain the full adult state, just as some animals do, their lives thus extending from 120 to 140 years. Dr. Lasalle has been drawing the attention of the Paris Academy of Medicine to this theory of the famous Flourens.

Life, Flourens argued, was abnormally abridged by the racking conditions of labor generally, from over population and artificial contrivances for the benefit of some caste or class. The rich or fairly rich dug their graves with their teeth, or ate and drank themselves into gout and its off-branching maladies by choosing their food badly.

What was wanted was the culture of the philosophic mind, apt to see the facts and events of life in their true relations.

STARTING IN SMALL WAY.

Dr. Emdee—Going to open an office across the street.

Druggist—You seem rather young for a family physician.

Dr. Emdee—Yes, I know; but I'm only going to doctor children at first.

The little patient proceeded to illustrate.

"That's beautiful," said the doctor. "I want to hear the whole of it."

All the while the skilled fingers were sewing up the wound, the sweet, childish voice sounded bravely through the room, and the only tears shed on the occasion came from the eyes of the mother.

It is, I believe, a physiological fact that some expression of one's feelings tends to lessen pain. Since weeping and groaning are distressing to one's friends, how would it do for us all to try singing instead?

HOME REMEDIES FOR BURNS.

Burns are such frequent and painful accidents, says a writer in a recent household magazine, that simple home remedies which are immediately available are among the things which every housekeeper should know.

Scrape or grate a raw potato quickly and bind the pulp into a poultice on the burn. Or make a paste of cooking soda and water, and bind this on the burn. Both these remedies are cooling and will draw out the fire. If care is taken the blister will not break. The water in the blister helps to form a new skin and should be kept as long as possible.

It is a splendid plan to keep a bottle of linseed oil and lime water on a shelf where it can be quickly procured in case of a burn. This is a well-known remedy, though not as cooling as the first mentioned.

HEALTH RULES IN BRIEF.

Breathing through the nose is an excellent preventive against colds.

Earache may be caused by a bad tooth, the pain being transmitted, or by a foreign body in the ear, or by rheumatism. Warm fomentations of poppy heads or poultices will afford relief.

Deafness is often caused by collection of hard wax in the ear. Remove the cause by dropping into the ear a few drops of glycerine at night-time, and syringe in the morning with warm water.

Blackheads.—Those who suffer from blackheads should steam the face occasionally and rub in some simple ointment. Face massage and strict attention to cleanliness will effect wonders in bad cases.

Neuralgia, or hraw ague, should be treated with a mixture of quinine when due to malarial origin. Defective sight is a fertile source of the trouble, and the only treatment is the wearing of properly-made spectacles.

For Croup.—One teaspoonful of pulverized alum, two tablespoonfuls of honey, one-fourth teaspoonful of borax, and one teaspoonful of camphor. Give half a teaspoonful every fifteen or twenty minutes. Put the patient in a hot bath.

Chilblains may be prevented by avoiding extremes of heat and cold. Don't toast your feet over a hot fire and then go out for a walk on cold pavements. Wear woollen socks and stout boots. To alleviate pain rub the feet with castor-oil.

Before Breakfast.—Always put on your boots before breakfast—If you have to go out immediately after it. Bending down to lace or draw on boots after a good meal may produce faintness or syncope, caused by pressure of full stomach on the heart.

Eat fruit for breakfast. Eat fruit for luncheon. Avoid pastry. Shun muffins and crumpets, and buttered toast. Eat whole-meal bread. Refuse rice pudding. Decline potatoes if they are served more than once a day. Wash the face every night in warm water. Sleep eight hours a night.

Would the woman aid her digestion, clear up a muddy skin, and secure all round health, let her become an apple eater. Pears are health aids, but better when cooked. Peaches are calculated to beautify, and grapes are declared the healthiest of all fruits. Cherries, an authority says, frequently restore health and strength to the weak. Strawberries, though a cold fruit, have the virtue of healing rheumatism. Pineapples are said to be the best cure for dyspepsia known.

THE BANKS OF CANADA

HAVE AGENCIES IN EVERY TOWN IN THE DOMINION.

What an American Has to Say About the Banking System of This Country.

The chartered banks have thrown their net over the British Northwest and are establishing branches at its every municipal knot. There are more than a score of them doing business in Winnipeg, half as many are to be found at Edmonton and Calgary, and they have their agencies in nearly every new town of the wheat belt. One of the first buildings I saw in the wilds of the Co. ball mining regions was a pine shack, with the words "Imperial Bank" painted upon its walls, and near by the Canadian Bank of Commerce was doing business in a tent, writes Frank G. Carpenter from Winnipeg to the Chicago Record-Herald.

The Bank of Montreal has just put up a new building at Edmonton, and altogether there are hundreds of substantial banking institutions in this new part of the world. As far as I can learn they are all making money. Six of the large banks, whose branches are spread most widely over this territory, earned more than 14% per cent on their paid-up capital in 1903, and upon their capital and surplus combined almost 9% per cent. This covered the whole of Canada, and a great part of the profits came from the West.

During my travels here I have met the leading financiers, and have learned something about the banking system. It is different from ours. Canada's financial matters are managed by big institutions with big capital, which have branches scattered throughout the country. There are no small banks with \$50,000, \$100,000 or \$200,000 capital. It is not possible to start a bank of that kind. The money business of the whole country is done by chartered banks, which have altogether a paid-up capital of more than \$50,000,000 and a surplus of more than \$54,000,000.

NETWORK OF BRANCH BANKS.

There are now thirty-five main banks in Canada, with more than one thousand branches spread all over the country. Of these branches 401 are in the Province of Ontario, 183 in Quebec, 98 in Nova Scotia, 45 in New Brunswick, 87 in Manitoba, 50 in British Columbia and almost 100 in this Canadian Northwest.

The Bank of Montreal, which has its head office in Montreal, has almost a hundred branches. It has three banks in the United States and some in Great Britain. The Canadian Bank of Commerce, the Union Bank, the Imperial Bank, the Bank of British North America, as well as some thirty others, have all a large number of branches.

These banks are all making money. They have altogether assets of more than \$640,000,000. They have deposits approximating half a billion dollars, and I am told that the deposits of the Bank of Montreal alone are more than \$100,000,000. A significant evidence of the prosperity of Canada is that the assets of these banks have increased about 50 per cent. within the past five years and the stock of each of them sells far above par. That of the Bank of Montreal at this writing is 255, and that on a capital of over \$14,000,000, with a surplus of \$10,000,000.

The chartered banks are largely under government control and their capital and dividends are limited by law. Every bank has to pay a certain proportion of its money in government notes, and not less than 10 per cent. of its cash reserve must be paid in such notes. The banks have a right to issue notes to the amount of their unimpaired paid-up capital, but each must also deposit with the government an amount equal to 5 per cent. of its note circulation. This 5 per

and its stock is high. We have also established here a system of canals which is aiding in opening up our country. We are raising wheat by the millions of bushels and building mills to grind it. Indeed, I do not see how Canada could be better off than she is now."

FINANCE IN FAR WEST.

It was in the city of Calgary, in the range country not far from the foothills of the Rockies, that I talked with C. W. Rowley, the manager of the Canadian Bank of Commerce at that point. The Canadian Bank of Commerce is one of the most enterprising in the dominion. It has 104 branches, covering the entire northern part of the continent from Cape Breton on the Atlantic to Vancouver on the Pacific, and from San Francisco to Dawson. It has a capital of \$10,000,000 and a surplus of \$3,000,000. It keeps right in front of the new development in the British northwest and it has branches established at almost every settlement. Mr. Rowley is one of its leading bankers in the West and he knows all about the financial situation. He said:

"Our banks are making money in this part of the world. There are eight of the chartered institutions represented in Calgary, and that notwithstanding the population is only 12,000. We have, however, a great wholesale business here and we control the trade of the country about."

"What are your interest rates?" "They are about the same as those in western parts of the United States. We are now getting 7 and 8 per cent."

There are many loan associations here. A great deal of real estate selling and loaning is done, and some of the big land companies are making large profits. The secretary of such a company here, one of the biggest in Canada, which is handling some millions of its own and railroad lands, tells me he has made \$70 for every one he has put in the company. Another company started with a grant which cost them a dollar or so an acre on installments. They paid the first installment and the sales from the lands then began to come in. These were used for the future payments, so that only \$2,500 was actually invested by the original incorporators. One of the men who went into that deal is said to have made \$700,000 and another to have netted almost \$1,000,000. Nearly all the chartered banks have savings departments, and there are in addition postoffice savings banks, which are to be found at every country cross roads, as well as in the towns and cities. The private savings banks have something like \$20,000,000 in deposits, and the postoffice savings banks have \$44,000,000 and 200,000 depositors. In the postoffice banks 3 per cent. interest is paid, but no one may deposit more than \$1,000 in one year or have more than \$3,000 standing to his credit at one time.

SOME NOVEL CHURCHES

MANY ARE BUILT OF STRANGE MATERIALS.

Place of Worship Constructed of Snow-Blocks — Rushes Was Used for Another.

The Rev. E. J. Peck, who, after thirty years' missionary work amid the ice and snow of the Arctic regions, has just returned home, relates some curious experiences in church building amid the Eskimos. One place of worship he constructed out of snow-blocks, from which material he likewise made both the seats for the congregation and the altar. This church, although but a rude and temporary structure, answered its purpose in protecting the worshippers from the bitter cold and winds.

Even more singular was the church this indefatigable missionary erected in

IN MERRY OLD ENGLAND DEATH BY ELECTRICITY

NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

Occurrences in the Land That Reigns Supreme in the Commercial World.

Mr. W. Greenwood, a Blackburn magistrate, fined himself in a case brought against him for chimney firing. There are thirty-five cases of scarlet fever at the Norwood Poor-law schools. Birmingham Boys' Anti-Cigarette League has now a membership of over 5,000.

Cordite street is the name given to a new thoroughfare near Woolwich arsenal.

Mr. Keir Hardie, M. P., pays 7s 6d. weekly for his place in Neville's Court, Fleet street, London.

Local men only will, as far as possible be employed in building the new Lambeth Town Hall at Brixton.

Islington Guardians have spent £300 in maintaining the family of a man who has just been imprisoned for deserting his wife.

It is estimated that the Germans in London number something between 100,000 and 200,000 people.

Admiral of the Fleet Sir John Fisher has just celebrated his sixty-fifth birthday. He is now in his fifty-second year of his naval service.

The beautiful monument in Merton church, originally placed there by Mrs. Cook, the widow of the famous Capt. Cook, has lately been restored.

The substitution of Colonial for English meat in Christchurch (Hants) workhouse has resulted in a saving of £87 during the past quarter.

After enjoying a pension for forty years, Joseph Willey, a Crimean veteran, has just died at Littlethorpe, Leicestershire. He was 77 years old.

James McNally, an inmate of the Home of the Little Sisters of the Poor, South Lambeth, has entered upon his 110th year. He is the King's oldest subject.

St. Pancras children are being encouraged to learn to swim by the gift of free passes to the borough Council's baths to all school children who win swimming races.

"I constantly see it stated that foreign seamen are more sober than English sailors," said Mr. Mead, at the Thames police court, "but my experience is the reverse."

Two letters from Lord Nelson, dated 1801, and addressed to the mayor and town clerk of Yarmouth, have recently come into the possession of the Yarmouth Town Council.

Mr. Balfour is already planning to complete some literary work which he has not been able to attempt during his term of office, and amid the excitement of a general election.

Among the well-known people who will, this year, celebrate their golden weddings are Professor Sir William and Lady Crookes, Sir John and Lady Strachey, and Lord and Lady Amherst.

The Postmaster-General has made a joke. He said that the ex-Prime Minister was recently unable to insure his life, because no clerk in the insurance office could make out his policy.

Samuel John Voisey, sexton of Culmpton church, Devon, for 50 years, has just died. He attended every funeral held in the church during the half century he held office, and saw eight vicars come and go.

To ensure fruit dealers and consumers receiving full weight, the Swanwick Fruit Growers' Association have adopted the gallon (5 pound) pasket, made in Winchester prison, as the standard strawberry basket.

For refusing to grind some coffee an able-bodied young man of twenty-three, who has been maintained in the workhouse for twelve months at the expense of Marylebone ratepayers, was sentenced to twenty-one days' imprison-

RESPONSIBILITY IN THE CASE OF ACCIDENTS.

English Law on the Subject of Fatalities From Live Wires and Rails.

"With the introduction of railways worked by electricity on the live-rail system," says W. Valentine Ball, an English barrister, "a very interesting problem arises as to whether and how far the company is held responsible for the accidents which happen to persons on the line. At first sight it may appear to be a simple matter to answer this question: but it is not so easy as it seems as much depends on the answer to a further question, namely, what right had the injured person to be where he was? Although divers accidents from electric shocks have occurred since the live-rail was introduced in England, no case in which the question of liability of the railway company has been considered has yet come before the courts. The subject must, therefore, be approached from the standpoint of first principles."

AS TO EMPLOYEES.

"And first with regard to persons employed on an electric railway by the company. If any such person meets with an accident by coming into contact with a live rail there is an English statute known as the Workmen's Compensation Act, which would clearly give him a right to claim damages, unless it could be shown that the workman had brought about the accident by his own serious and wilful misconduct. Apart from this and certain other statutes, of which the most important is known as the Employers' Liability Act, there is no rule of the English common law which would entitle a workman to compensation qua workman. In fact the English law as (apart from statute) with regard to the liability of an employer for injuries sustained by a workman is similar to that which, according to Mr. Crosswell, obtain in America."

LIABILITY OF COMPANY.

"That author states—'As to the liability for an electric (The Law of Electricity, 1895, sec. 266) company to its employees for defective construction and maintenance, the leading rule is, as in other branches of the law of master and servant, that the employee in entering the business accepts all the obvious, incidental and natural risks thereof, and the company is not liable for injuries resulting to him therefrom.' The risk of injury by shock from a live rail could hardly be described as anything but an obvious risk, especially if the company took the precaution of posting warning notices in places where the employees were likely to cross the permanent way ('or the road bed') on the level."

PROTECTION OF PUBLIC.

"Different considerations apply (a) to the public who may at certain places, have the right to cross the line on the level, and (b) to passengers who may be expressly or implicitly requested to cross the line for the purpose of getting from one platform to another. In all these cases it is clearly the duty of the company to take precautions. For instance, it would be their duty to guard the naked conductors with wooden rails in order to prevent a person stepping on the metal. It may be here mentioned that the Board of Trade in England (this being the Government department that has worked in these matters) have made regulations to this effect; but they have declined to call upon electric railway companies to guard the naked conductors throughout their length. Failure to post warning notices would probably be regarded as negligence on the part of the company."

TRESPASS ON LINE.

but each must also deposit with the government an amount equal to 5 per cent. of its note circulation. This 5 per cent. on all the note circulation of the country issued by the banks forms a common fund for the security of the note-holders, who are further secured by a provision requiring that the notes of a suspended bank shall bear interest at 6 per cent. until the public is notified that they can be redeemed.

NOT LIKE AMERICAN SYSTEM.

During my stay in Montreal I met the manager of the Bank of Montreal, E. H. Clouston, and had a chat with him about Canadian banking methods. The Bank of Montreal is one of the chief financial institutions of the world. It was founded by Montreal merchants in 1817, when James Monroe was beginning his first term as President of the United States, and its original capital was \$135,000. It paid a dividend of 8 per cent the first year, and has paid dividends ever since. Its capital has been increased to \$14,400,000, and it has now a surplus twenty times as large as the amount originally invested. Its president is Lord Strathcona, the richest man in Canada and the representative of the Dominion in London.

The Bank of Montreal looks more like one of our government departments than any financial institution of Wall street. It has Corinthian pillars at the front, and its roof, a hundred feet above the floor, is upheld by columns of black granite from Vermont, each as big around as a flour barrel and as bright as polished iron. Everything about the building is stately, and the servants are as imposing as those of the Bank of England. A sleek, black-haired Jeremiah Crumpler-like butler, in a blue suit trimmed with red and a bright red vest with brass buttons, took in my card to Mr. Clouston, and I was conducted into a church-like reception-room and asked to wait.

In speaking of Canadian banking Mr. Clouston said:

"I think our system is better than the American. It has more checks upon bank officials and is more preventive of established here a system of canals which branches in every part of Canada we feel every day the pulse of."

THE WHOLE COUNTRY.

We keep track of the financial conditions and financial movements, and we can prevent panics and similar disasters."

"How about your interest rates?" I asked. "Does not your system of chartered banks tend to equalize them throughout the Dominion?"

"I think so," stated Mr. Clouston. "The rate is now about 5½ or 6 per cent. almost everywhere, with an increase where the risk of loss is greater. We get higher rates in the far West and in the mining regions."

"But is not your banking system a monopoly or trust? Does it not tend to crowd out the small fry?"

"It prevents the establishment of small banking institutions, but that is for the good of the public. It is not a trust, although the chartered banks might be called combinations of capital, which to a certain extent work together. I believe that they render our financial condition safer, and that they are for the general good of the country."

"What is the condition of Canada today?"

"It is prosperous, and it has been so for some years."

"Will this condition continue?"

"I see no reason why it should not. Canada is at the beginning of its growth, and it is developing rapidly. Immigrants are settling our great West, factories are being established by capital from the United States, and all sorts of sound enterprises are being undertaken. I see no reason why our country should not go right ahead and steadily increase in population and wealth. I believe that we are doing better here on the whole than you are in the United States. We have one of the best railways in the country, and we are building two others, which will be equally great. When the Canadian Pacific was started the people laughed at the idea that it would be a financial success. It is now one of the most profitable of the world's railways."

from the bitter cold and winds.

Even more singular was the church in this indefatigable missionary erected on the desolate shore of Black Island, Cumberland Sound. Forty sealskins sewn together and stretched over a framework of whale's ribs constituted the walls and roof, while the interior was provided with provision boxes and boards that did duty for seats. All went well until one day the Eskimos' dogs, hard pressed by hunger, made an attack upon the structure, which they partially devoured. The rents in the walls caused by their

VORACIOUS APPETITE

were for a time mended with strips of canvas and sacking, but the church was subsequently demolished and a wooden one built in its stead.

The first place of worship ever erected at Perth, in Western Australia, is worthy of note not only by reason of the unusual materials employed in its construction, but because of the varied uses to which it was put. When in 1829, the 2nd Company of the 63rd Regiment arrived in the Colony, the men proceeded to collect a quantity of rushes, from which they, with considerable skill and ingenuity, constructed a small building, where every Sunday Divine service was held. For more secular purposes, however, did it serve for not only was it employed as a barracks, but at intervals it did duty as a theatre, on the boards of which its builders were wont to display their histrionic ability.

VITRIFIED CLAY.

is the material of which a Chicago church has been constructed, even the window-frames being of that material. The decorative features are white terracotta, the altars, communion rail, and organ-loft being of that substance. The ceiling is of brick and tile vaulting, the keystones of terra-cotta, and the ribs of the arches and groins of moulded brick. Another peculiarity attaches to this church, for like Solomon's temple, it was built without sound of hammer, not a single nail having been used in its construction.

Near Niagara Falls, in the little village of Munford, stands a church which may be said to be literally built of fossils. At first glance the edifice would appear to be constructed of rough sandstone covered with a coating of coarse plaster, which, on nearer approach, resolves itself into a delicate tracery of leaves, branches, and twigs, preserved for all time by being metamorphosed into indurated masses of flinty limestones—permanent mementoes of

SOME PRIMEVAL FOREST.

Though wooden churches are not uncommon, one made from a single tree must be almost, if not quite, unique. Such a one is the Baptist Church in Santa Rosa, which is built entirely from the wood of a single redwood tree, the size of which can be roughly computed from the fact that after the church—one of the largest, by the way, in the country—had been erected, enough material remained from which to cut 60,000 shingles. In a somewhat different sense a church in Gippsland, the eastern province of Victoria, may be said to have required but a single tree-trunk for its construction, inasmuch as a giant eucalyptus was hollowed out until a room sufficient to contain a congregation of fifty was formed. At San Jose, in California, there is a similar church capable of holding twenty-five worshippers and a small organ.

THE TALLEST MEN OF EUROPE.

The tallest men of Europe are found in Catalonia, Normandy, Yorkshire, and the Ardennes district of Belgium. Prussia gets her tallest recruits from Schleswig-Holstein, the original home of the Anglo-Saxons; Austria from the Tyrolean highlands. In Italy the progress of physical degeneration has extended to the upper Apennines, but the Albanian Turks are still an athletic race, and the natives of the Caucasus are as sinewy and gaunt as in the days of the Argonauts.

house for twelve months at the expense of Marylebone ratepayers, was sentenced to twenty-one days' imprisonment.

The Medical officer of the London County Council having reported that "standing" as a punishment should not be inflicted on any children in the special schools, orders have been issued to the teachers of such schools prohibiting this form of punishment.

WHAT AN EARTHQUAKE DID.

A District In Japan Entirely Changed in a Day.

On October 28th, 1891, a great earthquake took place at Gifu, in the interior of Japan, 151 miles from Tokio. The results were carefully mapped. In the inner zone fields changed their shape and size; sometimes they were compressed to seven-tenths of their former size, and had to be surveyed. Riverbeds contracted one or two per cent. A great fracture extended sixty miles across the country, marked by an embankment twenty feet high. Apparently the whole country fell, mountains, hills, rice fields and forests, on one side of the fissure, leaving the other side up. Landslides were brought about, and in one case a whole grove of bamboos moved sixty feet with the trees upright. In the inner zone, near the centre, temples collapsed, bridges were destroyed and shortened, railways were twisted, many fissures and mounds formed, grave-stones were piled together, and in general the country presented the appearance of having been shaken up in a hopper. Bamboo houses were sometimes driven into the ground so that only the roofs remained on the surface. Among the wounded from such an earthquake tetanus and various spinal troubles are common, the bacillus of tetanus being an earth product. In the outer zone the Japanese houses commonly stood, but European masonry suffered. Tombs and stone lanterns were thrown down, and the pond waters were lashed into foam. In thirty seconds Japan lost \$40,000,000, 9,960 people and 128,750 dwellings, not counting temples and factories. The country was literally tossed to pieces. It is said that the dwellers in an earthquake land are temperamentally affected by it. There is probably some direct relation between seismicity and the national characteristics, such as stolidity, indifference, fatalism and endurance, coupled with high nervous and muscular development.

FAMOUS ENGLISH ENGINE.

Sixty-four-year-old "Lord of the Isles" to be Broken up.

After having been preserved as a relic at Swindon, England, works since the abolition of the broad-gauge track in 1892, the engine Lord of the Isles has been condemned to the scrap heap. She was the last remaining locomotive of Brunel's famous "white elephant" railroad.

Designed sixty-four years ago by the late Sir Daniel Gooch, the Lord of the Isles, with her big driving wheels, tall chimney, and abundant brass work, stood as the model of all the subsequent broad-gauge express engines.

She remained a monument to British engineering genius, for after her last journey had been run she was sent on show to the Chicago World's Fair and the great Paris Exhibition, gaining medals at both.

In these days, of great locomotives and long non-stop journeys people are apt to look down upon the early engines. The broad-gauge engines, however, certainly had the quality of speed.

It is still handed on as a tradition among Great Western veterans how, in the early forties, a broad-gauge locomotive raced against time from Bristol to Paddington—the limits of the then existing line—a distance of 117 miles.

This urgent journey was to enable a bill to be deposited in Parliament before the House adjourned; and, so the legend runs, the distance was covered in just over an hour.

of the company.

TRESPASS ON LINE.

"The law upon this branch of our subject has been thus stated in a text book recently published in England: 'Carriage by Railway,' by H. Disney, barrister-at-law. 'If a person is wrongfully on the premises of a railway company there is no duty upon the company to warn him of even concealed dangers. He comes entirely at his own risk, and, though nothing may be done with the intention of injuring even a criminal (as by setting a man-trap to catch a thief), the company is under no obligation for negligence to a trespasser.' Thus if a person were in a train with the fraudulent intention of traveling without paying, the company would probably not be responsible if that person were injured by negligence. Again, a person trespassing on the line could not make the company answerable for injuries received while so trespassing."

FARMING IN LONDON.

The Great Metropolis Raised Big Crop Last Year.

Millions of people who look upon the capital of the Empire as anything but an agricultural centre will be surprised to learn that during 1905 2,080 bushels of wheat were grown in the county of London.

The agricultural returns, which were issued recently, show that the acreage under cultivation in London and the estimated yield were as follows:

	Yield.	Acreage.
Wheat	2,080 bushels	65
Barley	880 bushels	22
Oats	3,456 bushels	72
Beans	440 bushels	22
Peas	618 bushels	27
Potatoes	1,960 tons	324
Turnips and swedes	701 tons	50
Mangolds	4,919 tons	246
Hay	4,032 tons	2,871

The only class of produce included in the general returns which London did not raise was hops.

GORDON'S ONLY WEAPON.

Had a Cane in His Hand When He Fell at Khartoum.

In some reminiscences of Sir Frederick St. John, a diplomatist who served his country well, we have the facts which prompted General Gordon to carry no weapon but a cane when leading the Imperial troops during the Taping struggle. How he came to do so has not, so far as we are aware, been told. We therefore quote Sir Frederick St. John's explanation:—

"When acting in conjunction with the Chinese general, San-ko-lin-sin, against either Nankin or Foochow, Gordon received a message from the rebel leaders, offering submission if their lives were guaranteed. Having obtained the consent of the Chinese commander, he agreed. The town surrendered, and the three rebel chiefs appeared before San-ko-lin-sin. He seeing that they had not shaved their heads in sign of submission had them decapitated on the spot. Whereupon exasperated beyond control by such treachery, Gordon armed himself with a revolver, and was hastening to the general's tent with the intention of chastising him in the most summary manner for his breach of faith, when suddenly he paused, and coming, on reflection, to the conclusion that his contemplated act was simple murder, he threw away his weapon and registered a vow that, so long as he remained in China, he would never again carry any weapon more formidable than a cane."

HOT WATER SUPPLY.

The first co-operative system of hot water supply in this country is to be installed at Kells, Whitehaven, England, in thirty-two miners' cottages built for the Earl of Lonsdale. Hot water for all the houses will be supplied from one boiler, and the arrangement is expected to prove economical and convenient.

TRICKS TO DRAW TRADE

AN ATLANTA DRY GOODS MAN HAD HIS PARTNER ARRESTED.

A Balloon Disaster Turned to Good Account — A Clever Welsh Miller.

Not long ago the junior partner in a dry goods firm in the city of Atlanta, Georgia, applied for a warrant for the arrest of his senior partner on the ground that he was selling goods below cost and so losing the firm money. Great was the interest when the case came on. The court was crowded. Then counsel for the senior partner asked for postponement in order to have more time to prepare his case. The request was granted and the senior partner temporarily released. As the senior member left the court the younger stood up and angrily cried, "If he is released the sacrifice will still go on!"

An hour later his shop was simply crowded by bargain-seekers, and when the case was called again no plaintiff appeared and the suit was dismissed. The firm had succeeded in catching their customers.

Disasters are often turned to good account by smart merchants. A small Parisian cloth-manufacturing concern have lately doubled their profits through the

TERRIBLE BALLOON DISASTER

near Rouen a couple of years ago. It may be remembered that, when the car of the balloon broke away and the aeronaut and his elder son plunged to death, the younger was caught by a hook which pierced his coat. He was so carried for four miles, and came safely to the ground. The identical coat was re-purchased by its makers, the above-mentioned company, and hangs in their windows, with a full description of how it saved the wearer's life.

A Welsh miller proved himself the equal of either American or Frenchman in smartness. He was unlucky to lose a guinea in a bin of flour, and, after trying in vain to find it, told a neighbor the story. "Well, I suppose it will crop up in one of the sacks," said the latter. This gave the miller an idea. He advertised his loss in the local paper, offering a reward to the finder.

HIS SALES TREBLED

In the next few weeks and he was paid for his lost guinea many times over.

It was an American patent medicine manufacturer who bought a noted trotting horse, named it "Brambling's Liver Pill," and issued an open challenge to race it for \$25,000 a side. The horse has run several races, winning some and losing others, but its odd nomenclature has caused so much comment as to well fulfill its purchaser's purpose.

A most excellent idea on the part of a large Brooklyn shop is what it calls "a vestibule nursery," where children can be left by their mothers while the latter do their shopping. There is a large room with great plate-glass windows and beautifully fitted. Not only is this institution a boon to mothers who cannot afford nurses, and so have to take their babies with them when they go shopping, but the passers-by are attracted by the glimpses they catch of this pretty room, with its crowd of smiling babies and

NEAT AND DAINY NURSES.

One stormy night a couple of years ago a man was standing looking into a shop-window in North London holding an umbrella over his head. It was one of those cheap affairs with a metal stick and handle. In some unexplainable fashion the tip of his umbrella came in contact with some unguarded portion of the electric light wire overhead. The circuit was completed, and the unfortunate man received a shock which killed him on the spot. The crowds of inquisitive people who gathered next day to view the

DON'T THROW MONEY AWAY

THE SETTING HEN—Her failures have discouraged many a poultry raiser.

You can make money raising chicks in the right way—lots of it.

No one doubts that there is money in raising chickens with a good incubator and brooder.

Users of the Chatham Incubator and Brooder have all made money. If you still cling to the old idea that you can successfully run a poultry business using the hen as a hatcher, we would like to reason with you.

In the first place, we can prove to you that your actual cash loss in eggs, which the 50 hens should lay during the time you keep them hatching and brooding, will be enough to pay for a Chatham Incubator and Brooder in five or six hatches, to say nothing whatever of the larger and better results attained by the use of the Chatham Incubator and Brooder.

If you allow a hen to set, you lose at least eight weeks of laying (three weeks hatching and five weeks taking care of the chickens), or, in the eight weeks she would lay at least three dozen eggs. Let the Chatham Incubator on the hatching, while the hen goes on laying eggs.

Our No. 3 Incubator will hatch as many eggs as twenty setting hens, and do it better. Now, here is a question in arithmetic:—

If you keep 20 hens from laying for 8 weeks, how much cash do you lose if each hen would have laid 3 dozen eggs, and eggs are worth 15 cents per dozen? Ans.—\$9.00.

Therefore, when the Chatham Incubator is hatching the number of eggs that twenty hens would hatch, it is really earning in cash for you \$9.00, besides producing for your profit chicks by the wholesale, and being ready to do the same thing over again the moment each hatch is off.

Don't you think, therefore, that it pays to keep the hens laying and let the Chatham Incubator do the hatching?

There are many other reasons why the Chatham Incubator and Brooder outclasses the setting hen.

The hen sets when she is ready. The Chatham Incubator is always ready. By planning to take off a hatch at the right time, you may have plenty of broilers to sell when broilers are scarce and prices at the top notch. If you count on the hen, your chicks will grow to broilers just when every other hen's chicks are being marketed, and when the price is not so stiff.

The hen is a careless mother, often leading her chicks amongst wet grass, bushes, and in places where rats can confiscate her young.

The Chatham Brooder behaves itself, is a perfect mother and very rarely loses a chick, and is not infested with lice.

Altogether, there is absolutely no reasonable reason for continuing the use of a hen as a hatcher and every reason why you should have a Chatham Incubator and Brooder.

We are making a very special offer, which it will pay you to investigate.

Small Premises Sufficient For Poultry Raising.

Of course, if you have lots of room, so much the better, but many a man and woman are carrying on a successful and profitable poultry business in small city or town lots. Anyone with a fair sized stable or shed and a small yard can raise poultry profitably.

But to make money quickly, you must get away from the old idea of trying to do business with setting hens as hatchers. You must get a Chatham Incubator and Brooder.

To enable everybody to get a fair start in the right way in the poultry business, we make a very special offer which it is worth your while to investigate.

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Halifax, Chatham. Factories at CHATHAM, ONT., and DETROIT, MICH.

The MANSON CAMPBELL CO., Limited, Dept. No. 35, CHATHAM, CANADA

Let us quote you prices on a good Fanning Mill or good Farm Scale.

The Chatham Incubator and Brooder has created a New Era in Poultry Raising.

The setting Hen as a Hatcher has been proven a Commercial Failure.

The Chatham Incubator and Brooder has always proved a Money Maker.

A Light, Pleasant and Profitable Business for Women

Many women are to-day making an independent living and putting by money every month raising poultry with a Chatham Incubator.

Any woman with a little leisure time at her disposal can, without any previous experience or without a cent of cash, begin the poultry business and make money right from the start.

Perhaps you have a friend who is doing so. If not, we can give you the names of many who started with much misgiving only to be surprised by the ease and rapidity with which the profits came to them.

Of course, success depends on getting a right start. You must begin right. You can never make any considerable money as a poultry raiser with hens as hatchers. You must have a good incubator and brooder, but this means in the ordinary way an investment which, perhaps you are not prepared to make just now, and this is just where our special offer comes in.

If you are in earnest, we will set you up in the poultry business without a cent of cash down. If we were not sure that the Chatham Incubator and Brooder is the best and that with it and a reasonable amount of effort on your part you are sure to make money, we would not make the special offer below.

WE WILL SHIP NOW TO YOUR STATION FREIGHT PREPAID

A CHATHAM INCUBATOR and BROODER

You Pay us no Cash Till After 1906 Harvest

"Gentlemen.—Your No. 1 Incubator is all right. I am perfectly satisfied with it. Will get a larger one from you next year. H. M. LOCKWOOD, Lindsay, Ont."

"Gentlemen.—I think both Incubator and Brooder is all right. I got 75 per cent. out of three hatches. R. S. FLEMING, Flatville, Ont."

"Gentlemen.—I had never seen an incubator until I received yours. I was pleased and surprised to get over 80 per cent., and the chickens are all strong and healthy. A child could operate machine successfully. Jas. Day, Rathwell, Man."

No. 1—60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

THE CHATHAM INCUBATOR—It's success has encouraged many to make more money than they ever thought possible out of chicks.

Every Farmer Should Raise Poultry

Almost every farmer "keeps hens," but while he knows that there is a certain amount of profit in the business, even when setting it takes care of itself, few farmers are aware of how much they are losing every year by not getting into the poultry business in such a way as to make real money out of it.

The setting hen as a hatcher will never be a commercial success. Her business is to lay eggs and she should be kept at it. The only way to raise chicks for profit is to begin right, by installing a Chatham Incubator and Brooder. With such a machine you can begin hatching on a large scale at any time.

You can only get one crop off your fields in a year, but with a Chatham Incubator and Brooder and ordinary attention, you can raise chickens from early spring until winter and have a crop every month. Think of it!

Quite a few farmers have discovered that there is money in the poultry business and have found this branch of farming so profitable that they have installed several Chatham Incubators and Brooders after trying the first.

Perhaps you think that it requires a great deal of time or a great deal of technical knowledge to raise chickens with a Chatham Incubator and Brooder. If so, you are greatly mistaken. Your wife or daughter can attend to the machine and look after the chickens without interfering with their regular household duties.

The market is always good and prices are never low. The demand is always in excess of the supply and at certain times of the year you can practically get any price you care to ask for good broilers. With a Chatham Incubator and Brooder you can start hatching at the right time to bring the chickens to marketable broilers when the supply is very low and the prices accordingly high. This you could never do with hens as hatchers.

We know that there is money in the poultry business for every farmer who will go about it right. All you have to do is to get a Chatham Incubator and Brooder and start it. But perhaps you are not prepared just now to spend the money. This is why we make the special offer.

IS THIS FAIR?

We know there is money in raising chickens. We know the Chatham Incubator and Brooder has no equal.

We know that with any reasonable effort on your part, you cannot but make money out of the Chatham Incubator and Brooder.

We know that we made a similar offer last year and that in every case the payments were met cheerfully and promptly, and that in many cases money was accompanied by letters expressing satisfaction.

Therefore, we have no hesitation in making this proposition to every honest, earnest man or woman who may wish to add to their yearly profits with a small expenditure of time and money.

This really means that we will set you up in the poultry business so that you can make money right from the start, without asking for a single cent from you until after 1906 harvest.

If we knew of a fairer offer, we would make it. Write us a post card with your name and address, and we will send you full particulars, as well as our beautifully illustrated book, "How to make money out of chicks." Write to-day to Chatham.

Winnipeg, New Westminster, B.C., Montreal, 512

CENSUS OF THE EMPIRE

TAKEN IN 1901 AND THE RESULTS ARE ISSUED NOW.

dhists, 12 millions; primitive, animistics, pagans, etc., 23 millions.

In regard to lunacy the report states that in nearly all the colonies the proportion is much below that in the United Kingdom. The proportion of lunatics and feeble-minded to the 10,000 is as follows:—United Kingdom. 43; Malta 42; Victoria, 41; New Zealand, 36; New South Wales, 23; Canada, 21; Bahamas

LONDON'S GREAT TRAFFIC.

Facts Displayed in Recent Blue Books.

Two blue books of singular interest are volumes V. and VI. of the Report of the Royal Commission on London Traffic.

Among the astonishing facts obtain

able fashion the tip of his umbrella came in contact with some unguarded portion of the electric light wire overhead. The circuit was completed, and the unfortunate man received a shock which killed him on the spot. The crowds of inquisitive people who gathered next day to view the scene of the tragedy found the window filled with a brand-new assortment of wooden-handled umbrellas, with a full explanation of the dangers incurred by using one of metal. Needless to say, the enterprising shop-keeper reaped a rich reward. — London Tit-Bits.

SUICIDE ON WEDDING MORN.

Scepticism Drives Last of a Noble Family to Grave.

A terrible wedding tragedy took place at Naples, Italy, recently. The young Prince Vincenza Pignatelli, only 20 years of age, was to have been married at 4 o'clock in the afternoon to the Countess Anna Saluzzo.

In the early hours of the morning the Prince rang for his servant. The latter at once made his way to his master's room, but before he could reach it heard a shot. The Prince was found lying wounded on the floor near the bed. He tried to speak, but fell back dead.

On a table by the bed lay a volume of poems, open at the lines: "Could I forever rest my weary heart! Gone is the last delusion which I cherished."

The Prince left two letters, the first addressed to his father and the second to his betrothed. To his father he summarized his objections to marriage, and ended with the words: "I return to the void whence I came."

In that addressed to his bride he besought her pardon, and said that scepticism alone compelled him to suicide. The Prince and his father were the last two representatives of a noble house.

PAYING PROFESSION.

The finest profession in the world from a money-making point of view is the law for those who get front places, as witness the case of the Earl of Halsbury, who resigns the Lord High Chancellorship on a comfortable pension of \$25,000 a year. For five years—1875-80—he was Solicitor-General, drawing about \$45,000 per annum in salary and fees, and he has occupied the Woolsack, with but a brief interval, for seventeen years at a salary of \$50,000 per annum. Up to the present, therefore, he has received for his services to the State about \$975,000, to which another \$25,000 must now be added for every year that he survives. The Irish Lord Chancellor, Lord Ashbourne, whose retirement was also necessitated by Mr. Balfour's resignation, has received from public money about \$725,000. He will now have to rest content with the modest pension of \$18,460 per annum.

ELECTRICITY FROM THE SKY.

A late attempt to get electric power from the atmosphere is credited to M. Michkin, a Russian. A kite was sent up from a mountain near Novo-Alexandria, and when it had risen a little above 100 feet sparks began to appear in the collecting apparatus at the rate of every three to five seconds, soon changing to a continuous stream. A motor was then driven by a pressure of 22,000 volts for an hour, stopping for an interval when the wind fell. The motor reached a speed of 4,700 revolutions per minute, and it was concluded that loftier flying, with a motor designed for higher pressure, could supply considerable power.

LORD KITCHENER'S DOUBLE.

The chief police-inspector in one of the South London divisions is the living image of Lord Kitchener. By a curious coincidence his name is Kitch. It would be impossible to distinguish the two men but for a genial smile which is ever present on the inspector's face, and which is such a contrast to the usual stern aspect of the Indian Commander.

TAKEN IN 1901 AND THE RESULTS ARE ISSUED NOW.

Figures as to the Religious Divisions of King Edward's Subjects.

Somewhat tardy in making its appearance, but of extreme interest, is the report issued of the census of the British Empire taken in 1901.

The report deals not only with the population, but also includes conditions of marriage, occupations, birth-places, religions, degrees of education, and infirmities.

The first British Empire census was made in 1861, and England and her possessions then comprised 8,500,000 square miles. In forty years the aggregate area of the Empire has increased by 40 per cent., and in 1901 amounted to 11,150,378 square miles, or rather more than one-fifth of the land area of the globe.

THE INCREASE SHOWN.

The population in 1861 was about 259,000,000. In 1901, exclusive of North-western Rhodesia, for which no estimate could be obtained, it reached 400,000,000. Of this huge total 294,361,056 are contained in the Indian Empire, increased by 81,000,000 people since 1871.

In 1861 the population of the United Kingdom was 28,927,485; in 1901 it was recorded as 41,458,721.

Next in bulk of figure comes Canada. Five years ago her population was 3,371,315; 45 years ago it was roughly estimated at 3,199,418.

Australia increased her population in 45 years from 1,208,641 to 3,836,154. In one instance only has the population of any British possession decreased. In 1871 the population of Gambia was recorded as 14,190; in 1901 it had shrunk to 13,456.

DENSITY OF POPULATION.

In regard to average density of population, there are 33.5 persons to the square mile throughout the British Empire; the most densely populated districts are the Isle of Man and the Channel Islands, 496.3 to the square mile; the most sparsely, Australia, with 1.3.

Calcutta is, next to London, the most populous city of the Empire. In 1710 its population was put at ten or twelve thousand; five years ago the figure reached 848,000.

In religion the report classes 395,000,000 people of the Empire as follows:—Hindoo, 208 millions; Mohammedans, 91 millions; Christians, 58 millions; Bud-

dhist, 25; in regard to lunacy the report states that in nearly all the colonies the proportion is much below that in the United Kingdom. The proportion of lunatics and feeble-minded to the 10,000 is as follows:—United Kingdom, 43; Malta, 42; Victoria, 41; New Zealand, 36; New South Wales, 32; Canada, 31; Bahama Islands, 31; South Australia, 31; Fiermudas, 30; Grenada, 30; Sierra Leone 25; Tasmania, 25.

HYPNOTIZED BY TELEPHONE.

Some remarkable experiments in the way of hypnotizing by telephone have just been carried out in the Savoy Hotel, London, England, by Mr. F. F. Abbott. The experiments were conducted in the presence of a considerable number of medical men. Mr. Abbott introduced a young Scotsman, whom he had hypnotized seven times during the previous fortnight. After passing his hand over the face of the subject, Mr. Abbott soon reduced the man to a passive state, and, then, accompanied by one of the medical men, he left the building, and from a distance of two miles telephoned to the hotel in which the seance had been held. When the bell in the hotel room rang the young Scotsman went to the telephone, and, with a shudder, fell back quite unconscious. Mr. Abbott had commanded him over the telephone to go to sleep, and the subject remained in a hypnotized state until Mr. Abbott returned and awakened him.

MUSICAL BED.

A native Indian ruler owns a musical bed. The weight of the body sets the works in motion, and it plays half an hour, while life-sized figures of Grecian maidens at its head and foot finger stringed instruments. Fans are waved by a concealed motor, which keeps them going the whole night long.

BALDWIN'S BED.

A gravedigger of Alresford, Hants, England, named Baldwin, better known as "Duke," who has just died, had not slept in a bed for twenty years. His usual resting-place was an open shed outside the town, and his only covering a few sacks. Occasionally he slept in a newly-dug grave.

BEQUEST TO CHICKENS.

A woman who recently died in Chicago had for years kept a number of chickens, and in her will she left \$1,500 to be used in erecting "a chicken-house, good and warm, and lined inside and out, for them."

Facts Displayed in Books.

Two blue books of singular interest are volumes V. and VI. of the Report of the Royal Commission on London Traffic.

Among the astonishing facts obtainable from these maps and diagrams are the following:—

One-fourth of the population of England and Wales live within 20 miles radius of Charing Cross.

From the Strand one can get to 21 points of London; from Whitehall to 22 and from Piccadilly to 18.

The omnibuses of London carry in one year the whole population of the United Kingdom seven times over.

A passenger in Oxford Street has a choice of 29 different omnibus routes through that street to different parts of London.

The total number of passengers on London's tramways, railways and omnibuses in one year is equal to three-quarters of the population of London.

The route mileage of railways within the area now constituting the administrative County of London was only 29½ in 1845; in 1860 it was 69½; in 1880 it had increased to 215½; and in 1900 to 248½.

At the busy time of the day 642 omnibuses pass by the Bank in an hour, a procession of 2½ miles long; 400 through Oxford street and Piccadilly, a procession of 1½ miles in length.

Motor omnibuses hold 34 persons, as against a horse omnibus load of 26, so that if horse omnibuses in London were replaced by motor omnibuses the streets would be relieved of one-fourth of their existing omnibus traffic.

MILLIONAIRE M'NIFICENCE.

A benevolent bequest of \$5,000,000 is rather above even the multi-millionaire standard. It has, however, recently been attained in France. The old city of Dijon is the legatee, and the testatrix is a widow lady, Mme. Grangier, a wealthy landed proprietress, who died not long ago, and bequeathed the whole of her estate, which is valued at \$5,000,000, to the city of Dijon.

ISLAND OF BLACK CATS.

Chatham Island, off the Coast of Ecuador, South America, abounds in cats, every one of which is black. These animals live in the crevices of the lava formation near the coast, and subsist by catching fish and crabs, instead of rats and mice.

COLD FACTS ABOUT THE GOOD OLD DAYS.

"This reminds me of the good old days down on the farm. My, but we were a hardy lot. We never had to have the second call for breakfast. Not much! I can remember how exhilarating it was to wash up after we'd done our chores. No hot water for us! No, indeed! The good, bracing temperature of the water just as it came from the stream put new life into us."

THE NEW ONES

They are here in all styles and at all prices. High Shoes or Low, Black or Chocolate.

THE **J. J. HAINES** SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

(By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flour in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,
16th January, 1906.

J. W. HALL.

Easter: Past and Present.

Long before the Christian era our Saxon fore-fathers held a yearly festival in honor of the Spring Goddess Easter. The early church fathers were wise enough to turn the old-time observances to higher use, and for centuries Eastertide has been Christendom's most widely celebrated festival. We invite your inspection of our choice assortment of Easter Chocolates in dainty packages, also Easter Greeting Cards and Perfumes. The Medical Hall.—Fred L. Hooper.

A small fire in the grass at the east end of the Bay of Quinte Ry. office at the station gave the firemen a run on Monday morning. The blaze was close to office and had begun to scorch the building when discovered. A few pails of water quenched the blaze.

Maple syrup made its first appearance on our market, Saturday, but it was no drug on the market the three farmers who had milk cans filled with the maple product had crowds about their rigs, and their supply did not last very long. The price asked was \$1 per gallon.

"Herpicide" guaranteed to cure Dandruff, stops hair falling, and prevents baldness. 10 cts an application, at

THE PLAZA BARBER SHOP
A. WILLIS.

On Sunday morning Annie Dorothy, the little daughter of Rev. J. R. Conn, passed away. The baby was but a little over one year old, but for about six months had been a sufferer from rheumatism. The funeral took place from the manse on Tuesday to the Eastern Cemetery.

The death occurred at Hannibal, N. Y., on Wednesday, March 28th, of John Burren, a former resident on the Kingston road about three miles from Napanee, aged seventy-four years. Mr. Burren's house burned on March 26th, and while attempting to save the contents of his home, deceased was so badly burned that he died a couple of days afterwards. Mrs. Thos. Pierson Napanee is a daughter of deceased.

trict.

Mr. F. F. Miller attended the Automobile Show in Toronto this week.

Mr. and Mrs. C. H. Rose, Tamworth were in town on Thursday.

Mrs. Herb Gibson is the guest of Mr. and Mrs. Stephen Gibson.

Messrs. Wm. Davy and Geo. Lindsay left for Cobalt on Monday.

Mr. Jas. Pringle, Deseronto, was in town on Monday.

Mr. W. J. Jewell is refitting the Milligan store on Dundas street for Mr. Fred Curry.

Mr. Bruce Wagar has accepted a position in the J. J. Haines Shoe store.

Mr. John Hinch, Centreville, was in town on Thursday.

Councillor Ming was in Toronto a few days this week.

Miss Leah Barnhart, Toronto, spent a few days this week at her home here.

Mrs. John Sullivan, Oswego, who has been spending the winter with Mr. Z. A. Grooms, returned home on Monday.

Mr. and Mrs. A. Lalonde, Toronto, were in town this week attending the funeral of her mother, Mrs. McCumber.

Miss Julia Wilcox, Picton, is the guest of Miss Alice Pruyn.

Mrs. Thos. Vanluven and daughter, Moscow, spent a few days in town this week with friends.

Mrs. A. Connolly and Miss Helen Trickey of Yarker, were guests of Mayor and Mrs. Lowry, on Thursday.

Mr. Frank Morris was taken seriously ill early this week and is still confined to his bed.

Mr. W. F. Hall has moved his office from near the Paisley House to over Wallaces Drug store, Grange block.

Mr. and Mrs. C. W. Guess leave for New York next week to visit his son Mr. Geo. A. Guess, of Mexico, who is in New York on business.

Mrs. C. W. Guess was in Picton this week attending the funeral of the late Mr. Mark Losee.

Mr. F. Burrows returned last week from a three months' stay in Cuba. Mr. Burrows says Cuba is an ideal place to spend the winter in, but he thinks he prefer our Canadian summers. While there the days were ninety in the shade, but the nights were cool enough for blankets. Vegetation in that island is wonderful, almost every kind of fruit and vegetables can be grown and in some cases three and four crops a year. Sugar is one of the principal exports of the island. Land is rapidly increasing in value, and the country is filling up with American speculators. Mr. Burrows went there for the benefit of his health, and is very much improved after his stay on the island and a life in the open air.

MARRIAGES.

ARDEN.

In a few days farmers will be busy ploughing.

Edward Cole, who was badly hurt on the head by a stone, thrown accidentally by a neighbour's boy, has been taken to Kingston General Hospital by his father.

The township council met Tuesday. The wife of Rev. A. C. Hoffman, Methodist minister, has presented him with a daughter.

A fire broke out in the roof of the engine houses of the Barker steam milling works. Fortunately it was seen in time, very little damage done.

It is intended to have a children's concert on the Thursday evening before Good Friday, for the benefit of the Arden school children.

News has been received that George R. Monks and others have arrived safely at Saskatoon.

The board of Addington license commissioners will meet in Arden shortly.

J. Aylesworth, P.L.S., has been surveying in Kennebec for Addison Miller and others.

Carbo Magnetic Razors are giving entire satisfaction, take one on trial free for a month.

BOYLE & SON.

ENTERPRISE.

Our winter has been much milder than the two preceding ones. However we have had a good deal of cold weather.

Many of the farmers around here have tapped, but the run of sap as yet is rather small.

Mrs. McKeown spent a couple of days last week in Chippewa the guest of her daughter, Mrs. J. Dillon.

Mr. Joseph Barrett intends moving his family to Tamworth in the future.

Mr. Lawrence Burns who underwent an operation at the Hotel Diew Kingston. We are glad to say has so far recovered as to return to his home in Chippewa.

Mr. Ed. Fenwick has started a grocery and shoe store in Mr. Chas. Keech's shop. We wish him success after his great loss.

A. S. KIMMERLY is selling large quantities of Red Clover and Timothy Seed as well as all kinds of garden seed. I will buy English Multiplier Onions. Full stock of Bibby's Cream Equivalent, Ground Oil Cake, Flaxseed Meal. Try our 25c tea. Five Roses Flour beats the world. Pressed Hay for sale.

STRATHCONA.

Sugar making is the order of the day.

The Jolly Pathfinders gave an entertainment in the hall on Tuesday evening to a large house. Those attending report a good show.

John Winters spent Sunday at his home in Yarker.

Rev. T. F. Dowdell is holding services in St. Jude's this week. They are largely attended.

Albert Hanes took a business trip to Kingston on Monday last.

John T. Bowyer of Point Ann spent a few days last week with his family.

Chas. Thompson of Belleville spent Sunday with his family here.

The Misses Lena and Lillie Tait spent a few days in Deseronto last week visiting friends.

Mr. and Mrs. Guy Pybus of Napanee were visiting her father, H. Wager the past week.

R. J. Pybus and family have removed to Napanee.

Mrs. John Murphy is still seriously ill.

Mr. Chas. Asselstine and wife of Peterborough are visiting his parents, Mr. and Mrs. John Asselstine this week.

Mr. Bert Storings, and family of Syracuse, N.Y., have moved to this place.

John King of Harlowe is visiting relatives here.

Frank Hanes spent Sunday evening in Camden East.

The reading room is well patronized and is of great benefit to the village.

Abraham Connors and family have removed to Ernestown where he has a situation.

The Boxing Tournament was a great success. Dan made a very efficient and popular referee.

Mr. Chas. Hilton underwent an operation this morning for a cancer on his left foot. We hope that Mr. Hilton will soon be able to be about again.

We are glad to state that Mrs. Geo. Haycock is able to be out again, after being confined to the house for a couple of weeks with a severe cold.

We are sorry to say that Mr. H. Marten is at present very low with pneumonia. We hope for a speedy recovery.

Mrs. McCoy who has been visiting Mrs. Lott for a couple of weeks returned to her home on Monday last.

Mrs. Murphy is no better.

Mr. Frank Haycock is improving. Rev. Mr. Mears, of Newburgh, is holding revivals here this week.

Rev. T. F. Dowdell is holding Lenten services in St. Jude's church this week. All are welcome.

Quite a number from here attended the funeral of the late James Kelley on Thursday last. Much sympathy is expressed for his sorrowing widow and family.

Buy all your bright tinware from BOYLE & SON they make the best.

E. LOYST sells flour, feed, bran, shorts, salt, coal oil and pressed hay, just a little cheaper than others.

ODESSA

Miss Florence Murphy went to the Kingston General Hospital last week and underwent an operation for appendicitis. Her condition is favorable.

Robert Dougherty, of Kemptville, has taken charge of his brother's factory at Westbrook, as a cheese maker.

Odesa factory opened April 2nd, with a supply of about 18,000 pounds of milk.

Died on Saturday at noon at his home, George Benjamin, of this place. The funeral service was held on Monday afternoon at

THE success of pastry depends upon the flour. Bread and pastry must be more than merely appetising; they must be wholesome, digestible, nourishing.

The flour depends upon the wheat and the way it is milled.

Royal Household Flour

is made from spring wheat only. It is milled by the newest and best machinery. It is purified by electricity.

Use it and you get bread not only light, crisp and appetising, but also wholesome, digestible and nourishing.

You will better your baking by buying Ogilvie's Royal Household Flour from your grocer.

Ogilvie Flour Mills Co., Ltd.
Montreal.

101

"Ogilvie's Book for a Cook," contains 130 pages of excellent recipes, some never published before. Your grocer can tell you how to get it FREE.

Money Saved is Money Earned

Rev. Mr. Garbut of Flinton conducted services here on Sunday last and preached a very interesting sermon.

Mrs. McBride and Mrs. Dempsey spent Thursday and Friday in Cloyne.

Mr. Willie Morton left here on Monday for Cobalt where he intends spending the summer.

Mr. and Mrs. C. Godfrey went to Arden on Saturday returning Monday.

M. Bailey, traveller for Robinson & Nichol passed through here on Saturday en route to Kingston.

A number of tramps have returned with the warm weather. They look hale and hearty, as though they had spent a good winter.

Miss Leta Morton was the guest of Mrs. J. Forbes on Sunday last.

Mrs. Anderson and Miss Fleming attended the Millinery openings at Twiss on Thursday.

Mrs. Allport returned home on Sunday after spending a couple of weeks with her sister, Mrs. Campbell of Flinton, who has been very ill.

Miss Pearl Thompson was the guest of Miss Leta Morton on Monday.

Blue Eyes is still in our midst and he says the longer he stays in Kaladar the more it seems like home.

Mr. W. Bongard left here on Monday for Bannockburn, where he has secured a good position for the summer.

Mr. Peter Morton spent Sunday at the King Edward.

Mr. Wilson and Mr. Alexander registered at the Algerian on Tuesday.

Misses Edith and Etta Kellar were the guests of Miss Lena McBride on Sunday last.

Mrs. J. Dafee of Bancroft is visiting her son, Mr. W. Miller of this place.

Miss Lucile, teacher, spent Sunday at the Algerian.

Miss Hazel Godfrey was the guest of Miss Laura Morton on Sunday.

Mr. Henry Presley and his sister Addie returned home Thursday last after spending a few weeks in Ottawa.

Sugar Making Supplies.

Boiling furnaces and pans, buckets, spoils etc.

MADOLE & WILSON.

YARKER.

A splendid bale in two sections has just been packed by the Women's Auxiliary of the Church of England, Yarker, and will be duly shipped to the Rev. L. La Clare, Fairford, P. O., Lake St. Martin Reserves, Manitoba. The men of the congregation put in the bale a pound of useful articles for the Missionary.

The Parochial card collection this year has reached \$101.00 the best in the history of the Parish. Well done Yarker.

Everything indicates spring, and many of the feathered species have arrived. We all welcome the little birds again.

Stewart Crowther has gone to Brockville, where he has secured a position.

E. W. Benjamin will give the Merchants Bank a site for their new building free. Mr. Benjamin is all for Yarker's interest; long may he live.

Mr. Albert Benn got tired of his bachelor life and got married on Sunday to Miss Mary Lee, Colebrook. We extend congratulations; they will reside in Yarker.

Sore Throat and Coughs

A simple, effective and safe remedy for all throat irritations is found in

Cresolene Antiseptic Tablets

They combine the germicidal value of Cresolene with the soothing properties of slippery elm and licorice.

10c. All Druggists

Her condition is favorable.

Robert Dougherty, of Kemptville, has taken charge of his brother's factory at Westbrook, as a cheese maker.

Odesa factory opened April 2nd, with a supply of about 18,000 pounds of milk.

Died on Saturday at noon at his home, George Benjamin, of this place. The funeral service was held on Monday afternoon at the house by the Rev. J. A. McCamus. The remains were placed in Morven vault. Deceased is survived by a widow and one son.

An old resident passed away on Monday evening in the person of Mrs. Elizabeth Caton, relict of the late Chas. Caton. She is survived by three daughters and one son: Mrs. John Aylesworth, Mrs. Charles Clark, Mrs. Mark Fraser and Byron Caton, all of this place.

J. C. Fraser has moved in front of W. A. Baker's house.

Miss Dora McDonald, who has been very sick with pneumonia, is better.

Mrs. George Watts visited friends in Belleville last week.

The Jolly Pathfinders again visited this place and gave a concert in town hall on Saturday evening.

James H. Gordon entertained his Sunday school class on Tuesday night

Nickle plated tea and coffee pots, trays &c. at MADOLE & WILSON.

DIAMOND DYES.
Will Dye any Article of Clothing from feather to Stockings.

The Only Package Dyes That Make Fast and Unfading Colors.

Feathers, ribbons, silk ties, dress silks, shirt waist, dresses, costumes, capes, jackets and shawls can be dyed at home with Diamond Dyes so that they will look like new. Try a package of the Diamond Dyes, and see what a bright, beautiful, non-fading color it will make, with but little trouble.

Diamond Dyes are the greatest money savers of the age, as many a woman with one or two ten cent packages of these dyes has dyed her old dress a lovely and fashionable color, so as to save the expense of a new one. Partly worn clothing can be made over for the little ones, and by dyeing it with Diamond Dyes, one would not recognize that the dresses and suits were not new.

Diamond Dyes give new life and usefulness to curtains, furniture coverings, draperies, carpets, etc. Beware of imitation and common package dyes; ask for the "Diamond" and see that you get them.

OBITUARY.

JACOB ROMBOUGH.

One of Morven's oldest residents, in
the person of Jacob Rombough, passed
away Sunday morning at the ripe age
of eighty years and two months. De-
ceased suffered a stroke of apoplexy
three weeks ago from the effects of
which he never recovered. A family
of three sons are left to mourn a tender
and loving father. The sons are
Marshall, on the homestead; Alexander,
New York, and Frank, Morven.
Deceased was a kind and thoughtful
neighbor, a friend to every one and a
man respected and loved by his neigh-
bors, and friends. The funeral took
place, Tuesday, at two o'clock to the
Morven vault.

HARRY M. MOODY.

Mr. Harry M. Moody, late foreman
of the Napanee Express, died in King-
ston General Hospital on Saturday.
Deceased had been ill for some weeks
with lung trouble and about four weeks
ago went to Kingston General Hospital
for treatment. For many years Mr.
Moody was forman of the Presbyterian
Printing Office, Toronto, and came to
Napanee in December last to assume a
position on this paper. The deceased
was a member of the printing firm of
Moody & Sons of Moore street, Bir-
mingham, England, and was in his 58th
year. Four daughters survive, Mrs.
Moody having died some years ago.
The funeral arrangements were in
charge of Typographical Union No.
91, and interment took place in St.
John's Cemetery, Norway on Monday
afternoon at 2 o'clock, from 20 Hamil-
ton street, Toronto. The late Mr.
Moody was a lifelong Liberal.

IT'S DELICIOUS!

What's Delicious?

A Cup of Malagama Black Tea. Try
half pound package, which will only
cost you 20 cents, and which we think
you will want more of after trying.

For sale by

THE COXALL CO.

Horticultural Society.

The interest in the working of the
Horticultural Society was never keener
than it is at the present time. The
paid up membership is now 57, and
owing to the fact that the seeds, shrubs
and plants for this season have nearly
all been ordered, no further applica-
tions can be entertained during the
coming season.

The Society is not only making a
generous distribution of plants among
the members, but has ordered, and
will set out in the Warner Park
50 or 60 evergreens, extending
along the North side of the Park,
and groups of syringas, lilacs and
other flowering shrubs, as well as a
number of European White Birch.

EXECUTORS' NOTICE TO CREDI- TORS.

IN THE SURROGATE COURT OF THE
COUNTY OF LENNOX AND ADDINGTON.

IN THE ESTATE OF MARY BLACK, LATE OF THE
TOWN OF NAPANEE, MARRIED WOMAN,
DECEASED.

NOTICE is hereby given pursuant to R. S. O.
1897, Chapter 123, Section 38 and Amending Acts,
that all persons having claims against the
estate of the said Mary Black, who died on or
about the 15th day of March, A. D. 1906, are
required to send by post prepaid, or to deliver
to John English, Solicitor for the Executors,
on or before the 25th day of April, A. D. 1906,
their names, addresses and descriptions, and a
full statement of particulars of their claims
and the nature of security (if any) held by
them, duly certified, and that after the said
date the executors will proceed to distribute
the assets of the deceased among the parties
entitled thereto, having regard only to the
claims of which they shall then have notice.

JOHN ENGLISH,
Solicitor for the Executors.
Dated this 28th day of March, A. D. 1905.

Come and See the Long, Beautiful Hair grown by the use of the Seven Sutherland Sisters' Hair Grower and Scalp Cleaner. Canadian Head Office 11 Colborne Street, Toronto. J. H. Bailey, Foreign Manager.

Builders Hardware, Paints, Oil, Glass, Varnishes for Boats, floor finishes at BOYLE & SON.

Kellar-Smith.

Under the balmy air of an April day a pretty house wedding took place when Bertie May Smith was united in marriage to Mr. Joel Kellar, a prosperous farmer of Ernestown, at the home of her step father, D. R. Hicks Maple Corner, on Wednesday April 11th. Exactly at twelve o'clock high noon amid the strains of the wedding march the bridal party took their places in the parlor, the bride leaning on the arm of her step father, bride being waited upon by Miss Dora B. Weese, of Bath, and Mr. T. Croighton of Hawley acting as best man. Little Miss Iva Kellar, sister of the groom, acted as flower girl and Miss Lora Clement of Collins Bay, cousin of the bride, played the wedding march. The bride looked charming attired in her wedding gown of steel gray silk trimmed with white chiffon lace. The bridesmaid was dressed in a steel gray gown of silk trimmed to match, and the little flower girl looked charming in her white silk dress, the whole party wearing bouquets of white primroses. After the ceremony was performed by Rev. Mr. Thomas, the guests repaired to the dining room where a sumptuous repast was awaiting them. At three o'clock the bridal party, amid showers of rice and best wishes, took the cab for Napanee, where they took the train for Toronto Newmarket and other points west those from distance at the wedding were from Kingston Brockville, Glenvale Erinsville, and Schenectady, N.Y. The bride's going away suit was of navy blue trimmed with white and blue silk braid.

The bride received a number of useful and beautiful presents.

International Stock Food, Heave Cure and other remedies. Three feeds one cent.

MADOLE & WILSON.

Napanee Yacht Club.

A meeting of the Napanee Yacht Club was held in J. N. Osborne's barber shop Wednesday evening at 8 p.m. when the following officers were elected for the year:

- J. N. Osborne, Commodore.
- E. J. Roy, Vice-Commodore.
- M. B. Mills, Captain.
- F. J. Vanalstine, Secretary.
- Mark Graham, Treasurer.

The next meeting of the Club will be held at the same place and at the same hour, on Friday April 30th. All interested are invited to attend. The cups of the Yacht Club will be on exhibition in J. N. Osborne's barber shop window in the near future.

The meeting night of the Napanee Yacht Club has been changed from the 2nd and 4th, Wednesday nights of each month to the 1st and 3rd Wednesdays of each month. The next meeting will take next Wednesday at the usual hour. All interested will please take notice.

Use Prism Brand Floor Enamel It dries quickly, has a varnish gloss, and is true to Color. The Medical Hall.—Fred L. Hooper, sole agent for Napanee.

At a long consultation held with his solicitor, it is understood Mr. Joseph Phillips of the York County Loan commenced the preparation of his defence.

Brockville, April 10.—On Saturday afternoon an alleged horse thief named "Prof." Seymour, arrived here with a horse and buggy, the property of a liveryman named Galt, of Deseronto. The local police were on the lookout, and Seymour decamped, leaving the outfit behind.

along the North side of the Park, and groups of syringas, lilacs and other flowering shrubs, as well as a number of European White Birch, Scarlet Maple, European Linden and Catalpa as shade trees.

The public meeting of the Society will be held in the Town Hall on the evening of Tuesday the 17th April, and will be addressed by Mr. A. B. Cutting B.S.A., of Guelph. Mr. Cutting has wide experience in Horticultural matters, having spent some time in the Horticultural Department of the Ontario Agricultural College, subsequently taking special work along Horticultural lines in some of the Eastern States. He also had a number of year's experience in the study of fruit growing and flower culture in South America. His wide experience coupled with his pleasing address, make him one of the most interesting lecturers on Horticulture in the Dominion of Canada. The Society is to be congratulated upon securing the services of such an able man.

This meeting is free to the public, and all citizens of the town are cordially invited to attend. The meeting will be held in the Town Hall and a musical program will also be provided. At this season of the year when all are looking towards beautifying their homes, Mr. Cutting should be greeted with a full house.

New Century, Sunlight and Handy Washers, sold on approval.

MADOLE & WILSON.

MEALS FOR SCHOOL CHILDREN.

Paris Gives One Meal a Day—Salt Water on Streets.

In Paris the city government gives every school child one full meal a day. This does not tend to pauperize the children or to lessen the responsibility of the parents, for all those who can afford to pay for the meal are expected to do so. On the other hand, no jealousy or contempt can be felt by the richer children for their starved comrades; for all are supplied with the same metal token, which has to be given up in exchange for the meal. The "cantine scolaire," as the municipal soup kitchen is called, is not confined to Paris. In the provinces, the "soupe scolaire," its equivalent, has sent up the school attendance by leaps and bounds. Here, however, instead of paying for their mid-day meal, all those who can possibly do so are encouraged to bring to school their handful of vegetables and the like and the contributions are all put into the common soup.

Many European cities on the seacoast use salt water for watering the public thoroughfares, calling it a waste to make use of fresh water for this purpose. They are the more satisfied because certain properties of sea water eliminate the necessity of frequent applications. On the other hand, salt water exerts a very destructive influence on the paint and varnish of vehicles, and merchants affirm that the salt is found everywhere and that its delinquency is attended with harmful results. And again, salt water is destructive to the pipes and metallic fittings, and the leakage of the pipes kills vegetation in trees, parks and gardens.

HEALTH IN SPRING.

Nature Needs Assistance in Making New Health-Giving Blood.

Spring is the season when your system needs toning up. In the spring you must have new blood, just as the trees must have new sap. Nature demands it. Without new blood you will feel weak and languid; you may have twinges of rheumatism or neuralgia, occasional headaches, a variable appetite, pimples or eruptions of the skin, or a pale, pasty complexion. These are sure signs that the blood is out of order. A tonic is needed to give new energy. Dr. Williams' Pink Pills are the best tonic in all the world. They make new rich blood—your greatest need in spring. They clear the skin, drive out disease and make tired, depressed men and women bright, active and strong. Mrs. Chas. Masson, Yarmouche, Que., proves the great value of Dr. Williams' Pink Pills in building up people who have become weakened and run down. She says:—"In the winter of 1905 I was very much run down and lost flesh rapidly. My blood was poor. I suffered from indigestion, severe headaches and general debility. In this condition I decided to give Dr. Williams' Pink Pills a trial, and thanks to this valuable medi-

CHAMELEON A LADY'S PET

BECOME GREATLY ATTACHED TO THEIR OWNERS.

The Little Creatures Change Their Color to Suit Dress of the Mistress.

The chameleon promises to be a favorite pet in London this year.

One great point in favor of the chameleon is its accommodating habit of taking on the hue of the color against which it is placed. Thus one chameleon will match up with gowns of half a dozen different shades. So, though fashionable, it is really quite an economical adornment.

Much, however, will depend upon the weather, for, like the summer girl, the chameleon only thrives when the sun is bright. To import them now would be almost madness, as a cold snap would rob them of their brightly colored little lives.

The chameleon is really the ideal pocket pet. It has a habit of sitting on its hind legs, and it has weird, staring eyes perched on the top of its head. To pursue natural history further, it may be pointed out that, the chameleon never goes far from home.

ITS FUNNY WAYS.

It has two little arms, with almost human-fingered hands, and with these it clings for an indefinite time to anything on which it is placed. For instance, if you put a chameleon on a plant it will cling to that plant until removed. Or if a lady attaches it to her gown, it will cling passionately to her dress. It will never fall off and it will never run away. In fact, it may be said that chameleons always become very much attached to their owner.

The species most recommended is the one hailing from Morocco, which is about five inches long, and has a fascinating habit of curling its tail between its legs and up its chest. One of these placed on its hind legs and provided with penholder as a walking-stick will sit for hours on end without moving.

COLD KILLS THEM.

The diet of the chameleon consists of meat-worms and flies. The latter the chameleon catches for himself in the summer months by shooting out his comparatively immense tongue.

There is one sad aspect to the chameleon fashion. When the summer has flown and cold weather comes, the chameleon must die unless sheltered in a very hot plant house or sent south for the winter. One well-known marchioness, who became very fond of her chameleon, last summer sent it to Biskra during the winter months. At the present moment it is in excellent health, and will be restored to its devoted mistress when spring develops.

NINE MURDERS FOR MONEY.

Father and Daughter Among Victims

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON

CHAPTER XXXIX.—Con.

Norah found her old room ready for her, and Harman waiting to attend upon her as of old; and in condition of wonderment beyond description, she changed her travelling dress for an evening one. The sight of Harman awakened all the painful memories connected with Becca South. She asked gently if Harman had heard any tidings of the lost girl and Harman, with a sigh, shook her head.

"No, my lady—no, ma'am—not a word, and—"

She was going to add, "I shall never hear of her again," but did not want to sadden her beloved mistress, and changed the subject.

Presently the big gong resounded through the house, and Norah went down to the drawing-room.

The Fernalds were there and Jack, but not Cyril nor Mr. Petherick.

Norah looked around.

"He is not here yet!" said Lady Ferndale, taking her hand and drawing her to her almost protectingly. "Are you very anxious to see the new earl, Norah?"

Norah smiled. A kind of presentiment of some approaching surprise and climax suddenly flashed upon her, but it was vague and indefinite.

"Are not you?" she said. "What does it all mean, and why does he come in this mysterious manner? Where is Cyril?"

"He will be here directly; he is in the library with Mr. Petherick," said Lord Ferndale, crossing over to her, and taking his place beside her, also with an air of supporting and encouraging her. "He has something of importance to communicate to Mr. Petherick—"

"About the earl?" she asked, her brows coming together with a puzzled expression.

Before Lord Ferndale could answer, the door opened, and the butler, with a look baffling description, said:

"Lord Arrowdale."

Norah started, and held Lady Ferndale's hand tightly, and looked toward the door, but she saw no one beside Cyril and the old lawyer.

Then suddenly she caught a glimmering of the truth from a certain expression in Cyril's face. The next instant he was by her side, and had got both her hands in his.

"Are you so surprised, dearest?" he murmured.

"Am I? Cyril!" broke from her, as she clung to him, her lovely eyes searching his face. "Are you—?"

"Yes, countess!" said Mr. Petherick, with a slight emphasis on the title. "The Earl of Arrowdale, for whom we have been looking so long, is none other than your husband, Mr. Cyril Burne!"

Norah uttered a faint cry, and trembled a little; and then, as they gathered round her, and, all talking at once, began to explain the mystery, the tears rose in her eyes, and, half laughing and half crying, she hid her face on Cyril's breast.

They were all excited, and the old lawyer certainly not the least.

"Of course. I have been a blind old idiot," he exclaimed to Lord Ferndale, "or I should have guessed the truth long ago. But, you see, we lawyers are not accustomed to romance, and—and it never occurred to me that Mr. Burne could be other than he represented himself. If I were to try and tell you how glad I am that things are as they are I couldn't do it!" And he laughed, and coughed, and nodded to one and the

other, he understood her as little as the swine wallowing in its sty understands the mystery of the stars. To his base mind it seemed just impossible that any woman should choose obscurity and poverty before rank and wealth. Yes, he told himself in his solitary musings in the grim, desolate cottage, she would come round in time. Any day, any hour, he might receive a message from her. She would come back and send for him, and accept his terms. He should be the husband of Lady Norah Arrowdale, and, if not lord of Santleigh, the owner of the vast wealth left by the late earl. And so he waited—waited with a restless, feverish impatience, intensified into an agony far past description by the hideous secret which haunted him.

All day he spent shut up in the house in which his crime had been committed, and which seemed a torture house and a tomb to him. It was only at night that he emerged from the gloomy silence of the haunted cottage, and then he avoided his fellow-men, and prowled about the dark lanes and round the Court.

He heard of Mr. Petherick's arrival, and knew that he was staying at the Court, but he did not go near him. He would wait, he told himself, until Norah returned and sent for him. Then—well, he called up a vision of victory and triumph which almost made him giddy, and for the moment dispelled the dark shadow which hovered about him.

This evening he had sauntered up the avenue with his head resting upon his breast, and, suddenly raising his eyes, saw that the windows of the vast mansion were full of light.

He stood still and gazed, and his heart beat expectantly, and he drew nearer and waited, his hands clasped tightly and feverishly behind his back.

Presently a servant came hurrying down the drive, and he stopped him. "Beg your pardon, Mr. Berton. You gave me a fright, sir."

"What—why is the place lit up to-night?" asked Guildford Berton, controlling his voice, and speaking as calmly and composedly as he could.

The man touched his hat.

"The new earl's coming, sir."

Guildford Berton's hands gripped each other still more tightly, and he bit his lip as he choked back the exclamation which nearly burst from him.

"The earl!" he said, wonderingly.

"Yes, sir; quite sudden and unexpected like. Mr. Petherick only heard this morning. There's Lord and Lady Ferndale and another gentleman there to meet him. Beggin' your pardon, sir, I must be goin' on," and he hurried off.

Guildford Berton drew back among the trees. The news had startled and bewildered him. He had been so absorbed with his one idea—waiting for Norah's return and decision—that he had scarcely given a thought to the young earl, for whom he had been looking so long and fruitlessly.

He paced slowly down the avenue, hurrying back.

"Do you know when the earl is coming?" he asked.

No, the man said, nobody knew for certain; but it was supposed that he would arrive to dinner.

Guildford Berton hesitated a moment, then said:

"And is Lady Norah—it is not known when she returns?"

The man shook his head, doubtless

My blood was poor. I suffered from indigestion, severe headaches and general debility. In this condition, I decided to give Dr. Williams' Pink Pills a trial, and thanks to this valuable medicine I am again enjoying perfect health."

Dr. Williams' Pink Pills cure all the ailments due to poor blood or shattered nerves. That is why they cure anaemia, rheumatism, neuralgia, kidney trouble, indigestion and the secret ailments of women and girls. Sold by medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

He (on his knees)—"Darling, I love you with all my heart, with all my soul, and with all the strength of my being." She—"Are you in earnest, Clarence?" He [reproachfully]—"In earnest? Do you think I am bagging my trousers in this way for fun?"

A BROAD STATEMENT

This announcement is made without any qualifications. Fem-Roid is the one preparation in the world that guarantees it.

Dr. Leonhardt's Fem-Roid will cure any case of Piles. It is in the form of a tablet.

It is the only pile remedy used internally.

It is impossible to cure an established case of Piles with ointments, suppositories, injections, or outward appliances.

A guarantee is issued with every package of Dr. Leonhardt's Fem-Roid, which contains a month's treatment.

Go and talk to your druggist about it.

The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

"Why, Clara, you look radiant! What has happened?" "I've just received an invitation to a wedding." "Well, there's nothing particular in that to go into raptures over." "Yes, but it happens to be my own," and she showed the new engagement-ring.

Doctored Nine Years for Tetter.—Mr. James Gaston, merchant, of Wilkes-barre, Pa., writes: "For nine years I have been disfigured with Tetters on my hands and face. At last I have found a cure in Dr. Agnew's Ointment, it helped me from the first application, and now I am permanently cured."—135.

"Yes," said the fair young girl, "every body says I'm just the picture of 'mammy.'" "Well," replied the gallant youth, "you're certainly a flat-bellied picture."

THE JAPS did it. They supplied the mental food in the "D & L" Mental Master, which cures instantly backache, headache, neuralgia, rheumatism and sciatica.

This is a delicate way of putting it, isn't it? "My dear," he said to his wife at table, "I begin to think there are a few misprints in your cookery book."

A worthy old farmer, who thoroughly detested taxes and tax-gatherers, was once called on by a collector a second time for taxes he had paid, but for which he had mislaid the receipt; and, as he told the story to a friend, he exclaimed:—"Would you believe it, sir, the fellow began to abuse me!" "Well," said his friend, "what did you do?" "Do? Why, I remonstrated with him." "And to what effect?" "Well, I don't know to what effect; but the poker was bent!"

will be restored to his devoted mistress when spring develops.

NINE MURDERS FOR MONEY.

Father and Brother Among Victims of Assassin.

The whole of South Africa has been talking of nothing but the appalling revelations which have followed up the disinterment of the body of a farmer named Schaefer, which was found buried in a fowl house on the premises of the murderer, Pierre Basson, near Cape Town.

It is now established that Basson, who shot himself on seeing his victim's body exhumed, is responsible for at least nine murders, two of his victims being his father and his brother. Basson was only 25 years old at the time of his death. The motive was in every case the same. The murderer selected a victim who was pressed for money, lent him a fairly large sum, and obtained his insurance policy as a guarantee of payment.

There seems little doubt that he was born a criminal of the worst type. His father, a fine type of the Cape Huguenot, disapproved of his son's vicious tendencies when the latter was only 12 years old. It is related that he once roasted a cat alive over a slow fire, and throughout his childhood was guilty of numerous acts of atrocious cruelty to animals.

His father, a man of robust health, who had never had an illness in his life, died suddenly on Oct. 15, 1900. No post-mortem was held, though the extraordinary suddenness of the death caused much comment, and there is little doubt that he was poisoned. He was insured for \$42,000, the whole of which went to Pierre Basson.

Early in 1903 Basson returned home one day from a fishing expedition, and announced nonchalantly that his brother Jasper had been washed off a rock and drowned. Jasper was insured for \$17,500, and it is remarkable that nearly the whole of this amount was in an accident policy, so that if Jasper had died a natural death Pierre would not have benefited.

KAFFIRS AND SLAVES.

Origin of Two Words is an Interesting Bit of History.

Very curious has been the history of the word "kafir." The French explorers who have been opening up the Sudan and Sahara find that they are called kufs by the Mohammedans, while Sir Henry Rawlinson once said that the loveliest Oriental lady he had ever seen was a kafir slave at Kabul. When she had loosened her golden hair she could cover herself completely as with a veil. This name of kafir is as world-wide as Islamism, for it is the name of "unbeliever" applied by true Mohammedans to those that refuse the faith. The Portuguese found it applied to the negroes of East Africa by their Arab predecessors, and handed it on to the Dutch and to the English. The kafir slave in Kabul belonged to one of those black-clad mountain tribes in the heart of Afghanistan who till 1895 defied their Moslem neighbors, and on their dizzy precipices gazed on their idolatry. These Afghan kaffirs claim to be descended from the Greeks who came with Alexander in his conquest of the east.

A remarkable instance of verbal degradation is the word "slave." Its original, the Russian "slava," meant glorious, being etymologically akin to the English word "glory," and was proudly taken as their name by the Slavonic people. But when the Germans reduced hosts of the Slavs to servitude their name, from malice or accident, as Gibbon says, became synonymous with "servile." It retains no more suggestion of its racial origin now than does "ogre," which is really "Hungarian," from a confusion of the Magyars with the Huns, and of both with the terrible Tartars.

BRAINS FOR TWO.

Clarence—Miss Sharpun has brains enough for two, bah Jove!

Florence—Then why don't you marry

ever occurred to me that Mr. Burne could be other than he represented himself. If I were to try and tell you how glad I am that things are as they are I couldn't do it! And he laughed, and coughed, and nodded to one and the other. "No need to trouble about that money now, you know, Lord Ferndale," and he chuckled.

"The money the late earl left to Norah?" said Lord Ferndale.

"Yes, yes!" assented the old man. "We shan't dispute the will now. Lord Arrowdale won't be troubled by us. He may keep it and welcome."

Cyril heard and looked round.

"It is not Lord Arrowdale's to keep, Mr. Petherick," he said, with a laugh. "Will you take charge of this for Lady Arrowdale, please?" And he handed him the long blue packet in which he had inclosed the marriage certificate. "Open it, please."

Mr. Petherick opened it, and hastily read the paper inclosed. Then he held out his hand with an impulse of satisfaction and approval.

"It is a deed of gift to Lady Norah of all that the will gave her!" he exclaimed. "My lord," and he bowed to Cyril with an almost solemn formality, "permit me to express my conviction that in the present holder of your ancient and honorable title your house has a worthy and noble representative."

There was more handshaking and talking, but at last Lord Ferndale reminded the rest that dinner was waiting—and spoiling—and Cyril, relinquishing Norah to him, gave his arm to Lady Ferndale.

As the door opened they saw that the hall was full of servants. The butler had borne the startling news of Cyril's identity to the servants' hall, and in a flutter of intense excitement, they had gathered together to give him and his beautiful wife a welcome.

Not for many years had the vaulted roof rung with such cheers as rose when the party came out from the drawing-room into the hall, and it was not until Cyril had led Norah forward, and spoken a few heartfelt words of greeting and thanks that the party were permitted to go in to dinner.

And long before the meal was over was heard the buzz and murmur of an excited crowd gathered on the terrace outside, for the news had spread through the village like wildfire, and the excited people had hurried to the Court to ascertain for themselves whether the story were true; whether, indeed, Mr. Cyril Burne were the real Earl of Arrowdale, and beautiful Lady Norah, whom they had learned to love, the countess; and it was not until Cyril had taken Norah out onto the terrace and presented himself and her to the cheering crowd that it would consent to bethink itself to the merrymaking for which the household had made hasty preparations.

It was a night of wild excitement. Some ready-witted individuals rushed off to the church and set the bells ringing, and others hurriedly built up a huge bonfire on the green, and soon the flames were spreading sky high, and helping the bells to proclaim the home-coming of the young earl and his bride.

With her arm within her husband's, and surrounded by their friends, Norah watched the red reflection of the great fire and listened to the pealing of the bells with feelings of profound joy and gratitude; joy so perfect and absorbing that it is little wonder she forgot for the moment the existence of such a person as Guildford Berton, of the mystery attending the disappearance of Becca South.

Indeed, not one of them, excepting Jack, gave a thought to the man whose base scheming had so nearly wrecked the life of the beautiful girl whom they all loved. It was only he who remembered that Guildford Berton had still to be reckoned with.

CHAPTER XL.

That evening, an hour before the romantic arrival of the Earl and Countess of Arrowdale, Guildford Berton had wandered up the avenue and gazed up at the great house. He had accepted Lady Ferndale's promise, and had waited as she had advised him. What could she have intended to imply, he asked himself, but that Norah would come round to his terms, and was only asking for a few days' grace? What could she do but

would arrive to dinner.

Guildford Berton hesitated a moment, then said:

"And is Lady Norah—it is not known when she returns?"

The man shook his head, doubtless wondering why Mr. Berton did not go up to the Court and ask the question of Mr. Petherick.

"I can't say, sir; I haven't heard that she is expected, even."

Guildford Berton walked on and reached the cottage. It was dark and gloomy and forbidding as usual, and he threw himself into the armchair beside the neglected fire, which was smoldering sullenly in the small, pinched grate, and mused.

How long would it be before Norah returned and they could be married? How long would it be before he could leave this place, which he hated with a fear and loathing beyond words, and take her away with him? His wife! His wife! The vision dispelled for a space the gloom which enveloped him, and he sat muttering.

"Lady Ferndale is at the Court; I will go and speak to her. I'll ask her where Norah is, and how long it will be before she comes back. She cannot refuse to tell me. Yes, I'll go to the Court to-night. What does it matter to me that this young fool and vagabond has come? I want nothing of him, I want Norah! Norah! Norah! I will go up to-night—to-night!"

Then he crouched lower over the fire, and warmed his hands at the feeble flame which he had succeeded in rousing, and suddenly he was startled by the crash of bells. He rose, with that look on his face which the man wears whose brain is beginning to soften from constant brooding, and as he looked through the window a tongue of fire shot up and lit up the room.

For a moment he stared, wild-eyed, then he realized what had happened.

"Curse the fools!" he muttered with a snarl. "They'll wish they were tolling for his death or had got him on the top of a fire, before many months have gone," and he flung himself into the chair again.

But presently, as if the voices shouting and cheering drew him in spite of himself, he rose, and, flinging on his coat, took up a soft wideawake hat, and, carefully locking the gate, went out.

By this time the light from the huge bonfire was casting a mellow glow over the village, and its reflection, red and blithe, could be seen in those windows

The Better Way

The tissues of the throat are inflamed and irritated; you cough, and there is more irritation—more coughing. You take a cough mixture and it eases the irritation—for a while. You take

SCOTT'S EMULSION

and it cures the cold. That's what is necessary. It soothes the throat because it reduces the irritation; cures the cold because it drives out the inflammation; builds up the weakened tissues because it nourishes them back to their natural strength. That's how Scott's Emulsion deals with a sore throat, a cough, a cold, or bronchitis.

WE'LL SEND YOU A SAMPLE FREE.

SCOTT & BOWNE, Chemists, Toronto, Ont.

of the Court in which there happened to be no light.

As he entered the village street he found a crowd of people tending toward the Court, as a stream tends to the sea. He joined them half mechanically, and, in their midst, presently found himself on the lawn just beneath the terrace.

A stream of light poured from the dining-room windows onto the broad marble pavement of the terrace, and fell on the upturned faces of the crowd; and the red glow from the bonfire poured from behind them and seemed to mingle with the light from the window.

The crowd was shouting all round him, and in the overstrained condition of his nerves he could not distinguish what they were saying.

"What is it the fools are yelling for?" he demanded of a man who stood beside him, and who was, with the exception of himself, the only silent person in the crowd.

The man started slightly as he heard Guildford Berton's hard, sarcastic voice, and emitted a low whistle of surprise.

"Hullo!" he said, close to his ear, for the noise was almost deafening where they stood, "you here! I should have thought you would have made yourself scarce by this time, now the game's up. Do you mean to say you don't hear what they are shouting for? They are calling for the earl and his wife! Take my advice, and follow my example," and with a grin he moved away sideways and was lost in the crowd, at the moment Guildford Berton recognized him—Furlong.

At another time the man's sudden appearance—and disappearance—and sinister warning would have had some effect upon Guildford Berton; but a strange mood possessed him that night, and it may almost be said that he actually forgot the man the moment he lost sight of him. But the words, "the earl and his wife!" haunted him.

"Is the earl married?" he asked of a woman who had taken Furlong's place at his side.

She stared at him.

"Don't you know that—" she began, then she broke off to exclaim, "Why, it's Mr. Guildford, bea'n't it, sir?"

He stifled an oath, and got away from her and into the centre of the crowd, pushing nearer and nearer the terrace.

"His lordship's at dinner, and won't come out, bless you!" said a man.

"Oh, yes, he will; at least she will, bless her heart!" was the retort; and Guildford Berton, wondering dully why the new countess, who must be a stranger, should seem so well known and already popular, pulled his soft hat further over his face, and waited.

Presently a roar rose from the crowd; the dining-room windows had been flung wide open by a couple of footmen, and a stalwart man stepped out onto the terrace, with a lady on his arm.

The light from the bonfire fell full upon his face and hers, and Guildford stared and gasped, and then laughed hoarsely. He must be going mad for certain, to imagine that these two must be Cyril Burne and Norah. Yes, that was it; he was losing his reason.

Then, as if in a dream, he heard the gentleman speak. The words fell upon his ears as if they had been spoken by some one a mile off, and yet he caught every one distinctly. What was he saying, this man who looked like that hound Cyril Burne?

"Thank you, my friends, one and all, for the kind welcome you have given us. I trust none of us will ever forget this night, and that henceforth we are neighbors in every sense of the word. Thank you again and again, not only for myself, but for my dear wife, whom all of you know, and whose heart is full of gratitude for your kind wishes."

A mighty cheer rose, deafening, thrilling. And almost before it had ceased Guildford Berton clutched the arm of the man pressing against him.

"Who—who is that?" he demanded, hoarsely.

The man stared at him, and shook his hand off impatiently.

"That fellow, as you calls him, master, is the young earl, the gentleman as was Mr. Burne, the artist; and that

THERE IS NOW A MASS OF PROOF

THAT LUMBAGO IS ALWAYS CURED
BY DODD'S KIDNEY PILLS.

Quebec Man Cured his Kidneys with
Dodd's Kidney Pills, and his Lumbago
Vanished.

Quebec, P. Q., April 2.—(Special).—John Ball, a bricklayer, residing at 57 Little Champlain Street, this city, has added his statement to the great mass of proof that Lumbago is caused by disordered Kidneys, and consequently easily cured by Dodd's Kidney Pills. Mr. Ball says:

"I was troubled with Lumbago for two years. I could not work. I had to get up at nights to urinate so often that my rest was broken. I read of cures by Dodd's Kidney Pills and made up my mind to try them. After the first box I could see and feel a change. Three boxes cured me completely."

Lumbago, like Rheumatism, is caused by uric acid in the blood. Uric acid cannot stay in the blood if the Kidneys are working right. Dodd's Kidney Pills make the Kidneys work right.

PROFESSIONAL GOSSIPS.

In China elderly ladies are regularly employed as gossips, and they are paid well. It is usual for them to go to the best houses, beating a drum to announce their arrival, and to offer their services to the lady as entertainers. If their offer is accepted, they sit down and tell the latest news, the choicest scandal, and anything that they think may interest their hearers. Should their stock-in-trade prove very delectable they most likely go away with a very handsome present in addition to their regular fee, which is at the rate of about 1s. an hour. Some of these gossips have a large number of clients, whom they visit at regular intervals.

REFLECTION.

The photographer was thoughtfully surveying a row of pictures he had taken of a number of patrons.

"There is no denying the fact," he muttered, "there are some ugly features in this business."

How long have your Kidneys been sick?—Here's South American Kidney Cure evidence that's convincing: "I am a new man—three bottles cured me." "Five bottles cured me of Diabetes." "I never expected to be cured of Bright's Disease, but half a dozen bottles did it." "I thought my days were numbered, but this great remedy cured me." It never fails.—134.

"My dear Miss Kempton," remarked Mr. Cliftonville, meeting the young lady by chance, "your new hat is simply divine. I crossed the street especially to get a better view. However, I shouldn't like to sit behind it at the theatre." "But, then, you needn't," retorted Miss Kempton, with an arch smile; "for you are welcome to sit beside it." What could the poor boy do?

DO NOT ALLOW yourself to become alarmed because you have lost your appetite and are losing flesh, but commence taking "Ferrovin" the best tonic. It will build you up quickly.

To avoid "catching" cold keep your room at an even temperature, don't sit with your back to a warm fire, and avoid draughts.

Cure the Nerves and you will control almost every disease that flesh is heir to. The foundation of health is a perfect stomach and good digestion—these right

PEDLAR'S STEEL CEILINGS

Two thousand designs suitable for all classes of work such as Churches, Schools, Stores, Halls. Also special designs for Houses, Kitchens, Dining-Rooms, etc. Nothing has ever been devised to equal Pedlar's Steel Ceilings for Farm Houses. Cheap as lath and plaster and will never crack or fall off.

Avoid Accidents by Using Pedlar's Steel Ceilings.

Made to fit any size room and can be nailed on by any mechanic. Shipped from our warehouses painted all ready to apply.

LANDS In Western Canada

Two cornering sections, selected lands in Saskatchewan, only 5 miles from two railways, C.P.R. & G.T.P. Strong soil, 20 per cent. plough land, spring creek, no sloughs.

honestly.
The man started at him, and shook his hand off impatiently.
"That fellow, as you call him, master, is the young earl, the gentleman as was Mr. Burne, the artist; and that young lady is his wife, Lady Norah as was. Hurrah! Hurrah! One more cheer, boys! Hurrah!"

(To be continued).

LIGHT FOR 184 MILES.

Splendid as the illumination of Rangoon was, nothing in all the Prince of Wales' tour of India has approached the magnificent conception which was carried out by the railway authorities. Both sides of the line to Mandalay were decorated with a string of lamps burning in transparent petal-like cups of tinted paper. Between every other pair a native stood with a great double torch, and this illumination was continued along the line without intermission till daylight shone upon the royal train. The distance thus covered by the double line was 184 miles, and, it may be added, to show the enormous preparation involved that each Burman stood 20 yards only from his neighbor.

HEALTH IN THE HOME.

Baby's Own Tablets are equally good for little babies or big children. If a child is suffering from any of the minor ills of childhood a few doses of the Tablets will cure it. And an occasional dose to the well child will prevent sickness. Mrs. A. Mercier, Riviere Ouelle, Que., says:—"My baby was cross, irritable, did not sleep at night and did not seem to thrive, but since giving her Baby's Own Tablets all this is changed. She now eats well, sleeps well and is growing fat. The Tablets have proved a blessing to both myself and the child." So say all mothers who have used this medicine. Baby's Own Tablets are sold by all druggists, or you can get them from The Dr. Williams' Medicine Co., Brockville, Ont., at 25 cents a box.

A STUDENT'S MANIA.

An Extraordinary Case Aired in A Berlin Court.

A most extraordinary story is told in the Central Criminal Court of Berlin, Germany, the other day, by Robert Stoss, a student, 22 years of age, who was charged with causing bodily injury, public violence and theft. These three charges were represented by Stoss, having cut off the hair of sixteen young girls in the streets of Berlin.

Evidence was given that Stoss had passed all his examinations with honors and that he had special talent as a mathematician. He was an industrious, well-behaved student.

When questioned by the presiding judge, Stoss said that his taste for beautiful, long hair was so intense that he could not resist it. He began cutting off girls' hair the day the Crown Princess made her public entrance into Berlin.

"I cannot explain why I could not resist temptation to cut off girls' hair," he said. "I perpetrated the second offence in November last, when the King of Spain arrived in Berlin, and the girl whose hair was cut off did not notice what had been done."

"What did you do with the hair?" asked the judge.

"I took it home and kept it in a box labeled 'Reminiscences,'" replied Stoss. "If you were liberated would you promise never again to cut off girls' hair?" asked the judge.

"I cannot promise; I cannot say whether I could resist the temptation," was the reply.

Stoss stated that he had tied each trophy with a ribbon and labeled it with the date on which he obtained possession of it.

The court discharged Stoss, his relatives promising to place him under restraint.

MAKING PAYMENT.

"All I have in the world I owe to my wife," murmured the millionaire, who was about to fail, "and I guess I better square up with her right now."

And he proceeded to put his possessions in his wife's name.

Cure the Nerves and you will control almost every disease that flesh is heir to. The foundation of health is a perfect stomach and good digestion—these right and you are insured plenty of nerve force, perfect circulation and pure blood. South American Nerve is a wonder-worker—gives nerve force—makes rich blood. It's a veritable "Elixir of Life."—132.

Mrs. Green (who thinks of engaging)—"But is the girl honest? Can she be trusted?" Mrs. Brown (the girl's former mistress)—"You need not be in the least alarmed. She is perfectly honest. All the time she was with me I never knew her to take a thing—not even my advice as to how things should be done."

MONTH AFTER MONTH a cold sticks, and seems to tear holes in your throat. Are you aware that even a stubborn and long-neglected cold is cured with Allen's Lung Balm? Cough and worry no longer.

The Lady: "Pa wants us to wait ten years before we marry; but that will not matter, dear George. You will still be young then." The Escort: "Yes, my dear; but it was not of myself I was thinking."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

He: "I'd consider it a great pleasure to talk to a woman like Miss Gassaway." She: "What! Why, she'd talk you to death." He: "I said I'd consider it a pleasure to talk to her, not to listen to her."

A SKIN THAT BURNS with eczema, and is covered with eruptions that discharge a thin fluid, may be made smooth and slightly with Weaver's Ointment. But this external remedy should be used in conjunction with Weaver's Syrup.

Peach: "Mr. Riche says very bitter things about those lazy sons of his, but his wife is always making excuses for them." Bloom: "Yes, she makes excuses, but he has to make allowances for them; that's what angers him."

No Heart too Bad to be Cured.—Testimony could be piled high in commendation of the wonderful cures wrought by Dr. Agnew's Cure for the Heart. No case stands against this great remedy where it did not relieve the most acute heart sufferings inside of thirty minutes. It attacks the disease in an instant after being taken.—131.

"And why don't you like her, Mabel?" "Because she talks so much scandal. I was dying to tell her about Mrs. Jones's goings-on, and about the awful way Mr. Jenkins treats his wife, but she never gave me a chance to get a word in."

For 33 Years

Shiloh's Consumption Cure, the Lung Tonic, has been before the public, and this, together with the fact that its sales have steadily increased year by year, is the best proof of the merit of

Shiloh

as a cure for Coughs, Colds, and all diseases of the lungs and air passages. Those who have used Shiloh would not be without it. Those who have never used it should know that every bottle is sold with a positive guarantee that, if it doesn't cure you, the dealer will refund what you paid for it. Shiloh

Has Cured

thousands of the most obstinate cases of Coughs, Colds and Lung troubles. Let it cure you.

"Last winter I coughed for three months and thought I was going into Consumption. I took all sorts of medicines, but nothing did me any good until I used Shiloh's Consumption Cure. Four bottles cured me. This winter I had a very bad cold, was not able to speak, my lungs were sore on the side and back. Six bottles of Shiloh made me well again. I have given it to several people, and every one of them have been cured."—D. Joseph, St. Francis, Que.

WIDESPREAD DEVASTATION

New Craters in Vesuvius Belching Forth Subterranean Fire.

A despatch from Naples says: The eruption of Vesuvius, which on Saturday reached a magnitude placing it among the historic displays of Vesuvian fury, increased in violence on Sunday, and in the evening threatened to become even more terrible. The earth for miles around quaked repeatedly, the shocks being felt in Naples, and greatly alarming the citizens, although they caused no harm. Incessant rumblings, groanings and thunderings accompany the repeated explosions at the crater, whence there is an immense discharge of lava, cinders and hot rocks. Ashes are falling over a large part of Southern Italy, even to the east coast. These and the dense smoke on Sunday evening blotting out all sight of the mountain, the Island of Capri and the Town of Sorrento from Naples. During the day many areas around the mountain were in darkness.

The towns and villages have been generally abandoned. Hence the extent of the damage is unknown fully. Refugees brought from Torre Annunziata in artillery wagons on Sunday evening reported that the lava stream, striking a villa on the outskirts of that town, divided, one current flowing in the direction of Pompeii, while the other threatened to destroy Torre Annunziata. It has since been reported that the lava reached the town, sweeping over the barriers that had been erected with the utmost energy by the military engineers. The latter, together with all the officials and the whole population, were compelled to abandon the town. The prisoners in the city jails were placed on boats and brought to Naples. No loss of life is reported at Torre Annunziata, but at San Giuseppe a church and several houses had been wrecked, apparently by an earthquake. Several persons were killed and injured. The remainder of the populace fled in a panic.

TOWNS AND VILLAGES ABANDONED

Ottajano, Poggio, Marino, Somma, and other towns and villages have been abandoned. Lava is flowing several feet deep through the streets of Ottajano, and many houses have fallen.

The latest reports from Pompeii state that a lava current 600 feet wide and 21 feet deep is rapidly nearing that place. The cemetery and some houses north-west of the town have been destroyed.

Bosco Reale is also threatened. The railway around the mountain has been wrecked in one or two places. The destruction of the crops and the ruination of cultivated soil will involve tremendous losses.

The observatory, on the northwest slope of the volcano, was held by Dr. Matteucci, the director, and his staff, long after a general observer would have thought it possible. Eventually the place had to be abandoned, and it is now destroyed. The funicular railway and Cook's Hotel have been wrecked.

The Village of Bosco-Trecase was buried Saturday by the lava which flowed from the crater formed April 2. The inhabitants abandoned it in time to save their lives. They had lingered in the hope of saving their belongings, but the destroying stream advanced on them so fast that they finally fled in terror, leaving their possessions behind.

The eruption became so violent on Saturday that the authorities ordered the inhabitants of Bosco-Trecase to leave their homes and retire from the zone of danger. The town had a population of about 10,000, and was the nearest one of importance to the crater, lying between the volcano and Pompeii. The village was then in danger of destruction by the stream of lava which was flowing down the south side of the mountain, and fine sand was falling upon it in great quantities.

APPEAL FOR AID.

An appeal for aid was sent to the government by the Mayor. He asked for troops and artillery waggons to assist in removing the inhabitants and their valuables to a place of safety.

New craters have opened in the sides of the mountain, some of them opposite Naples. The lava issuing from the new crater which was formed on April 2 has now divided into two streams. One of these is flowing south-east toward Ferzigno over the old lava bed of 1834, and is not causing any damage. The other is flowing southward over Bosco-Trecase and the neighboring vineyards.

The peasants are holding services of intercession, addressed especially to St. Anne, the patron saint of Naples. The detonations in the crater continue, and are of the most violent character. There are frequent electric flashes.

LEADING MARKETS

BREADSTUFFS.

Toronto, April 10. — Flour—Exporters are paying \$3.65 for 90 per cent. Ontario patents, buyers' bags. Manitoba, \$4.30 to \$4.50 for first patents and \$3.90 to \$4 for seconds.

COUNTRY PRODUCE.

Butter — The market continues steady. Creamery — 25c to 26c do solids — 27c to 28c Dairy lb. rolls, good to choice, 18c to 19c do large rolls — 17c to 18c do medium — 16c to 17c Cheese — 14c for large and 14½c for twins.

\$4.25; stockers, \$3.50 to \$3.85; stock calves, \$3 to \$3.60 per cwt. Calves were easy at \$3 to \$6. Export ewes, \$5.25 to \$5.75; culls and bucks, \$4.50 to \$5; grain-fed lambs, \$7.25 to \$7.75 per cwt; Spring lambs, \$6 to \$7 each.

Hogs were steady and unchanged. Quotations were:—Selects, \$7.25; fats and lights, \$7 per cwt.

A MONSTER'S CRIME.

Horrible Death of a Five-year-old Girl at Montreal.

A Montreal despatch says: In the finding of the body of Ida May Ahern, a child of five years, lying naked and lifeless in a thicket at Cole St. Paul on Thursday morning, there came to light so piteous and so fiendish a crime that the whole island of Montreal is shocked. The horror of it is intensified by the thought that a being of such vicious tendencies could have passed through the community almost unnoticed until he had left the unmistakable marks of his unutterable brutality. Not only had the little girl been lured away from her homeward course after school and subjected to a horrible shame, but blue

ONTARIO LEGISLATURE

WHAT THE LEGISLATURE AT TORONTO IS DOING.

WOMAN SUFFRAGE.

Mr. Smith, of Peel, moved the second reading of his amendment to the Franchise Act, which provides that unmarried women and widows, who are entitled to vote in municipal elections, shall have votes for the Legislative Assembly, subject to the same conditions which govern male voters. He hoped that the House would give the measure a liberal and gallant support.

SALES OF CHATELLETS.

Mr. Lucas' bill to amend the Act respecting conditional sales of chattels was warmly supported by the members representing farming communities, but the Attorney-General could not give it his sanction, as in its present shape it would legalize violations of certain contracts. The main feature of the bill is that lien notes, time receipts, contracts for conditional sale of chattels or other contracts should be null and void when they contained provisos, conditions or stipulations that actions or suits in connection with them should be tried in any particular place.

Mr. Hoyle suggested that the courts should be authorized to fix the place of trial and this suggestion will be discussed when the measure comes before the Legal Committee.

MEMBERS TOO DILATORY.

Mr. Pratt was not prepared to move the second reading of his bill to regulate proprietary and patent medicines, and the Premier took advantage of the fact to read the members a brief lecture for their dilatoriness. There were some bills, he said, which had been on the order paper for five weeks, though there was not the shadow of an excuse for the delay. The Government, he declared was doing all it could to expedite business and he thought the members should lend all the assistance they could.

ENQUIRY OF MINISTRY.

Mr. Gage — Is the Government aware that Mr. Joseph Phillips, the president of the Toronto Life, is a prisoner on the charge of misusing funds? That the two other directors of the company have discredited themselves by their evidence at his trial? Also the clerks have shown an absent-mindedness and forgetfulness quite incompatible with competent work? Has the Government thought of appointing some reliable, competent person to take charge of the company's affairs?

ESTIMATES PASSED.

Consideration of the estimates was resumed, a large number of votes being passed, including a total of \$412,395 for public buildings, \$95,260 for public works, \$212,410 for colonization roads, \$427,525 charges on Crown lands, \$180,172 for miscellaneous.

ENGINEERS' BILL.

The Stationary Engineers' Act was reported by the special committee. The bill provides that every engineer operating any steam plant of 50 horse power or over, must pass an examination to be approved by the Lieutenant-Governor-in-Council, who fixes the fees, entitling him to a certificate. This, however, is not to apply to steam heating plants in schools and public buildings, where the pressure rarely exceeds ten horse power. The association must make a return to the Government annually showing the number of members, applicants, those passed and plucked, together with the reasons for the latter. Every engineer of two years standing, who can show a certificate of good character, is to be admitted to the Association of Engineers. In case of illness of the engineer, employers must allow 30 days before taking on another permanently, using a substitute in the meantime. This also applies to the case of an engineer leaving his employer. Appeals from the Board of Engineers are to be made to the Minister of Agriculture. The penalty for violations of the

DOMINION PARLIAMENT

NOTES AND PROCEEDINGS OF THE OTTAWA HOUSE.

ST. LAWRENCE ACCIDENTS.

Mr. Bergeron was told by Mr. Brodeur that 122 accidents had happened on the St. Lawrence below Montreal since 1890. Of these 36 had been in the pilotage division of Montreal, and 43 in that of Quebec.

SOUTH AFRICAN WAR.

Mr. Kemp learned from Sir Frederick Borden that 224 Canadians had been killed in the war in South Africa, in addition to Major Howard, and 20 others, who at the time of their deaths had ceased to belong to Canadian corps but were still in service in South Africa. The attention of the Government had not been called to the fact that certain seriously disabled soldiers had received no recognition from the Imperial Government.

BEAUTY OF NIAGARA FALLS.

Mr. Cockshutt was informed by Sir Wilfrid Laurier that 14 memorials had been received from Canadian organizations or citizens and 407 from Americans in favor of the preservation of the beauty of Niagara Falls.

SUPPRESSING RIOTS.

Col. Hughes was told by Sir Frederick Borden that the cost to the country of the riots at Sydney, C.B., a year ago had been \$7,809, of which only \$2,500 had been paid by the municipality up to date, and the Department of Justice had been instructed on April 27, 1907, to take legal proceedings against the municipality. There were three municipalities similarly in arrears for the service of troops to suppress riots.

PROVINCIAL REPRESENTATION.

Mr. Hughes (King's) moved a resolution that an address be presented to the King, praying for the submission to the Imperial Parliament of an amendment to the British North America Act, preventing any province of the Dominion from ever having fewer representatives in Parliament than it was given when it entered Confederation.

MILITARY BANDS.

Col. Hughes was informed by Sir Frederick Borden that the Government regulations forbade any military band in uniform to take part in a demonstration or procession for party or political purposes.

FOOD SUPPLIES.

Mr. Macdonell was told by Mr. Emerson that the food supplies for the survey parties on the Ontario section of the Transcontinental Railway were not purchased by the Government, but by the Transcontinental Railway Commission, through a purchasing agent who obtained them at most favorable wholesale rate prices. No complaints had been received regarding the supplies. The purchasing agent examined the supplies and tested them before shipment and they were also examined by the commission's agents at the points of destination.

LORD'S DAY BILL.

Mr. Foster asked Mr. Fitzpatrick to plain the intention of the clause referring to the continuance of trainloads of cattle to their point of destination on a Sunday. What was meant by the "destination"? If it meant the next place where the train could be naturally held up, it would be very objectionable, but if it meant the ocean point, no objection could be found.

Mr. Fitzpatrick said the intention was that the point of destination should be the destination of the goods or cattle, not the destination of the train. Confusion might result from this clause, and it would be the duty of the Government to make the point absolutely clear.

Another difficulty might arise regarding the arrival of perishable fruit at its point of destination on a Sunday. Fruit could not be left on the siding all day long. He would invite the attention of all the members of the House to those

do solids 20c to 24c
 Dairy h. rolls, good to choice, 18c to 19c
 do large rolls 17c to 18c
 do medium 16c to 17c
 Cheese — 14c for large and 14½c for
 twins.
 Eggs — New laid are quoted at 16c
 and storage at 13c.
 Poultry — Choice dry plucked turkeys
 are up to 16c to 18c, fat chickens 1c
 higher at 12c to 13c, thin 7c to 8c; fat
 hens, 8c to 9c, thin 6c to 7c, ducks 12c
 to 13c.
 Potatoes — Ontario selling at 65c to
 75c per bag on track here, and 75c to
 85c out of store; eastern, 70c to 80c on
 track and 10c more out of store.
 Baled Hay — \$8 to \$8.50 for No. 1
 timothy, and \$6 for No. 2 in car lots
 here.
 Baled Straw — \$5.50 to \$6 per ton for
 car lots on track here.

MONTREAL MARKETS.

Montreal, April 10. — Grain — Good
 demand by cable for Manitoba spring
 wheat.
 Oats — No. 2, 39½c; No. 3, 38½c; No.
 4, 37½c.
 Peas — 76c f. o. b. per bushel.
 Barley — Manitoba, No. 3, 49c to
 49½c; No. 4, 48c to 48½c; Ontario, 46c
 f.o.b. 73 per cent. points.
 Corn — American mixed, 51½c; No.
 2 yellow, 52c, ex-track.
 Flour — Manitoba spring wheat pat-
 ents, \$4.50 to \$4.60; strong bakers', \$4
 to \$4.10; winter wheat patents, \$4.25 to
 \$4.50; straight rollers, \$4 to \$4.10; do.,
 in bags, \$1.75 to \$1.85; extras, \$1.65 to
 \$1.75.
 Millfeed — Manitoba bran, in bags,
 \$19 to \$20; shorts, \$20 to \$21 per ton;
 Ontario bran, in bulk, \$18.50 to \$19.50;
 shorts, \$20, milled mouille, \$21 to \$22;
 straight grain mouille, \$25 to \$27 per ton.
 Rolled Oats — Per bag, \$1.80 to \$1.90
 in car lots, \$2 to \$2.05 in small lots.
 Cornmeal — \$1.30 to \$1.40 per bag.
 Hay — No. 1, \$8 to \$8.50; No. 2, \$7 to
 \$7.50; clover, mixed, \$6 to \$6.50, and
 pure clover, \$6.
 Cheese — New-made fodder cheese
 sold at 12c to 12½c in country. Local
 quotations unchanged at 13c to 13½c.
 Butter — New milk butter is selling
 well at 22½c to 23c; old creamery, good
 quality, is bringing 21c to 21½c; infer-
 ior grades, 19c to 20½c.
 Eggs — Fresh receipts were quoted at
 16½c to 17c.
 Potatoes — Per bag of 80 pounds, 60c
 to 65c.
 Honey — White clover, in comb, 13c
 to 14c per pound section; extract, 8c to
 9c; buckwheat, 6c to 6½c.
 Provisions — Heavy Canadian short
 cut pork, \$21.50; light short cut, \$20; Am-
 erican short cut, \$20; American cut clear
 fat back, \$20; compound lard 7c to 7½c;
 Canadian pure lard, 11½c to 11¾c; ket-
 tic rendered, 12½c to 12¾c; hams, 13c
 to 14½c, according to size; breakfast
 bacon, 15c; Windsor bacon, 15c; fresh
 killed abattoir dressed hogs, \$10.25 to
 \$10.50; country dressed, \$8.75 to \$9.25;
 alive, \$7.75 to \$7.85 for selects.

BUFFALO MARKET.

Buffalo, April 10. — Flour — Quiet
 and steady. Wheat — Spring unsettled;
 No. 1 Northern, 85c, carloads. Corn —
 Strong; No. 2 yellow, 51½c; No. 2 corn,
 50½c. Oats — Dull; No. 2 white, 35½c;
 No. 2 mixed, 34c. Barley and rye—No
 offerings.

NEW YORK WHEAT MARKET.

New York, April 10.—Wheat — Spot
 market firm; No. 2 red, 83c bid in eleva-
 tor, No. 2 red, 90c nominal, f.o.b. afloat;
 No. 1 northern Duluth, 89c f.o.b. afloat.

CATTLE MARKET.

Toronto, April 10.—Prices continued
 steady for butchers', but owing to an
 alleged weakness in the English market
 an easier tone was noticeable in export-
 ers'. Best exporters' were worth \$4.50
 to \$5.15; medium, \$4.50 to \$4.75 per cwt.
 Quotations for butchers' cattle were as
 follows:—Choice, \$4.90 to \$5.50; good
 loads, \$4.50 to \$4.85; medium, \$4.15 to
 \$4.45; good cows, \$3.50 to \$4.25; me-
 dium cows, \$3 to \$3.50; common cows,
 \$2.50 to \$3.25 per cwt. A straight load
 of butchers' were sold by Wilson,
 Maybee and Hall for \$5.50 per cwt.
 Short-keeps were quoted at \$4.30 to
 \$4.70; medium weight feeders, \$3.90 to

the community almost unnoticed until
 he had left the unmistakable marks of
 his unutterable brutality. Not only had
 the little girl been lured away from her
 homeward course after school and sub-
 jected to a horrible shame, but blue
 finger prints in the tender flesh show
 that the monster had not stopped at any
 ordinary violence. All the clothing, shoes
 and stockings, was stripped away and
 thrown into the basement of a
 church within a few hundred yards of
 the secluded spot where the outrage took
 place. A young woman saw the man
 climbing over the fence leading from
 the wood with the clothes in his arms,
 and several others saw him with the
 child, and are able to furnish a valuable
 description of his appearance.

Ira has been missing since Tuesday
 afternoon, having failed to return from
 school, and when her clothing was found
 in the church, the distracted mother
 identified it. That fact in a measure pre-
 pared the parent for the terrible reality
 she was soon to face. From the black-
 ness of this revolting crime a single ray
 of mitigation appears, and that is the
 evidence that the murderer was intoxica-
 ted at the time, and therefore not
 fully cognizant of the terrible deed he
 was committing.

Detectives from both the Provincial
 and city staffs have been detailed to
 work on the case. A number of private
 citizens are taking part in the search.
 It is believed that the murderer can
 scarcely escape, so well do all the de-
 scriptions agree.

MINERS ATTACK POLICE.

A Desperate Encounter Near Leth- bridge.

A Lethbridge despatch says: A se-
 rious clash between the striking miners
 and Mounted Police on guard at No. 3
 shaft of the Galt Mines, about two miles
 from town, was commenced on Thurs-
 day by the attempt of the police to ar-
 rest one of the strikers for objectionable
 conduct. A mob of over three hundred
 men and women attacked the officers,
 outnumbering the latter fifty to one, and
 a pitched battle ensued, the police using
 truncheons freely, while the rioters re-
 sorted to stones and missiles. Constable
 Fitzgerald was seriously, if not fatally,
 injured, and a number of the mob were
 badly clubbed. Reinforcements were
 hurried out from the barracks here and
 dispersed the crowd.

About the same time desperate dynamite
 outrages were perpetrated by the
 strikers or their sympathizers, who at-
 tempted to blow up the residences and
 families of Jos. Oros and Steve Ungary,
 non-union men. A charge was placed
 under the corner of the house of the
 former and exploded, wrecking that por-
 tion of the building and smashing the
 windows in the adjoining residence. A
 shot placed under Ungary's house did
 little damage, but about an hour later
 it was set on fire, and the police found
 the building saturated with coal oil.
 Further outbreaks are feared, and the
 police force here are utterly inadequate
 for such an emergency.

TOWER FELL IN RUINS.

Accident on the New Government Block at Ottawa.

A despatch from Ottawa says: At ten
 minutes to twelve on Thursday morning
 the new tower, which the Government
 has been building in the north-east angle
 of the western departmental block,
 known as the "Laurier tower," collaps-
 ed. No lives were lost, four or five
 workmen employed on it stepping off on
 to the roof of the main structure just in
 time. The loss probably will be \$25,000.
 Just before noon the building began
 to crack. Two men were on the roof
 and stepped off on to the roof of the
 main building. Two or three others
 were in the vacant upper room of the
 tower, and they took alarm and got
 away. Then a crack showed on the out-
 side, a piece the size of a man's body
 fell to the ground, the perpendicular
 crack grew larger, and then, with a loud
 crash, the walls fell outward, burying
 the derrick at the foot of a mass of
 stone, brick, rubble and ironwork.

days before taking on another perman-
 ently, using a substitute in the mean-
 time. This also applies to the case of
 an engineer leaving his employer. Ap-
 peals from the Board of Engineers are
 to be made to the Minister of Agricul-
 ture. The penalty for violations of the
 provisions of the act was reduced on
 the advice of Hon. Adam Beck, making
 the minimum \$10 and the maximum \$20.
RAILWAY BILL.

At one point in the discussion of the
 Railway Bill Premier Whitney made
 an important declaration of policy. The
 operation of electric railways on Sun-
 day was under consideration, and one
 or two members had expressed them-
 selves as adverse to giving extended
 powers in this direction, when Mr.
 Whitney made the following declaration
 on the question: "It is impossible to
 foreshadow what the situation may be
 in five years from to-day. In case the
 future should prove that electrical sys-
 tems will be doing the same amount of
 work and extending over the same dis-
 tances as the steam railways do now,
 the people of the province will have to
 decide whether they will allow those
 railways the same privileges on Sundays
 as the steam railways have to-day. Un-
 til that time comes the Government pro-
 poses that the present law shall remain
 as it is. It may be changed next year
 or the year after, whenever common
 sense may decide. That will be left to
 be decided by the force of public opin-
 ion. There is no immediate hurry or
 necessity for a change."

At another stage of the discussion the
 Premier stated that while electric rail-
 ways deserved every reasonable encour-
 agement, he would not take the responsi-
 bility—and he was certain no one else
 in the Legislature would—of giving
 Councils, which were elected one Janu-
 ary and might be turned out the next,
 the power of granting perpetual fran-
 chises. In his opinion, the time had
 not come when the public would justify
 the Legislature saying that any railway
 should have the right forever of going
 or a highway.

TO STOP LATE REGISTRATION.

Premier Whitney introduced a bill to
 repeal this law. He does not propose
 to put anything in its place, but simply
 to wipe out a measure which, he says,
 has proved itself a perfect nuisance. The
 law as it now stands applies only to
 cities and county towns, and the Pre-
 mier pointed out, was not in force in many
 places considerably larger than some of
 the county towns. The only apparent
 advantage of the system, he said, was
 that it permitted electors who were not
 on the roll to have their names insert-
 ed immediately before an election and
 after the lists had closed. The advantage
 of this, however, was more than
 doubtful, while the cost was very great,
 considering the meagreness of the re-
 sults. In future the municipal rolls will
 be taken as the sole basis of the voters'
 lists.

CHEAP SCHOOL BOOKS.

The Government, Hon. Dr. Pyne said
 in reply to a question by Mr. Dunlop,
 had the question of modern, cheaper
 and uniform school text-books under
 consideration, and hoped to make
 a statement on the question before the
 close of the session.

MR. JOSEPH PHILLIPS.

Hon. Mr. Foy, in reply to a question
 by Mr. Gagey, said that the Government
 was aware that Mr. Joseph Phillips,
 president of the Toronto Life, was a
 prisoner on a charge of misusing funds.
 As to whether they knew whether two
 other directors of the company had dis-
 credited themselves by their evidence at
 the trial, that clerks had shown an ab-
 sent-mindedness incompatible with good
 work, and whether the Government
 thought of appointing a competent and
 reliable person to take charge of the
 company's affairs, Mr. Foy stated that
 the Government was enquiring into these
 matters.

THE GOLDEN ROSE.

Pope Will Present it to King Alfonso's Fiancee.

A despatch from Rome to the Echo
 de Paris says that the Pope will this
 year present the Golden Rose to Prin-
 cess Ena of Battenberg, King Alfonso's
 fiancee.

ment to make the point absolutely clear.
 Another difficulty might arise regard-
 ing the arrival of perishable fruit at its
 point of destination on a Sunday. Fruit
 could not be left on the siding all day
 long. He would invite the attention of
 all the members of the House to these
 points. They should have a reasonable
 measure, such a measure as would have
 behind it the force of public opinion,
 and not a measure which the judges
 and other people might consider it their
 business to endeavor to evade.

INDEMNITY TO MEMBERS.

Among the bills introduced and read
 a first time was one to amend the Act
 respecting the Senate and House of
 Commons, by Mr. Fitzpatrick. This is
 to remedy an omission in the Act of
 last session regarding indemnity to
 members. It provides that in case a
 member who is in Ottawa becomes sick
 and is unable to attend the House he
 may be entitled to his indemnity.

GREAT WORK AT QUEBEC.

Several Hundred Workmen on the C. P. R. Improvements.

A despatch from Quebec says: It is
 learned that the Canadian Pacific Rail-
 way authorities have decided to adopt
 the port of Quebec, not only for the ter-
 minus of their passenger steamship
 service, but the whole of their Liver-
 pool service as well. At first it was
 planned that only the new big passen-
 ger ships Empress of Britain and Em-
 press of Ireland would stop at Quebec,
 the smaller vessels proceeding on to
 Montreal, as usual, but later it was de-
 cided that all vessels on the Liverpool
 service should make the port of Quebec
 the summer terminus. In order to meet
 the requirements the C. P. R. have en-
 tered into a scheme for vast improve-
 ments here, which have been com-
 menced within the past few days, and
 now several hundred workmen are en-
 gaged in making the roadway for new
 railway tracks on the north embankment
 wall of the Louise docks, constructing
 crib stringers and driving piles in the
 River St. Charles for the trestle work,
 etc. The company expect to complete
 this big undertaking, apparently, to
 meet the accommodation of their steam-
 ship service, by the first week of Aug-
 ust. In the meantime the point A
 Carey wharf, with its large freight shed,
 and the Great Northern grain elevator
 will be placed at the company's disposal,
 together with the breakwater landing
 and sheds until their own accommoda-
 tion is ready.

ACROSS THE ATLANTIC.

Messages Sent by the De Forest Wire- less System.

A Montreal despatch says: According
 to a message received here, Dr. Lee De
 Forest, inventor of the De Forest sys-
 tem of wireless telegraphy, cabled from
 Ireland on Friday that messages were
 coming in perfectly from the American
 coast station, thereby insuring success
 of the trans-Atlantic wireless. It had
 been known that experiments were be-
 ing made between these two points,
 which are a little more than three thou-
 sand miles apart, but as the instru-
 ments at this end were turned practi-
 cally for sending, it was not precisely
 known how much matter was being
 caught at the receiving station in Ire-
 land. Dr. De Forest's cable, however,
 has convinced the promoters that the
 project is now on a going basis between
 the two continents.

A NEW PENALTY.

Young Man Condemned to Abstain From Cigarettes for a Year.

A despatch from Philadelphia says:
 Judge Staples, in the Criminal Court
 c. Wednesday, imposed a peculiar sen-
 tence upon Charles Hollister, jun., of
 Belmont, N. Y. Hollister pleaded guilty
 to indictments charging false pretences,
 and Judge Staples suspended sentence
 on condition that Hollister make an
 oath that he would abstain from the
 use of cigarettes for one year.

ANOTHER MINER RESCUED.

Believed That Others are Still Wandering in the Mines.

A Lens, France, despatch says: Another man was brought up alive on Wednesday morning from the Courrières Mine, which was wrecked by an explosion of gas on March 10. He had been in the mine for twenty-five days. It is believed that others are still alive in the workings. The name of the survivor found on Wednesday morning is Berthou. He lived on food which he found in the pockets of dead companions, and slaked his thirst from puddles.

Berthou says that he suffered terribly from the cold, and that he removed the clothing from several dead bodies and put it on himself. He was knocked down at the moment of the explosion, but on recovering himself found that the air was breathable. He was found behind a sort of door that closed one of the galleries. When he caught sight of the rescuers he said "Here I am." Berthou thought that only eight days had passed since the explosion. Once, he says, he contemplated suicide. His hands were bitten by rats, which several times attacked him when he was sleeping.

The finding of another survivor has renewed the fury of the women against the managers of the mine because the work of rescue was abandoned so soon after the explosion.

It is reported that four of the thirteen men who were taken out of the mine last week after twenty days' entombment will probably die from the effect of the privations which they suffered.

A story is told here that these men were reduced to such extremities before their rescue that some of them ate flesh from the dead bodies of two apprentices.

EXPLORE GILLIES LIMIT.

The Provincial Geologist to Make Thorough Report.

A Toronto despatch says: Prof. Miller, the Provincial Geologist, will this summer conduct a thorough investigation of the "mineralized" portion of the Gillies timber limit, which, as Premier Whitney announced on Tuesday, is to be retained and developed for the benefit of the Province. In addition, it is stated that he will commence an exploration of other portions of the limit, which is in all about 100 square miles in extent, as it is reported that there are excellent mineral indications elsewhere than in the portion which it has been decided to hold for the people. Prof. Miller's reports on his work will be of great value to the Government.

Many reports are in circulation in respect to action by the Government relative to the methods of treating the ores from the limit, but this has not yet been seriously considered, and no negotiations are under way, or have been entered into, on this point, although suggestions have been made to the Government by persons with more or less expert knowledge. There is every hope, however, that the reduction works which will be a necessary accompaniment of the Government exploitation of the "mineralized" section of the famous limit will be found to be all that is needed in this respect.

CHANCELLOR VON BUELOW

Fainted Shortly After Making Speech on Morocco.

A Berlin despatch says: Chancellor von Buelow while attending the debate in the Reichstag on Thursday fainted and was carried to a committee room by some of the members of the House. The Chancellor made a speech on the subject of Morocco, and was listening to the answers of Herr Bebel, the Socialist leader, when he was taken ill. The Vice-President of the House, Dr. Count von Stolberg Weringerode, adjourned the sitting for a moment of rest.

RUSSIAN GOVERNMENT ROUTED

Elections Held in the Stronghold of the Bureaucracy.

RUSSIAN ELECTIONS.

A despatch from St. Petersburg says: The electoral colleges in 28 out of the 51 provinces in European Russia on Sunday elected 178 members to the national Parliament—about one-third of its entire membership—and returns received up to midnight indicate that the wildest hopes of the Liberals have been realized, the Constitutional Democrats and other progressivists practically everywhere having gained a tremendous victory over the Octobrists and other conservative parties. As far as is ascertainable not a single reactionary candidate pulled through, and nowhere did even the Octobrists score a triumph. The majorities obtained by the Radicals clinch the character of the victory. From the Volga to the frontier of Poland and from the still icebound coast of Archangel to the Black Sea the story is substantially the same.

GOVERNOR ASSASSINATED.

The London Times' correspondent in St. Petersburg cables as follows:—Sleptzoff, Governor of Tver, has been assassinated under circumstances almost similar to those in which Von Plehve was killed. Sleptzoff organized the massacres at Yaroslavl last November, and, being transferred to Tver did nothing to prevent the burning of the Zemstvo building, where many employees were roasted alive.

RUSSIA WANTS \$200,000,000

A despatch from St. Petersburg says: Russia has opened preliminary negotiations in Paris for a large foreign loan of at least \$200,000,000, and desires more if possible. The syndicate with which she is negotiating is composed of German, Dutch and British capitalists, but so far as ascertainable no Americans are connected with it.

TROOPS KILL PEASANTS

A despatch from Berlin says: Russian troops had a battle with peasants in the province of Kersan, killing 28 and wounding 100 of them. A Gatling gun was used.

NEGOTIATIONS WITH CHINA.

A despatch from Peking says: The Russo-Chinese negotiations appear to have reached a deadlock. At any rate, they are dragging along slowly. M. Pokotiloff, the Russian Minister to China, and Tong, the Chinese commissioner appointed to negotiate an agreement with Russia regarding Northern Manchuria, have conferred only two or three times during the past month. Russia has the upper hand because she holds nearly all the privileges she contends for, while

demanding that China officially grant them. The Chinese, on the contrary, were never so determined to withstand all foreign encroachments. Both parties are trying to keep the negotiations as secret as was the case with the Chinese-Japanese treaty. One bone of contention is believed to be the mining and other concessions which the Tartar generals in Manchuria gave to Russian corporations, and which Russia wants the Chinese Government to ratify. The Chinese, however, insist that their Government never sanctioned these concessions, and that therefore they are invalid.

TOBACCO USERS WILL PAY.

A despatch from St. Petersburg says: The extra financial burden caused by the war with Japan will be borne in part by tobacco consumers. A project to increase the internal revenue tax on an average of 30 per cent. has been approved for submission to the approaching National Parliament. The increase falls heavily on the choicer grades of tobacco, but even the cheap "mahorka" smoked by the peasants will be raised over eleven points.

THIEVES LOOTED MONASTERY.

A despatch from Rostoff, Province of Yaroslavl, says: A gang of thieves looted the Troitza Warnitzki monastery during the night of April 3 and got away with \$23,000 and a quantity of valuable articles.

LATEST IN STRIKES.

A despatch from Moscow says: The political prisoners with whom the local jails are crowded, have declared a "hunger strike" (refusing to partake of food) to compel the authorities either to bring them to immediate trial or order their release. Many of the prisoners have been three months in jail without being confronted with the charges against them.

COATS OF MAIL FOR POLICE.

A despatch from St. Petersburg says: The Chief of Police of St. Petersburg, after various tests, is equipping the police and gendarmes with coats of mail, to be worn under their uniforms.

PRISON FOR FALSE REPORTS.

A despatch from St. Petersburg says: The rigorous press regulations announced on Thursday have been supplemented by a sweeping repressive measure, making it a prison offence to spread false reports about Government officials or troops which tend to produce public excitement. The penalty is multiplied if such reports result in actual rioting.

CONSERVING MOISTURE.

There is no knowing what a season will be, wet or dry. It is always changing. We know the future only by what the past has been. The chances are that in the localities where there has been two or three seasons of excessive moisture that it will get back to normal,

riety of nitrogenous foods during mating so as to secure strong fertile eggs. Eggs for hatching should not be chilled. Keep in a cool, even temperature and turn daily if they must be kept a few days.

Mate the hens with a full-blooded cock of merit. A trap-nested bird is the most valuable. Be sure he has no physical deformities.

Early-hatched chicks will get a good start before hot weather and be better able to combat lice. The incubator is the thing for early hatches.

Mate your best stock a few days before selecting eggs for setting and you will be more sure of getting fertile eggs, and of the desired mating.

some of the members of the House. The Chancellor made a speech on the subject of Morocco, and was listening to the answers of Herr Bebel, the Socialist leader, when he was taken ill. The Vice-President of the House, Dr. Count von Stolberg Weringerode, adjourned the sitting for a quarter of an hour, during which deep silence prevailed throughout the House. Dr. Mugdan and Dr. Becker had in the meantime gone to the assistance of the Chancellor, who appeared to be conversing with them and the members who carried him from the chamber to the sitting room of the President of the House, and placed him in an easy chair, and he began to show signs of returning to consciousness.

MISSING CREW TURNS UP.

Sailors From Nova Scotia Schooner Were Rescued.

A Lizard despatch says: The German steamer Assyria, bound from St. Thomas for Hamburg, in passing here on Thursday, signaled that she had on board all hands from the missing Nova Scotia schooner Carrie Easler. The Carrie Easler, coal laden, sailed from Canso, N. S., for Halifax about March 8th. Until Thursday nothing had been heard from either the vessel or crew, and both were generally believed to have been lost.

JAP FAMINE SUFFERERS.

Empress Dowager of China Subscribes £75,000.

A Tokio despatch says: The Empress Dowager of China has sent 150,000 yen (\$75,000) for the famine sufferers of Japan. The best informed persons consider further contributions unnecessary. The total of foreign contributions received is more than \$250,000.

POSTMAN FOUND DROWNED.

The Body of Robert Loudon, of Toronto, Recovered.

A despatch from Toronto says: The dead body of Robert Loudon, the letter carrier whose disappearance has been a mystery since November last, was found floating in the bay, near the Spadina Avenue wharf on Wednesday afternoon. The remains were so badly decomposed that it was impossible to recognize the dead man's features, and his identity was ascertained by means of letters and papers found in his pockets. His silver watch, two rings, \$8.75 in money, and other small articles were all recovered from his clothing, and this fact, according to the police theory, indicates that his death was not due to violence.

MOSCOW BANK ROBBERY.

Ringleader of Band Who Stole \$437,500 Captured at Zurich.

A Zurich, Switzerland, despatch says: The ringleader of the band which robbed the Mutual Credit Bank of Moscow of \$437,500 on March 20 has been arrested here. He is a young Russian, who arrived in Zurich April 2, and had been drinking heavily. The police took him into custody on the charge of intoxication, and found among his belongings a wallet filled with Russian bank notes. When the prisoner became sober he voluntarily confessed that he had headed the band of nineteen men who robbed the Mutual Credit Bank of Moscow.

BIG ORDER FOR RAILS.

Grand Trunk Pacific to Take 50,000 Tons from "Soo" Mills.

A despatch from Montreal says: The Consolidated Lake Superior Company has received an order from the Grand Trunk Pacific Railway for 50,000 tons of steel rails to be used in the construction of the spur line between Port Arthur and Lake Superior Junction.

go a measure of protection.

The British Government decided that it would be a diplomatic impropriety to discuss in the House of Parliament the persecution of Jews in Russia.

UNITED STATES.

John Alexander Dowie has been dismissed from the membership and denounced as the head of Zion City.

Independent soft coal operators will sign the scale, and Ontario users are reasonably sure of their supply.

Frederick Oremus, formerly of Brantford, was stabbed fatally with a file by Rudolph Schilling at Buffalo on Saturday.

James Colletto, of Brooklyn, N. Y., who has been despondent because the parents of a girl, of whom he was fond, would not allow him to continue his attentions, shot himself in the heart with a revolver.

GENERAL.

The Stag, a German hotel in the Black Forest, collapsed on Thursday while the guests were at lunch, and 55 were killed.

FIGHT REBELLIOUS ZULUS.

The Natal Field Force Was Forced to Retreat.

A despatch from Greytown, Natal, says: The colonial field force, which was concentrating at Impanza, twelve miles northwest of Greytown, for operations against the insurgent Chief Bambaata, the deposed Regent of the Greytown district, has been compelled to abandon its laager after heavy fighting and retire to Greytown.

A portion of the force sent to rescue the women and children isolated at Kentes Drift succeeded in so doing, but while returning was attacked by rebellious natives. A running fight was kept up for six miles, the Zulus continuing the pursuit until within a mile of Greytown. Three of the Colonial Police were killed and several were wounded. The remainder are safe at Greytown. The police report that the rebels are in strong numbers and flushed with victory and the officials fear further excesses. A strong force of artillery, infantry and mounted men moved out of Greytown on Thursday to operate against the rebels.

A laager has been formed here and every preparation has been made to defend Greytown in case of attack.

The bulk of the reinforcements sent from Pietermaritzburg and Durban have arrived, and will join Manselle's column.

HAZING IN BRITISH ARMY.

Four Lieutenants are on Trial Before Court of Enquiry.

A despatch from Aldershot, Eng., says: Four lieutenants, Hamilton, Dalrymple Hamilton, Jolliffe and Harford, were placed on trial on Wednesday before a court of enquiry which is making an investigation into the hazing of Second Lieutenant Clark Kennedy, who was severely maltreated by his fellow officers last month because, it is alleged, he was too poor to meet all the regimental subscriptions. The court is composed of four generals and two colonels, Lieut.-Gen. Sir Gerald Morton presiding.

MAGAZINE POSTAGE.

Some United States Publications Will Have to Pay More.

A despatch from Ottawa says: The attention of the Post-office Department has been called to postage paid on United States periodicals which have been going through the mails at a lower rate than if they were Canadian magazines. Consequently several notices have been sent from Ottawa to publishing houses in the United States advising them that they must pay postage on third-class matter instead of second-class. The periodicals formerly passed as second-class under or as newspapers. The difference in cost is one cent for two ounces instead of one cent a pound, which is the rate for second-class matter in the United States.

There is no knowing what a season will be, wet or dry. It is always changing. We know the future only by what the past has been. The chances are that in the localities where there has been two or three seasons of excessive moisture that it will get back to normal, or even the opposite extreme. Except on farms where the soil is very retentive and not properly drained, it is always safe to save moisture for fear that it will be short next summer.

When the snow melts and spring rain seems to soak the ground many feel deep it is almost impossible to get some farmers to see that there ever will be a time in July or August, when the crops will wither and the ground crack open. The way to check out moisture from the bank next summer is to check it getting out when spring comes. Plow early and keep the fields worked mellow and moisture cannot evaporate as fast as when left unplowed.

It has been estimated that an oat crop uses 522 tons or 4.76 inches of water to produce one ton of dry matter, corn uses 305 tons or 2.64 inches, potatoes uses 422 tons or 3.73 inches and red clover 452 tons or 4 inches of water to produce one ton of dry matter. That is to say that so much water goes into the plants to grow them or is lost from the soil by evaporation or percolation while the plants are making that growth. The greatest amount a plant needs is during the warm weather when, too, the greatest evaporation takes place—and that usually is the time when rain fall is the least. So it stands to reason that better crops can be grown if the farmer can prevent a waste of moisture at a time when it seems superabundant.

Late fall plowing has a tendency to save moisture because it loosens the surface soil so that the snow and spring rains can soak down into the earth instead of running off. Prof. King states that he has found that fall plowed land held nearly 2.5 per cent more water than unplowed land adjacent, the test being taken in the spring. Neither field had received any cultivation up to May 14th. This means that about six pounds of water per square foot had silently and unnoticeably left the unplowed field. In this case 13.5 tons of water per acre were lost. If the fall plowed field had been disced early in the spring and cultivation continued until May 14th, the difference would have been a great deal more than 13 tons of water per acre between the fall plowed and the unplowed fields.

When early spring plowing is compared with late plowing a similar difference is seen in the water content of the soil.

So then, in order to have a supply of moisture in the dry spell of summer it must be saved early in the spring. Plow as early as you can without spoiling the texture of the soil. It will not pay to work in the mud for the injury to the soil is greater than the benefit. Then keep the surface disced or harrowed after each heavy rain and you will store away tons of water for future use that will surely evaporate unless checked in this manner.

POULTRY NOTES.

Eggs for hatching should be fresh — fresher the better.

Now is the time to get the incubator. Get the order off to-day.

Hens should receive plenty of exercise when laying the eggs you intend to set.

Long feeding period is safer than short with too rapid increase in feed amounts.

Don't be afraid of getting hens too fat as long as they have plenty of exercise. If a chick is allowed to stop growing it will take a long time to get it started again.

"Don't put all your eggs in your basket"—put most of them in an incubator at this time of the year.

Put fresh straw in the nest boxes every week. This helps to keep mites from becoming numerous.

A bob-tailed pullet on a rickety hen roost is a sure indication that there is no money in poultry.

The eggs for hatching should be only those from well-developed, full grown pullets or from vigorous hens.

Feed the hens' roosters well on a va-

Early-hatched chicks will get a good start before hot weather and be better able to combat lice. The incubator is the thing for early hatches.

Mate your best stock a few days before selecting eggs for setting and you will be more sure of getting fertile eggs, and of the desired mating.

Are the chicks doing as well and the hens laying as many eggs as you reasonably expect they should. If not, examine them for lice and the roosting places for mites. Chances are that you will find some. Dust the fowls with fresh insect powder and apply coal oil to the roosts and fixtures for the mites.

If a scaly looking powder is seen around the roosts or nest boxes you may be sure there are mites there. These signs are unmistakable. Where coal oil is objected to, use strong brine, hot or cold, or hot lye water. This will route the mites. Whatever is used, apply again in a week or ten days for a new crop will be "on" by that time.

Dig up fresh soil for the hens and chicks to dust in; add sifted ashes to this soil and mix and pulverize it up nicely.

Give the charcoal to the hens for their health, and the fine cinders for grit, also furnish other grit in abundance to both hen and owner.

DAIRY JOTTINGS.

Cheap salt in butter is an expensive economy.

The wise dairyman keeps no more cows than he can properly look after. The woven wire fence is almost a necessity on a farm where sheep are kept.

Do not depend too much upon the ram for improvement; select your ewes as well.

Give the ewes daily exercise and fresh air, but do not expose them to storms.

The cows need and like fresh air but they neither need nor like exposure to bad weather.

Corn and corn meal, if fed too freely to cows, have a tendency to fatten them. Balance the rations with bran, alfalfa, clover, oil meal or cottonseed meal.

The more cows a farmer keeps and the better care he gives them, the bigger the bank account.

If you are a dairyman keep up with the times. Keep growing, keep on reading, keep improving.

Stir the cream twice a day, using a long-handled spoon which will reach to the bottom of the cream jar.

Heifers require a larger amount of feed for the production of a certain amount of milk than do older cows. They have to grow.

Don't forget the cows that are going to calve within the next few weeks. Give them some grain and if you are fortunate enough to have some silage silage to go with the ration, so much the better.

Many a so-called dairy cow is eating a dollar's worth of feed for every fifty cents' worth of milk and cream she is producing. The cow that will not give 3,000 pounds of milk yearly testing at least three per cent. butter fat, is eating the farmer into debt.

TO CHASE POACHERS.

Canadian Cruiser Vigilant Has Machinery Overhauled.

A Walkerville despatch says: In order to put her in first-class shape for any contest with American fish poachers in Lake Erie, the cruiser Vigilant, which wintered here, has been taken to the plant of the Detroit Shipbuilding Company for an overhauling. Particular attention will be paid to her machinery in order to give her the greatest speed her engines are capable of producing.

WAGE DEMAND FROM 250,000.

Operatives in the Lancashire District File Notice.

A despatch from London says: Operative cotton spinners and cardroomers in Lancashire to the number of 250,000 are sending in a month's notice to their employers of an application for an advance of 5 per cent. in their wages.

For the Children

To succeed these days you must have plenty of grit, courage, strength. How is it with the children? Are they thin, pale, delicate? Do not forget Ayer's Sarsaparilla. You know it makes the blood pure and rich, and builds up the general health in every way.

The children cannot possibly have good health unless the bowels are in proper condition. Correct any constipation by giving small laxative doses of Ayer's Pills. All vegetable, sugar-coated.

The Ontario Government have undoubtedly made a mistake in stubbornly adhering to the blunder made by Col. Matheson in fixing the net price of Ontario Government bonds at 96. He talks of insuring a popular loan of two and one-half millions during the coming summer, but does he really expect two or three months hence to get much more than the price already set? He and Premier Whitney endeavored to obscure their mishandling of the subject by insisting

for him the proof of his blunder will be only too accessible in the future.

Notice.

We are getting a lot of new dishes to set given away for coupons to customers that try here. Why not get some by dealing R. J. Wale's GREY LION GROCERY.

WHAT OTHER PAPERS SAY.

The Legislature is in a working mood, and the end of the session is in sight. The lobbyists seeking perpetual franchises are told that there are none for distribution. The railway taxation bill is the only big thing still in the future. The Government is determined to change things but that is proverbially easier than making improvements.

Montreal Herald.

The time for telephone nationalization is not yet but there is a strong conviction that steps ought to be taken to effectually control the monopolistic tendencies of the telephone interests, so that an efficient service may be obtained at reasonable cost.

Belleville Ontario.

The proposal of the Whitney Government to buy the land scrip of veterans who have not located their land at \$50 each is penurious in the extreme. It is in fact, a little over 31 cents per acre, a ridiculous price. It ought to be at least 50 cents per acre, and no doubt a strong effort will be made to have the law amended to that effect.

Chatham News.

The Government have announced that the famous Gillies timber limit, which contains wealth sufficient to provide the Province with running expenses for a lengthy period of time, will not be open to prospectors, and having promulgated this decision, have leaned back in their chairs and puffed out their cheeks, figuratively speaking. The experiment will be watched with marked cynicism. It may be that cynicism will turn to applause. It is to be hoped, for the sake of the Province, that it will.

Ancient Salads.

The lettuce was deemed by the ancients the food of the dead because when Adonis, the beloved of Venus, was mortally wounded by a wild boar the weeping goddess laid him upon a bed of soft and tender lettuce, whose milky juice possesses soothing and narcotic qualities. Lettuce was eaten by the ancients at the close of their repasts, as from its cooling qualities it was considered an antidote to the heating effects of wine. The bitter herbs which the Jews ate at the pass-over were wild lettuce, succory, tansy, camomile and dandelion, and this same race are the inventors of the salad compounded of oil, vinegar, sugar, salt and mustard to render the bitter herbs palatable. The Irish two centuries ago made their salads of sorrel, wood sorrel and beet chopped with vinegar, beer and a little sugar, but no oil, salt or mustard. Readers of classic history will remember how a lettuce caused the cruel death of Cambyse, king of Persia and Media, and of his consort, who was also his sister.

Municipal Thrift.

On the way from one town on Cape Cod to another a contributor to the Boston Transcript came upon a charming house by the roadside, which immediately claimed his attention. It bore a fresh coat of white paint, which was well set off by green blinds. There was a smooth piece of lawn in front, a group of fine shade trees and hammocks, piazza chairs, brilliant sofa nil-

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature to do its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

COUNTY COUNCIL.

Napanee, 3d April, 1906.

Council met in special session on Tuesday at 2 p.m., all the members present except Mr. Bryden, who has removed to Edmonton, Alta. Warden Bogart presiding.

Minutes of last day of preceding session were read and confirmed. An account for committee services, M. C. Bogart, \$2.50; W. A. Martin, \$3.50; Col. Clyde, \$3.70, passed at last day's session, was ordered to be inserted in the minutes.

The Warden stated that a deputation would wait on the Council this afternoon in reference to establishing a house of refuge for this county. He outlined the action taken by a meeting of the citizens of Napanee recently, and gave an estimate of what such an institute would cost, and what the cost would be to each municipality to maintain it.

On motion Mr. W. T. Gibbard and the Mayor were heard as to the advisability of erecting a house of refuge. Mr. Gibbard urged the erection of

Albert College Belleville, ONT.

Business School founded 1877. Practical and thorough. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters.

\$37.00 pays board, room and tuition, electric light, use of gymnasium and baths, all but books laundry, etc., for 10 weeks—longer time at same rate. Special reduction to ministers, or to two or more entering at same time from same place. A specialist in book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department also assist in the work. The high character of the College is a guarantee of thoroughness. New Commercial Hall one of the finest in Ontario.

by Col. Clyde, that all the communications and correspondence relating to our County Roads be sent to

the price already set? He and Premier Whitney endeavored to obscure their mishandling of the subject by insisting on talking about the action of the former Government. In the first place, it is sufficient to point out that former Government had no Ontario bonds to sell. All that they offered were bonds on the railway itself, guaranteed, it is true, by the Province, but, as financiers will say, probably three points less in value than the inscribed securities of the Province, with all its resources behind them. Realizing the advisability of offering the latter rather than the former, and realizing, too, that the time was not favorable for a sale, the former Government had resolved to get the authority of the Legislature to issue Provincial bonds, to wait for a more favorable turn of the market, and in the meantime to make application to give the bonds the advantage of being put on list of securities in which trust funds can legally be invested.

Col. Matheson took only one of these precautions. He got the authority of the Legislature to issue full bonds and then he threw them away. There was no reason for hurry in disposing of them. The former Government had procured a renewal of the temporary loan at its full value for 3.5-8 per cent. And now we have the Treasurer of the Province selling the bonds at 96 net and agreeing to pay 3.1-2 per cent. for 40 years. Anyone can figure for himself that a borrower can better afford to pay 3.5-8 per cent when he gets a full dollar than he can afford to pay 3.1-2 per cent on 100 cents and only gets 96. It needs no financial genius to appreciate this. The likelihood that times will improve should certainly have suggested to Col. Matheson the policy of waiting. In the meantime he could have tried the issue of a popular loan. We repeat once more our firm belief that by doing so he would have set far as the value of Ontario bonds, the testimony being given by his own people, who best know the financial standing and resources of the Province. He has chosen, through mere incapacity with a dash of vanity, to sacrifice the Province's first issue of bonds, and has made his political career as Treasurer impossible. Unfortunately

was a smooth piece of lawn in front, a group of fine shade trees and hammocks, piazza chairs, brilliant sofa pillows and all the adjuncts of summer comfort in luxurious profusion.

"Whose place is this?" he demanded of the boy of twelve who accompanied him as guide and adviser in general.

"That there?" said the boy. "Oh, that there's the poorhouse."

"The poorhouse!" the man exclaimed. "You seem to have luxurious paupers in this town."

"Well, you see," was the explanation, "we hain't got but one, 'n' she's an old woman, 'n' the overseers they board her out with one o' the neighbors 'n' let the poorhouse to some o' them Boston folks for the summer, 'n' that pays her keep."

How to Boil Water.

To boil water would seem to be a very simple thing, and yet the late Charles Delmonico used to say that very few people knew how to do it. "The secret is," he said, "in putting good fresh water into a clean kettle already quite warm and setting the water to boiling quickly and then taking it right off for use in tea, coffee or other drinks before it is spoiled. To let it steam and simmer and evaporate until the good water is in the atmosphere and the lime and iron and dregs only left in the kettle is what makes a great many people sick, and it is worse than no water at all." For water boiled like this and flavored with a few drops of lemon juice Mr. Delmonico used to charge as much as for his best liquors, and he often recommended it to his customers and friends who complained of loss of appetite. It is worth trying. —Good Living.

The Alternative.

The doctor had been called to see a pitman's wife. On coming down from her room the doctor said to the husband: "Well, Geordy, I'm glad to say there isn't very much wrong with your wife. It's a case of too much blood, and we'll try an old fashioned remedy. Just get a leech at the chemist's and put it on her, and I believe you'll find her better when I call in the morning." Next day the doctor called again and, meeting the husband, who was a bit of a sportsman, like many of his kind, said: "And how's your wife this morning, Geordy? Better, I expect." "Nal, man, but she's worse," replied Geordy. "Worse!" exclaimed the doctor. "But did you do as I told you last night?" "Well, not exactly, for I couldn't get a leech, so I put the ferret I bed w' 'er." —London Tatler.

Doctor (to wife of patient)—Be brave, madam. It is my painful duty to inform you that in twenty-four hours your husband will be no more.

The Wife (overwhelmed with grief, but at the same time having regard to expence)—Good gracious! And you have prescribed medicine for five days at least.

His Only Chance.

Hostess—Of course, you'll have a piece of cake, Johnny. Johnny—Yes'm, an' please gimme the biggest piece. Hostess—Why, Johnny, I'm surprised. Johnny—Well, ma told me not to ask for a second piece.—Catholic Standard and Times.

His Preparation.

Bill Nye once told a story about a man who, after eight hours' work on a country daily, was fired for incompetency and then went on a lecture tour of the country on the subject of "Journalism."

CASTORIA.

The Kind You Have Always Bought

maintain it.

On motion Mr. W. T. Gibbard and the Mayor were heard as to the advisability of erecting a house of refuge.

Mr. Gibbard urged the erection of a suitable home for our poor in all its phases, in eloquent and convincing terms, and was ably supported by Mayor Lowry.

Messrs. Martin, Baker, Paul, Creighton, Clyde, Miller, Woods, and Hal, replied to Messrs. Gibbard and Lowry, represented the condition of the poor in their municipalities, and the new taken by the members of the County Council and those whom they represented as to the care taken of their poor and their opposition to a house of refuge.

County Commissioner Hall was in favor of a house of refuge. When he was reeve of the Township of Richmond they tried to take care of and provide for their poor, but nevertheless he felt that they were not properly cared for. He was in favor of a house of refuge.

An account from James Dryden, for committee services, \$18.20, deputation to Toronto, was referred to the Finance committee with the understanding that accounts of other members of deputations be also referred to the same committee when submitted.

From F. C. Bogart, for two plans showing County roads, \$25.00. Laid on table until to-morrow.

From J. R. Dafee, coal, \$54.00. Pd.

From F. Burrows, postage, \$3.00. Pd.

From Jas. Richardson, \$2.50. Pd.

From Thos. Syntington, \$5.00. Pd.

From G. B. Joy, \$8.00. Pd.

From Alexandria Industrial School, expenses of Lillian Fife, \$13.75. Referred to Finance committee.

Also, notice from Police Magistrate Rankin, giving notice that Manson Abrams, North Fredericksburgh, had been sent to the Victoria Industrial School. Filed.

On motion, Mr. Cameron, of the Watrous Engine Co., and Mr. Scott, representing Good Roads Machinery Co., were heard before the Council.

An account from W. A. McCarthy, Kingston, for operating on Joseph Sead, \$240, was referred to the Finance committee.

COMMUNICATIONS.

From Wm. Pillar Denbigh, Secretary of Farmers' Association of Frontenac, asking co-operation to get an emigration agency established at Kingston by the Dominion Government, for the benefit of farmers in this district who require farm help. Referred to committee on Legislation and Memorials.

From Wm. Bicknell, Camden East, asking for refund on pedlar's license. Filed.

From High School, Picton, re account submitted at last session to this County. Filed.

From Col. Clyde and Mr. Woods, deputation appointed to wait on the Government, re grants to Colonization roads. Adopted.

Moved by Mr. Creighton, seconded

by Col. Clyde, that all the communications and correspondence relating to our County Roads by-law be laid on the table. Carried.

Mr. Martin submitted his report as a member of the deputation to wait on the Government, re County Roads by-law.

The Warden also reported the action he had taken as a member of the deputation.

Council adjourned till 10 o'clock to-morrow.

WEDNESDAY—SECOND DAY.

Council met at 10 a.m.; members all present; Warden presiding.

Minutes of yesterday's session were read and confirmed.

A delegation of business men of Nanawbe were heard regarding the proposed ferry at Hay Bay.

Dr. Simpson, M. S. Madole and W. T. Waller addressed the Council in the interests of the ferry.

Moved by Mr. Martin, seconded by Mr. Baker, that the application of the deputation for a license to the ferry and a grant to assist in opening up the approach, be referred to the Roads and Bridges committee. Carried.

On motion the account of Mr. F. C. Bogart, laid on the table until to-day, was ordered to be paid.

Mr. Baker gave notice that he would withdraw his notice of the introduction of a by-law to issue deputation to finance the proposed County roads system.

Moved by Mr. Martin, seconded by Mr. Paul, that the correspondence with the Minister of Public Works, re County roads by-law, be published in the minutes. Carried.

Council adjourned till 1.15.

Council resumed at 1.30.

The Clerk read a telegram from Dr. E. Bruce Smith, Inspector of Prisons, stating that he would wait on the Council to-morrow, Thursday afternoon, respecting the house of refuge. Filed.

Moved by Mr. Baker, seconded by Mr. Paul, that the Chairman of the County Property Committee be instructed to have the flower beds in front of the Court House attended to, at a cost not to exceed \$25.00 for the present year. Carried.

Council adjourned for half an hour for benefit of committees.

Mr. Martin introduced by-law to appoint a superintendent over County roads, which was read.

On motion rule 38 was suspended in order to give the by-law a second reading.

A motion of Mr. Martin and Col. Clyde, that council go into Committee of the Whole, was carried.

Moved in amendment by Mr. Baker, seconded by Mr. Woods, that the by-law be read a second time six months hence. Lost.

Mr. Baker asked for the yeas and nays.

Yeas—Baker, Bogart, Woods—3. Nays—Creighton, Clyde, Martin, Miller, Paul—5.

Mr. Miller in the chair.

Moved by Mr. Martin, seconded by Col. Clyde, that the by-law be read clause by clause and blanks filled in. Carried.

Moved by Mr. Baker, seconded by Mr. Bogart, that committee rise, report progress and ask leave to sit again. Lost.

After considerable discussion it was moved by Mr. Martin, seconded by Mr. Creighton, that Committee rise, report and ask leave to sit again at 10 a.m., to-morrow. Carried.

Warden in chair. Report of Committee was adopted, and on motion Council adjourned till 10 a.m., to-morrow.

THURSDAY—THIRD DAY.

Council met at 10 a.m.; members all present; Warden presiding. Minutes of yesterday were read and confirmed.

An account of the County Clerk, \$9.00, was ordered to be paid.

Rule 38 was suspended, in order that the report of the Chairman and Secretary of Finance committee might be received.

Report was read, and on motion Council went into Committee of the Whole. Mr. Woods in the chair, to consider report. Clause 1 was read and adopted.

On motion of Col. Clyde and Mr. Woods, it was amended, and the following accounts paid, Geo. Woods \$22.50, Thos. Clyde \$20.75, James Dryden \$18.20, W. A. Martin \$22.95, H. A. Baker \$18.00, S. Paul \$19.75, M. C. Bogart \$14.25.

Clause 3 was read and adopted, and on motion of Messrs. Martin and Baker, the committee rose, and reported the report as amended.

Moved by Mr. Martin, seconded by Mr. Paul, that the report of Committee of the Whole be adopted. Carried.

Mr. Miller asked for the vote.

Yeas—Baker, Bogart, Clyde, Martin, Paul, Woods—6.

Nays—Miller, Creighton—2.

Mr. Paul presented report of the delegation to the Municipal Association, which was read and adopted.

Moved by Mr. Baker, seconded by

CURED HIS WIFE of LA GRIPPE

Quebec Man tells how the Great Consumptive Preventative was an all-round Benefit

"My wife took La Grippe when she was in Ottawa," says R. N. Dafee of Northfield Farm, Que., in an interview. "She got a bottle of Psychine and after using it for a few days she was quite well. I took a cold and am using it and am getting all right. I think Psychine is one of the best tonics on the market to-day."

There you have the whole matter in a nutshell. La Grippe and colds are among the forerunners of consumption.

This man had one, his wife had the other. Psychine not only cured both but it built them up so that their bodies are strong enough to resist disease. All seeds of consumption are killed by

PSYCHINE

50c. Per Bottle

Larger sizes 61 and 62—all druggists.
DR. T. A. SLOOUM, Limited, Toronto.

FIFTY CENTS

In some conditions the gain from the use of Scott's Emulsion is very rapid. For this reason we put up a fifty-cent size, which is enough for an ordinary cough or cold or useful as a trial for babies and children. In other conditions the gain is slower—health cannot be built up in a day. In such cases Scott's Emulsion must be taken as nourishment; a food rather than a medicine. It's a food for tired and weak digestions.

Send for free sample

SCOTT & BOWNE, Chemists,
Toronto, Ont.

50c. and \$1.00. All druggists

Mr. Woods, that in view of the Ontario Government withholding their approval of our County Road By-law and as no doubt the municipal councils of the County gave their approval of said by-law with the expectation that the County would receive aid from the Government to the extent of one-third of the amount expended by the County, we are of the opinion that to continue the County road system without such aid would not be in the interests of the County nor meet with the approval of the several municipalities. Lost.

Council adjourned till 1.30 p.m. Council resumed.

Dr. J. Bruce Smith, Inspector of Prisons, addressed the Council as to erection of house of refuge.

After a lengthy discussion of the question, Council resumed general business.

Mr. Martin presented first report of Roads and Bridges committee, which was adopted. Also, the second report of this Committee, which was adopted.

Council went into Committee of the Whole on the second reading of the by-law to appoint a superintendent over county roads and to define his duties. Mr. Miller in the chair.

Moved by Mr. Martin, and Mr. Creighton, that the title of the by-law be amended so as to read, "to appoint overseers over county roads, and define their duties. Carried.

Moved by Mr. Martin, seconded by Mr. Paul, that clause 1 read as follows, "That the overseers of County roads in each County Council division be the representatives of such division in this Council or someone selected by them." Carried.

Committee rose and reported progress and the report was adopted.

Council adjourned till 10 a.m. tomorrow.

FRIDAY—FOURTH DAY.

Council resumed as per adjournment. Minutes of yesterday were confirmed.

A communication from the Dominion Bank was read, showing credit to the County \$151,343.00, of \$4,921.01 was filed.

On motion Council went into Committee of the Whole on the second reading of by-law to appoint committees over county roads, and define their powers and duties. Mr. Miller in the chair.

On motion of Messrs. Martin and Paul, that clause 1 read, "the committees over county roads in each County Council Division shall be the representatives of such division in this Council. Carried.

Clause 2 was passed, giving said committees power to purchase tools and materials, and employ men for the proper improvement of the roadways under their jurisdiction.

Committee rose, reported progress, and asked leave to sit again. Warden resumed the chair and report was adopted.

Moved by Mr. Baker, seconded by Mr. Paul, that the Warden, Chairman of Roads and Bridges committee, and Col. Clyde be a committee to draft the by-law to appoint committees over County roads, etc., and report this afternoon. Carried.

Council adjourned till 1.30 p.m. Council resumed.

The Special committee appointed to draft the by-law to appoint committees over county roads, etc., reported, and on motion the report was ordered to lie on the table.

Council went into Committee of the Whole on second reading of by-law to appoint committees over roads. Mr. Woods in the chair.

The by-law was read clause by clause. Moved by Messrs. Martin and Baker, that the blank in the by-law, allowing two dollars and fifty cents per day and mileage. Lost.

Moved by Mr. Miller, seconded by Mr. Clyde, that the blank in the by-law appointing the members of the County Council overseers of county roads be filled in with the sum of two dollars and fifty cents per day without mileage. Carried.

The by-law was reported and report adopted. Rule 38 was suspended. In order that Mr. Creighton might introduce a by-law to allow the Treasurer to overdraw.

Moved by Col. Clyde, seconded by Mr. Paul, that the Roads and Bridges committee appoint a committee to receive the road machinery when it arrives; and also arrange where the said machinery shall be first used, and also define where and when the machinery will be delivered to the next division that it will operate at. Carried.

Moved by Mr. Paul, seconded by Mr. Baker, that this Council authorize the Roads and Bridges committee to purchase three sets of moulds for making concrete tiles, 12, 18 and 22 inch. C. Registrar Gibson addressed the Council as to certain requirements in Registry office.

Council went into Committee of the Whole, and the by-law permitting the Treasurer to overdraw was put through its several readings and confirmed.

Moved by Mr. Paul, seconded by

mitted to Council for approval.

I am, Sir,

Your obedient servant,
J. H. MACNAUGHTEN,

Secretary Public Works Department.
W. G. WILSON, Esq.,
County Clerk, Lennox & Addington.
Napanee, Ont.

Napanee, March 22d, 1906.

Hon. Dr. Reaume,
Minister of Public Works,
Toronto, Ont.

Sir,—I have the honor to enclose herewith a presentation of facts re By-law 204, passed by the Council of the County of Lennox and Addington under the provisions of "An Act for the Improvement of Public Highways" said presentation of facts being signed by the sub-committee of the County Roads and Bridges Committee, appointed for that purpose, and for the purpose of calling in person upon you if considered necessary after laying the matter before you in writing as enclosed, and I am instructed by the Committee to request that you will be kind enough to notify me at as early a date as possible the decision of your Department, and if you should still require further evidence in the matter other than contained in the enclosed report, the deputation will again wait upon you.

The desire for speedy information from your Department is due to the fact that our Council has been called together for 3d April, in order to appoint a Superintendent of the Works and arrange for matters in connection with the improvement of our roads.

Yours respectfully,

W. G. WILSON,

County Clerk.

Napanee, March 22d, 1906

Hon. Dr. Reaume,
Minister of Public Works,
Toronto, Ont.

Hon. Sir,—At a meeting of the Roads and Bridges committee of this County, we were appointed as a deputation to submit a written presentation in behalf of the County Council, asking your approval and satisfaction of the County Road By-law, previously submitted to you, together with a plan of the roads designated in the By-law. We are also prepared to wait upon you if necessary at any time to give any additional information required by you and to urge a speedy approval of the By-law.

Our presentation of the matter is as follows:

In the year 1872 the Council of the County of Lennox and Addington purchased from the Richmond Road Company their right, title and interest in all the roads owned by the said Company, which consisted of about fifteen miles of road in the Township of Richmond, and one mile in the Township of Camden, paying therefor the sum of \$7,500.00. Subsequently different portions of road throughout the County were assumed by By-law as County roads.

In January, 1893, the County Council passed a By-law abandoning all the County roads.

The Council of the Township of Richmond protested and disputed the right of the County to abandon the roads purchased by the County from the Richmond Road Company.

An agreement was arrived at between the Council of the Township of Richmond and the County Council by which a test case was to be submitted to the Court to decide the liability for the maintenance of the road formerly owned by the Richmond Road Company.

The County Council adopted a resolution requesting the Township of Richmond to keep said road in repair pending a decision as to the ownership of said road.

The case was withdrawn before trial and therefore no decision was ever given and the ownership of said road, and the liability for maintenance has been a matter of dispute between the Township of Richmond and the County of Lennox and Addington ever since. In June of last year the Township of Richmond presented a claim against the County for the sum of \$5,600.00, for maintenance of said road, which they assert they are entitled to under the agreement of 1893.

The County Council rejected this claim, and an action was at once instituted against the County Council for committing a common nuisance through the non repair of the road in dispute.

On June 27th, 1905, this action was up for trial before His Honor Judge Price, and an agreement was then entered into between the County Council and the Council of the Township of Richmond by which the action against the County was abandoned on condition that the County road by-law, then under consideration, should be finally passed and put into effect.

We enclose herewith a copy of a resolution of the County Council in

Red Rose Tea is Clean Tea

CLEANLINESS is as necessary to tea quality as to any other food.

Tea rolled by hand, cured by hand, weighed, blended and packed by hand may or may not be clean.

Every operation of making Red Rose Tea, on the plantation and in the warehouse, is performed by machines, the rolling and curing, the blending and weighing are all done by scrupulously clean automatic machinery.

Red Rose Tea is never touched by human hands from the picking to your kitchen.

Red Rose Tea is always clean. It cannot be otherwise, because it has no possible chance of contamination.

Its "rich, fruity flavor" cannot be impaired by foreign substance of any sort whatever.

Red Rose Tea is good Tea

DRS. KENNEDY & KERGAN

Specialists in the Treatment of Nervous, Blood, Private and Sexual Diseases of Men and Women. 25 Years in Detroit.

No Names used without Written Consent. Cures Guaranteed.

Thousands of young and middle-aged men are annually swept to a premature grave through early abuse or later excesses. Chas. Anderson was one of the victims, but was rescued in time. He says: "I learned an evil habit. A change soon came over me. I could feel it; my friends noticed it. I became nervous, despondent, gloomy, had no ambition, easily tired, evil forebodings, poor circulation, pimples on face, back weak, dreams and drains at night, tired and weak morning, burning sensation. To make matters worse, I became reckless and contracted a blood disease. I tried many doctors and medical firms—all failed till Drs. Kennedy & Kergan took my case. In one week I felt better, and in a few weeks was entirely cured. They are the only reliable and honest Specialists in the country."

READER—We guarantee to cure you or no pay. You run no risk. We have a reputation and business at stake. Beware of frauds and impostors. We will pay \$1,000 for any case we take that our NEW METHOD TREATMENT will not cure.

We treat and cure Nervous Debility, Varicocele, Stricture, Weak Parts, Kidney and Bladder Diseases. Consultation free. Books free. Call or write for Question List for Home Treatment.

RHEUMATISM FLIES

IN ONE TO THREE DAYS

WHAT A "HEAVEN BEGUN BELOW" IT WOULD BE TO MANY A WEARY SUFFERER FROM RHEUMATISM, NEURALGIA AND ALL THE KINDRED AILMENTS, IF FAITH WOULD TAKE HOLD OF AND USE SO RADICAL A CURE AS THE GREAT

South American Rheumatic Cure

Why, its very nature makes it the most natural and easy cure that human intuition and diligence have discovered. Its wonderful power is in its simplicity; its effectiveness is in its going right to the seat of the trouble, dispelling the causes that "bode evil," give pain, stiffen joints, distort limbs, twist muscles, and when it reaches vital spots, oftentimes cause death. South American Rheumatic Cure is as harmless as milk. One of its marvels is the rapidity with which it effects a cure and the testimony of the thousands who have "thrown away their crutches" and climbed from the valley of suffering to the mountain top of health would fill a book.

Don't be incredulous. Encouragement comes with the first dose no matter of how long standing.

ALL DRUGGISTS AND MEDICINE DEALERS HAVE IT.

SOUTH AMERICAN RHEUMATIC CURE

S. BOND & CO., ODESSA.

ONLY 1-50 OF A GRAIN

Fruit is good for you. Ripe figs are a splendid laxative to regulate the bowels. Prunes are good for stomach and liver. Orange juice is splendid for the nerves and sleeplessness. Apples heal the kidneys and increase the flow of urine. If apple juice be evaporated to a gray powder, 1-50 of a grain of this powder has the same action on the kidneys as half a pint of fresh apple juice. Two "Fruit-a-tives" tablets contain more than 1-50 of the medicinal part of apple juice, besides the healing, curative virtues of oranges, figs and prunes. More than that, "Fruit-a-tives" are concentrated and combined with tonics and antiseptics by a secret process which increases their powers over disease many times.

Her Method of Darning.

"The worst case of a henpecked man I ever saw," said the traveling man, "is up in my little native place among the Berkshire hills. The hen in this case is a smart woman who runs a farm and keeps everything shipshape except her husband. She is content to let him get along in any old fashion, so long as he does not interfere with her work. One day he asked her apologetically if she wouldn't darn at least one pair of his stockings, for every pair he owned had holes.

"She gave him a crushing glance and said, 'If every pair has holes, wear two pairs, and the good places in one will cover the holes in the other.' And she made him do it too."—New York Press.

Mexico's Fans.

In Mexico fans were used long before the conquest, and when Montezuma heard that the Spaniards had landed and were about to visit him he sent for goldsmiths and lapidaries and ordered, among other gifts which were to be offered to Cortes, two feather fans ornamented with a sun and moon of highly polished gold. Like the Japanese and other ancient nations, the Aztecs evidently considered the fan an emblem of authority, for they generally placed it in the hands of Ometecuhtli, god of paradise, and of Toteac, the military disciple of Quetzalcohuatl.

Weighing the Anchor.

A young lady, who had no knowledge of nautical phrases, asked a friend, "Do you know, I often wonder why a ship has to weigh its anchor every time it leaves port?" The answer of her friend was not illuminating—"Well—er—the weight is constantly changing, you know, because of the—er—binnales and things that accumulate on the anchor!"—London News.

His Jubilee.

Judge—Are you aware of any mitigating circumstances in your case? Prisoner—Yes, your honor. This is the fiftieth time I have been here for vagrancy, and I thought that perhaps we might get up a small jubilee.

For Two Pins.

"My wife told me this morning that for two pins she'd kiss me."

"How affectionate!"

"No; merely crafty. She's after two diamond hatpins she saw in a jeweler's window yesterday."

The Resemblance.

"A wild goose has really some reason to be classed in courage with the eagle."

"In what respect?"

"It is sure to die game."—Baltimore American.

Scorn no man's love though of a mean degree. Love is a present for a mighty king. Much less make any man thine enemy.—Herbert.

Information.

"What is a domestic animal, mamma?" asked the little boy.

"A domestic animal," replied mamma, with a scornful glance at papa, who was putting on his coat, "is one who does not spend all his time at the club."—Brooklyn Life.

A bill is better receipted, and an old chair is better reseatd, and that is the resemblance between them, although neither of 'em looks at all like the other.

AMERICAN OFFICIAL ENDORSE

Twenty-Eight Army Generals Send Letters of Endorsement

To Dr. Hartman, the Inventor of Peru-na.

No other catarrh remedy in the world has received such unstinted eulogy from so many renowned statesmen and military men as Peru-na.

Gen. O'Beirne of Washington, D. C.,
Writes: "As many of my friends and acquaintances have successfully used your Peru-na as a catarrh cure, I feel that it is an effective remedy, and I recommend it as such to those suffering from that disease as a most hopeful source of relief."—James R. O'Beirne, 290 Broadway, Washington, D. C.

General S. S. Yoder of Ohio,
Writes: "I have found Peru-na to be a wonderful remedy. I only used it for a short time and am thoroughly satisfied as to its merits."—S. S. Yoder, Washington, D. C.

Brigadier-General Kirby
Writes: "I can recommend Peru-na to all those who are afflicted with catarrh."—D. T. Kirby, Washington, D. C.

Brigadier-General King of Confederate Army,

Writes: "I unhesitatingly state that I am convinced Peru-na is a medicine that will effect all the cures that are claimed for its use."—J. Floyd King, Washington, D. C.

General Smalls, Beaufort, S. C.,
Writes: "I have used Peru-na for catarrhal trouble and find it beneficial and to be all that it promises, and freely give it my unqualified recommendation."—Robert Smalls.

General Abbott of Washington, D. C.,
Writes: "I am fully convinced that your remedy Peru-na is an excellent tonic. Many of my friends have used it with the most beneficial results for coughs, colds and catarrhal trouble."—Ira C. Abbott, 906 M St., N. W., Washington, D. C.

Captain Yarnell of Washington, D. C.,
Writes: "Your medicine, Peru-na, I believe to be the best medicine for catarrh on the market. I have taken only a small amount, and can see very beneficial results."—W. G. Yarnell, 2322 Lincoln street, N. E., Washington, D. C.

General McBride of U. S. A.,
Writes: "I have no hesitation in recommending Peru-na to all persons who are afflicted with catarrhal troubles."—J. D. McBride, 450 Pennsylvania Ave., N. W., Washington, D. C.

General Noske of O. V. U.,
Writes: "I commend Peru-na to those who are troubled with colds, producing catarrh, as a most efficacious cure and as

a good general tonic."—Chas. F. Noske, 213 B St., N. W., Washington, D. C.

General Erwin's Recommendation.
"Many of my friends have used Peru-na as a dyspepsia remedy with the most beneficial results."—John B. Erwin, Washington, D. C.

Brig. General Schell Benefited.
"Peru-na is indeed a wonderful tonic, and for coughs and colds I know of nothing better."—F. M. Schell, Washington, D. C.

General Duffield of the Union Army,
Writes: "I have used Peru-na in my family and have found it a valuable medicine, and take pleasure in recommending it to all who suffer from catarrh of the stomach or who require a tonic of efficiency."—The Cairo, Washington, D. C.

General Butler of South Carolina,
Writes: "I can recommend Peru-na for dyspepsia and stomach trouble. I have been using your medicine for a short period and feel very much relieved. It is indeed a wonderful medicine, besides a good tonic."—M. C. Butler.

Gen. Powell, Hecker Post No. 443,
Writes: "After using one bottle of Peru-na I became convinced of its curative qualities, and continued its use to date.

FITS CURED

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEIBIG CO., 179 King Street, W., Toronto, Canada. All druggists sell or can obtain for you

LEIBIG'S FIT CURE

ICERS OF HIGH RANK E AMERICAN REMEDY, PE-RU-NA.

GEN'L. O'BEIRNE

GEN'L YODER

Gen. Henderson of Washington, D. C.,
Writes: "Peruna has been used in my family with the very best results, and I take pleasure in recommending your valuable remedy to my friends as a fine tonic and effective cure for catarrh."

Maj. Gen. Armstrong of Washington, D. C.,

Writes: "As many of my old comrades and friends have been greatly benefited by the use of Peruna for catarrhal troubles, I heartily join in their endorsement of its curative qualities."—F. C. Armstrong.

General Pettys of the U. V. U.,

Writes: "It affords me pleasure to say that some of my patients who have used Peruna as a tonic and also for catarrhal troubles, have been greatly benefited by the same. I am satisfied of the excellence of the same."—Charles Pettys.

General Legg of Washington, D. C.,

Writes: "I take pleasure in endorsing the many recommendations I have heard and read of Peruna, because of having had knowledge of the truth of so many of them."

"We always tell our sick and ailing friends of the remedies that we have learned, from experience, were good for us when ailing in the same way, and we do it as a duty we feel that we owe them."

"Why is it any the less our duty to advise all the people we can when we know of a good and comparatively inexpensive remedy that makes many cures, and benefits in almost all cases?"

"My own little personal experience of being relieved of deafness, caused by a siege of catarrh, warrants me in advising all the afflicted to just try Peruna."—A. M. Legg.

Col. Shatswell of Washington, D. C.,

Writes: "I commend Peruna as a most agreeable as well as effective medicine. Catarrh and catarrhal colds are checked and generally cured by a judicious use of it. It is a good promoter of digestion and is an excellent remedy for a weak stomach. It tones up the appetite and is not at all disagreeable to take."—Nathaniel Shatswell.

Captain Jackson of Washington, D. C.,

Writes: "I am eighty-three years old, a veteran of the Black Hawk, Mexican and Civil Wars. Some years ago I was seriously affected with catarrh of the stomach. After the use of three bottles of Peruna every appearance of my complaint was removed."

"If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis."

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O. All correspondence held confidential.

All symptoms of catarrh have disappeared, yet I continue its moderate use as a preventive, and an old man's tonic."—W. H. Powell, Belleville, Ill.

Gen. Sebring of the Confederate Army,

Writes: "I can cheerfully recommend your valuable remedy Peruna as a very excellent tonic, and also good for coughs, colds, catarrh and general debility."—W. H. Sebring, 133 W. 4th St., Jacksonville, Fla.

General Payne of Washington, D. C.,

Writes: "I join with my comrades in recommending Peruna to my friends as an invigorating tonic to build up the system."—Eugene B. Payne, 407 4th St., N. W., Washington, D. C.

General Talley of Pa. Vol. U. S. A.,

Writes: "Your Peruna has been used by me and my friends as a relief for catarrhal troubles with the most beneficial results. I am so convinced of the efficacy of Peruna that I do not hesitate to give it my recommendation."—Wm. Cooper Talley, 713 D St., N. E., Washington, D. C.

General Bigelow Cured.

Gen. J. G. Bigelow, 151 C St., N. W., Washington, D. C., writes:

"Peruna has made me well and it has given me more than ordinary strength and spirit for work."—J. G. Bigelow.

General Chase, Asst. Adj. Gen'l G. A. R.,
Writes: "The excellence of Peruna as a cure or relief for catarrhal disturbances is well established. Many of my friends have been benefited by its use."—B. F. Chase, 28 Harrison St., Anacostia, D. C.

General O'Connor of U. V. Legions,

Writes: "If you are suffering from catarrh or physical debility, immediately commence the use of Peruna. It has been of the greatest benefit and service to many of my friends."—Dennis O'Connor, 738 32nd St., N. W., Washington, D. C.

Gen. Wright of the Confederate Army,

Writes: "I take pleasure in recommending Peruna. It is a remarkable medicine and should be used by persons who are in need of a good tonic and by sufferers from catarrh."—Marcus Wright, 1724 Corcoran St., Washington, D. C.

Gen. Hawley of Washington, D. C.,

Writes: "I have used Peruna and find it very beneficial for kidney trouble and especially good for coughs, colds and catarrhal troubles."—A. F. Hawley.

Brig. Gen. Cook, of Washington, D. C.,

Writes: "As a number of my friends and acquaintances have used Peruna as a catarrh cure with good results, and as

I am now using it beneficially, I can safely recommend its use to persons suffering from this disorder."—Geo. W. Cook.

Gen. Middleton of Washington, D. C.,

Writes: "Your preparation of Peruna as a cure for catarrh as well as a tonic deserves the gratitude of those afflicted with that disease as well as physical prostration. I have been much benefited in every respect in various ways, and I feel it a duty to recommend its usefulness to my fellow citizens."—John Middleton.

General Sypher of Washington, D. C.,

Writes: "After suffering for years with neuralgia, I was persuaded by a friend to use your remedy, Peruna, and after giving it a fair and thorough trial, I can now cheerfully recommend Peruna to any one who is suffering with neuralgia. It is also an excellent tonic."—J. H. Sypher.

Brig. Gen. Gibson of Washington, D. C.,

Writes: "Peruna is not only a remedy for colds and catarrh, but also an admirable tonic and should be in every household. I commend its possession and use to all persons. Am using it myself with good results."—A. G. Gibson.

TWO ALPHABET LETTERS.

"J" and "W" Comparatively Recent Additions to the List.

It is a fact, not so well known but that it may be said to be curious, that the letters j and w are modern additions to our alphabet. The letter j only came into general use during the time of the commonwealth, say between 1649 and 1658. From 1630 to 1646 its use is exceedingly rare, and I have never yet seen a book printed prior to 1652 in which it appeared. In the century immediately preceding

over £1,000,000 of today. These golden bezants contained about 30 shillings' worth of our gold, but to go to market with would buy then as much probably as 7½ sovereigns now would. Were the scorpion allowed to break forth here he would probably tell how this high priced and saintly carcass was treated by his people when Louis died at the siege of Tunis, twenty years later. Being hard up for embalmers, they had, according to the journal of Aubrey, to quarter and boil him down in separate caldrons and so sent but his

forget the past." Be kind to yourself and "forget it." Do not try to do so in a labored, strenuous way, but gently suggest to yourself a dozen times a day if necessary that you are happy in the "eternal now" and not burdened down with disagreeable thoughts of the past. In learning the "art of forgetting" you will form the wholesome habit of remembering things worth knowing and thereby bring harmony, peace and contentment into your life.—M. J. Lorimer in Suggestion.

Nervous Women

Their Sufferings are Usually Due to Female Disorders Perhaps Unsuspected.

A MEDICINE THAT CURES

Can we dispute the well-known fact that Canadian women are nervous?

How often do we hear the expression, "I am so nervous, it seems as if I should fly," or, "Don't speak to me." Little things annoy you and

make you irritable; you can't sleep, you are unable to quietly and calmly perform your daily tasks or care for your children.

The relation of the nerves and generative organs in women is so close that nine-tenths of the nervous prostration, nervous debility, the blues, sleeplessness and nervous irritability arise from some derangement of the organism which makes her a woman. Fits of depression or restlessness and irritability. Spirits easily affected, so that one minute she laughs, the next minute weeps. Pain in the abdominal region and between the shoulders; loss of voice; nervous dyspepsia; a tendency to cry at the least provocation—all this points to nervous prostration.

Nothing will relieve this distressing condition and prevent months of prostration and suffering so surely as Lydia E. Pinkham's Vegetable Compound.

Miss Leah Stowell, of 177 Wellington St., Kingston, Ont., writes:

Dear Mrs. Pinkham:—

"Your Medicine is indeed a God-send to suffering women, and I only wish that they all knew what it can do for them and there would be no need of their dragging out miserable lives in agony. I suffered for years with bearing-down pains, extreme nervousness and excruciating headaches, but a few bottles of your vegetable Compound made life look new and promising to me. I am light and happy and I do not know what sickness is, and I have enjoyed the best of health now for over four years. Lydia E. Pinkham's Vegetable Compound has sent sunshine into thousands of homes and hearts."

Will not the volumes of letters from women made strong by Lydia E. Pinkham's Vegetable Compound convince all women of its virtues? Surely you cannot wish to remain sick and weak and discouraged, exhausted each day, when you can be as easily cured as other women.

only came into general use during the time of the commonwealth, say between 1649 and 1658. From 1630 to 1646 its use is exceedingly rare, and I have never yet seen a book printed prior to 1652 in which it appeared.

In the century immediately preceding the seventeenth it became the fashion to tail the last i when Roman numerals were used, as in this example, viij for 8 or xij in place of 12. This fashion still lingers, but only in physicians' prescriptions, I believe. Where the French use j it has the power of s as we use it in the word "vision." What nation was the first to use it as a new letter is an interesting but perhaps unanswerable query.

In a like manner the printers and language makers of the latter part of the sixteenth century began to recognize the fact that there was a sound in spoken English which was without a representative in the shape of an alphabetical sign or character, as in the first sound in the word "wet."

Prior to that time it had always been spelled as "vet," the v having the long sound of u or of two u's together. In order to convey an idea of the new sound they began to spell such words as "wet," "weather," "web," etc., with two u's, and as the u of that date was a typical v the three words above looked like this: "Vvet," "vweather," "vweb."

After awhile the typefounders recognized the fact that the double u had come to stay, so they joined the two u's together and made the character now so well known as w. I have one book in which three forms of the v are given. The first is an old double v (vv); the next is one in which the last stroke of the first v crosses the first stroke of the second, and the third is the common w we use today.

Gave Him a Start.

Holding up a pair of antique candlesticks, an auctioneer said:

"Give me a start."

"A dime!" came a voice from the crowd.

"What!" exclaimed the horrified auctioneer.

"Ah," said the bidder, "I thought that would give him a start!"

Fraudulent Sweetbread.

"A true sweetbread is perhaps the most healthy meat that can be eaten," said a doctor, "but you are never able to get it. The sweetbread proper is the pancreas, which is one of the most effective agents in promoting digestion, but the sweetbread of trade is usually obtained from the throats of cattle and is what is called the thyroid gland. This gland rests against the windpipe, and while its texture is similar to that of the real sweetbread, it has not the same beneficial qualities. But some butchers, in order to make money, pass off the salivary gland, that which furnishes the saliva, located in the cheeks, for a sweetbread. This is the most inferior substitute of all. The pancreas, or real sweetbread, is a most dainty morsel. It is of triangular form, while the sweetbreads obtained from the throat are of an oval form. But what is the use of making people dissatisfied? They have been eating thyroid and salivary glands for sweetbreads for years and have been satisfied. But then they have never tasted the real thing."—Pittsburg Dispatch.

Money Value of St. Louis.

When Louis IX., the saint, surrendered with his whole forces to the Saracens at Mansura on the 5th of April, 1250, 1,000,000 golden bezants—equal to half that number of the livres of the day—were demanded for his freedom. But the Moslems came down to 800,000 bezants, and in the end by surrendering Damietta Louis got off for 100,000 marks—equal, roughly, to

priced and saintly carcass was ordered by his people when Louis died at the siege of Tunis, twenty years later. Being hard up for embalmers, they had, according to the Journal of Aubery, to quarter and boil him down in separate cauldrons and so sent but his whitened skeleton to France.—London Chronicle.

The People of Great Britain.

Ethnologically Great Britain is a mixture of many races, resulting from a succession of invasions. When the Romans invaded Britain the inhabitants were Celtic, mixed with an earlier Euskarian non-Aryan element. They continued to be mainly so until the fifth and sixth centuries, when the level parts of the country were overrun by German tribes. Then followed invasions by the Danes and other Scandinavian tribes and lastly the Norman conquest. The inhabitants of England and the lowlands of Scotland, therefore, sprang from an amalgamation of the original Celtic with German and Scandinavian blood. Wales and the highlands of Scotland are still inhabited by descendants of the ancient Celtic tribes. The people of Ireland also are of Celtic origin, although there is an admixture of many other races.

Costliest Building in the Country.

Which is the costliest building in America? Would you answer offhand the New York state capitol at Albany? Hardly. Your thoughts would turn more likely to the national capitol at Washington or to the Congressional library. But the New York state capitol cost more than the national capitol and the library of congress together. The Empire State capitol cost \$24,000,000, while the one at Washington, two acres larger, cost only \$12,000,000 and the Congressional library only \$7,000,000. Our Empire State capitol cost as much as the nation paid for all Florida and the Philippines combined.—Gilson Willets in Leslie's Weekly.

The Art of Forgetting.

I have heard men and women say, "I could be happy now if I could only

the past. In learning the art of forgetting" you will form the wholesome habit of remembering things worth knowing and thereby bring harmony, peace and contentment into your life.—M. J. Lorimer in Suggestion.

Followed Instructions.

A lady going from home for the day locked everything up carefully and for the grocer's benefit left a card on the back door.

"All out. Don't leave anything," it read.

On her return she found her house ransacked and all her choicest possessions gone. To the card on the door was added, "Thanks. We haven't left much."

Had to Creep.

"Why do you say 'A blush crept over the face of the fair plaintiff?'" asks the editor.

"Because," explains the society editor, "there was so much powder on her face the blush had to creep or else it would raise too much dust!"

A Good Rule.

When thou wishest to give thyself delight think of the excellencies of those who live with thee. For instance, of the energy of one, the modesty of another, the liberal kindness of a third.—Marcus Aurelius.

A Ruler.

Singleton—That's a queer sign, "Wanted—A girl to feed ruling machine." Wederly—Nothing queer about that. Somebody wants a nurse girl to look after the baby.

Some people will never learn anything, for this reason, because they understand everything too soon.—Pope.

of *Charles H. Fletcher*

"Let the GOLD DUST TWINS do your work"

"Your Servants, Madam!"

The Gold Dust Twins are always ready to work; they are certainly artists in the cleaning line. There's nothing cleanable which

Gold Dust Washing Powder

will not clean—and do it better, more quickly and more economically than anything else can. You are not serving your best interests if you're trying to keep house without GOLD DUST.

OTHER GENERAL USES FOR GOLD DUST: Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil cloth, silverware and tinware, polishing brass work, cleansing bath room, pipes, etc., and making the finest soft soap.

Made by THE N. K. FAIRBANK COMPANY, Montreal, P. Q.—Makers of FAIRY SOAP.

GOLD DUST makes hard water soft

THE REAL FOUNDATION

The Enduring Life Is Not That
Built on Dreams.

Therefore whosoever heareth these sayings of mine and doeth them, I will liken him unto a wise man which built his house upon the rock.—Matt. vii., 24.

A good many thousand sermons have been preached on this text, probably nearly all of them with the intent to prove that the way to build the life on a rock foundation is to pass through the experience known as conversion, obtain saving faith and join the church. This is typical of a popular way of interpreting the scriptures: First, determine what you wish them to mean and then make them mean that. The purpose being to persuade people to join the church, then by hook or crook that duty must be discovered in every divine precept.

But this is simply to ignore the plain words of the great teacher. It would be impossible to clarify his statement: If any man hears and does the things I have been teaching he is like one who builds on a rock. One thing marks the rock-founded life, the doing of Christly deeds. The course of conduct, the kind of character he has just outlined in the sermon on the mount gives the established staple character.

The enduring life is not built on dreams. Many people think that their lives are rock-founded because they have a nebulous admiration for the moral teachings of Jesus. On the whole they admire

THE SERMON ON THE MOUNT;
having taken the trouble to say as much as this they sit back with the comfortable feeling that they have set themselves in their right place in the universe, that the Almighty will be delighted with their indorsement.

One of the most dangerous hypocrites is the easy going, thoughtless being who fancies that the indorsement of a duty is equivalent to the doing of it. He evaporates his convictions into compiments instead of crystalizing them into conduct. So far from being built on a rock he floats around on a whisp of hay in a high wind. A butterfly might better hope to drill and quarry out a foundation than he. Besides this, his hypocritical praise of right precepts makes

them only offensive to those who might desire to practice them.

Others imagine that an intellectual assent to certain statements concerning the church or the bible or Jesus is sufficient to fix the life in stability. But the great teacher does not place the emphasis so much on what men may think of his character or mission, nor even on their honest opinions on the theories of the past and the future, which have delighted mental gymnasts since the world was young, to him the great differentiating fact touches those dynamic convictions that are determining your conduct this day.

He places conduct before creed. He long ago took that method of teaching which modern pedagogy approves. He taught religion by the manual method. Instead of saying, as theologians do, first comprehend these doctrines and then you will be able to do them, he says, first do these things,

PRACTICE MY PRECEPTS,

and they will ere long become plain to you. Men learn religion by doing. Begin to do the right and you will get the reason; get the rule through the example. Deeds are the solvents of doctrines.

The house of life is built differently from any other; we get the plans by erecting the structure. In the realm of character it is houses rather than architecture we need. Build but one hour's conduct squarely on the plain, cogent teachings of the man of Nazareth and you will serve the world better than if you gave a lifetime to the explanation of his words.

Doctrines are but teachings intended to be done into deeds. Doing them you gain a larger peace of mind and sense of stability of life than in any other way. If you want the equilibrium of faith you will find it by simply laying life's daily details on the plain foundation of his principles. Nothing could be plainer; there are no hair-splitting metaphysics, no subtle questions of policy here; do these things and the heart finds calm, the life certitude, the soul satisfaction.

HENRY F. COPE.

THE S. S. LESSON

INTERNATIONAL LESSON,
APRIL 15.

Lesson III. Jesus's Power Over Disease
and Death. Golden Text:
John 11. 25.

LESSON WORD STUDIES.

Note.—These Word Studies are based on the text of the Revised Version.

A Shorter Account of the Sermon on the Mount.—In verses 20-49 of the preceding chapter Luke gives a briefer account of the Sermon on the Mount. The main differences between the account of Matthew and this briefer one in Luke are explained by the different objects and intended circle of readers of these gospels; but in both the Sermon is given as the inaugural discourse of the kingdom of heaven. Matthew, writing for the Jews, records much that has special bearing on the Levitic law (5. 17-38), while Luke, writing for Gentiles, omits much of this. Luke, however, records some of the omitted parts of the sermon in another connection later on in his gospel narrative.

prejudiced modes of thinking, the words and works of Jesus invariably revealed the power of God.

17. In the whole of Judea.—From this statement some have inferred that Luke was under the wrong impression that this miracle was performed in Judea, but such an inference is not at all warranted. What is intended by the phrase is a statement of the fact that the news of the miracle spread even as far as into Judea, some miles to the south, as well as in all the region round about.

FIJIAN SAW HIS MAJESTY

ISLAND CHIEF'S DESCRIPTION OF
PARLIAMENT OPENING.

After Ceremony He Has a Sumptuous
Feast at a Restaurant in
the City.

A Fijian who witnessed the opening of the British Parliament by the King wrote a most interesting account of his experiences for his native paper, Na Mata, a translation of which is given in the London Spectator.

First he deals with the causes which were due to the state opening.

THE FUTURE OF RUSSIA

THE FIRE OF A REVOLUTION IS
STILL BURNING.

Leader of Moderate Conservatives Says
First Parliament Will Be
a Farce.

The uselessness of expecting that the meeting of Russia's first Parliament on May 10 will in any way abate the internal struggle is now accepted by every one in St. Petersburg, says a correspondent in that city. The fire of revolution is burning everywhere continuously, but it has not by a long way burned out or smoked out the Government. Far distant, too, is the day when the army will make common cause with the revolutionaries.

The present slaughter of minor Government employees in obedience to the orders of Counte Witte and Minister of the Interior Durnovo is a salient feature. Thirteen postal telegraphers at Tchita who shared in the general strike in October have just been sentenced to death. The revolutionaries treat this and similar cases merely as a skirmish lost in war.

Against the existing system the revolutionary programme is still the paralysis of the administrative machinery from within. Street fighting and other disorders are not part of their scheme. The leaders are not likely to call

A GENERAL STRIKE

at present because the installation of the Douma as part of the fabric of Government offers some hope of wrecking the whole system.

Dmitri Shipoff, the leader of the moderate conservatives, makes the following estimate of what the Douma will amount to when it meets. The majority will be peasants, who will arrive quite unprepared for the mode of procedure. Many will not even understand the words used, which will be of the official kind and wholly strange to them. The peasants will maintain that the agrarian question is their paramount interest and will refuse to trust its solution to any one outside of their own class. But it is just the agrarian question which is bound to meet from the beginning insurmountable difficulties which will serve the revolutionary propaganda."

Shipoff holds strongly that the double and triple system of election makes the people regard the whole procedure as intentionally complicated and obstructive. He emphatically denies that the new Council of State will serve in any sense the purpose of upper chambers and senates elsewhere.

He maintains that it will be almost the same bureaucratic wall which exists now as

AN ENEMY OF PUBLIC LIFE.

He is certain from long experience (he was chairman of the Moscow provincial zemstvo for many years) that the Council of the Empire and the Douma are fated doomed to a disagreeable struggle, inasmuch as no decision of the Douma can be brought direct to the Emperor's notice. The Council, in its new form, not only diminishes the authority of the Douma but concurrently reduces the prerogative of the Emperor.

The majority of those who have analyzed the constitution of the chambers agree with Shipoff that they have been so drafted under Count Witte's guidance as to strengthen the bureaucracy at the expense of both the Czar and the people.

MARY'S EASTER PARTY.

It happened that Mary's tenth birthday fell on Easter Monday, so, to her great delight, her mamma decided that she might give an Easter party to her little friends.

Ten little folks received, several days prior, invitations written on egg-shaped cards, together with the request that each child bring one dozen hard-boiled and colored eggs.

The two elder sisters of the small hostess attended to the planning of the party, and the decorating of the rooms for the occasion. The large sitting room was adorned with many paper lilies, and one large pot of real Easter lilies in regal bloom. All about the walls, on the lamp shades and shelves, were tissue paper nests with candy birds' eggs, fluttering butterflies, also tissue, and quaint rabbits guarding their treasures of oval dainties.

The dining room walls were festooned in white and green, evergreen garlands, and the waxy white of pigeon berries. The tablecloth of snowy white had a delicate tracery running in and out among the dishes, made by a slender rope of evergreen. The centrepiece was a tall Japanese paper stork guarding a nest in a tall chimney, and in the nest two small baby storks, and a tiny baby in wax. Around the foot of this piece a bank of valley lilies nestled in green moss. The moss was real, the lilies artificial.

Around this circled ten small white plates, each with a great orange resting on it. Outlining these a strip of tissue moss in deep scallops, in which moss were set tiny lilies. At each end of the table was a large cardboard lily, holding about a quart of candy eggs in all sizes and colors. To hold these in place set the flowers in deep bowls, and cover the bowls with paper or moss.

For amusements, the sisters had planned out a brief programme. First Mary recited a short Easter poem. One of the sisters told the quaint legend of the stork, and linked it with the tender story of the time. The other sister told of the part the rabbit plays in the Easter story. Two girl friends told stories, one giving the true wonder of the butterfly resurrection; the other telling gay stories of egg rollings.

Then followed an egg-cracking contest, in which all the children took part. Two persons would each choose an egg, and crack them together, the one having his egg broken first having to give it up to the other. At the end of the contest, the person having the most eggs in his or her basket had a pretty painted egg as a prize.

Next came a grand egg hunt; the sisters had hidden all about in the sitting room and hall 500 candy eggs. Mary did not know of this, so she, too, was given a tiny basket, and allowed to join the half-hour hunt. No one was allowed to eat an egg till the trial was over—under the lounge, behind picture frames, etc., were they hidden. Time up, one girl was found to have 15 more than anyone else, so she received a candy box in the form of a rabbit as a prize. The baskets were given as souvenirs, and each child was allowed to eat the eggs she had found.

Several games were played before the little guests filed out to the supper room. The supper consisted as much as possible of dishes into the composition of which went eggs. Egg sandwiches, eggs cooked in every possible way and accompanied by bread and butter cut in egg shape, custards, a simple ice cream yellow with eggs, tiny cakes in egg shades, and oval jelly tarts. The finishing dishes were the candies and oranges.

Songs and a game or two more, and then the children went home, each car-

THE EGG FEAST

the kingdom of heaven. Matthew, writing for the Jews, records much that has special bearing on the Levitic law (5. 17-38), while Luke, writing for Gentiles, omits much of this. Luke, however, records some of the omitted parts of the sermon in another connection later on in his gospel narrative.

Verse 1. All his sayings—Those spoken in the Sermon on the Mount.

Into Capernaum—Near which city the sermon just ended had been delivered.

2. Centurion—An officer of the Roman army commanding a company of one hundred men, as the name implies.

Servant—Literally bond servant, or slave.

Dear unto him—Or, as in the marginal rendering of the Revised Version, precious to him, or honorable with him.

3. Sent unto him elders of the Jews—Note both the modesty and the propriety of this action on the part of the Roman soldier. He knew Jesus to be a Jewish rabbi, and his respect for the Jewish religion prompted him as a Gentile not to go himself directly to Jesus, but to approach him through the mediation of recognized representatives of the Jewish people.

4. He is worthy—The respect with which the centurion seems to have habitually treated the Jewish people, as exemplified in his action referred to in the preceding verse, won for him in return the respect of the Jews. It was indeed a high tribute for a Jew to give a Roman to say that he was worthy of attention and favor at their hands.

5. He loveth our nation—All that we learn concerning the centurion indicates that his religious convictions inclined him toward the Jewish faith.

Our synagogue does not imply that there was but one synagogue in Capernaum, but simply that the one to which these particular Jews belonged was referred to.

Not far from the house—The narrative of Luke at this point is more detailed than that of Matthew (comp. Matt. 8. 5-10).

Lord—The word Lord here does not necessarily imply more than "Sir," in which sense we find it used in John 4. 19; 12. 21; Acts 16. 30; and other passages.

But say the word—Or, speak with a word.

Servant—Lit. in this case, boy.

8. Go and do—The centurion's argument seems to be this: as he himself commands and is obeyed by those over whom he has authority, so he assumes that Jesus, who apparently has power over unseen forces, and over the spirit world, can command and heal at a distance.

9. He marvels—We have here one of the many little indications found in the gospel narratives of the true humanity of Jesus. He was actually astonished at the faith of the centurion.

No, not in Israel—Where more than anywhere else, such faith was to be expected.

11. Soon afterwards—Or, as many ancient authorities read, on the next day.

Nain—A town on the northwest slope of Little Hermon near the ancient Endor. Within the territory of the tribe of Issachar. The name itself means lovely, and was given to the town on account of its charming location. It was about twenty-five miles from Capernaum.

12. To the gate of the city—All towns of importance in the ancient Orient were surrounded by walls for the sake of protection. Nain itself is approached from the road leading up from Capernaum by a narrow rocky path on which doubtless the two companies met.

14. Touched the bier—Thereby subjecting himself to ceremonial uncleanness. But here, as in the case of the leper (Luke 5. 12), Jesus sacrifices mere Levitical ceremonialism, with its rules about uncleanness, to a higher law of love.

Arise—A single word of authority. (Comp. Luke 8. 54; John 11. 43; Acts 9. 40.)

16. Fear took hold on all—In the presence of this manifested authority over death, it was natural that men should fear.

Disciples Glad To hear of simple words

A Fijian who witnessed the opening of the British Parliament by the King wrote a most interesting account of his experiences for his native paper, Na Mata, a translation of which is given in the London Spectator.

First he deals with the causes which gave rise to the stale opening.

"Parliament had been considering for a long time and divided councils had arisen," he writes, "and it seemed to the King that its reports to him were wavering, and that what it desired was not the desire of the people of the land. So he decided that it should be dismissed."

Then he discourses upon the "chieflike" boy, who is very good-natured to us Fijians, the one who fed us with crabs and gave us pipes. "This 'boy' got a 'most useful letter' from the police, which 'prevented the people of the land from crowding us, so that we might well see the King.'"

He was found a stand in Parliament Street, or, as he terms the thoroughfare, "the path of Parliament."

"As we waited we saw pass the great chiefs and their ladies in their carriages. Who can tell their splendor, the chiefs in their robes of war, and their robes as nobles of the land, and the ladies with golden crowns dazzling like lightning with diamonds and precious stones? Who can tell it? It was like a dream or the glory of the fairies."

THE WORKMAN'S "BADGE."

"Where we stood we saw all sorts of people. For this Parliament have been chosen many working men by the people, as their messengers to the Big Council. This is a new thing, as formerly members of chieflike tribes only were chosen."

"I saw one of these messengers of the working men to Parliament. He was waiting where we were. The man had a red necktie on. I was told that it was a badge of a workman, as it is not the custom of people of chieflike birth to wear red neckties."

"Just before it struck 2 on the clock the bands along the path were heard playing 'God Save the King,' and the voices of the Lords of War calling out, 'Present arms!' and then appeared the King."

"In front of him went four carriages, with six horses each to draw them. On the horses sat men, and other men ran alongside. These carriages had in them the high chiefs, who serve the King. Then came a warrior band on horseback with a handsome young chief in the centre, who carried the standard of the King."

"When they had passed by, then came the King in a golden coach, drawn by eight white horses, white as milk. As he appeared everybody took off their hats and shouted, 'Hip, hip, hooray!' and the sound of the cry was like the roar of the surf on the reef in their great joy at seeing the King."

THE KING.

"The standards opposite to us were lowered to the ground in salute, and the bells of the big church of Westminster rang out. The King bowed his head in response, and touched his hat, returning a military salute to the gladness of the people of his land."

"Sombol! Sombol! how handsome the King is. Who can describe it? He is handsome and tall and portly, even as a true chief of Fiji."

"The chieflike boy with whom I was said that we should meet in the evening with some other friends and have a feast, as a finish up to our joy at having seen the King. That thing happened, and we fed at a house of feasting called the House of Julius."

"The owner is a Frenchman very skilful in preparing food and, it pleases chiefs and ladies to feast there. The night I was there it was full of chiefs and ladies. I saw a lady there who, it was said, was the mother of a chief who concerns us, the Assistant Big Scribe for the Colonies. She looked to me very beautiful, with a splendid dress and ornaments."

"When the Frenchman knew I was a Fiji, great was his good nature to me, and he said that I should go and see his kitchen, and he took me there. Sombol! Sombol! the wealth of the white men; the saucepans were silver saucepans."

THE EGG FEAST

Germany has given us many pretty customs—the Christmas tree, the egg feast and the decorated Easter egg. The first egg feast of which we have any record occurred many hundred years ago in a mining village in the Harz mountains. According to one account, a countess was driven from her home by the cruel exigencies of war, in the night, with her two little children. A faithful serving man took them to his home and his people in this village nestled high in the Harz mountains.

The woman whose name was Frau Rosalinda von Lindenburg, received much kindness from these humble folk, but she missed many of her luxuries of her former state. She was particularly fond of eggs, and these were not to be got. Strange as it may seem, there were no hens in Germany in those days, or but a few imported at great expense from the far east and owned by the very rich. At the earnest request of the countess her host visited her home, which he found burned to the ground, and carried away under cover of darkness a few chickens that were roosting in the trees about the ruins. The peasants had never seen such "strange birds," the eggs they laid surprised them, and the brood of downy chickens hatched from the eggs filled them with astonishment and pleasure. But the good countess prepared a still greater surprise and pleasure for her kind friends.

Easter morning, after the religious service the countess gathered all the children of the village about her, and talked to them, and told them stories, and then sent them away into the grove to play, to build nests, as if they were birds, while a feast of milk soup and cooked eggs and egg cakes was made ready at her cottage for them. She had made a feast a few days before for the housewives, giving them to eat of new dishes in which eggs were used, and presenting to each guest at her departure several fowls to take home with her. But Easter was for the little ones.

Well, when the children had eaten their fill of the good things of the feast, they heard strange little chuckings and peepings and cooings in the grove, and they ran out and found in each nest five beautiful eggs, all different colors, with texts and mottoes on them. There was great fun, laughing and comparing of nests and conjecture where they came from, and what hen could lay such beautiful eggs. One little girl, seeing a hare jump out from behind a bush, declared it was he laid the Easter eggs. The children all believed it, and so came the association of the hare with the colored eggs. But in reality the countess had colored the eggs with mosses and roots.

Later in the day, as the countess sat in her cottage door with her children, she saw a man coming up the side of the mountain. Her little girl cried out, "It is father!" and ran to meet him. The countess had believed her husband dead, killed on the battlefield.

SAVED OVER 300 LIVES.

Superintendent of Bathing Ground Retires With Great Record.

Frank Shooter, who has just resigned his post as superintendent of the Exeter, England, bathing ground, has in the last quarter of a century saved over 300 lives.

He holds all the premier awards of the Royal Humane Society, including the gold medal, which was presented to him with 100 sovereigns by the Exeter citizens.

Mr. Shooter once swam 100 yards along a mill stream under a road in complete darkness, and snatched a boy from death just as he had reached a large waterwheel.

Only one drowning case has occurred at Exeter bathing ground during twenty-five years.

way and accompanied by bread and butter cut in egg shape, custards, a simple ice cream yellow with eggs, tiny cakes in egg shades, and oval jelly tarts. The finishing dishes were the candies and oranges.

Songs and a game or two more, and then the children went home, each carrying in their tiny baskets a dainty egg painted by the big sister helpers. These were made from the shells of the eggs used in the custards, etc., so cost nothing but a little work.

GIANT'S COFFIN UNEARTHED.

Workmen in a Bristol Street Make a Rare Find.

Workmen frequently come upon curious things in their street excavations, but it is not every day they disturb the last resting-place of a famous giant. Some workmen had this uncanny experience while digging in Trenchard Street, Bristol, England, recently.

Their picks and shovels grated against the leaden coffin of Patrick Cotter O'Brien, whose immense stature of eight feet three inches made his name a household word a century ago.

There is no mistaking the identity of the coffin for the plate thereon bore the following quaint inscription:

PATRICK COTTER O'BRIEN,

Whose name was Cotter,

But he called himself O'Brien,

Whose stature was 8ft. 4in.

He died on Sept. 8th., 1806.

Aged 46.

Patrick, it appears, was as gigantic in graces as inches. A native of Kinsale, Ireland, local history records that his manners were amiable and unoffending, and the inflexible integrity of his conduct through life, united to the calm resignation with which he awaited the approach of death, proved that his principles were strictly virtuous.

It is said that O'Brien hated the idea of exhibiting himself, and he directed that his body should be so buried as to cheat the grave robbers that gave additional terror to death in those days.

Accordingly, his friends provided a leaden coffin and had it interred at a great depth, iron bars being placed in the sides of the rock to render removal impossible.

The local authorities at Bristol are proud of their find, and it is thought they will resist any overtures from the Green Isle to recover the remains.

EASTER.

Hark! the Easter bells are ringing,
Filling all the sweet Spring air,
List! the birds their matins singing;
'Tis their Easter prayer.

Lilies tall their heads are bending
Round a shrine of Holy Name,
Incense rising, voices blending,
Easter joy proclaim.

In the dim cathedral stillness
Heads are bending low in prayer;
Voices call us through the portals,
Let us enter there.

Hark! a burst of song angelic!
See the white-robed choir advance—
Christ is Risen! Alleluia!
Sweet each upturned glance.

Let us join the heavenly anthem,
Rise my soul! Thy winter past—
Alleluia! He is Risen!
Peace has come at last!

ETYMOLOGY IN THE FAMILY.

Tommy—Pop, my teacher told us today that the name Adam means earth.

Father—That's right, my son.

Tommy—Then the original man's name was Mud.

Father—with a glance at the real head of the house—That's right, too, Tommy.

NOTHING BUT LOVE.

Stella—"They say that Helen married for money."

Mildred—"I don't believe it."

Stella—"But her husband is awfully rich and awfully homely."

Mildred—"True, but when he comes home late she scolds him for an hour."

THE STORY OF NICKEL

A MODERN MIRACLE—STONES CONVERTED INTO BREAD.

Following the Ore Through Smelter Until Finished Product Is Reached.

V.
In our last letter describing the process of smelting ore we saw the important part that water plays. Your guide further informs you that two of the things which more than anything else are necessary in modern smelting are wind and water. "If I were to ask you," your guide goes on, "what is the heaviest thing that passes through these furnaces, you would naturally answer 'ore.' But in reality there are nearly twice as many pounds of air blown into these furnaces through the pipes that we call tuyeres as of anything else. The air serves two purposes. First of all, it keeps the coke burning, and so generates heat. Then it burns the iron, or a large portion of it, which is in the ore. Just as you have seen a blacksmith hammering a bar on an anvil causing the sparks and shreds of glowing iron to fly around, so the air, rushing into the furnace, burns the iron and sets it

there was nothing here where we stand, but a rocky hillside and a swamp. It took money and brains to effect the change. It took more. It took faith in the future. It took brains and money and perseverance to produce the nickel. It took ability, foresight and courage to find the market and to seize it. If we cannot cause two blades of grass to grow where but one grew before, we make two pots of matte where there was less than one before, and to some extent we have accomplished the miracle of turning stones into bread."

So far we have been tracing the history of the successful development of the nickel industry. It is an inspiring story; but it is only part of the history of Canadian nickel. There is another story, much less encouraging, but scarcely less interesting. The woods around are full of the evidences of failure. To make the story complete both sides of it must be told. Something about the other side will be given in the articles of this series that are yet to appear.

Algy: "Do you think, my love, that your father will consent to our marriage?" Angely: "Of course, papa will be very sorry to lose me, darling." Algy: "But I will say to him that instead of losing a daughter, he will gain a son!" Angely: "I wouldn't do that, love, if you really want me. Papa has three such sons living at home now, and he's a bit touchy on the point."

ROCK HOUSE AT CREIGHTON NICKEL MINE.

free, while the quartz rock, which you saw added, seizes this iron and unites with it to form slag."

Out of the furnace at this end flows matte and slag. Matte contains copper and nickel with a little sulphur and iron. The slag contains the rock that was in the ore, the rock that was added and a little of the iron that was in the ore and was burned out. Both of these substances fall together into a large tank, which is called a "settler." The matte is heavier than the slag, and so sinks to the bottom. The slag flows off into the slag cars, one of which always stands on the track below each furnace. The slag is carried out to the dumping ground. As it cools it forms good solid ground, on which it is hoped some day to erect

NEW SHOPS AND OFFICES.

The matte, as already explained, sinks to the bottom of the "settler." As you watch an electric crane comes moving slowly down the building, carrying an enormous pot which is carefully deposited in front of the "settler" directly under a clay-lined spout. At the end of this spout a steel bar sticks into the "settler" near the bottom. The furnace men pass a hook over the end of the protruding bar, and bending to their work smile it on either side with heavy clothes. In a few minutes a stream of

HEALTH

POORLY NOURISHED CHILDREN.

Malnutrition in children, which, of course, is to be considered a condition rather than a disease, may usually be traced to one of three causes. Occasionally, although rarely, it is an inherited tendency. The children of feeble parents may inherit a general weakness of constitution, and exhibit that weakness chiefly in their digestive processes. But sometimes this inheritance is only apparent, since a nervous and unstable mother may react on her children for ill, even if they do not inherit her tendencies, by excesses and uncertainty in her system of bringing up.

Another and very frequent cause of malnutrition in the young is improper feeding. In babies it often results from some error in starting the diet, especially in artificially fed infants. If the digestion of a very young baby is allowed to get out of order, it is sometimes a long time righting itself, and all this time the child's general nutrition is necessarily suffering.

With older children a poor and insufficient diet will naturally result in weak and anemic states, just as it will in older persons, but it is generally the opposite mistake that is made. An overfed child will suffer from poor nourishment quite as much and often more than an underfed one.

The danger is not so much from an occasional overhearty meal, although that is a great mistake. An indiscretion that results in an acute attack of indigestion meets with the punishment that fits the crime; the offending matters are carried off from the system, and the transaction is closed, to say nothing of the fact that a salutary lesson has been given, which the parents may remember next green-apple-season if the boy forgets. But the danger of malnutrition lies in the constant giving of a little more food than the system needs, causing fermentation, restlessness and discomfort, and resulting in such lowering of the general condition that actual slow starvation may result, because the child is unable to digest enough food to feed it.

A third cause of malnutrition in children, and one which is to be looked for chiefly among the poorer people and in tenements, is a want of proper ventilation. Rooms are too hot and too crowded, or too cold and too crowded, windows are seldom or never opened, and plumbing is often defective. If the children of his class did not spend most of their time on the streets their mortality would be much higher; and even as it is, an epidemic finds its greater number of victims among them.—Youth's Companion.

RUSSIAN TEA.

Writing on the effects of tea as a beverage, Sir Lauder Brunton draws a contrast. In Moscow he dined with a scientific man, and after dinner the samovar was placed on the table and tea handed round. He asked his hostess how much tea she used, and she replied: "I am extravagant in tea; we are twelve at dinner, and I put in four teaspoonfuls, but most people would not put in so much." Here, the writer thought, is a difference from our rule of one teaspoonful for each person and one for the pot, and a reason why tea can be drunk to such a large extent in Russia without doing harm. While he was spending the night in a herring boat off Whitby the master complained of his sufferings from indigestion. The reason became evident when they made some tea. But, instead of being a pale straw color and having a hardly perceptible flavor, as in Russia, it was as black as ink and had a strong, bitter and astringent taste. Tea had apparently been put into the pot not by the spoonful, but by the handful. Several cupfuls every day was sufficient to produce any amount of dyspepsia.

EASTER CUSTOMS IN SAXONY.

During the Easter festival time in Saxony, there are many customs still observed, which can be traced back hundreds of years, and which are kept up precisely as in the olden times.

That one, of the peasants decorating their cottages early in Holy Week, with wooden horse heads, as a charm against evil spirits may partially have died out, it is true, but the habit of nailing a horseshoe over the barn door for exactly the same purpose on the Saturday preceding Easter day, is still strictly adhered to in Lower Saxony. It is said that Saturday of Holy Week has always been chosen for this especial task because the simple Saxon country folk still firmly believe that upon this one occasion, of all the year, the earth is entirely freed of evil spirits, all being then congregated in hell, where Christ, who was crucified the day before (Good Friday) had afterwards descended, and there showed his power over the devil and the evil spirits by preventing them from carrying out their wicked designs for that short space, upon the earth. And therefore there could be no better opportunity for nailing up the horseshoe than during the time that their tormentors are on their journey, but who, upon their return at the sight of them, will fear to enter the court or yard.

The game of ball upon the village green on Holy Thursday, played by grown-up and sometimes aged country people, seems indeed a most curious habit, but it is carried out as a religious duty, and with all zest possible, though also with a superstitious fear of tasting a drop of water or a crumb of bread, no matter how exhausted, until the game is ended.

On Good Friday, as in our Episcopal churches at home, the altars and chancels of the Lutheran churches are draped with black, but the organ is never allowed to be touched until the setting of the sun, when there is always a tremendous ringing of bells and a congregating of people to sing that touching hymn, "O Traurigkeit! O Herzensleid!"

A Roman Catholic custom, on the same evening, is the consecration of fire and water with steel, the making of stone fire, and the lighting of Easter candles, signifying eternal light.

Many of these people still believe the morning sun on Easter day hops three times for joy. But before it even arises above the horizon the village boys and girls are off to draw the "Easter water," during which process it is forbidden to speak a word or make a sound of any kind, or the water will lose its freshness and remain so until the following Easter.

But it must be confessed that though silence may be maintained as religiously as ever, the present day German boy and girl make Easter a merry occasion by playing dumb pranks upon one another, and so getting some fun out of it. Upon their return to their homes, piles of colored eggs await them, which they have always been taught to believe (on Easter day) are hare's eggs, which, during their absence at the spring, the busy little animals have laid in nests of straw and moss beside the breakfast plate.

Perhaps the queerest custom of all, and certainly an expensive one, is the destruction on Easter evening of all the earthen pots and stone vessels in the household, typifying the sacrifice of the old and the resurrection of the new. Such broken scraps, with all the shells of eggs eaten at the Easter breakfast, are thrown upon a great heap of similar debris collected upon the village green weeks before by the village boys, which stuff is used to cover up the Easter fires; it being considered good luck to keep

YOUNG FOLKS

MR. BUSHIEL'S HOSPITALITY.

Four brothers by the name of Peck, (All Mr. Bushiel's kin), As often as one desires it, Are taken by him in.

Eight sisters, the Misses Gallon, When the four Peck brothers are out, In Mr. Bushiel's quarters, Have room to move about.

Thirty-two cousins, the Quarts—ah, me! What will Mr. Bushiel do? Polite and open he smiles and says, "I'm alone, so there's room for you."

A jingling crowd—the sixty-four Pints, To shelter them, no fun! Mr. Bushiel laughs, "I'm empty now, Walk in, come, every one!"

Two hundred and fifty-six baby Gills, The tiniest friends and shy—"Can we all come in?" Mr. Bushiel replies, "I can hold you and not half two."

newest pot which is carefully deposited in front of the "settler" directly under a clay-lined spout. At the end of this spout a steel bar sticks into the "settler" near the bottom. The furnace men pass a hook over the end of the protruding bar, and bending to their work smile it on either side with heavy sledges. In a few minutes a stream of molten metal breaks from the top hole. Slowly it runs at first, blood-red and thick. Then it falls with force, sparkling in a brilliant orange-colored cascade.

As the metal falls beneath you the tapper watches it critically. "It is high grade," he says.

"How do you know that?" you ask.

"Well," he replies, "if it runs out cold-looking and thick like this," and he points to the glowing stream, "that's good stuff. But if it runs out thin, and there are sparks, then it is low grade." It goes up the converter badly. "And then, you see—"

He does not finish the sentence, but jumps into a sheet-iron shield which he throws across the stream in front of him. In his left hand he seizes a long iron rod, on the top of which a pointed vane of clay is fastened. Watching his chance he carefully places the vane of clay in position, rams it home and closes the spout. Along comes the crane, drops its tentacles or hooks, which attendants fasten to the sides of the pot, which is now filled with glowing metal. Slowly the pot is lifted up, and carried down the long building, till it reaches a curious barrel-shaped vessel with a gaping mouth. That, your guide informs you, is a Bessemer converter. The word, perhaps conveys no meaning to you, but he explains that years ago Sir Henry Bessemer discovered that if you melted pig iron and blew air through it you could burn out the impurities and turn out first-class steel. About twenty years ago it was discovered that the same principle was applicable to the metallurgy of nickel.

THE POT OF MOLTEN METAL.

which the crane has just brought down the building, is poured into the mouth of the converter, which is a barrel-shaped steel vessel, lined with quartz and clay. It seems a trivial matter, as in fact all the work done by the crane seems trivial; but here is a vessel containing five tons of molten metal emptied into another vessel as easily as you would pour out a dipper of water. After the converter has received the contents of the pot it slowly lowers its mouth until it is within about eight feet of the floor, to permit a man to throw in a stick or two of cordwood. Then the blast is turned on and the converter tips back until the mouth is brought under a hood which fits closely over it and gathers the sparks and flame into the smokestack.

"The converter," your guide informs you, "will blow for about two hours while the iron is burning out. As the iron burns out it unites with the quartz in the lining of the vessel and forms slag." When the converter has done its work the product is carried outside and poured into long iron moulds, where it is allowed to cool and harden. After it has become cold in the moulds it is broken up with sledges into slabs about three inches. That is matte. That is the finished product so far as Canada is concerned. It carries about sixty per cent. nickel, and twenty-two per cent. copper. The rest is mainly sulphur, the iron having mostly disappeared in the smelting. In this state it is shipped to the refinery in the United States, where the copper and the nickel are finally separated.

"How much matte have you made to-day?"

"Well, let us see; 22 tons last night, and 16 to 18 tons to-day, with probably two or three more before the shift changes—say 40 tons for the 24 hours. It is not as high as has been done, but the rock is not the best. We will do better when we get into a new bed."

"Simple, isn't it?" your guide remarks; and you are tempted to answer,

"YES, WHEN YOU KNOW HOW."

Then your guide becomes reminiscent. "Yes, when you know how. But it has taken time and courage and money to learn how. Three years ago

To shelter them, then, I must find a

Mr. Bushel laughs, "I'm empty now, Walk in, come, every one!"

"Two hundred and fifty-six baby Gills, The tiniest friends and shy—"

"Can we all come in?" Mr. Bushel replies,

"I can hold you and not half try."

A jolly good fellow to entertain all, This Mr. Bushel must be!

He takes them only one group at a time—

And each group makes him, you see!

THE LATE PLOVER.

It was a beautiful summer morning, and Uncle John was obliged to drive out to his farm.

"Would you like to come with me, Teddy?" he asked, as the horse was brought round to the door.

"Yes, sir!" Teddy answered, eagerly. "I just guess I would."

The sun was bright, and the country road was green and sweet with delightful odors, and Teddy trotted around in the fields like a young colt. Uncle John was driving along home at a smart trot, when all of a sudden he stopped the horse quickly and cried out:

"Teddy, do you see that?"

And there, right under the pony's feet almost, were a whole family of little plovers.

Teddy was so delighted that he could scarcely speak.

The tiny birds were just as quiet as could be, because their mother had taught them not to make a noise when any danger came near them. But they were dreadfully frightened, for you see they had been nearly run over.

"You may get out, Teddy, and run along the road for a short distance," said Uncle John.

And then Teddy saw that the little plovers were not alone, but that their father and mother were with them. The minute Teddy's feet touched the ground the old birds began to make a fuss. Probably they thought he was a cruel, bad boy that was coming to steal their babies.

The mother "cheeped" and all her little family followed her into the grass at the roadside, but the father bird ran along in front of Teddy, back and forth, and seemed to want the little boy to play with him.

"Try to catch him, Teddy," he said.

Teddy tried, but found it was not an easy thing to do. It was queer, too, for the plover dragged one wing along in the dust, and seemed to be quite lame, but just as soon as the little boy would get near the bird and think he could put his hand on it, he would find it was a little ahead of him all the time.

He followed it along the road for three or four minutes, Uncle John driving slowly after him, till all of a sudden, when the father plover thought the mother bird had had time to get their wee family through the fence into the field and to hide them safely in the long grass, he rose straight up into the air, and away he flew back to them before Teddy had time to think.

"Wasn't it too bad to fool a boy like that," Uncle John said, as Teddy climbed back into the buggy. "You see the father bird was only pretending he was lame, so you would think you could catch him, and then, while you were chasing him, he knew the mother plover would be hiding the little ones. If you were to go back now you couldn't find them anywhere."

"Oh," said Teddy, "but I wouldn't have hurt them. Why did they want to hide from me?"

"Well, you see," said Uncle John, "they didn't know you had an Aunt Anna, who has taught you to be kind to every living thing."

"That's so," said Teddy, soberly, and he wondered if he would ever know as much as Uncle John did.

SHE LOST OUT.

Mrs. Caller—"It does not always pay to husband one's resources."

Mrs. Homer—"Why not?"

Mrs. Caller—"Well, I judge so from

Mrs. Backer's experience. She let her husband have the \$5,000 she inherited from her grandmother and he lost it all in speculation."

sia, it was as black as ink and had a strong, bitter and astringent taste. Tea had apparently been put into the pot not by the spoonful, but by the hand-ful. Several cupfuls every day was sufficient to produce any amount of dyspepsia.

A CERTAIN CURE FOR CHILBLAINS.

Mutton, tallow, and lard, of each half a pound; melt in an iron vessel, and add of hydrated oxide of iron two ounces, stirring continually with an iron spoon until the mass is of a uniform black color; then let it cool and add of Venice turpentine two ounces, and of Armenian bole one ounce, and of oil of bergamot one drachm; rub up the bole with a little olive oil before putting it in. Apply several times daily by putting it upon linen or lint.

WHEN RESTING.

When you are resting, even if it is to be only a matter of a few minutes, darken your room as completely as possible. Lying down throws your head in such a position that the lids of your eyes have absolutely no chance to keep off rays of light, and there is a definite eye strain in consequence. No bed should be faced in such a way that you are forced to face the morning light, and especially not so that the light will waken you.

BLACKHEADS.

To get rid of blackheads, bathe the face for ten minutes in hot water, then gently press out the blackheads, and touch the spots with lemon juice or eau de Cologne. Wipe the face, and rub in a good skin food, or cold cream. Take plenty of green vegetables and fruit, have rooms well ventilated, and take daily exercise in the open air.

BLOOD PURIFIERS.

Figs or some fresh fruit should always be taken at breakfast. Fruit in the morning is gold. Apples are an excellent purifier for the blood. Baked apples and cream make a nice breakfast dish eaten with brown bread and butter. It is said that apples eaten plentifully will work wonders in giving persons who are addicted to alcoholic drinking a distaste for the same.

FOR BANDAGES.

For the careful woman who always has bandages on hand there is nothing better to keep them in than wide-mouthed glass jars with tops that screw on. The pieces of old linen and cotton should be boiled in order to have them perfectly clean, then ironed and torn into strips, and each strip neatly rolled. A number of these little rolls can be put into one ordinary-sized jar.

REMEDY FOR INDIGESTION.

Clean and scrape the roots of six or eight dandelions, cut into small pieces and pour over them a pint of boiling water, cover closely and let stand over night. Strain through cheesecloth and it is ready for use, a dose being a wine glass full before meals. It must be kept cold and renewed every three days. The juice of two oranges and a little sugar can be added and it will be more pleasant to take.

SLAUGHTER OF INFANTS.

Fifteen Thousand a Year Killed by Drugs in England.

The use of laudanum and aniseed as a medicine for babies was strongly condemned by Dr. Marriott, the presiding magistrate at Stockport, England, recently.

A young woman was charged with attempting suicide, and it was stated that she obtained the poison for the purpose from a chemist, who supplied laudanum and aniseed to her on the understanding that it was for a baby.

"The chemist says it is a common mixture for the babies, who are peculiarly susceptible to the effects of opium," said Dr. Marriott.

"All I can say is that over 15,000 babies are done to death annually by this so-called remedy, which is eminently adapted to increase infantile mortality."

old and the resurrection of the new. Such broken scraps, with all the shells of eggs eaten at the Easter breakfast, are thrown upon a great heap of similar debris collected upon the village green weeks before by the village boys, which stuff is used to cover up the Easter fires; it being considered good luck to keep them burning as long as possible.

Another custom here very, very old, mountains. And as dusk approaches it is interesting to see the village people issue from their houses, group together, and watch eagerly for the first spark of fire to appear upon the distant hills. There suddenly appears only one tiny flame—then another—here, there, before, behind, until finally it actually seems as if the pretty village was encircled by a beautiful chain of brilliants. As the fires are continually fed with peat and twigs, the excitement of the watchers increases in proportion, the boys and girls showing appreciation by brandishing torches, swinging lanterns and screaming with sheer delight, in which joyous demonstration the grown people join. To a stranger the sight for the first time may seem odd and almost weird, but to my mind, of all the curious Easter customs in Saxony, this is the most attractive and impressive.

A NOVEL EASTER DESSERT.

Egg shells must be saved in advance to prepare this dessert. When using the eggs break a piece from the larger end of the egg, turn out the contents, and rinse the empty shell in cold water. These may be filled with blancmange in different colors, or with jelly, colored yellow, pink, red, brown, green and clear.

A very good rule is the following: Soak one and one-quarter tablespoons powdered gelatine in one-quarter cup cold water for half an hour, then dissolve it with three-quarters cup of hot water, and one cup sugar, two tablespoons lemon juice, and one-third cup of finely grated preserved pineapple. Mix well, and let cool, stirring it once in awhile. When it begins to jelly beat it with a wire whisk until white and frothy. Add the stiffly whipped whites of three eggs, and beat a little longer. Fill gently into the egg shells and stand in a pan of meal or flour until firm, it is better to prepare them the night before Easter. In arranging for the table these may be alternated with pink or red jelly eggs, and served in a nest of rich yellow custard lightly covered with candied orange straws to imitate a nest.

EASTER PUDDING.

For some time before Easter, when baking, empty without breaking the shells, the yolks and whites of the eggs from small holes in the large end of the shells for milk. Make a blancmange, using 1 qt. milk, $\frac{1}{2}$ cup sugar and 4 tablespoons cornstarch. Divide the mixture in three parts. Color one part yellow with the yolks of eggs, and flavor with lemon, another part brown with chocolate, leaving the third white and flavoring with vanilla. Pour the mixture into the shells and stand in a pan of corn meal or flour to keep the open ends upward. Put in a cool place over night.

Soak $\frac{1}{2}$ box gelatine in $\frac{1}{2}$ pt. cold water for 30 minutes. Add 1 pt. boiling water and place over the fire until dissolved, stirring all the time. Remove from the fire, add 1 cup granulated sugar and the grated rind and juice of 2 oranges. Turn a pie plate upside down in the bottom of a 2-qt. granite basin or an earthenware dish of about the same size. Strain the mixture in this and let stiffen. This forms the nest. In the morning turn the jelly onto a large glass dish. Remove the plate from centre and half fill the hollow with whipped cream. Remove the shells from the eggs and arrange prettily in nest. Serve portions of the nest with eggs and pass whipped cream with it. This is sure to please the children.

Mrs. Slabough—I'm sorry, but this ain't my day for bakin' biscuits. Tramp—Don't mention it, mum, the pleasure is mine.

THE FAMINE IN JAPAN

ONE MILLION PERSONS SAID TO BE STARVING.

Relief is a Difficult Matter—Snow Covers The Ground to a Great Depth.

A million persons are starving to death in Japan, a million at the very lowest estimate. The first official reports last December stated that 700,000 people were in destitution, but, far from getting better, conditions have become worse, and after careful investigations it has been found that at least a million are reduced to the last extremity. These are the declarations of Arthur B. Reeve in the Boston Transcript.

The Japanese are coming nobly to the rescue of their suffering fellow countrymen, but with all their efforts only a very small part of the suffering can be reached. The Government has projected and is carrying out millions of dollars' worth of public works that every day give employment to thousands of poor people, and thousands of Japanese are making contributions in sums ranging from 50,000 yen, given by the Emperor, and 10,000 yen, given by the Japanese Railway Company, to the single yen and even sen of the common people whom the famine has not touched.

Not long ago a band of philanthropic women of Yokohama sent an agent through the famine district with 125 yen and 400 kimonos, to discover how best the sufferers could be reached and relieved. Throughout her journey the clothing was passed free by all the government officials, and the railroad companies checked it as personal baggage. The conditions which she uncovered were appalling, and have just been embodied in her report.

In one village which she visited the headman of "soncho" told her that of the forty-six families in the village twenty were in want, and gave her a list of them. Careful personal canvassing confirmed all that the soncho had told her by showing conditions worse than even he was willing to admit. Many families had no blankets and only thin and ragged clothing, although the snow lay deep all around, and icicles hung from the eaves of the houses even in the middle of the afternoon. Some had no mats and had only bundles of straw to help them to resist the cold.

The food was insufficient and very poor; a little rice flour mixed with leaves and daikon, a Japanese plant very much like a fern, boiled with beans, being the kind she saw. Everything not poisonous was being utilized. In one school five children had no lunch and five children could not attend at all because of lack of food.

SOLDIERS' FAMILIES SUFFERING.

How far the war was to blame for the condition in this village it was hard to judge, but five families of soldiers were found which were practically destitute. In one of these the soldier was very ill, and in two others the soldiers were wounded, while in another the soldier had just returned. One family consisted of an old father and mother, a wife and a little son to whom the soldier would never return. In one family, visited in the afternoon, the baby was crying, a little one of three years of age was wailing and fretting and a child of ten was just starting out to try to beg some rice—the last stage in a Japanese household, where begging is seldom resorted to, even when starvation is an old acquaintance.

An accompanying official said to the mother, "Can't you stop that child's crying?" "I could," she replied, "if I had something to give her to eat, not without." Every family visited was given enough to keep it for a month with proper economy, an example of how little is necessary to relieve a great deal of suffering in this frugal country.

strong spirit of hope and helpfulness on the part of the Japanese themselves. An instance of this was seen in a village called "Devil's Head," snowed under eight feet, leaving a hundred and sixty-six people without a particle of food of any kind. Immediately the neighbors, but little better off, raised sixty yen, by means of which pittance the lives of these one hundred and sixty-six persons were insured for three weeks until other aid had time to arrive.

An old man aged ninety-one died in another village and his well-to-do son, instead of receiving condolences which in Japan usually consist of gifts to the bereaved, himself contributed for the poor twenty koku of rice, a royal gift that sustained one thousand people for ten days!

Even the children have been pressed into service to relieve the situation, and little tots in some schools in the famine district have been taught to braid straw and wood shavings, their finished work being sent to Yokohama. In one school the children make over one hundred yen a week and this school is one in which not a teacher has received a salary since last November. Yet they all help with smiling faces and lessons have been indefinitely postponed in favor of the more pressing necessities of obtaining the means of life.

FOR SAFETY OF WORKERS

EXHIBITION OF APPLIANCES TO PREVENT ACCIDENTS.

Many Devices Seen to Protect Employees From Fly-Wheels and Saws.

A permanent exhibition of practical appliances to prevent accidents to operators of machines in factories has been established in Paris at the Conservatoire des Arts et Metiers. This exhibition was officially opened early in December by M. Loubet, President of the Republic.

In the exhibition are installed the more common machines found in factories. The machines are in motion, and a practical demonstration is given daily by an official in charge. The various machines have been chosen by the administration of the conservatoire as representative of their class, and are equipped with the most improved appliances for the prevention of accidents to the operator.

One notes first of all the arrangements added to protect the operator improve rather than injure the appearance of the machines. In every instance the safety appliances are graceful and slightly; at the same time they are arranged with the greatest possible simplicity and economy, and it is apparent that the improvements, though of great value both to the employer and to the employee, must add but a small per cent. to the cost of the machine. A brief recital of some of the more common machines found in the collection will give a comprehensive idea of the scope of the exhibition and the general idea elaborated.

FLY-WHEELS AND SAWS.

Flywheels within the height of the operator are surrounded by high screens of substantial wirework. If the wheel is small and a screen impracticable the spokes of the flywheel are hidden by light plates that make it impossible for the clothing or person of the operator to become involved in the wheel.

Horizontal saws are entirely protected by an ingenious arrangement somewhat on the plan of the sticks of an ordinary fan, and can readily be swung backward or forward to admit work of varying sizes. Ribbon or band saws are incased in angle pieces or practical boxes wherever it is possible for the operator to come in contact with the blade.

All gearing to lathes is enclosed, and a practical and readily detachable cos-

LUMBER FOR THE WORLD

CANADA HAS THE GREATEST WOOD PULP FORESTS ON EARTH.

An American Correspondent Talks About the Great Wealth of the Dominion.

Imagine yourself seated in one of Telephone Bell's tetrahedral kites flying over the biggest lumber-yard of the world. I refer to the immense forest area of the Canadian dominion. It begins on the Atlantic and ends at the Pacific, stretching from east to west for more than 3,000 miles, writes Frank G. Carpenter, from Ottawa in the Chicago Record Herald.

Starting in Nova Scotia and New Brunswick, you look down on enough big trees to cover the State of Massachusetts. There are lumber mills working, and the proprietors of the London newspapers are putting up pulp mills there to supply the paper for the greatest reading constituency of Europe. Going westward we fly over the vast forests of Quebec, and into those of Ontario from where a great part of our white pine now comes.

Here the forests extend from the shores of Lake Superior and Huron northward to those of Hudson Bay, and go on to the west, almost to the setting sun. They take in the Lake of the Woods region, and then switch to the north and skirt the wheat belt, until they lose themselves in the giant woods of the Rockies and the Pacific.

British Columbia has the same climate and vegetation as Washington and Oregon, and its trees are surpassed by none in the world. They are sometimes forty, fifty, or sixty feet thick; a single log will load a car, and one tree cut into boards may make a train load. Timber, which will square two or three feet and make a log sixty feet long, is spoken of there as a tooth-pick and such tooth-picks are exported all over the world. This British Columbia timber belt is almost untouched. It has red and yellow cedar, white and yellow pine, red fir, maple and oak. It is one of the most valuable pieces of woods left on the North American continent.

WOODS ABOVE THE LAKES.

Flying back to the east let us look for a moment at the woods beyond the great lakes. Above Lakes Superior and Huron is an extension of the forests we had in Wisconsin and Michigan. Fully one-third of the trees are more than one hundred years old, and many have seen several centuries. They consist of white pine, birch and maple and other hard woods, with a strip of spruce at the north vast enough to make the wood pulp for the newspapers of generations to come. Four million pine logs are floated down every year to this city of Ottawa, and other millions go to the great lakes and across to the United States.

The Dominion is doing all it can to preserve the trees. On some of the public lands the regulations are now such that no trees below a fixed size can be cut. The timber is sold only when it is ripe. If these arrangements are kept in force, they will give Ontario a forest reserve of 40,000,000 acres, which will, it is estimated, bring in \$30,000,000 a year.

Canada has set aside a number of national parks. In two of its Rocky Mountain reservations it has almost as much as we have in all our national parks, and in Ontario there are 7,000,000 acres of such reservations. The Yoho Park on the Pacific slope is forty miles long and fifteen miles wide, and the Rocky Mountain Park, along the line of the Canadian Pacific Railroad, is ninety-six miles long and forty-six miles wide. The Algonquin National Park, in central Ontario, contains 1,200,000 acres, and northern Quebec has a national park of more than a million and a half acres. The Canadian government guards its forests against fires

like chewed paper. It is now wood pulp, and has only to be purified and dried into a sort of a cardboard before it is ready for the market. I opened one of the mills and took out a handful of the pulp, then grinding. It was clean, but hot; and I asked the engineer whether hot water was needed for making it. He replied that the water went into the mill ice cold, but that the friction of grinding was so great that it soon boiled and steamed.

GOES TO READERS OF WORLD.

After the pulp comes from the mill it is forced through wire strainers and then carried over wide belts of the finest woolen felt. It is so thrown upon these belts that it coats them. The particles stick together, forming a kind of cardboard, which dries as it goes on to the various machines, and finally comes out in great rolls ready for shipment over the world, to be made into newspapers which we have served up to us every morning at out breakfast tables.

The best wood pulp, however, is made by a chemical process. In this manufacture there is no grinding whatever. The logs are cut into chips and put into an enormous steel tank, which is filled with sulphurous acid and steam. This works on the wood as the stomach works on food, and finally digests it into a pulp. The difference between chemical pulp and mechanical pulp is about the same as the difference between short staple cotton and long staple Sea Island cotton. The chemical pulp has a longer fibre and it makes a stronger paper. The tank used for making chemical pulp at Sault Ste Marie is almost 100 feet high, and the most complete of its kind in existence.

A FRONTIERSMAN LEGION

ORGANIZATION POSSESSES MANY ELEMENTS OF ROMANCE

Lord Lonsdale Is Chairman and Many Notable Men Have Decided to Join.

Probably no organization in the world possesses elements of romance in so great a degree as this new legion just formed in London England. Its object is wholly patriotic and its members are associated for the promotion of imperial interests in time of peace, and for imperial defence in time of war.

The official definition of the term "frontiersman" states it "includes men trained and qualified by previous completed military service, or by working, hunting or fighting in wild countries, or at sea, who for various reasons do not, or cannot serve in the existing military forces of the Empire, and who are not prepared by reason of temperament or vocation to submit themselves to the ordinary routine of military discipline except in the time of war."

Under such conditions the legion has already gathered into its ranks men whose collective adventures in all parts of the world would, if set down on paper, make more thrilling and absorbing reading than any volume of fact or fiction ever published.

EARL OF LONSDALE CHAIRMAN.

The General Council consists of experts—financial, military and judicial—and representatives of all vocations, of the wilderness and of the sea. The chairman is the Earl of Lonsdale, who himself has had experiences which fall to the lot of few men. His collection of hunting trophies at Lowther Castle is supposed to be the finest in the kingdom.

The chairman of the Executive Council, Sir Henry Seton-Karr, is a famous big game hunter and was one of the pioneers of that sport in Wyoming at a time when he was liable himself to be hunted by red-skins.

Mr. M. H. De Hora's career furnishes one of the most remarkable stories of the present age. One of his little exploits was the cutting out of the battle ship

something to give her to eat, not without." Every family visited was given enough to keep it for a month with proper economy, an example of how little is necessary to relieve a great deal of suffering in this frugal country, as the agent had started out with less than \$70 in money.

The "Foreign Committee for Relief of Famine in the North" has just made public its first report, and in it four things are especially impressive. First of all it is noted that the difficulty of administering relief is very great, owing to the large area over which the people are scattered and the deep snow which prevents the use of jinrikshas in distributing the assistance.

In the one province of Miyagi nearly a third of a million people are reported to be in want, but with a view of finding out the most distressed the vice-governor recently sent out blanks to be filled in by the soncho, giving details as to the most destitute. It was found that something over ten thousand persons required immediate help to keep them from starving. The Committee of Foreign Relief voted four thousand yen to be used in this one province, although that was a good part of the total sum that they had at that time collected.

Members of the committee took this sum and sometimes travelling over roads covered with snow several feet deep, delivered it in the form of cheques on banking houses to the heads of the counties in the name of the foreigners living in Japan. The heads of the counties distributed it to the heads of the villages, to be given by them in turn in the

CHEAPEST SUITABLE FOOD

to the persons who needed it most. Thus it has been arranged that the final distribution shall be in the hands of the soncho, since, even were it advisable, it would be impossible to distribute "in person" to the hands of the sufferers. The various sonchos seem to have wonderfully detailed information of the circumstances of their people. They are entirely trustworthy, and as the work of relief must be in the main handed over to them, this is fortunate. The fact that they are accountable to the government of the province insures the continuance of the work after the relief committee has passed on to the next town. They are elected by the people over whom they rule, and hence, not being petty officials from afar, their relations with the people are paternal and they can be made very serviceable in relieving the want that they see among their own friends, neighbors and even relatives.

The second point brought out in the report was the magnitude of the work, which has been sufficiently touched on by what has been said of its difficulty. Another curious phase of the situation is the independent spirit and patient industry of the people in spite of their suffering. As to the conditions, in scores of villages that have been visited and reported on they are pitiable in the extreme. There are able-bodied men clothed in ragged, thin garments, who have to face piercing winds and snows to bring in from the mountains the coal and wood, on the price of which labor their thinly clad families are trying to eke out a miserable existence. There are mothers giving their very lives to keep their babies warm, themselves exposed to stinging blasts that must rapidly shorten their lives. There are even cultured old men and women who in former days were in comparative comfort, but now are reduced to physical destruction that no words can describe. There are children barefooted in the snow whose scanty clothing and pinched faces tell the sad tale of only one meal a day and that of straw and fern or daikon leaves in which is mixed a little cheap rice flour, for this is the diet to which a large part of Japan is reduced.

MORAL TIES STRAINED.

Under such strains moral ties are weakening. Even mothers are known to leave their starving children never to come back. Men desert their families in considerable numbers. But among all this wide wretchedness there is a

thing sizes. Ribbon or band saws are incased in angle pieces or practical boxes wherever it is possible for the operator to come in contact with the blade.

All gearing to lathes is enclosed, and a practical and readily detachable casing over the end gears permits the change of these gears in the screw cutting machines.

Emery wheels are closely incased and the operator protected from injury from the dust and flying particles.

Drills, planing or mortising machines are closely protected at all parts, and it would seem that a determined effort would be required on the part of the operator to secure injury.

KEEP OUT SKIRTS.

In planing and knitting machines special attention is taken to protect the skirts of female operators. All the running parts being tightly enclosed.

In general, one remarks that all belt, gear and wheels coming within reach of the clothing and person of the operator are well enclosed and protected by casings or screenings.

Because of the liability of the employer for all injuries to the employee, more attention is paid to the protection of the workmen in France and other European countries possibly, than in America.

EMPLOYER IS LIABLE.

In France the law presumes that the accident is due to the negligence of the employer. A workman receiving permanent injuries, preventing him from work, is entitled to an annual income of two-thirds of his salary; for temporary incapacity he is entitled to claim one-half of his salary. If the workman dies from the result of an accident his wife is entitled to a yearly income of 20 per cent. of her late husband's salary if she does not remarry, and a child receives fifteen per cent. of the deceased workman's salary until arriving at the age of sixteen; if two children they receive 25 per cent.; if three, 35 per cent., and if four or more, 40 per cent.

It will be seen, therefore, how greatly it is to the interest of the employer in France to seek for and adopt safety devices in his factory. It is also a direct object to builders to make safety to the operator an important consideration in planning of machines. The French machinery builders have already brought safety in machines to a high degree of perfection. The machines found in the conservatoire exhibition are machines actually on the market and are loaned by the manufacturers.

THIS WAY TO FORTUNE, PLEASE!

Work done is the criterion of ability; not promises, not boasts.

Accept every experience as an educator. Look for the lesson contained; it is there.

Don't let your work end with thinking and talking. Act. If you get an idea, try it out to a conclusion.

Talk to the point. Don't waste time on preliminaries.

The man who, in a lowly position, gives proof of zeal and ability, is always the man who later is found occupying a remunerative position of trust and responsibility.

Work is not an end in itself; simply a means to an end. A humble position should be utilized as an opportunity to prove merit for a higher post.

To do your best is simply a matter of doing justice to yourself; to refuse to do so is to hide your light under a bushel, which others have neither time nor inclination to lift.

Sometimes a man may find himself engaged upon work which he thinks (and perhaps rightly thinks) affords no scope for his real abilities. There is a tendency under such circumstances to perform his duties in a perfunctory manner. Why? It is by the performance of work, and not by the class of work that ability is measured.

CHINA'S BIG BRIDGE.

The longest bridge in the world is the Lion bridge, near Saugong, China. It extends five and a quarter miles over an arm of the Yellow Sea, and it is supported by 300 huge stone arches. The roadway is seven feet above the water, and is enclosed in an iron net-work.

ninety-six miles long and forty-six miles wide. The Algonquin National Park, in central Ontario, contains 1,200,000 acres, and northern Quebec has a national park of more than a million and a half acres. The Canadian government guards its forests against fires and pays half the wages of the fire rangers on timber lands leased to lumbermen.

Canada has some of the greatest wood pulp forests on earth. North of the pine belt there is a strip of spruce and poplar which runs across the greater part of the continent. It contains enough trees of the right sort to supply the newspapers of the world for ages. Indeed, it could furnish enough to almost paper the globe and leave some to spare. In the Lake St. John basin of the Province of Quebec there is a wood pulp area as large as the State of South Carolina on which are now standing 100,000,000 cords of pulp wood. A half-million tons of pulp could annually be made from that forest for an indefinite period; and this is only a patch on the whole. Sir Alfred Harmsworth, the proprietor of the London Mail, has bought large tracts of spruce timber in Newfoundland, where he will make the paper for his many publications, and the Lloyds, the owners of the Shipping Register, another London newspaper of wide circulation, have also invested in pulp forests.

TURN LOGS INTO PULP.

Canada has now thirty-nine mills, which are annually turning out 275,000 tons of wood pulp, a large part of which goes to the United States. I went through a pulp mill here at Ottawa, which was grinding spruce logs to powder, reducing them to pulp, and finally turning them into paper. It was making great rolls of newspaper, each as big around as a hoghead, and it was also turning trees into paper bags. It is operated by the Ottawa River, which furnishes many thousand horse power and runs sawmills, factories and paper mills.

The biggest pulp mills of the world, so I am told, are those of the Lake Superior Corporation at Sault Ste. Marie, Canada. These mills make both mechanical and chemical pulp, turning out a big product when in full operation. During my visit to them the mechanical works only were going, and the output was 100 tons per day. A hundred tons, however, gives little idea of the amount of paper made. It takes about a cord of wood to make a ton of pulp, and a ton, if the roll which weighs that were spread out like a carpet, would cover any city pavement to the length of three and a half miles.

The pulp comes out in the shape of a cardboard two yards wide, rolled up just like matting.

FROM TREE TO NEWSPAPER.

It is several centuries since Shakespeare found

Tongues in trees, books in the running brooks,
Sermons in stones and good in every thing.

It remained, however, for our age to make these tree-tongues speak and to preach their sermons to all the world. I felt that as I went through the big pulp mill watching the machines yank newspapers out of saw logs. The spruce timber is cut in the forests during the winter and floated down the rivers to Lake Superior and thence brought to the Sault.

The logs are of various diameters. Those worked during my stay were a foot or a foot and a half thick. The bark was taken off by planing machines and they were carried on endless belts to the mill. All the machinery was moved by water and the books really floated in the running brooks on their way to their readers.

The mills in which these logs are ground are about eight feet in diameter and not more than eight feet high. Each has a great grindstone in it, against which the logs are pressed by machinery in such a way that they are gradually pulverized as the stones move around at the rate of 200 revolutions per minute. As the wood grinds off the dust falls down into the water inside the mill, and when it comes out it looks

neers of that sport in Wyoming at a time when he was liable himself to be hunted by red-skins.

Mr. M. H. De Hora's career furnishes one of the most remarkable stories of the present age. One of his little exploits was the cutting out of the battle ship Huascar from Peru, but that is by no means the most exciting of his adventures.

Captain Walter Kirtan has been a prospector, gold miner, engineer, guide, scout, hunter, seaman, correspondent and a soldier.

FOUNDER OF THE LEGION.

The founder of the legion, Mr. Roger Pocock, has the extraordinary record of having filled thirty different vocations in his highly adventurous life, including those of trooper, cowboy, seaman, with the Yokohama pirates, captain of a pack train and scout.

Mr. Morley Roberts, the distinguished novelist, is another member of the council. He was a sailor the greater portion of his life and left the merchant service as a master mariner.

Two of the greatest journeys of recent times were those made by Captain Harry De Windt and Captain E. S. Grogan, both of whom are in the legion. Mr. R. Bowmain Ballantyne is an old cowboy, and a South American explorer, whose name is Colonel S. B. Steele, is known far and wide in Canada. He is the hero of remarkable feats of bluff which tamed the fighting tribes of Western Canada without fighting.

Generals Sir Reginald Hart, Sir John French, Sir Edward Hutton, Sir F. Maurice, Sir E. Brabant, Admiral Prince Louis of Battenberg, Admiral Sir Percy Scott, Sir A. Conan Doyle, Sir Percy Haggard and Sir Claude De Crespigny are a few who are aiding the legion.

The British War Office has recognized the value of such an organization to the Empire and has given its approval, and already, it is stated, that correspondence has elicited the fact there are six thousand men in different parts of the Empire who are ready to enroll themselves in the legion.

GROWTH OF LONDON.

Book Issued Shows Startling Figures of Immensity of City.

The immensity of London is well illustrated in a volume just issued by the London County Council entitled "A Statistical Abstract for London, 1905." It is an amazing compilation and shows that the British metropolis still holds the first place among the greatest cities of the world.

The rapidity of the growth of London during the last century is shown by the fact that while in 1801 the population was 1,114,644, it had risen in 1901 to 6,581,402, and these six and a half million people live in 928,000 houses.

Nothing is more impressive to the visitor to London than the enormous volume of the traffic. Londoners' propensity for cheap locomotion is strikingly indicated by the vast number of tramways and omnibuses. Of course the tramway and omnibus statistics for 1904 do not adequately represent the traffic of the present day, as since the completion of the new tubes new electric car tracks have been opened. There were then 201 miles of tramway lines open, and during the year 557,947,846 passengers were conveyed, while 288,965,214 passengers travelled on the two principal omnibus companies' vehicles.

The letters, book packets, etc., delivered by the postmen amounted to 1,108,091,000, and 28,364,000 telegrams were despatched.

An interesting idea of the different sources of London's wealth may be gathered from the gross annual assessed value of the income tax in 1904, houses, etc., amounting to £45,055,851 (\$225,279,255); trades and professions being £74,806,433 (\$374,062,265), and the profit of public companies, and other interest and profits amounting to £143,534,555 (\$717,672,775).

Ethel—"I rather like that young Doubleday. He has a good firm mouth and chin." Myrtle—"Goodness! Has he been kissing you, too?"

LOCOMOTIVE SOON TO GO

ELECTRICITY IS REPLACING IT VERY RAPIDLY.

American Railroads Are Making the Change — Advantages Over Steam.

Five years ago a railroad operator of commanding influence said: "In ten years' time it will be difficult to find a steam locomotive on the trunk lines of the east. When found it will be on the scrap heap. It will have been displaced by the electric motor."

The remark was received with incredulity. Even railroad operators who foresaw a revolution in motive power thought the limit should be placed at twenty years, if not a quarter of a century. The revolution meant so much. Not only in their view, before this could be done, must a complete change be made in methods, track construction and organization, but influences of power, which would naturally be exerted in a continuance of old ways and old methods, must be overturned. Yet but half of the period named by this far-seeing man has expired, and the revolution is in progress.

ON NEW YORK LINES.

The process of electrifying the railroads centering at New York is under way. Already a portion of the Long Island Railroad is being operated by electricity, while the labor of electrifying other parts is being steadily pushed. Similar work is being done on the lines of the New York and New Haven. The operation of the New York Central so far up as Croton is only awaiting the completion of the terminal improvements in Manhattan. Though no public announcement has been made of the fact, it is well known that the Pennsylvania contemplates the moving of its trains by electricity between Philadelphia and New York when the tunnels under the North River are completed. Now the Erie takes a step in the same direction, while the Delaware and Hudson is experimenting with a new style of electric motor.

THE WHOLE SYSTEM.

In the present outlook it would seem as if the only purpose was that of moving the suburban traffic by electrical power. It is merely the first step in the coming revolution. The other steps may not now be apparent to the general public, but they are clearly visible to railroad men. Already the New York Central has begun the preliminary work of electrifying its western division. When both ends are operated by electricity it will be but a short time before the same power will be applied to the middle sections. When one road is wholly operated by electric power other roads will follow. One road will not be permitted to enjoy a monopoly of the advantages resident in applied electricity.

ITS MANY ADVANTAGES.

If no other advantages were secured to the travelling public than that of increased comfort and cleanliness, the revolution would be justified. Exemption from coal dust and coal smoke would increase travel. And that would be the advantage gained by the company. This is not a fanciful consideration. Railroad operatives now declare that increase of comfort and convenience in their cars has been followed by such increase of receipts as to justify the expenditures entailed. But there are other advantages in the way of increased speed and economy of operation that commend the power to railroad men. In the whole realm of direct energy, says the Brooklyn Eagle, there is not to be found such waste as is made in the application of energy stored in coal. But 10 per cent. of that energy is secured. Ninety per cent. goes to waste. It is true that as yet coal must be consumed to generate electricity. But the power thus obtained is in much larger

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way.

To appreciate the simplicity and ease of washing with Sunlight Soap in the Sunlight way you should follow directions.

After rubbing on the soap, roll up each piece, immerse in the water, and go away.

Sunlight Soap

will do its work in thirty to sixty minutes. Your clothes will be cleaner and whiter than if washed in the old-fashioned way with boiler and hard rubbing. Equally good with hard or soft water.

Lever Brothers Limited, Toronto

"PRESENTED AT COURT"

YOUNG LADY TELLS OF WHAT SHE HAD TO GO THROUGH.

How She Was Presented — A Delightful Glimpse Behind the Scenes of Court Life.

The happiest moment of my life came when I was told by my mother that I was to be presented at the Court of King Edward and Queen Alexandra, writes a pretty debutante in London Answers. We at once began to make preparations for the great event, and these are on no inconsiderable scale.

WHAT "DREAMS OF DRESSES" COST

The necessary wardrobe is no small matter. A simple Court dress by Paquin will cost anything from \$750 to \$1,000, not including lace, which may be a family heirloom above price. The debutante's bouquet may include \$125 worth of costly orchids and hothouse blooms. As to gloves, the regulation twenty-four-button Court gloves will cost \$5 or \$12.50 a pair, at least, in a Bond Street shop, and the correct shoes cost \$25 a pair.

Only two hundred "presentations" are allowed at each Court, and about five hundred "attendances." No lady not officially connected with the Royal Household may "attend" more often than once in three years.

My mother's name and my own had been sent in at the beginning of the year, and in due course, one morning, we received the severely plain cards with of invitation bearing the date of the court we were to attend. Of course, we knew the "dress regulations"—Court bodice well off the shoulders; three white plumes for the debutante, distinctly showing on the head from the front; and a train at least four yards long. All this information was sent with the cards. The so-called "high" bodice, which is in reality a square-cut, low one, is only permitted if one can produce a medical certificate proving one is in delicate health.

One would not think a white dress would take long to choose; but I know mother and I fairly lived in the impressive saloons of the Court dress-maker—a frigid autocrat who invariably sat upon our timid suggestions and nipped in the bud our shy preferences.

THE ART OF TRAIN MANAGEMENT.

When the materials, trimmings, flowers were selected, and a longish interval had elapsed, we were "tried on"—at first in the rough, so to speak; and at long length in all our completed glory. My gown looked deliciously pure and deceptively simple. My ornaments were pearls, and mother's diamonds.

"Miss—, Presented by the Countess of—"

AND STILL ALIVE.

Queen Alexandra's lovely face flashed a sweet smile at me, whilst King Edward looked down from his throne with all the good nature and kindly tact and sympathy for which he is famous 'ne world over. The "kissing hands" over, I began my tremendous elaborate series of curtsies, wondering at my own skill in avoiding my voluminous train. I thought they would never end; but at last felt my train being unceremoniously rolled up, and, it seemed to me, fairly flung at my head.

By good luck I caught it before it capsize my feathers, took a long breath, and realized that it was all over, and I was still alive!

PREVENTION OF SENILITY

FAMOUS PHYSICIAN WRITES ON THE LENGTH OF LIFE.

Sir James Crichton Brown Says We Are Entitled to One Hundred Years.

Sir James Crichton Browne, M.D., LL.D., etc., the Lord Chancellor of England's visitor in lunacy, writes as follows on the length of human life in his book, "The Prevention of Senility."

Every man is, I think, entitled to his century, and every woman to a century and a little more, for women live longer than men. Every child should be brought up impressed with the obligation of living to a hundred, and should be taught how to avoid the irregularities that tend to frustrate that laudable ambition.

To lengthen as well as to strengthen the lives of the people is the object of preventive medicine. Certain great measures that lie beyond its scope are first of all necessary if we could prolong the days of the masses of our people. Regular employment must be secured and poverty diminished by our statesmen and economists, so that we may no longer have amongst us thirteen millions on the verge of hunger and dying in multitudes.

BEFORE THEIR TIME.

If old age is to be attained, a good start in life must be given, and hence the importance of these questions as to infant feeding and milk supply. If it is to be reached by a proper proportion of wayfarers in sound condition, we must reduce the prevalence of those infectious diseases which carry off so many of the young, and often cripple where they do not ill and we must see that our children have a sufficiency of food, and a

WHAT FOODS ARE BEST

THE PROPER DIET FOR A STRENUOUS LIFE.

London Physiologist Gives a List of Brain and Muscle Building Diet.

One of the most eminent physiologists in England, speaking in his London home to a representative of the Daily Mail expressed pleasure at the wonderful awakening of interest among the general public on the subject of what to eat.

What busy men and women, he said, want to know is: "What foods shall I eat to give me that sustained vigor of body and mind absolutely necessary to enable me to keep my place in the high-pressure life of modern cities?"

The subjoined list contains foods well suited to the nutrition of adults in this climate, and they may be combined in the most varied ways to meet the needs of the consumer—

Rich in carbohydrates (muscle building) cow's milk, cabbage, peas, wheat, maize, carrots, rice, potatoes, apples, rising from 140 in cow's milk to 3,000 in apples.

Rich in fats (heat energy), fat pork, egg, yolk of egg, fat beef, cow's milk, maize, rice, carrots, cabbage and corn.

Rich in albumen (the greatest of nutritives), milk, flour from cereals, maccaroni, maize, peas and bread, vermicelli, savoy, cabbage, wheat bread, rice, rye bread, white bread, whole wheatmeal bread, black (rye) bread, potatoes, carrots, lentils, bran bread.

RICE PUDDING BEST.

The ordinary dinner menu yields approximate nutritive value something like the following—

	Nutritive Value.
Soup, chiefly water, merely a stimulant	00.00
Fish, white, chiefly water	18.03
Entree (lean beef)	22.03
Joint (leg of mutton)	24.04
Vegetables, cabbage, carrots, potatoes	22.00
Sweets (rice pudding)	77.52
Milk	12.04
Yolk of egg	48.00
Apples	13.04
Tea, coffee	00.00

It will be seen that the ideal luncheon might consist, as the late Mr. W. E. Gladstone often wished that it might, of rice milk pudding made with eggs, for this is the most highly nutritious diet known. The drawback is its failure to tickle the palate—in all other respects it is nearly perfect.

Lean meat, beef, or mutton, eggs, milk, the principle vegetables and fruits are the materials for a properly balanced diet.

of energy, says the Brooklyn Eagle, there is not to be found such waste as is made in the application of energy stored in coal. But 10 per cent. of that energy is secured. Ninety per cent. goes to waste. It is true that as yet coal must be consumed to generate electricity. But the power thus obtained is in much larger proportion than when taken directly from the coal.

WITHOUT USE OF STEAM.

Of course, the ideal condition will be reached when electricity can be provided without the aid of steam power. It will not do, in view of the past, to conclude that the discovery of the means by which it can be done is not in the near future. As it is, however, the science of electricity has advanced to that stage when it is recognized as the most economical of efficient in power. The main thing is that the revolution in motive power is in progress. The next five years will be a memorable period in the history of electrical propulsion.

REMARKABLE INVENTION

AN AIR ENGINE WHICH MAY KILL THE COAL TRADE.

New Invention Will Propel a Locomotive or Vessel Without the Use of Steam.

Arrangements are now being made in England to test a new type of engine, which, if it proves successful, may cause which resulted from the discovery of the steam engine or of the application of electricity to motive power.

The patentee is a Lancashire man, who has already achieved some success as an inventor. This new production he describes as a triple economic air engine and if the inventor can justify all his claims the business of the coal miner will be practically gone, as far as industrial requirements are concerned.

Summarized, the claims for the new engine are as follows:—The economic air engine will save the use of coal and all cost of fuel; it will take the place of steam, which will not be required to keep the pressure of air constant; it will

DRIVE A LOCOMOTIVE.

propel a ship, work a mill forge, &c., without using either gas, water, coal, electricity or oil, and it will entirely prevent smoke.

The economic cylinder will be more powerful than any other type of cylinder of equal diameter; it will save the use of large boilers and not more than two will be required for large works.

With two or more boilers filled with compressed air up to the pressure required in each boiler the economic cylinder will keep up the pressure of air, if set to work.

In locomotives and other high pressure steam boilers the wear and tear is considerable. It is caused by the fires, the use of dirty water, and the constant changing of temperature and pressure, all having a tendency to pull them to pieces and cause serious rents round the rivet holes and other parts of the boilers. This wear and tear will be avoided by the use of the air engine.

While this still remains to be proved, the doing away with the use of coal in smelting appears to be

AN ACCOMPLISHED FACT.

Mr. J. Corbin Weld, Deputy Governor of the Canada Company, who is now in London, says that he had just received information of an important experiment, which resulted in proving that smelting would be successfully achieved by electricity.

The experiments were made, not by a body of men seeking to float a company, but at the expense of the Canadian government with a view of the development of the iron ore industry in the Ontario district.

He had received information that the results of the experiments were definite and conclusive, and that the treatment of ore by electricity could be profitably and lucratively carried out.

When the materials, trimmings, now were selected, and a longish interval had elapsed, we were "tried on"—at first in the rough, so to speak; and at long length in all our completed glory. My gown looked deliciously pure and deceptively simple. My ornaments were pearls, and mother's diamonds.

Such chinks and crannies of time as we had left from the dressmaker during this period of preparation were more than filled up with minor engagements, such as those with the hair-dresser, the Court professor of deportment, and, above all, consultations with my "social godmother"—the great lady of title who was to "present" me. The deportment man rehearsed with me the needful curtsy, which was to be accompanied by a peculiar sidelong, sliding step, which gets you across the room without turning your back to anyone.

Our professor of deportment also taught me how to manage my train with skill and how to keep my balance in my high-heeled shoes on a highly polished floor. For there is a tradition at Buckingham Palace about a tall awkward girl of high rank who caught her heel in her dress when descending the grand staircase, and rolled from top to bottom like a mummy, hopelessly involved in her gorgeous satin train!

When the great day itself dawned we began dressing immediately after dinner in the evening. Everyone seemed anxious to assist in dressing me.

A crowd had assembled to see us start. I fondly imagined it was an admiring crowd; but I soon knew better. Eventually we entered St. James's Park, and fell into line among the miles of carriages that stretched along the Mall. Here, too, crowds were assembled, and for over an hour we were entirely at the mercy of the people who gazed in at the windows and criticised us most cruelly, considering our entire helplessness. Indeed, we were not sorry when our carriage dashed through the gates of the Palace, and drew up before the main entrance.

MANNERS "UP WEST."

To my terror we were invited into a side room where the Royal dressers inspected us as a last precaution. We passed muster, fortunately, and then trooped with the crowd up the grand staircase. Half-way up we passed one of the Queen's pages, who took from me one of my pink cards, at the same time shooting a keen glance at me to see if I were dressed "according to regulations."

A barrier of velvet ropes divided our saloon from the one next in the suite, and as the latter emptied, this barrier was raised by two gigantic officers in the dazzling uniform of the First Life Guards. The minute the barrier was raised we all crushed through in a glittering heap with that insane desire to be first which governs all crowds. Sharp elbows gave sly digs, jewelled bracelets scratched unmercifully, flowers and tempers were lost, and we struggled constantly in spite of the general rebuke of the officers: "Quietly, if you please! Gently, ladies!"

KISSING HANDS AND CURTSEYS.

As we approached the fatal doorway we fell into single file, and an officer whispered quickly in our ear the requisite number of curtsies, indicating how many members of the Royal Family were present. The Queen, we learned, had not yet retired. This fact made a great difference to the debutantes, because one "kissed hands" only if Her Majesty were present; whereas, if one of the princesses had taken her place one merely curtsied.

We waited and waited, but suddenly—almost without warning—my train was deftly taken off my arm and spread out in all its shining glory. I wondered vaguely if all those women and officials could hear my thumping heart. It seemed like one of those nightmares in which a mad bull is after you, and your limbs refuse to move. Mechanically I craned my precious pink card, glided through the doorway, and was dimly conscious of a monstrous mirror on my left and a row of magnificent giants in scarlet and steel on the right, forming a passage with their drawn swords.

Someone on my left took the crumpled card from my trembling hand, and like a girl in a dream I heard my name:

infant feeding and milk supply. If it is to be reached by a proper proportion of wayfarers in sound condition, we must reduce the prevalence of those infectious diseases which carry off so many of the young, and often cripple where they do not ill and we must see that our children have a sufficiency of food, and a sufficiency of teeth with which to eat it. If it is to be wisely pursued, we must foster the self-respect and arrest the degeneration of our people by giving them decent houses, and promote their physical development by affording them facilities for exercise.

Peculiarly desirable it is that we should warn the public against these causes of premature senility which operate with disastrous effect when childhood is over. I am not prepared to indulge in any general denunciation of alcohol, but there can be no question that an excess of it does make men old before their time. It induces over-excitation and exhaustion of the nerve-cells, and also vascular paresis and arterio-sclerosis which is the main feature in pathological senility; and it is especially apt to do this if indulged in at a time when the tissues are approaching the natural limit of

THEIR FUNCTIONAL ACTIVITY.

Whatever tends to diminish disease is conducive to longevity, but in our endeavor to promote it we must have regard to mental as well as to bodily hygiene. A great deal of premature decline in force and energy is due to over-use of the brain and nervous system. Dr. McLane Hamilton says that Americans break down at an earlier age than Europeans, especially from nervous ailments, and he attributes this to their struggles for the rapid accumulation of wealth, to the competition and ambition which are largely stimulated by agitational newspapers, to the worries and anxieties of business in which men immerse themselves without recreative relief, to hustling, over eating, insufficient exercise and luxurious living generally.

If we are to lower our death rate and promote old age we must return to simplicity and tranquility of life.

MINESOWING CRUISER.

A New Style of Vessel Added to the British Navy.

The quaintest-looking warship in the British navy is the small cruiser Iphigenia, which has just been converted into a mine-sowing vessel. Along either side of her deck are two rows of elevated rails, in which numerous submarine mines are slung. Three lines of rail project over the vessel's stern, the mines being dropped overboard from them as she steams along. The introduction of a mine-sowing ship into the British fleet is an experiment undertaken as a consequence of what was learned during the war in the Far East, and the idea is that the Iphigenia would be able to mine a channel or other narrow waters far more effectively than could be done by steam launches.

SNAKE HUNTING WITH NOSES.

When the Australian aborigine is pushed and can find no other game, he catches snakes for food. With his wonderful brown eyes he can see the faintest trail where a snake has zig-zagged through the dry moss and leaves. At night-time his broad nostrils take up the chase, and, stooping down among the bushes, with a tough forked stick in his hand to support him, he follows the track as unerringly as a bloodhound. When he runs a snake to earth, if he cannot surprise it in the open and kill it by a sudden blow of his stick, he squats over its hole, making a low hissing or whistling sound with his lips. Soon the snake puts its head out of the hole and peers round. In an instant the forked stick descends and fixes it to the ground by the neck, and the black fellow, seizing it behind the head, so that it cannot bite him, drags it out of the hole, and either twists its head off or pounds it on the ground till its back is broken.

Mrs. Casey—Has her husband any influence? Mrs. Hogan—Begobs, he's under it all the time.

rice milk pudding made with eggs, for this is the most highly nutritious diet known. The drawback is its failure to tickle the palate—in all other respects it is nearly perfect.

Lean meat, beef, or mutton, eggs, milk, the principle vegetables and fruits are the materials for a properly balanced meal. Well cooked, well masticated, consumed without addition of liquids of any kind, they should maintain any person in perfect bodily and mental health to old age.

EDUCATION AND BURGLARY

Methods of English House-breaker Have Much Improved.

Education, says the Head Constable of Liverpool, England, in his annual report on the city police, which has just been issued, certainly has had one effect upon crimes of dishonesty in that it has to a certain extent eliminated personal violence as an accessory circumstance. Acts of violence only add to the dangers of the burglar's or thief's enterprise, and education, introducing better methods to him, as to the honest workman, has enabled him to avoid them, either by a more educated study of details or by changing the character of his crime from that of larceny to that of fraud. Either course decreases his danger, and the latter generally increases his profits—swindling, whether it be by means of a lying prospectus, a misleading trade description, an appeal for a bogus charity, or any other false pretence is both safer and more profitable than stealing a man's cash and valuables by breaking into his house or knocking him on the head. Personal honesty and professional or trade tradition seem under the stress of modern competition to afford less protection to the rights of property than they did years ago, and something more is wanted, if the honest and dishonest are to compete in life on anything like equal terms.

LOYAL TO HER FATHER.

Young Highland Woman Would Not Disclose Her Affairs.

A young Highland woman named Mackenzie has elected to go to prison rather than disclose the affairs of her deceased father. The case is a remarkable one in the legal annals of Scotland, and many there are who are disposed to sympathize with her in her troubles, and who admire her for her pluck.

George Mackenzie was a furniture dealer at Stonehaven, Kincardineshire. His daughter was ordered by the sheriff to hand her father's books to the trustees of the estate. She refused to obey. The sheriff warned her that disobedience of such an order was a serious offence, and gave her six days to consider her position further. It was plainly understood that if she still refused to give up the books she should be imprisoned.

At the end of six days she was as obstinate as before, and the matter became embarrassing, because nobody could be found willing to take her to prison.

Eventually the sheriff's under officer entered the court, and with great difficulty was persuaded to undertake the duty. Accompanied by a woman attendant, Miss Mackenzie was then conveyed to the prison in Aberdeen.

FRANCE'S LARGEST CLOCK.

The works of a clock made for the cathedral of St. Gervais d'Avranches weigh 2 tons, there are five sets of wheels and the hours are struck on a bell weighing over 6 tons by a clapper of 2½ lbs. For the quarters and the carillon there are twenty-two other bells ranging from 13 cwt. to 2 tons. There are four faces to this clock, which is the largest in France.

Mrs. Naggot: "Well, I guess I have a perfect right to my opinions." Mr. Naggot: "Certainly you have, my dear. And if you only kept them to yourself on one would ever question that right."

Hon. J. D. Carscadden, formerly of Newburgh, died in Brooklyn on Sunday last, April 8th, 1906. Deceased was a business man in Jersey City for a number of years as a member of the firm of Carscadden and Warner. Mr. Warner was a brother of late Sidney Warner, Wilton. The funeral took place on Sunday evening from his late residence to Woodlawn cemetery.

Mrs. Ann Williams, sister of John Wickham, a negress who has been a life-long resident of Napanee, passed away on Friday last, aged over ninety years. Deceased was born in slavery, her father and mother having been brought to Napanee as slaves a long number of years ago, and were liberated in this country. Deceased had been ill for the past few months of dropsy. The funeral took place on Saturday.

On Thursday night of last week about one o'clock fire was discovered in the barn on the premises occupied by Hugh Killorin, South Napanee. An alarm was sent in and the fire engine and hose were taken to the river but as no other buildings were in danger the engine was not used but a line of hose was run from the Campbell House corner and the blaze soon subdued though the barn and contents were completely destroyed.

DESERONTO ROAD.

Mrs. Mabel McFarland has been spending a few days visiting her mother Mrs. White.

Messrs. Mendle Kimmerly, and Levi Sager have been very busy during the past week in their sugar bush.

Wm. Brown and Archie Amey have already been ploughing, and if the weather continues fine the farmers will all be on the land next week.

Mr. and Mrs. Frank VanVlack spent a few days last week visiting friends in Thurlow and Belleville.

Mr. and Mrs. Bert Raymond, of Selby spent a week visiting friends on this road.

Manley Conger who has been ill all winter, we are sorry to say, does not seem to improve very fast.

Mrs. H. W. Sager who has been under the doctors care for the past three weeks with scarlet fever is slowly improving.

Buy all your bright tinware from BOYLE & SON they make the best.

SYDENHAM.

The millinery re-opening on Wednesday, was a decided success. Mrs. Garvin and Miss Holder had a very large line of pretty hats, all the way from the little knock-about to the dainty dress hat, a line in which no one would have any trouble in making a selection. All speak highly of the taste which Miss Holder brings forth in her millinery. Mrs. Garvin is also doing a good line of business in the way of dress-making. She has secured Miss Palmer, who is capable of turning out first class work.

Nelson Drader, who recently, purchased a farm near Liveryary, is moving. Mr. Drader has been a resident of Sydenham a number of years and his many friends are sorry to see them leave.

F. Lawson is making improvements to the interior of his residence.

House-cleaning is the order of the day.

Mrs. Guiles, Smith's Falls, is with her daughter, Mrs. P. W. Brown.

Flossie Smith, Odessa, guest of Pearl Sillis for the past week, has returned to her home.

Mrs. Barnett, Tweed, is spending a few days with her sister, Mrs. Stewart Joyner.

KALADAR.

The roads are in a bad condition, owing to the heavy snow storm which fell this week.

Mr. McKinnon, C. P. R. Operator, of Maberly, called on some of his old friends on Saturday last. Everybody seemed pleased to see him. Mr. McKinnon operated here for over four years when he was removed to Maberly we were sorry to lose so good a friend, but our loss was his gain.

Mr. C. Kellar made a flying trip to Tamworth, on Monday last.

Mr. Fred Cummings, of Ernestown, is spending a few days with friends in Kaladar.

Messrs. Walter Campny, Fred Morten, Stewat Snyder spent Saturday and Sunday in Tweed.

The cottage prayer meeting which

STRATHCONA.

Mr. Frank Granger left on Monday for Point Ann, where he will start a barber shop.

Mr. Webster Clement of Collins Bay is spending a few days visiting Mr. Wm. Lasher.

Mr. John Walker of Selby paid us a flying visit on Tuesday last.

We are pleased to say that Mr. H. Marten is slightly improving after a severe attack of pneumonia.

Rev. Mears of Newburgh is still holding revivals here.

Mr. Frank Haycock is somewhat improved.

Rev. Mr. Chant of Newburgh conducted the services in the Methodist church on Sunday afternoon.

Mr. and Mrs. Byron Rose of Newburgh Road called on Mr. Ed. Rook on Sunday evening last.

Mrs. Charlie McCaul and little daughter Violet are the guests of Mrs. James Kelley. Mr. and Mrs. McCaul moved to Blue Lake, when the cement works collapsed. Mr. McCaul dying shortly after their removal. Mrs. McCaul has the sympathy of a large circle of friends.

Miss Lott and Mrs. Hillman called on Miss Wells on Sunday last.

Mrs. Joseph Taylor is the guest of Miss Jackson.

Rumor says Mr. G. O. Madde, general merchant is about to sell his store and his many customers are very sorry to hear it.

Coughs, colds, hoarseness, and other throat ailments are quickly relieved by Crescend tablets, ten cents per box. All druggists

When the bread or cake or pastry comes from the oven light, crisp and appetizing, you are wont to say you have had good luck with your baking.

The "good luck" idea is a relic of the time when housekeepers pitted their competency against poor flour.

To-day good baking isn't a matter of good luck in any home where

Royal Household Flour is intelligently used.

In the hands of competent housewives it never fails because it is the whitest, lightest, purest and best baking flour to be had.

If the goodness of your baking is due to chance, your grocer is giving you the wrong kind of flour. Ask for Ogilvie's Royal Household.

Ogilvie Flour Mills Co., Ltd.
Montreal.

"Ogilvie's Book for a Cook," contains 130 pages of excellent recipes, some never published before. Your grocer can tell you how to get it FREE. 151

Money Saved is Money Earned

Professor Dorenwend

America's Greatest Hair
Goods Artist is

Coming to

Paisley House, Napanee, on

FRIDAY, APRIL 27th,

This visit gives you a chance to consult Prof. Dorenwend about your Hair and to choose from the stock of Hair Goods, which he carries with him—just what you require.

GENTLEMEN!

Oil. Perhaps you have tried a lot of patent medicines and now have no confidence in any. Do not condemn this until you have tried it. We have such confidence in it that if you try it and it does not cure you we will refund your money. It is a powerful, penetrating oil that acts directly on the bone—the seat of the disease—and has brought deliverance to so many that we have no hesitation in saying it will deliver you. Here is one case:—

Dear Sirs—I am free from rheumatism today because I used Tuck's Bone Oil. I had rheumatism in my hands and feet and thought at one time that my life was going to be ruined by it. I consulted a doctor and tried various remedies, but while some of them that I took internally made me feel better for a time none of them took the pain away. After I had suffered for six months or more doctoring all the time, I was advised to try Tuck's Rheumatic Bone Oil. I did and I never can be thankful enough to the man who told me to get it. I had not used a bottle until I was better and before the second one was done my joints were loosened up, the pain was gone and I was well. Tuck's Bone Oil did it. That was six years ago and I have not been bothered since.

H. S. Brown, Merrickville.

For rheumatism, lame back, neuralgia, sprains, coughs, colds, quinsy or bronchitis, in short for any and all kinds of inflammation there is nothing to equal Tuck's Rheumatic Bone Oil. A bottle should be on the shelf in every home. For sale by all medicine dealers at 50c. a bottle or sent prepaid by the Tuck Bone Oil Co., Limited, Smith's Falls, Ontario.

Nickle plated tea and coffee pots, trays &c. at MADOLE & WILSON.

DENBIGH.

Mr. George W. Sweetnam, of Vennachar, one of the first and for years one of the most prominent settlers in this part of the country, died on the 31st of old age and general infirmity at the age of nearly 75 years. Besides being a farmer and land owner he for some time carried on a very prosperous business as a General Merchant. He also represented this Municipality from 1885 to 1891 and during part of the year 1894 as reeve, in the county council. For several years past his health had declined steadily and rapidly and for some time before his passing away he was quite helpless. The funeral which was conducted by Mr. Geo. A. Snider, of Denbigh, took place at the Vennachar Cemetery, on Monday the 2nd inst. Deceased leaves to mourn his widow five sons and two daughters who are all grown up and away from home except his eldest son Austin, and youngest daughter, Mrs. Emma Buffam.

Mrs. Mary John, beneficiary of her lately deceased son Edward, who for only a little over two years was a member of the Denbigh Council of the Canadian Order of Chosen Friends has already received from the treasurer of the Order cheques amounting to \$589.50 cents in settlement of the Life Insurance and Sick Benefit claims, and greatly appreciates the readiness, promptness, and fairness of the officials of the Order in effecting a settlement.

The Fritsch brothers Otto, Julius, and Emil have bought another span of horses and a full outfit of implements vehicles and machinery to take with them to Saskatchewan whither they are intending to journey in another week or so.

Emil Stein and family and Adolph Warlich are also getting ready to leave for Saskatoon where they intend to settle.

Even medical men are not immune from catching the westward moving fever as our Medical Practitioner Dr. J. Chant, much to everybody's regret has suddenly left Denbigh with the intention of locating in the far North West.

Mr. Fred Cummings, of Ernestown, is spending a few days with friends in Kaladar.

Messrs. Walter Campny, Fred Morten, Stewart Snyder spent Saturday and Sunday in Tweed.

The cottage prayer meeting which was held on Sunday night at Mr. Kellar's was well attended.

Mr. C. Godfrey, Prop. of the King Edward, left here on Monday for the west where he intends spending the summer.

Mr. Charles Morten spent Monday in Tweed.

Mr. and Mrs. A. Fleming were guests of Mr. Chas. Morten's on Sunday last. Mr. La Valle spent Sunday at the King Edward.

Miss Lillian Fleming spent Saturday at Tweed.

Mrs. J. Bathgate is the guest of her sister, Mrs. H. Allport.

A carload of waggons and buggies here last week for Mr. Frank McKinnon of Northbrook, he is doing a rushing business in that country.

Mr. Peter Morton is busy hauling lumber to this station which he intends shipping to Tweed.

Mr. Iner Delane, of Cloyne, was in town on Saturday.

Miss Edith and Etta Kellar visited Miss Laura Morton on Sunday.

Mr. John Winters, of Cloyne, registered at the King Edward on Tuesday.

Easy and Pleasant Home Dyeing.

Diamond Dyes

Will Color Anything Any Color.

The most wonderful helpers in the home to economical dressing are the Diamond Dyes. They are so easy to use that even a child can dye a rich and perfect color with them.

Diamond Dyes make faded and dingy dresses, blouses, capes, jackets, stockings, scarfs, laces and draperies look like new.

Beware of dyes that claim to color cotton and wool with the same dye. It is impossible to get satisfactory results from dyes of that character. In Diamond Dyes there are special dyes for coloring all cotton and mixed goods and special dyes are made for all wool goods. Each of the Diamond Dye colors is guaranteed to give full satisfaction, when used according to directions.

burning on mission and market street and Market. The twelve-story Mutu Sansone has also been destroyed.

San Francisco, April 18,—At 10 night the fire was unabated and thousands of hills and clamoring for places on the fire damage is now believed to have reached a height to be homeless.

NEWS IN GENERAL.

The Government proposes to appoint a mining commissioner, who will settle all mining disputes.

Trade returns for the last nine months show an increase of nearly \$50,000,000 over the same period last year.

The house occupied by Sheriff Hope at Belleville was burned, and the Sheriff's family had a narrow escape.

At Montreal a Coroner's jury recommended that James Hackett be committed for trial for the murder of Ida Ahern, a child.

Navigation is open at Fort William and Sault Ste. Marie and a large fleet of boats cleared from Midland for Lake Superior.

Seven men were killed by an explosion during gun practice on the battleship Kearsage.

An international Salvation Army congress will be held in New York May 11 to 16.

United States dealers are protesting against the Canadian duty of ten cents a pound on tea.

Mr. John F. Wallace, of New York, has been chosen third arbitrator in the dispute between the Grand Trunk Railway Company and their engineers.

Crown Attorney Curry states that negotiations are in progress for Joseph Phillips to hand over securities amounting to \$60,000 for the benefit of the York County Loan shareholders.

No farmer can afford to feed Cattle and Lice too—Zenoleum Kills Lice.—T. B. WALLACE sells the ZENOLEUM at the Red Cross Drug Store.

Belleville, April 17.—Two stores on Front street, this city, were robbed last night, namely, Robinson & Thompson's tailoring establishment and the Oak Hall clothing house. In the Oak Hall, the thieves got about \$5 in money, but the other firm have missed nothing so far. No clothing was taken by the thieves. The police suspect local parties.

Belleville, April 16.—The Belleville rolling mills, which have laid idle for many years, were on Saturday sold to J. Wardrope, of Ottawa, who is said to have been acting for a syndicate. It is said that new and up-to-date machinery will be installed, and the plant operated to its full capacity. There is \$30,000 of the city's money in the bank here, waiting to be earned as a bonus by whoever operates the mills.

Belleville, April 17.—On Good Friday a number of local sports went to Deseronto and met a contingent from Napanee there. A cockfight took place with the result that the Belleville men won seven out of ten events and only lost two birds. The affair was held a couple of miles east of Deseronto and was largely attended. Considerable money changed hands on the result. The police did not interfere.

Paint Brushes of all descriptions, Brooms, Wash Boards and tubs,
MADOLE & WILSON.

Belleville, April 16.—A drowning accident occurred here this afternoon, the victim being Edward, the six-year-old and only son of Mr. D. Fitzgerald, foreman of the boiler shop at the G. T. R. works here. The little fellow was last seen on the bank of the River Moira, near his home, making mud pies. He was seen by some companions going to the river for a small pail of water. The parents were not notified of the occurrence for a couple of hours when grappling parties began a search but, owing to the swift current, it is feared the body has been carried out into the bay, as it was heavily clothed. The body had not been found at 9 o'clock to-night.

Pictou, April 18. -On Monday evening, Mrs. West, an aged lady was found dead in her room—everything pointed to her having been dead for several hours. She had evidently been preparing dinner when death came, as meat and potatoes were on the stove in cooking order, but the fire was out. She had likely been resting on a couch near the stove as she was found at the foot of it on the floor in a cramped position. A bruise over the right eye indicated that she had pitched forward striking the stove. The coroner was summoned but decided there was nothing to warrant an inquest.

We are head quarters for builders' hardware, building paper and nails, galvanized iron roofing, Sanitary plumbing, Steam and hot air heating. Let us give you an estimate.
MADOLE & WILSON.

TAMWORTH.
Material for erecting a store for W. A. Fuller, is being placed on the ground stone, sand and lime also the bricks. All the joists are on the ground, the excavation is all done and when completed will be a fine building.
Miss Coulter has the brick and lumber on the ground of her site for a residence. We do hope all the rest that were burned out will follow suit and build.
M. Fitzgerald has his building nearly done, the iron roof is now on, it is a very nice building and improves the back street.

We are sorry to chronicle the sudden death of Mrs. J. A. Taylor, who died Wednesday morning. The funeral took place Thursday afternoon at 2 o'clock, the remains were taken to the family vault at Centreville. Mr. Taylor has the sympathy of the whole community in his great loss. Mrs. Taylor was a good Christian woman and was a model housekeeper. She leaves a family of four small girls.

IT'S DELICIOUS!

What's Delicious?

THE COXALL CO.

When Rheumatism is torturing the body the sufferer wants relief quick. He does not want to be told that he is suffering from uric acid Rheumatics poison in his blood when perhaps he knows all the time that Rheumatism has been in his family for generations, that he is predisposed to it, that he got wet through or chilled through the other day and that at once his old enemy began operations. He does not want to take a lot of medicine into his stomach to drive the awful pain out of his leg but he feels as if he wanted something to go right to the spot. This is where Tuck's Bone Oil comes in. It is a powerful, penetrating oil that goes right to the spot, goes quick and safe and sure. It acts on the seat of pain and if used according to directions will cure Rheumatism. It has done it for hundreds of others, it will do it for you. For sale by all medicine dealers at 50c. a bottle or sent prepaid by The Tuck Bone Oil Company, Limited, Smith's Falls, Ont.

Use Prism Brand Floor Enamel! It dries quickly, has a varnish gloss, and is true to color. The Medical Hall.—Fred L. Hooper, sole agent for Napanee.

On motion the Town Property Committee were instructed to have the outside of the town hall painted.
Moved by Councillor Simpson, seconded by Councillors Ming that the motion placing the account for the Electric Light plant be left in the hands of The Fire, Water and Light Committee be reconsidered. Carried.
On motion the above motion was rescinded.
On motion the placing of the Finances of the Electric Light Plant was left in the hands of the Finance Committee.
On motion the Collector's time was extended until the next regular meeting of council.
On motion Mr. Wm. Davy was heard in reference to a sidewalk to his home.
On motion the matter of Mr. Davy's sidewalk was referred to the street committee to report at next meeting.
Moved by Councillors Meng and Normie that the town procure a hose wagon and harness for fire protection purposes.—Lost.
A number of firemen were heard in reference to the hose wagon.
Moved by Councillor Williams, seconded by Councillor Graham that the Clerk secure estimates of cost of hose wagon and harness. Carried.

NAPLES STILL IN DREAD

The Death List Continues to Grow With Every Report.

A despatch from Naples says: Gloom is spreading over the city, and the fear of some great disaster from the continued activity of Vesuvius is increasing. Continued showers of ashes and sand have interrupted railway traffic and the feeling of panic is causing large numbers of citizens to neglect their ordinary pursuits. Many shops are closed, and in the streets are to be seen processions of refugees parading with lighted candles, crosses and pictures of saints. The accession of thousands of these fugitives to the population of Naples, with their stories of the terror and devastation wrought by Vesuvius in their villages, has had much to do with the increasing panic here.

The loss of property by the volcanic outbreak is estimated at \$20,000,000, and it is announced that 500,000 persons have been rendered homeless.

The panic here is increasing. The prisoners in the city jail multined owing to fright, and succeeded in breaking open some of the doors inside the building, but were subdued by the guards. They are in a state of great excitement, however, requiring doubled guards.

It is reported from Ottajano, Nola and Somma that numerous shocks of earthquake were felt there. Their effect was partly neutralized by the fact that great quantities of ashes lay piled up high against the walls, and act as a support for them.

The crater is belching out a tremendous torrent of water, mixed with stones and cinders. These cinders are more dangerous than they have been hitherto, as they are much heavier.

At Somma Vesuviana, north-east of the volcano, fifty houses and portions of three churches have collapsed under the weight of cinders. The Town Hall is threatened from the same cause.

Six feet of cinders have accumulated on the ground at Castellamar.

Thousands of panic-stricken refugees are pouring into Naples from Torre del Greco, on the shore of the bay. Their clothes are covered with volcanic dust, and they are in a pitiable condition from terror and privation. The Bishop of Naples and the municipality are co-operating to provide food and shelter for the refugees.

SLOPES LINED WITH BODIES.
Three hundred bodies have been found on the slopes of the volcano, and it is feared the total death roll will be two or three times that number.

Many houses here are falling under the weight of the volcanic ashes on their roofs.

The lava flowing down the slopes of Vesuvius has reached Pompeii.

The Village of Poggio Marino is buried in cinders.

The sunlight is almost hidden by the cloud of volcanic dust which fills the atmosphere, and the darkness adds to the alarm of the people. Further disasters are feared.

Five hundred persons were killed between Ottajano and San Giuseppe, on the eastern slope of Vesuvius.

The stream of lava which was flowing toward Torre del Annunziata was diverted near the cemetery of that place and turned to the left toward Pompeii.

AN AWFUL PICTURE.
The Martino's correspondent, on returning in from a visit to Somma Vesuviana, reports that Sarno is buried in ashes. The majority of its inhabitants escaped. Sarno is eleven miles from the volcano, and contained cotton

mills which employed 8,000 persons. Bread riots have occurred at Portici. The soldiers have the greatest difficulty in quelling the disorders. Troops have received no rations in two days.

The Government has decided to place Naples under martial law. The Napolitans are in a state of frenzy, and a famine and revolt are feared.

SITUATION IMPROVES.

A despatch from Naples says: One hundred and thirty-two bodies have been recovered from the ruins of the church at Ottajano. It is estimated that the total loss of life there was 500.

The situation here continues to improve. At noon on Friday the sun was shining brightly. Small quantities of ashes are falling in the Vesuvius district.

It is feared that should there be a heavy fall of rain, such as generally follows volcanic eruptions, the towns in the Vesuvian district will collapse from the weight of the ashes upon them when soaked with water, while the formation of mud on the roads will cut off communication. Hence the efforts of the military are now directed to the removal of the masses of cinders, which are heaped up for probable later use as fertilizing material. The sailors from the French naval squadron are aiding in the work.

It is calculated that \$10,000,000 will be required to rebuild the destroyed towns and support the victims until they are in a position to support themselves. Though ashes are still falling, the eruption has practically ceased.

The conduct of the King and the Duke of Aosta, the action taken by the Government, and the heroism of Prof. Mottucci are favorably commented upon on all sides.

CLIMBED THE VOLCANO.

Prof. Mottucci on Friday climbed up Vesuvius to a point a long way above the observatory, at the imminent risk of his life, and ascertained that unless the conditions change radically there will be no further discharge of lava at present. He states it is impossible to determine the quantity of sand in the crater, but as the cone has diminished considerably in height and the showers of cinders thrown out have been transformed into ashes he believes the end of the disturbance is near.

Nearly 5,000 refugees are already housed here, and the number is rapidly increasing. In fact, all the buildings available for the accommodation of the fugitives are crowded, and if many more people seek shelter here it will be necessary to place them in army tents.

The crowding of refugees into Naples has resulted in the almost complete stoppage of the supply of food usually forwarded to the Vesuvian districts, and consequently the prices of food have risen enormously, and the lack of meat and bread is seriously felt in these districts.

ALPS TURNED YELLOW.

A despatch from Zurich says: Ashes from Mount Vesuvius have fallen on the Alps in sufficient quantities to give them a yellowish red tinge. They have also fallen at Zurich and elsewhere in Switzerland. Owing to the dust in the air the sunsets have a remarkable fiery appearance.

ONTARIO LEGISLATURE

WHAT THE LEGISLATURE AT TORONTO IS DOING.

ONTARIO'S ELECTION ACT.

The Premier introduced a measure to amend the Ontario election act. This seeks to settle the vexed question of numbers on ballots. The present ballot has a number printed of the front of the counterfoil, and a corresponding number on the back of the ballot itself. The act of last session prohibited the putting by the deputy returning officer himself of a number on the counterfoil and a corresponding number on the poll book, thus doing away with the possibility of tracing how persons voted. In that sense it was really an abolition of the numbered ballot. The measure now introduced, the Premier said, was to settle all question as to numbers on the ballots, about which there had been more or less hysterical language used. He pointed out, however, that the numbers under the present act were there to prevent plugging and also to enable a scrutiny to be made. If there were no numbers whatever there could be no scrutiny. Next session they would take up the whole question of the ballot law with a view to deciding whether they should have an entirely new form of ballot or adopt the Dominion ballot, which had no number whatever, and under which no scrutiny could be held. In the meantime any bye-elections to be held would be held with ballots without numbers of any kind, though it would not be possible to have a scrutiny if such were demanded, and the parties would have to run the risk of plugging. The Premier concluded by saying he was strongly impressed with the desirability of providing that the expenses of the polling booths at elections should be assumed by the Government and not be borne by the municipalities.

NEW EDUCATIONAL MEASURE.

The following are the principal points of the new educational measure introduced by the Minister of Education:
The appointment of a Superintendent of Education.

An advisory council of seventeen members, representative of all branches of education, fifteen elective, and two, the President of the University of Toronto and the Superintendent of Education, being ex-officio.

Supplementary Estimates to contain a special grant to the rural, public and separate schools.

Additional grants to the territorial and poor schools and the continuation classes.

Increased grants for education (not including the normal school project) will cost about \$90,000 the first year.

Additional powers to educational boards to acquire and expropriate lands.

A minimum salary fixed for rural school teachers. Average salary rural schools at last available reports was \$372 for male and \$293 for female teachers. Discipline provided for teachers who accept smaller salaries.

Commissions of inquiry, with extensive powers as to securing evidence in regard to any educational question. One commission to be appointed shortly and to deal at an early date with the text-book question.

No school inspector to be dismissed except by a majority vote, for cause, and with the approval of the Government. Increased allowance for inspector's expenses.

In addition to the changes outlined in the acts, reference was made by Hon. Dr. Pyne to the Government's plans regarding the normal schools, which are empowered under existing legislation. This contemplates:

The establishment by September, 1907, of additional normal schools; the number and location of these not yet decided. Their capital cost will be about \$200,000, and yearly maintenance will cost \$70,000 to \$75,000.

This involves the abolition of the present county and city model schools. The district model schools to be retained, and possibly the model schools in one or two of the less advanced counties.

administration of the mining law and regulations, and the machinery of their enforcement, but will also provide funds for several contemplated bonuses for the refining of certain metals.

SEEDING IN THE WEST.

Spring Opens Quite Satisfactory for Farm Work.

A Winnipeg despatch says: The first report from the Canadian Pacific agents regarding the progress of seeding operations was received on Wednesday. The reports indicate that seeding operations, while not in full blast, may be said to be general throughout the western Provinces, and in some portions the work is far advanced. On the main line west seeding has begun at many points, Burnside being the first district to report operations as general.

The conditions throughout the country are somewhat uniform, taken as a whole, and no large portion can be said to be much in advance of any other.

Seeding is as fully advanced in the new Provinces as in Manitoba, and if there is any slight advantage it apparently rests with Saskatchewan. On the whole the spring is opening in a way quite satisfactory to those concerned in the grain crop, in which number all western Canada people may be said to be included. In addition to the report on the work of seeding, statistics are secured by the company showing the increase or decrease in acreage, a large majority of agents reporting an increase of from 5 to 10 per cent. In rare cases an increase of 25 per cent. is reported, and in a few instances there is a small decrease. At certain comparatively new points the increase is still larger. Weyburn, for instance, reports an increase of 40 per cent.; Macoun, 65 per cent.; Dundurn, on the Prince Albert line, 50 per cent., and Stoughton, on the Moose Mountain, 35 per cent.

AN INTERESTING REPORT.

Dealing With Neglected and Dependent Children.

One of the most interesting reports issued by the Government is that dealing with neglected and dependent children. There are numerous illustrations and a full account is given of the splendid work carried on by the children's aid societies. The report is now ready for distribution and anyone interested can secure a copy by addressing a request to J. J. Kelso, Parliament Buildings, Toronto.

Workers for neglected and delinquent children should seek for the good that is in every heart, ignoring the badness until it is crowded out by something better. Love, praise, encouragement, sympathy, these will soon transform little lives into all that could be desired. As a rule these children have had more than their share of knocks and scoldings, with no appeal to their better instincts and no incentive to show how they could be under fair conditions. Revere the child-nature. Think of the illimitable possibilities of goodness, the future that may be theirs; the opportunity that is afforded for effective service; and great joy and success will surely attend the work.

At a well-attended meeting in Gravenhurst a Children's Aid Society was organized recently to cover part of the Muskoka District. Dr. J. H. Elliott was elected President, and Mr. W. H. Cross, Secretary-Treasurer.

CHEAPER POWER PROMISED.

A Monster Deputation Gets Good News.

A Toronto despatch says: The rapidly swelling tide of public sentiment in favor of prompt and adequate Government action to give the municipalities within a radius of one hundred miles of Niagara Falls, cheap electric power was strikingly evident by the monster deputation of about one thousand representatives of over 70 municipalities which waited upon Premier Whitney and all the members of the Government on Wednesday. They came from Sarnia

LEADING MARKETS

BREADSTUFFS

BUFFALO MARKET.

Buffalo, April 17. -- Flour -- Steady. Wheat -- Spring stronger; No. 1 Northern, carloads, 85½c. Corn -- Strong; No. 2 yellow 53½c to 53½c; No. 2 corn

LEADING MARKETS

BREADSTUFFS.

Toronto, April 17. — Flour — The market is firm, with light offerings, exporters bidding \$3.05 for 90 per cent. Ontario patents, in buyers' bags, at outside points. Manitoba, \$4.30 to \$4.50 for first patents, \$3.90 to \$4 for second patents.

Wheat — Ontario — No. 2 white and red was 78c bid C. P. R. north.

Wheat — Manitoba — No. 1 northern, 83c asked, 82c bid, Point Edward, May shipment. No. 2 northern, 81½c asked, 80½c bid, same terms.

Oats — No. 2 white, 35½c bid, outside, on 5c freight rate to Toronto, 37c asked; Manitoba offered at 41½c in store Montreal, 41c bid.

Corn — No. 3 yellow, 51½c bid spot, Toronto.

Barley — No. 2, 50c bid, C.P.R. points.

COUNTRY PRODUCE.

Butter — Continued to come forward freely.

Creamery — 25c to 26c for solids, 25c to 24c for large rolls, good to choice 18c to 19c.

Dairy — 17c to 18c for medium, 16c to 17c for large rolls.

Cheese — Unchanged at 14c for large and 14½c for twins.

Eggs — Quotations are firmer at 17½c to 18c for new laid. Storage are quiet at 13c.

Poultry — Choice dry plucked turkeys, 16c to 18c; fat chickens, 12c higher at 12c to 13c; fat 7c to 8c; fat hens, 8c to 9c; thin 6c to 7c; ducks, 12c to 13c.

Potatoes — Ontario, 65c to 75c per bag on track here, and 75c to 85c out of store; eastern, 70c to 80c on track and 10c more out of store.

Baled Hay — Quotations are unchanged at 8c to 8.50 for No. 1 timothy and 8c for No. 2 in car lots here.

Baled Straw — 85.50 to 86 per ton.

MONTREAL MARKETS.

Montreal, April 17. — Grain — There is some inquiry for Manitoba wheat by cable, but bids continued about ½c per bushel out of line, and consequently, there is little or nothing doing. Barley quiet, supplies limited. Flour, quiet and steady. Milled firm. Supplies limited and the volume of business passing small. Rolled oats quiet and featureless. Hay continues firm in tone, very little new business being reported.

Oats — No. 2, 32½c to 34c; No. 3 32½c to 34c; No. 4 31½c to 33c.

Wheat — 74c to 75c l.o.b. per bushel.

Barley — Manitoba, No. 3, 51c; No. 4, 50c; Ontario, 46c l.o.b. 75 per cent. points.

Corn — No. 3 mixed, 56c; No. 3 yellow, 56½c ex-track.

Flour — Manitoba spring patents, \$1.50; strong bakers' \$4 to \$4.10; winter wheat patents, \$4.10 to \$4.30; straight rollers, \$3.80 to \$3.90; do, in bags, \$1.70 to \$1.80; extras, \$1.35 to \$1.45.

Butter — Sales of small lots of choice creamery of last year's make were reported this morning at 23c to 23½c. This improvement has not been noted by all dealers, however. A large firm was quoting old make at 20c to 21c.

Cheese — Steady and unchanged at 13c to 13½c. New make coming in very slowly.

Eggs — Closed firm in tone. Receipts fairly liberal this morning. Prices not affected. Fresh receipts selling at 19c to 20c.

Potatoes — Per bag of 80 lbs., 60c to 65c.

Honey — White clover, in comb, 13c to 14c per pound section; extract, 8c to 9c, buckwheat, 6c to 6½c.

Provisions — Heavy Canadian short cut pork, \$21.50; light short cut, \$20; American short cut, \$20; American cut clear fat back \$20; compound lard, 7c to 7½c; Canadian pure lard, 11½c to 12½c; kettle rendered, 12½c to 13½c; hams, 13c to 14½c, according to size; breakfast bacon, 16c; Windsor bacon, 15c; fresh killed about 10 dressed hogs, \$10.50; country dressed at \$9.25 to \$9.50; alive, \$7.50 to \$8 for selects.

BUFFALO MARKET.

Buffalo, April 17. — Flour — Steady. Wheat — Spring stronger; No. 1 Northern, carloads, 85½c. Corn — Strong; No. 2 yellow 53½c to 53½c; No. 2 corn, 52½c to 52½c. Oats — Stronger; No. 2 white, 36c; No. 2 mixed, 35c.

NEW YORK WHEAT MARKET.

New York, April 17. — Spot firm; No. 2 red, 89½c nominal elevator; No. 2 red, 90c nominal f.o.b. afloat; No. 1 northern Duluth, 88½c nominal f.o.b. afloat.

GEN. KODAMA MADE VISCOUNT.

Was the "Brains of the Army" During the War.

A despatch from Peking states that China will open Mukden, Antung, and Tatung to foreign trade during the month of April. A Japanese Consul has been appointed at Antung. The post may be raised to Consul-Generalship in June.

In case Viscount Hayashi, the Japanese Minister to Great Britain, should accept the Foreign portfolio, resigned by Minister Kato last month, Baron Komura may take his place at the Court of St. James.

Marshal Oyama, chief of the general staff, retired from that post on Wednesday, and is succeeded by Gen. Kodama, who was his chief of staff in Manchuria, and has now been created a viscount. This emphasizes the saying that he was the brains of the army during the war.

LOWEST TENDERS ACCEPTED.

The National Transcontinental Railway Contracts.

An Ottawa despatch says: The Cabinet on Thursday awarded contracts for the Winnipeg-Superior Junction and Quebec-La Tuque sections of the National Transcontinental Railway to the lowest tenderers, Mr. J. D. MacArthur of Winnipeg and Messrs. Hogan & Macdonald, respectively.

Mr. MacArthur's bid is in the neighborhood of \$13,250,000, while that of Messrs. Hogan & Macdonald approximates \$5,750,000. The mileage from Winnipeg to Superior Junction is 245 and from Quebec to La Tuque 150, so that it will cost about \$19,000,000 to build nearly 400 miles of railway. The successful tenderer in the former case is required to complete the work by October, 1907. To do so construction will have to be pushed very rapidly.

TEN THOUSAND MEN.

A Winnipeg despatch says: J. D. MacArthur, who will construct the Winnipeg-Superior section of the Grand Trunk Pacific, also contracted for 370 miles of construction work for the C. P. R. in various parts of the west, making 645 miles in all. By June 1 he will have ten thousand men on his pay roll. Seven thousand men will be required for Mr. MacArthur's Grand Trunk Pacific contract. The first section will begin five miles east of Winnipeg, the second at Molson, and the third at a point north of Kenora, on the Winnipeg River; the fourth at Dinorwic and at other places about equal distance where supplies can be gotten in from the C. P. R. by water. He will rush his undertaking from all these points.

ETIENNE LEFEBRE KILLED.

Struck by a C. P. R. Express on a Crossing Near Leonard.

An Ottawa despatch says: Etienne Lefebvre, 32 years old, a married man, was struck by the C. P. R. express while driving across the track near Leonard on Wednesday morning. He was still living when picked up, and was taken on board the train, but breathed his last shortly before reaching Ottawa at 12. His left hip was fractured, and his left arm was also fractured in two places.

decided. Their capital cost will be about \$200,000, and yearly maintenance will cost \$70,000 to \$75,000.

This involves the abolition of the present county and city model schools. The district model schools to be retained, and possibly the model schools in one or two of the less advanced counties.

High schools, the truancy and the public libraries acts are to be amended and consolidated at the next session of the Legislature; and

Steps are to be taken next session to reorganize the system of public school inspection.

BLAMED THE NEWSPAPERS.

In moving the second reading of his bill to regulate proprietary and patent medicines by compelling those dealing in them to show the ingredients they contain on a label affixed to the bottle or package, Mr. Pratt declared that many of these medicines were converting their users into inebriates and drug fiends. He blamed the newspapers for the spread of the drug habit.

BINDER TWINE CHEAP.

Several private bills were advanced a stage, after which the House, on motion of Hon. Mr. Hanna, confirmed the agreement made in July last between the Inspector of Prisons and Charities and William Bernard Converse, of Montreal, for the manufacture of rope and cord at the Central Prison, and for other purposes. Compared with former contracts, that of this year, Mr. Hanna said, was most favorable. In the month of March the department made \$181.87 more than in the same month of the previous year. Farmers, too, purchased binder twine for a cent a pound less than the local merchants could buy it. The prices were:—For 500-foot twine, 9½ cents a pound; 550-foot twine, 10½ cents a pound, and 600-foot twine, 11½ cents a pound. With all this, too, the labor was performed under the most favorable conditions.

VETERANS' LAND GRANTS.

Hon. Mr. Cochrane's bill for the redemption of volunteer land grant certificates was put through committee. One important alteration in the act provides that when a veteran chooses a hundred-acre lot he can take up 60 acres of the next lot, and purchase the other hundred if he wishes. Another amendment gives the veteran, who is actually located, the choice of taking the patent of his land out at once, when the land will be subject to all taxes and other regulations to which other patent lands are liable under the law. Formerly he did not get his patent for ten years, but he was exempt from taxes and other conditions imposed on ordinary settlers.

OBJECTS IN NEW MINING LAW.

A uniform law for the Province. The decentralization of administration.

Protection to the prospector. Security of titles, thus affording protection to the investor.

Everyone who wishes to hold mining lands must procure a miner's license, good throughout Ontario, and costing \$10 yearly.

Division of the Province into mining sections, in each of which, where there is sufficient business to warrant it, a mining recorder's office will be opened.

A claim will be a square of twenty chains to a side, with boundary north, south, east and west.

Actual discovery of valuable mineral necessary in order to obtain title to mining lands.

Working permits on certain conditions.

Prospecting permits, good for one year and covering 640 acres, on payment of a fee of \$100.

Patents indefeasible and not subject to any further working conditions.

Mining partnerships regulated.

Miners and mine laborers placed on the same level as mechanics under the lien act, in respect to enforcing collection of wages.

Improved regulations for securing the health and safety of working miners.

A separate measure to be brought down later, which aims at placing the mining industry on a basis by which it will itself not only pay the cost of the

of Niagara Falls, cheap electric power was strikingly evident by the monster deputations of about one thousand representatives of over 70 municipalities which waited upon Premier Whitney and all the members of the Government on Wednesday. They came from Sarnia and Southampton in the west, from Kingston in the east, from Orillia in the north, and from St. Catharines in the south.

A score of speakers urged the Government to take immediate action to preserve the heritage of the people at Niagara for the people, to make the district within 100 miles of the Falls, for all time to come, the manufacturing centre of the Dominion by providing for the transmission of power to the municipalities at cost price. "Save us from the monopolists," "do it now," "win the lasting support of the whole people of the province, agricultural, manufacturing and labor classes"—these were the slogans of the deputation.

The Premier, in his reply to the deputation, said that he believed in giving the municipalities cheap power, either by the Government production and transmission, or by Government control of private producers. By either method the consumer would get the power at cost or a trifle above cost. The Government would in the near future consider the question of power for the whole province.

FOUR YEARS IN PRISON.

Greene and Gaynor Were Sentenced on Friday.

A Savannah, Ga., despatch says: Judge Speer in the United States Court to-day sentenced Greene and Gaynor each to a term of four years in the penitentiary and to a fine of \$575.749.90, the amount each is charged with having fraudulently obtained from the United States Government.

UNITED STATES POACHERS BUSY.

Fishing on the Canadian Side of International Boundary.

A despatch from Toronto says: Fishery overseers have reported to the department that United States tugs on Lake Erie have been fishing on the Canadian side of the international boundary, some of them coming within two miles of the Canadian shore. The department at Ottawa has been communicated with, and urged to put the cruiser Vigilant into commission at the earliest possible moment, in order to put a stop to the raids of the poachers.

UPRISING IN CHINA.

Great Sword Society Devastating Peasants' Homes.

A Peking despatch says: The Prefecture of Jung, in the southern part of the province of Honan, is in a state of terror on account of the activity of the Great Sword Society, an anti-dynastic organization. Peasants are fleeing from their homes to the walled cities to avoid being forced into the revolutionary ranks. The society is using compulsion to obtain recruits, and is devastating the homes of those who refuse to join it. The disaffection has spread to the south-western part of the Province of Shantung. Native troops have been sent to check the uprising. The number of the rebels is estimated at 15,000.

TO FIGHT SAN JOSE SCALE.

Deputation Suggests an Amendment to the Municipal Act.

A Toronto despatch says: A deputation of St. Catharines district fruit men waited on Hon. Mr. Monteith on Wednesday, and suggested an amendment to the municipal act where the municipalities can attempt to eradicate the San Jose scale on properties where the owners or occupants make no attempts to do so. The cost of such action, it was suggested, should be added to the taxes against the properties.

DOMINION PARLIAMENT

NOTES AND PROCEEDINGS OF THE OTTAWA HOUSE.

AMERICAN SILVER.

Mr. Blain was informed by Sir Wilfrid Laurier that \$93,778 of American silver had been collected by Canadian banks under the agreement with the Government.

PROPOSED CANAL.

Mr. Lennox was told by Mr. Aylesworth that the survey of the proposed canal from Newmarket to the Holland River had been completed. The department had obtained an estimate of the cost of the work, but it was not in the public interest to publish it at the present time.

CLINTON POST-OFFICE.

Mr. Gunn learned from Mr. Hyman that the total cost of building and furnishing the new post-office at Clinton was \$18,685. The Government paid Mr. S. Dickson \$200 a year for rent, fuel and light for the Seaforth post-office, and \$40 a year to the Bank of Commerce for the rent of the custom house at Seaforth. The public building recently erected at Wingham, together with its furnishings, cost \$13,961.

ELECTRIC LIGHT.

Mr. Ames was told by Mr. Hyman that the installation of electric light lamps on the Parliament Buildings grounds had been done by the Public Works staff.

HUDSON BAY CO. SERVANTS.

Mr. Alcorn was told by Mr. Oliver that the claims of retired servants of the Hudson Bay Co. and their descendants to one-tenth of the lands of Thomas, Earl of Selkirk, in the former district of Assiniboia, were against the Hudson Bay Co. and not against the country.

RAILWAY BILLS.

The Crawford Bay and St. Mary's Railway Company's bill was adopted by the Railway Committee of the House of Commons. Mr. Gallier had charge of it. The bill asked power to build from Fort Steele, B.C., by a convenient pass through the Rockies to Lethbridge, in Alberta. It was amended to confine the railway to the use of the North Kootenay or South Kootenay passes.

A bill for the purpose of building a railway from Kamloops to a point near Tetejaune was referred to a special committee.

The Vancouver Western and Yukon Railway was given an extension of time for the branches already authorized and also for building new branches. One of the branches touched the Alaska boundary and another goes to Edmonton. The Brandon and Transfer Railway Company bill was held over until the 19th inst.

The Kingston and Pembroke Railway, a C.P.R. bill, was given an extension of time, two years to begin and five years to complete were given the company. This bill provides for a short-cut in the line from Toronto to Ottawa. It makes the route from a point on the Quebec and Ontario line between Sharbot Lake and Bathurst to Carleton Place, instead of from Sharbot Lake to Carleton Place.

POSTMASTERS WANT INCREASE.

A delegation of postmasters from all over Canada waited on the Postmaster-General. They asked that their positions be improved, and their salaries increased. They asked for 60 per cent. on actual and proper stamp sales up to \$1,000 per annum. In small country offices, where this will not net the postmaster a remuneration of \$50, then \$50 be fixed as the minimum; that 40 per cent. be allowed on stamp sales from \$1,000 to \$3,000 per annum, and 30 per cent. on sales from \$3,000 to \$10,000 per annum. That ten per cent. of legitimate postal revenue be allowed for rent, fuel

HOME.

SOME DAINTY DISHES.

Dried green peas, which are very cheap, make a most excellent soup. These should be soaked over night in cold water, and be thoroughly drained before being added to bacon boilings, or weak stock for soup.

A plain currant loaf is generally appreciated by children and can do them no harm. Work six ounces well-washed currants, three ounces of sugar, and two ounces of butter into two pounds of bread dough; knead thoroughly and bake like an ordinary loaf.

Baked Coffee Custards. — Make half a pint of very strong coffee, mix it with half a pint of boiling milk, beat two or three eggs till light into it, sweeten to taste and pour into a greased pie-dish. Bake very slowly till set, scatter chopped almonds over and serve hot or cold.

Broiled Fresh Herrings. — Scale and clean some herrings, and rub a little salt into them overnight, or a few hours previous to cooking. Wipe the fish dry and rub with flour. Make the gridiron hot, and place the fish on it over a clear fire. When one side is done turn carefully, and when cooked serve very hot with a lemon cut in half.

Peppermint Cordial. — Put sixty drops of essential oil of peppermint on to three or four lumps of sugar. Pound this in a mortar till all is thoroughly mixed, add to it four quarts of water and one quart of proof spirits of wine, or gin, and sufficient spinach juice to color it a good green. This is a delicious cordial.

Indian Stewed Mutton. — Take about a pound of cold cooked mutton, free from skin and fat, and cut it into dice of an inch square. Melt one ounce of dripping in a frying-pan. Place the meat in this, stir for two or three minutes, but do not let it brown. Then add a pint of hot stock. Season with salt and pepper and a dessertspoonful of chopped Indian pickle, and stew very slowly till tender. Thicken the gravy so that it clings to the meat, and there is no liquid in the dish. Garnish with chutney.

Lemon Marmalade. — Take any number of lemons. Six make a nice quantity. Slice these very thin, only rejecting the seeds. To each pound of sliced fruit add three pints of cold water, let this stand for twenty-four hours. Then boil altogether till the chips are tender, pour into an earthenware bowl, and allow it to remain till next day. Weigh it, and to every pound of boiled pulp add one and a half pounds of lump sugar. Boil the whole together until the syrup jellies and the chips are rather transparent. In taking out the pips be careful to leave all the white pith in, as that goes towards making the syrup.

Oatcakes. — Put two or three handfuls of medium size oatmeal into a three-pint basin, stir while pouring in boiling water. When all is moistened scatter a handful of dry oatmeal on the pastry board, turn out the prepared oatmeal, dust more meal over it. Take a piece of this according to the size cake you require and knead it out, using the rolling pin if wanted thin. Shape with a knife or the cutter. As oatmeal swells and dries very quickly, to have cakes that will stick together, and at the same time be short, this process must be carried out very speedily. Bake on a griddle that has been carefully cleaned and rubbed over with a piece of fresh beef suet. When cold store in a tin, and always heat before using.

HINTS FOR THE HOME.

Vinegar cruets, etc., may be beautifully cleaned with crushed egg-shells in a little cold water.

Chamois leathers should be washed in tepid water to which has been added a little ammonia. Rinse and stretch be-

of other material and padded. The felt is used singly if quite thick, or if thin, doubled and featherstitched around the edge. They are easy to wash.

The rich shades of green, blue and red and cream and golden browns can be made up into many useful, pretty articles, as whisk broom holders and fez shaped bags, finished with drawstring lassel at the bottom. The scraps make pen-wipers. I have only mentioned a few of the many uses in which this adaptable felt may be used.

To date 50 Canadian manufacturers have arranged to exhibit at New Zealand's exhibition at Christchurch.

Plans for Edmonton's water works and sewerage system have been adopted. The sewerage is estimated to cost \$306,000.

Homestead entries in Western Canada for March numbered 4,023, as against 2,441 for the same month last year.

The Ontario Government is trying to sell the protective fisheries cruiser Gilphie, which enforces the regulations on the Georgian Bay.

There have been more desertions from the Royal Canadian Horse Artillery at Kingston this year than any previous year.

Mr. T. N. Armit of the London Salvage Company will undertake the release of the Allan liner Bavarian, ashore near Grosse Isle quarantine.

GREAT BRITAIN.

A cable from London says an attempt will be made in Lincolnshire to recover

ON THE FARM.

FOOD FOR DAIRY COWS.

The dairy cow will not rise to a maximum of reasonable production unless she is fed a sufficient proportion of concentrated food to bring about such a result. Bulky food can be much more easily grown on the average farm than concentrated. Because of this, concentrated food is more frequently purchased than bulky food, and is, therefore, more expensive relatively. Moreover, it is my judgment that many dairymen feed concentrated foods in excess of the needs of the cows which still further adds to the cost of feeding. The discussion of this question, therefore, is of ought to be of much importance to the dairymen.

The amounts of concentrated food, that is the amounts of grain food that should be fed to dairy cows will of course, be influenced by the nature of the bulk of food that is given. Suppose cows in the one case eat clover or alfalfa hay of prime quality, and in the other, they must consume oat straw, corn stalks or sorghum, the amount of meal that would suffice along with the clover or alfalfa would not be enough to feed along with the other fodder.

It would not be enough for the reason first, that clover and alfalfa are in themselves a more nearly balanced ration than the fodders named; second, that they are more suitable for milk production; and third, because the cows will consume more of them relatively than of the other foods.

One authority on dairying was wont to say that his method was to feed the cows all they would eat up clean of meal. In my judgment such teaching is dangerous, a cow will eat more concentrated food than is good for her digestion if it is given to her, especially is this true of concentrated food strong in character. A cow which weighs, say 1,000 pounds, will in some instances consume more than 15 pounds per day of concentrated meal, an amount that will certainly unduly tax her digestive organs if fed to her long enough. A cow thus fed will not consume much fodder, but unless the proper relation is maintained between fodder and meal, the digestion will certainly get out of balance.

Of course the degree of concentration in the food must be taken into the account. For instance, should the meal be composed largely of corn in the one instance and mainly of wheat bran in the other, the cow would take larger quantities of bran without injury than of corn. It is a more bulky food. In any event, however, even where the feeding is sufficiently high, it is questionable if more than 8 to 10 pounds of meal should be fed to a milch cow for a prolonged period during the season of lactation. A very large and robust cow may take one or two pounds more with profit, but a cow of 1,000 pounds live weight does not require more than the amounts given above.

CARE OF SOW AND PIGS.

Sows should be mated six months to a year old, according to growth. Breeders differ with regard to the length of time the boar and sow should be together, but I prefer to leave them in each other's society about a day, writes William O. Slynus.

The hog house should be of sufficient height to clear the sow's back and large enough not to necessitate short turning. If the period of birth occurs in the winter, the house cannot be made too warm. If possible, have a yard for sow outside of the pen. It will not only give her contentment but exercise, thereby preventing the accumulation of flesh, which is a detriment to the coming brood. It also develops bone and muscle and imparts to the offspring

onices, where this will not net the postmaster a remuneration of \$50, then \$50 be fixed as the minimum; that 40 per cent. be allowed on stamp sales from \$1,000 to \$3,000 per annum, and 30 per cent. on sales from \$3,000 to \$10,000 per annum. That ten per cent of legitimate postal revenue be allowed for rent, fuel and light, or actual rent of space required with allowance for fuel and light. Time before 8 o'clock and after 7 o'clock should be allowed for as "night allowance," or "overtime allowance." They asked for a depot of postal stores and supplies at Winnipeg for convenience of the service in the West.

Hon. Mr. Aylesworth said he was glad to meet the postmasters, and would seriously consider their case. It seemed to him he had to decide whether it would be better to increase the pay of the postmasters or use the surplus the department was now earning for the improvement of the rural mail routes, so as to give more frequent mail service.

TRANSMISSION OF POWER.

Recommendations Made in Report of the Hydro-Power Commission.

Main points in the report of the Hydro-Electric Power Commission, which was laid on the table of the Ontario Legislature on Wednesday:

Transmission of power from Niagara at cost for distributing among the municipalities of five separate divisions is proposed, with centres at Hamilton, Toronto, Guelph, London and Windsor.

A market for 50,000 horse power could be obtained as soon as the transmission lines could be constructed, and for 100,000 horse power within five years afterwards.

Purchase of a right of way for a transmission line over the entire Niagara power district lying between Toronto and Sarnia is suggested.

Knowledge of recent sales of large blocks of power at Niagara determined \$12 per 24-hour horse power as the basis of calculation for the cost of transmitting power from that point.

Cost prices of power delivered to consumers at four typical points are calculated, including 25 per cent. allowance for future growth with annual charges of operation, repairs, replacement fund and interest at 4½ per cent., and power lost on lines and transformers. These figures are for 24-hour power per horse power per annum to the consumer: At St. Thomas, for a full load of 2,000 horse power, \$26.03; three-quarters load, 1,500 horse power, \$29.06; half load, 1,000 horse power, \$35.08. Berlin, full load, 3,150 horse power, \$18.48; three-quarters load, \$19.52; half load, \$22.91. Galt, full load, 1,750 horse power, \$22.56; three-quarters load, 1,312 horse power, \$24.74; half load, 875 horse power, \$29.56. Toronto, full load, 50,250 horse power, \$16.53; three-quarters load, 37,687 horse power, \$16.91; half load, 25,125 horse power, \$17.15.

A saving to Toronto of \$684,000 a year is calculated including \$53,000 on the pumping station, \$217,200 on the street railway, \$144,800 on the Electric Light Company, \$100,000 from steam power displaced, and \$169,000 by taking over the Electric Light plant at \$2,000,000 valuation.

For the installation of a new power house an intake site is proposed immediately above that of the Ontario Power Company at Niagara, with an alternative site eighteen miles west of the Falls, where double the head can be obtained and only half the water required for the same power.

AFTER THE ANARCHISTS.

United States Will Put Down the Propaganda.

A Washington despatch says: Anarchism in the United States will be put down with a firm hand. The information has reached the Government officials here that large numbers of Italian Anarchists have arrived at San Francisco and Baltimore, which has resulted in the adoption of extreme measures to apprehend these men.

HINTS FOR THE HOME.

Vinegar cruets, etc., may be beautifully cleaned with crushed egg-shells in a little cold water.

Chamois leathers should be washed in tepid water to which has been added a little ammonia. Rinse and stretch before placing in the shade to dry.

To remove tar from the hands, rub them with the outside of fresh orange or lemon peel, and dry immediately. The volatile oils dissolve the tar, so that it can be rubbed off.

To Clean China. — When china is very dirty it should be washed with warm water and a little finely-powdered fuller's earth. A little soft soap may be added to the water instead of fuller's earth, if preferred.

Oil marks on wall papers can be removed by applying a paste made of pipe-clay and cold water. Leave this on all night, and brush it off in the morning. A second application may possibly be necessary.

When choosing kid gloves do not always reject a thick pair, or a very thin pair, but those of medium thickness will generally be found to wear the best. Much, too, of course, depends on the kind of leather—gloves that are soft and stretch easily are seldom disappointing to wear.

To restore old crape.—This process can only be carried out when the kettle is boiling so fast that it is sending out a volume of steam from the spout. Then hold the crape in both hands, pass it too and fro several times through the steam, and it will become clean and look almost equal to new.

Brooms should never stand on the ground. Drive a couple of brass-headed nails about four inches apart, and on these hang the brooms head upwards. Washing the bristles occasionally in soap-suds will not only cleanse but also toughen them, and thus make the broom last longer. Shake out the water, and then hang them bristle upwards to dry.

Worms in Pot Flowers. — You can easily rid your pots of this pest. Keep them from water for two or three days, then turn out the pot carefully, and you will easily find the worm. When it is not desirable to disturb the plant, gently water it with weak lime-water, and the worm will come to the surface.

Scents for the Sick-room. — In long cases of illness the patient worries of every kind of scent in turn. May I recommend a trial of the following. Procure from a chemist a small quantity of oil of sandalwood. Heat a shovel well, and drop on it a few drops of the oil. This will at once diffuse a delightful odor through the sick room, and will be very refreshing to the patient. Another scent which makes the sick room pleasant is procured by placing a piece of camphor on a saucer, and laying it on a red hot poker. The fumes from the camphor quickly go off, and cause all closeness to disappear.

USES FOR OLD FELT HATS.

When the children's felt hats are past their days of usefulness as headgear they may be used in other ways. Take out hatbands and wash the felts, using a hot suds and a brush, rubbing the felt until it is clean and soft; rinse thoroughly and stretch out the crown as much as possible. Run a safety pin through the edge of the rim and pin it to the clothesline. This only leaves a small pinhole, while a clothespin would make a dent that spoils the smooth effect desired.

The gray and tan felts may be used for table mats, cut round, two pieces feather-stitched together. Used for in-soles, they make shoes that are stretching fit snugger and as a remedy for cold feet, they are excellent. Take the felt soles out at night and hang up to dry from the moisture absorbed. Good soles may be made for bedroom slippers, those that are knit, crocheted, or made from elderdown. Double the soles and stitch across back and forth in squares in a quilting style. Trim off the soles the right size and bind with braid, as this is easier to sew to the uppers than the felt would be.

Holders in use around the kitchen fire are much nicer to the touch made of a piece of felt than are those made

vage Company will undertake the release of the Allan liner Bavarian, ashore near Grosse Isle quarantine.

GREAT BRITAIN.

A cable from London says an attempt will be made in Lincolnshire to recover the jewels and treasure lost by King John in the Wash when he fled across the marches in 1216.

UNITED STATES.

Maxim Gorky, Russian patriot and author, is ill with consumption at New York.

James A. Bailey, showman, and partner of the late P. T. Barnum, is dead at Mount Vernon, N. Y.

Accused of stealing pigeons. Gilbert Golden, aged 11, of Chicago, hid from detectives in the oven of a cook stove until the heat forced him out.

Chided for breaking the rules of his father's pork packing establishment and sent home, Edwin Weyeruss, sixteen years old, on Wednesday afternoon twice shot his parent, Frederick L. Weyeruss, one bullet taking effect in the breast and the other in the right wrist. The father may die.

GENERAL.

The new Russian loan will aggregate \$92,000,000.

Japan has announced that two Manchurian ports will be thrown open to the trade of the world May 1.

CANADIAN WHEAT IN BRITAIN.

Experiments in Cultivation—Yield Less, Quality Better.

A despatch from London says: In the Royal Agricultural Society Journal particulars are given of experiments carried out at Woburn Station relating to the cultivation of Canadian varieties of wheat. The Journal says results would seem to show that they yield as satisfactory here as in the Dominion. This does not mean as much in respect to quantity, the return being 20½ bushels, as compared to our average of 29 bushels per acre, but the quality appears to have been appreciably superior to ordinary English wheat, as its selling price was 36 shillings per quarter, as compared with the English 32 shillings.

KING AND QUEEN IN COLLISION.

Carriage Ran Into by a Drunken Peasant's Cart.

A despatch from Cortu says: While King Edward and Queen Alexandra were driving in the streets here on Friday their carriage was run into by a cart occupied by drunken peasants. One of the latter was thrown from the cart, which passed over him, breaking one of his legs. The King and Queen alighted and aided him. The peasant, on learning the King's identity, crawled towards and tried to kiss his feet. His Majesty moved away to avoid him, whereupon the peasant tried to reach the Queen. It was necessary to hold him to prevent him from kissing her feet. The King summoned a doctor from the British flagship in the harbor to attend the injured man.

SMALLPOX ON JOHN'S ISLAND.

Dr. Bell is Going There to Assist the Inhabitants.

A despatch from Toronto says: Word has been received at the Provincial Health Department of an outbreak of smallpox on John's Island, on the north shore of the Georgian Bay. There are 150 people on the island, and five cases of smallpox have so far been reported. The island has no municipal organization, and Dr. Bell, inspector of the board, is, therefore, being sent to the scene to take charge of the campaign against the outbreak. He is taking with him the necessary supplies for vaccination and disinfection.

A special officer of the board is going to Cobalt to assist in the carrying out of proper sanitary arrangements there.

too warm. If possible, have a yard for sow outside of the pen. It will not only give her contentment but exercise, thereby preventing the accumulation of flesh, which is a detriment to the coming brood. It also develops bone and muscle and imparts to the offspring vigorous constitutions. Feed at this period with light, tasty food, such as middlings, bran and stale bread.

If the sow's house is comfortable this is about the only precaution necessary. Give just bedding enough to lie upon. It is a good plan to chop it up in a fodder cutter. The sow is inclined to form her bed into a nest, just her own size. The tottering little fellows fall under her as she rises. When she again lies down they are crushed. The best of mothers are liable to do this. After keeping the bed level for two or three days, the pigs get strength and this danger passes away.

Feed moderately with tasty food for two or three days, when the milk will come in full flow. Then gradually open your grain bins and cribs and give her a variety of heavy feed, accompanied by milk if possible, watching all the time for signs of clogging. At the first symptoms restrict the feed. Do not forget to give some whole corn as she will nibble at that at odd times.

The pigs will not need much care for about a week or ten days. At the end of that time they will begin to emerge from the pen. At that time place some tasty food, milk and broken crackers at their door, sheltered from dogs and cats, and you will be surprised how soon they will sample it. In a few days they will come out at your approach. By feeding from that time on until selling time you will increase their weight about one-third and they will sell all around your neighbor's, who do not "bother."

TREATMENT OF OATS FOR SMUT.

Years of experience have shown the advisability of treating seed oats to remove the contamination of smut, unless positively known that the seed is exceptionally clean and free from spores. Loss may be simply and cheaply prevented by use of hot water or chemicals.

Probably the best method, and one now extensively used, is to treat the seed grain with a weak solution of formalin. Secure at the drug store a half pound of formalin, add to it 30 gallons of water. Spread the seed grain on the barn floor and sprinkle the solution over it, making it thoroughly damp. Shovel together into a pile, cover with sacking or other convenient material and leave for two to 12 hours for the chemical to act. Sow at once, or spread out and dry and sow after a time. Thirty gallons of the solution are enough for 100 to 150 bushels of grain. While the seed should be moist, it ought not to pack in the hand.

SKIM MILK FOR CALVES.

This is an exceedingly valuable feed for growing calves. It must always be fed sweet and must be as warm as the mother's milk, about 98 degrees. Four quarts fed twice a day is sufficient for the first month. Add a teaspoonful of oilmeal to each feed. In addition to the skim milk, let the calves have oats or shorts and hay.

CURE FOR PARALYSIS.

Physician Reported to Have Discovered Cure for the Disease.

A despatch from London says: The Express reports that Dr. Legran Norton Denslow, an American consulting physician, who is now staying in London, has discovered a cure for locomotor ataxia, with which he has accomplished a number of wonderful recoveries from this hitherto incurable disease. The paper quotes Dr. Denslow as saying that he does not wish to have his discovery made ridiculous by premature publicity, like Dr. Koch's tuberculosis cure. When he is ready he will give it to the world. He will lay it before his fellow-physicians in a manner to safeguard it from charlatanism.

GUARDIANS OF THE WEST

CANADA'S MOUNTED POLICE KEEP ORDER ON THE PLAINS.

An American Correspondent Writes About the Vigilance and the Duties of the Force.

For the past two months I have been traveling along the Canadian frontier, writes Frank G. Carpenter from Regina to the Chicago Record-Herald. I have been living in the baby towns of the wild west, and have gone unarmed through some of the least settled parts of the country. The conditions here are far different from those which prevailed in our western states when they were first opened up to immigrants.

There are no cowboys dashing through the streets shooting up the towns, there are no hold-ups on the railroads, and the "bad man from Bitter Creek" is conspicuous by his absence. There are plenty of barrooms connected with the little hotels, but the old settlers do not make the tenderfoot dance by shooting at his toes with a revolver, and murders and lynchings are fewer than in the settled states of our West and South.

The secret of this good order comes from Canada's mounted police and the fact that the man who commits a crime is bound to be caught and punished. The mounted police is one of the most remarkable military forces in existence. It comprises less than 900 men, but it keeps order throughout a country more than half as large as the United States. A vast part of its territory is wilderness. It runs from here to the Arctic Ocean. It has its stations about Hudson's Bay, on the Peace River and in the mining camps of the Yukon. Its members patrol every part of the new wheat belt, where American and other immigrants are taking up homesteads, and they gallop up and down the boundary between the United States and Canada guarding against smuggling and cattle thieving and settling any minor troubles which arise between the two peoples.

LONG BEATS FOR MOUNTED MEN.

One of the largest stations of this territory is here at Regina. The mounted police have barracks about two miles from the city, and most of the new men are broken in at this point before they are started out into the service. There are other large stations at Prince Albert, Calgary, and Edmonton. They may be found near every Indian reservation and on every spot where trouble is likely to come.

During my stay at Ottawa I had an interview with Colonel Frederick White, the head of this organization, and the man, who, more than any other, has had to do with bringing it to its present efficient state. Colonel White has been connected with the police for more than thirty-five years. He has seen it grow from 200 members to almost 1,000, and he has been associated with it in various capacities through all parts of this great British Northwest.

I asked Colonel White to tell me something as to the extent of the territory under his jurisdiction. He said:

"Our police precincts run from the boundary of the United States to the Arctic Ocean. We have altogether about 1,500,000 square miles under our jurisdiction. Take Edmonton. That town lies over 300 miles north of the boundary of the United States. We have policemen on guard there and all along the line east and west to the Pacific Ocean and to Hudson's Bay. We have men hundreds of miles to the northward, and we keep a large force in the mining regions of the Klondike. Indeed, we have practically the whole of the sparsely settled and unsettled portions of British North America."

"Give me some idea of how order is kept in such a country," said I.

"Our arrangements are such that we come in contact with all the settlers. As it is now, our policemen ride on horseback through every part of the lands which are being opened up. From time

houses in pieces, and put them together again when they reached their destination. As it is now we go around by ship to Hudson's Bay once a year to visit that station. Our policemen there report on the conditions prevailing about the bay, as to the whaling and fur industries, and as to how the natives are treated. They have little steamers to patrol the bay and they go up the rivers in canoes and across country with sledges and dogs."

LARGE FORCE IN YUKON.

"What are you doing in the Yukon?" "We have a comparatively large force there engaged in keeping order and to a large extent in the governing of the country. We are doing what we can to put down gambling, robbery and all sorts of crime, and at the same time we are making some explorations. At Dawson we have adopted the fingerprint system for the identification of criminals, which promises to become universal over the world. It is now used in England and the United States, and there will some day be a classification bureau of this kind in Canada so that copies of the finger prints of all criminals will be on record for the various police departments of the country. This system was inaugurated by Scotland Yard in 1898, and that department now has in its classification bureau the finger prints of more than 100,000 individuals, from which they say, they can infallibly identify any criminal there recorded in one minute and a half."

NERVE DISORDERS OF THE GREAT.

Many Famous Men Suffered From Incurable Diseases.

Of supreme captains of the world there are but six or seven and scarcely one among them exhibits genius in its healthiest colors, says the London Times. In ambush for nearly all of them some form of nerve disorder lurks. Grotesque as the statement seems, epilepsy, manifest in greater or less degree, revolves upon their destinies. Charlemagne the great and wise captain of the Franks, who stands for feudal civilization, who "snatched" from darkness all the lands he conquered, and who reared an empire that no hand but his was able to control, is almost the sole exception. What says the beard?

At 32 Alexander the Great, who had reckoned himself a god, died during, it is just after, one of his frenetic outbursts. Caesar, the foremost man of the ancient world, had strange convulsions in his later years, and it may be that the danger of Brutus saved him from declining into madness. Mariborough, who was married to a violent woman and whose only son died in boyhood, was epileptic during his ten last years of life.

The adventurous and daring Clive, world famous and conqueror of India, at 40 was decidedly a neuropath. In his memorable duel with a brother officer he missed his aim, flung away the weapon and cried: "Shoot and be damned! I said you cheated and I say so still." Clive was passionate, morbid, gouty and an opium eater. At 49, rich and of unstinted reputation, he committed suicide.

Wellington was distinctly epileptic. His fainting fits after Waterloo were frequent and it was an attack of epilepsy that carried him off. The Bonapartes have been neuropathic for nearly three centuries and one of the epileptic fits of Peter the Great is "said to have lasted" three days. Charles V., whose mother was insane, had fits in his youth and was gouty, bald and scrofulous. Frederick the Great (from the face of whose father, when he took a walk, says Macaulay, "every human being fled"), reared in a perfect hell of a palace, had a certain general unsoundness of mind, to which mercy was altogether foreign. The stock of Oliver Cromwell was not over healthy, and of the neuropathic tendencies of the Protector himself there is sufficient evidence. Mohammed—but let Mohammed rest.

Joan of Arc, the divine girl-woman, seer and soldier, who came from the sheepfolds of Lorraine to make victorious the oriflamme of France, Joan heard voices and saw visions, and was kissed

THE AWFUL SLAVE TRADE

THOUSANDS OF VICTIMS FROM PORTUGUESE AFRICA.

Held on Alleged Five-Year Contracts in San Thome and Principe Islands.

Henry W. Nevins writes as follows concerning the slave trade in Portuguese Africa:

Just a year ago I was starting for my walk of 300 miles across the Cuanza river and through the Hungry Country of Angola, the Portuguese territory in Central Africa, south of the Congo State. I had already come up from the West Coast by a roundabout route to the district of Bihe, and there I joined the path which has for centuries been one of the chief trade roads into the interior. It is merely a track, in most places so narrow that you have to walk like a native, putting one foot exactly in front of the other, but it leads in almost a direct line from the sea to Benguela across the Thirsty Mountain belt, through the pleasant valley of Bailundu, over the west plateau of Boro-Boro across the Cuanza, through the Hungry Country, and the high watershed where the tributaries of the Congo and the Zambesi flow down on either side, across the soaking Luvali fens, past Livingstone's Lake Dilolo, through Nanakandundu, the home of the great Queen, into Congo territory, to the copper ranges of Katanga, and so to the lakes and away to the eastern sea. And this little track, which turns and twists to avoid every trap stump and tuft of grass, has from time immemorial been one of the great slave routes of the world.

It is so still. As I entered the Hungry Country I found slave shackles hanging on almost every bush. They are the wooden fetters with which the hands or the feet of the slaves are linked together on the march. On reaching the Cuanza the shackles are knocked off, because the slaves begin to despair of escape with that long stretch of Hungry country behind them; but I have found shackles on the path from end to end, even right down to the coast, and the other day I had a letter from an Englishman I knew west of the Cuanza, saying: "Since you left the traffic has increased, and is more open. The slaves are now going to the coast tied or, or rather tied together, in a continuous line." The path through the Hungry Country is strewn with bones and skulls, and I found there the fresh bodies of slaves, some murdered, some left to starve, because through fever or fatigue they had been unable to keep up with the party on the march, and in going through the Hungry Country no one waits.

HOW SLAVES ARE OBTAINED.

In most cases the slaves are originally obtained by natives, who buy them on some charge of witchcraft, or for debt, or for drink. Sometimes they are kidnapped, or captured in raids. Sometimes they are mere plunder of Portuguese traders. They are brought to the so-called "emigration agents," who are established at various points in the country under Portuguese regulations, and are forwarded by them to the coast, where they are received by other agents, chiefly at Benguela, but also at Novo Dodondo and Lourenco. The prices naturally vary according to the slave's health and capacity. I have known a woman who was taken from her husband and three children far in the interior, bought for twenty cartridges, and sold in Benguela for about £18. In the district of Bihe, which is some 60 miles from the coast, an ox, a load of rubber (say 60 pounds) and a young slave are regarded as about equal value—say £7. But in Benguela, as nearly as I can estimate, the average price given for emigration slaves is £16, though I have known a man give as much as £25 there for a really nice-looking girl.

Large numbers of the slaves are used

which we have always claimed. I go about the world a good deal, and I know only too well how much of her reputation for humanity and justice England has lost in the last ten years. Last year I despaired of any appeal to such qualities among us. But it does seem now as though we were going to wash our own hands and make a fresh start. When our own hands are clean again at last, we can enforce such representations upon Portugal as she dare not resist. Or if she resists, I suppose we are still strong enough at sea to send a cruiser to arrest one of these legalized slave ships on its course and bring the abomination to an end.

"THE RESURRECTION IN 1915."

Peculiar Religious Sect Create a Stir in Yorkshire.

Some remarkable beliefs are held by the new religious sect, the Millennial Dawnists, recently formed in Wharfedale, Yorkshire, England.

In the main the adherents, most of whom have left other Nonconformist Churches in the district, hold that man is mortal, and that he will not be endowed with a soul until the resurrection, which is timed for 1915.

Then Christ will appear on earth and preside at the head of His Church, which will consist only of those who have been faithful and true under the new dispensation. Thus will begin the Millennial age, which will continue for 1,000 years. During this period Christ and the Church will act as a tribunal, and all who have not previously joined this new Church will be given an opportunity of attaining the perfect life.

Guides will be provided to direct such persons along the paths of holiness, and the devil will be chained up, in order that they may be saved from temptation. If at the end of 1,000 years they succeed in reaching their original state—that of the spotless Adam—they will be admitted to the Church, this privilege having been forfeited by not joining the correct Church before the dawn of the millennium.

The members of this Church are to be the Bride of Christ in the new era, and they will be first to rise at the resurrection, and be known as the first fruits. The next will be those who ultimately win salvation and are admitted to life eternal whilst all the rest will go to a second death—which is everlasting death. The adherents are very enthusiastic.

Among the adherents of the new sect are three local Primitive Methodist preachers. In tendering their resignations they wrote that, while they believed that "the wages of sin is death," they could not find in the Bible that this life was the only opportunity they would have for salvation. They believed that Christ would come again, and that everyone would have another chance.

The movement is already causing a good deal of dissension in families.

SENTENCE SERMONS.

By looking for the best love lifts to the best.

A tree is known by its fruits, not by its shoots.

Some saints try to prove their faith by their ferocity.

He who scorns the poor turns his Lord from his door.

People who are always picking bones get little meat.

There may be more love in a warning than in a reward.

You cannot climb the heavenly ladder on stilts of dignity.

He cannot pray for himself at all who prays for himself alone.

A bunko game is not made a blessing by coming into a church.

The downward road often looks like an ascent to the eye of pride.

The fruits of heaven are not in the life unless its climate is in the heart.

The man who has blisters to show does not need to talk about his burdens.

The man with time to waste is a bigger fool than the one with money to burn.

We might have lighter loads on our

the whole of the sparse-ly settled and unsettled portions of British North America."

"Give me some idea of how order is kept in such a country," said I.

"Our arrangements are such that we come in contact with all the settlers. As it is now, our policemen ride on horseback through every part of the lands which are being opened up. Every man has his route and he gallops from farm to farm and town to town, asking every colonist whether anything wrong has taken place since his last visit. If the farmer has no complaints he is asked to sign a report to that effect, and if the contrary his troubles are at once investigated. We have a record of all the settlers, and we go over the route and make the policemen produce these signed statements showing that each man has been visited."

EVERY FARMER AIDS POLICE.

"It may be that the former will claim his cattle has been stolen. If so, the policeman goes with him to trace the thieves and if they are found he sees that they are brought to justice and punished. In many cases such complaints are false alarms, and the policeman and farmer find that the stock has merely strayed into some valley nearby. Nevertheless, we make many arrests. There were more than three thousand convictions for crime and other offences in the Northwest territories last year. Many of the offences were petty ones, and this number, all told, covers a population of more than 400,000, scattered over the enormous region I have described. It seems to be small."

"Do you have many murders?"

"We have had thirteen in four years," said Colonel White, "and of these there were only two of the criminals were Canadians."

"How about lynching?"

"We have never had one man lynched in Canada, and, more than that, we have never had a hold-up on our railroads. I will not say that plans have not been made to rob our trains, but so far we have circumvented them. Indeed the records show that traveling is safer in northern Canada than in western part of your country. I remember two or three instances which occurred recently where men had evidently schemed to hold up the trains on the Canadian Pacific Railroad. In one of these the would-be thieves had a team of fine horses and a carriage shipped to the point where they expected to rob the train. Our police knew something was wrong, and we had a force on the lookout. The men found that we were watching them, and as a result they gave up the attempt and drove off toward the south. We have not heard of them since."

"The mounted police are doing a great deal in the way of explorations," continued Colonel White. "They go ahead and make the trails, and prospectors and

SETTLERS FOLLOW THEM.

They have opened up the Rocky Mountains and have cut passage-ways through the wilds to Alaska and the Pacific coast. On such trips the policemen erect houses along the trail, and leave supplies of bacon and other provisions for travelers who come after, who might find themselves with little food away off in the wilds. The trouble of many of our mining prospectors is that their food supplies run out about the time they reach the place where they expect to work. They must then go back or starve. Such men can get fresh supplies at these rest houses. It is surprising that the men who have food will not touch the supplies, unless it is absolutely necessary for their sustenance. In such explorations our men go along and blaze a trail about eight feet wide. It is wonderful how soon others follow and how quickly little hotels grow up along the line. We are making such explorations all the time and are gradually opening up the great Northwest."

"Are all your police mounted, Colonel White?" I asked.

"No. There are many regions which are not accessible on horseback. This is so about Hudson's Bay, on the Mackenzie River, and in other parts of the far North. We have a station on Hudson's Bay to which we have shipped

Cromwell was not overhaughty, and of the nonpathic tendencies of the Protector himself there is sufficient evidence—Mohammed—but let Mohammed rest.

Joan of Arc, the divine girl-woman seer and soldier, who came from the sheepfolds of Lorraine to make victorious the oriflamme of France, Joan heard voices and saw visions, and was kissed, she said, by the celestials.

A NOTED MINE OWNER.

Risked a Fortune to Back Opinion and Struck Gold.

The death is announced of George Lansell, the Bendigo, Australia, mine owner. The death of Mr. Lansell removes one of the most picturesque figures in the history of Australian mining.

Mr. Lansell was the chief owner of the most important mines at Bendigo, the chief centre of quartz mining in Victoria. By his courage and faith in the future of the Bendigo field Mr. Lansell at one period in his history prevented the field from being practically abandoned.

The gold in the shallow workings had been exhausted, and all the experiments in sinking deeper were failures.

"You must go deeper or starve," said Mr. Lansell, and risked the whole of his fortune to justify his opinion.

The workings reached a depth beyond which gold had never been found in Australia. Mr. Lansell held on confidently. Jests and half-silly sayings passed by him unheeded. Down, down, went his miners till nearly a mile below the surface of the earth they found the rich gold-bearing quartz.

Then it was found that Mr. Lansell had been provident as well as plucky. He had bought controlling interests in most of the mines that were then being worked in a half-hearted fashion, but which proved veritable bonanzas at lower depths.

Mr. Lansell's pluck made him a millionaire, and the hero of the 50,000 people who get their living in the prosperous City of Bendigo.

One of his peculiarities was the fact that he never contemplated the introduction of outside capital, as was so largely done in the West Australian mines. As a consequence, the wealth of the Bendigo mines was locally distributed and their shares have never even been quoted on the London market.

CONCERNING ORANGES.

An eminent Japanese bacteriologist has shown that the acids of lemons, apples and other fruits—citric acid, malic acid—are capable of destroying all kinds of disease germs. Cholera germs are killed in fifteen minutes by lemon juice or apple juice, and typhoid fever germs are killed in half an hour by these acids, even when considerably diluted. If you squeeze a lemon into a glass of water containing cholera germs and let it stand fifteen or twenty minutes, you may drink the water with impunity, as the germs will be dead; these juices will kill other disease germs. Instead of telling a man to have his stomach washed out, we can now tell him to drink orange juice, which will cleanse the stomach as thoroughly as a stomach tube, provided it be not a case of gastric catarrh, in which there is a large amount of tenacious mucus adhering to the walls of the stomach, a stomach tube to dislodge it is required, but in ordinary cases of biliousness, foul tongue, bad breath, sick headache, and nervous headache, a fruit diet is a wonderful purifier.

Judge: "I fix your punishment at imprisonment for life." Prisoner: "He! he! he! he! ha! ha!" "What are you laughing at?" "I was thinking that you can't imprison me for the time I've lived already. That's one against you, judge."

Little Brother: "Mr. Poseyboy, won't you go and stand before the window?" Poseyboy: "Certainly, my little man; but why?" Little Brother: "Oh! ma says she can see through you. I want to see if I can."

at rubber (say 60 pounds) and a young slave are regarded as about equal value—say £7. But in Benguela, as nearly as I can estimate, the average price given for emigration slaves is £16, though I have known a man give as much as £25 there for a really nice-looking girl.

Large numbers of the slaves are kept to work the plantations on the main-land or other industries along the shore. But I wish now to speak only of the export trade to the Portuguese islands of San Thome and Principe in the Gulf of Guinea. The slaves are conveyed on the ordinary passenger steamers, which run about once a fortnight. A day or two before the steamer starts they are collected in a public building before a Portuguese official called the curador. They are asked whether they are willing to labor on the island for five years. Not the slightest attention is paid to their answer. A tin dish with a number and a tin cylinder containing a paper with particulars as to their names, etc., are hung around their necks, and having entered the office as slaves, they go out as "contracted laborers." This is the process which the Portuguese call "redemption." It is a most lucrative process for all concerned, except, of course, for the slaves, who are only the merchandise.

HERDED ON STEAMERS.

They are next taken on board in lighters and herded forward. There were 272 on the ship by which I came last June, not counting babies, which, perhaps, numbered fifty. The average during the last few years has been a little under 4,000 a year, but it is now rising owing to the perpetual demand on the planters for more and more labor. After about a week's journey the slaves are landed on San Thome—Oklango, or the Island of Hell, as they call it—and they are distributed among the planters who have requisitioned the "Emigration Committee" for them. The planters pay from £26 to £30 for a crown slave delivered in good condition.

It is almost entirely for the cultivation of cocoa that the slaves are required for the two islands, being close under the equator and nearly always veiled in mist and dripping with moisture, are as good for cocoa as they are deadly for human life, and the cocoa trade is now of great and increasing value. I believe it amounts to about £1,000,000 a year. And the value of the slaves is consequently so great that I think their masters try in most cases to keep them alive. Yet, as our Consul, Mr. Nightingale, said in his last published report, the death rate, where we can check it, is enormous. Among the slaves of Principe one in five dies every year, and where I have been able to test the rate on San Thome, it is almost equally high.

At the end of the five years the survivors are called up in batches of about fifty before the curador and are informed that their contract has been renewed for another term of five years. They never go back. I have sought in vain for a single case in which a slave from Angola has been returned to his home. A very few escape over sea in canoes. A few hundreds, especially on Principe, have escaped to the forests, and are living there like wild beasts. From time to time the planters institute drives or battues and shoot them off. It was described to me as fine sport.

IN HUMANITY'S NAME.

Since I published the account of my journey in Harper's Magazine one of the great American cocoa manufacturers has written to me to say that in consequence of my articles he has stopped the importation of San Thome cocoa. I think it likely that other great manufacturers will follow this example and if they act together and give their reasons this may have some effect upon the Portuguese heart.

But as a nation we have the right to interfere. In 1830 we paid Portuguese £300,000 to stop her slave trade. By the Berlin and Brussels Acts of only 21 and 16 years ago, Portugal bound herself, in common with us, to put down the slave trade from the Congo Basin and Central Africa generally. We have also the right of common humanity,

The fruits of heaven are not in the life unless its climate is in the heart.

The man who has blisters to show does not need to talk about his burdens.

The man with time to waste is a bigger fool than the one with money to burn.

We might have lighter loads on our backs if we had less starch in our necks.

There's many a man who never prays for ruin until his neighbor has his hay cut.

The man who goes out to buy religion never gets anything but the gold brick variety.

When a man really has the robe of righteousness he is not afraid to let it touch his neighbor.

The man who sits in the back at prayer meeting often wants to walk in the front in the parade.

The devil is never so near being your sovereign as when he seems to be worshipping your superiority.

He is sure to make crooked tracks who tries to tread the heavenly road while his eyes feast on the sights of sin.

AFFECTS THE HAT TRADE.

English Leather Manufacturers Oppose Embargo on Cattle.

At a meeting of the Stockport, England, Town Council recently a long discussion took place upon the question of the restrictions placed on the importation of Canadian cattle. Mr. Alderman Lees, a hat manufacturer, said it was a great disadvantage to the country to have these restrictions upon the importation of foreign cattle. One result was a great scarcity of hides, which seriously affected the price of leather, and that in turn affected the hating industry, and made it a very important matter to Stockport.

Mr. Alderman J. Turner, also a hat manufacturer, said that serious inconvenience to the hating trade was suffered through the great advance in the price of leather, hides having gone up 33% per cent.

Mr. Walmesley said the motor-car industry was responsible for the increase in the price of leather, five hides being used for each car.

GREAT BLUNDERS OF LIFE.

Here are some "blunders" written down by five hundred men, and to be found in the Great Library, Chicago:

"The greatest blunder in my life was gambling."

"When I left my church and mother."

"My greatest blunder was when I learned to smoke."

"Was to fool away my time when I was at school."

"Not keeping my position, but grew slack in my work."

"Thinking that my boss could not do without me."

"Refused a steady position with a good firm."

"Would not hearken to the advice of older people."

"Not saving money when I was young."

"Boasting some one out of money."

"Did not stick to anything."

"Careless about my religious duties."

"Did not take care of my money."

"STONE GONGS."

A recent English traveller in China describes some remarkable examples of sounding stones, or "stone gongs," which he saw at Chufu, the birthplace and burial-place of Confucius. One of the stones, which are composed of a greyish calcic limestone, has been shaped into a cover for an incense dish placed in front of the tomb of the grandson of Confucius. When struck with a stick, or with the knuckles, it rings like bronze, and the sound is so distinct that it is difficult to believe, without inspection, that the object is not really composed of metal. Sounding stones are known in other countries. A correspondent of Nature describes a bridge at Corick, in County Mayo, Ireland, which is locally known as the "music bridge," because the stones forming the coping give out a musical note when struck.

SEA COOKS OF LONG AGO

PERQUISITES AND HONORS THAT THEY CLAIMED.

British Navy Chefs of the Olden Time Were Men of Very Great Importance.

Sea cooks were, and are, very necessary persons in the internal economy of the ship of war, but there were rogues among them as among all classes of men. There were sea cooks who rose by the aid of influence and knavery to very lucrative positions. Lord Nottingham, when Lord High Admiral, gave a patent to his own cook to appoint all the cooks in the navy.

Stewards, surveyors, cooks and bakers are classed together by one writer as the chief beneficiaries under the system of peculation and perquisites which at one time made the navy so happy a hunting ground for the rascals of the country. But they were not all permitted to ply their trade with impunity. says the London Globe, and one sea cook got seven years hard labor from Sir John Fielding for a long series of frauds. And in sentencing the man the judge expressed his regrets that he could not order him to be hanged.

AT THE HOSPITAL GATES.

Pea soup was generally the best ration the men had and was certainly the most liked. Potatoes were always served in the skins, sometimes two to each man, and a good natured cook was frequently prevailed upon to cook cakes and duffs that the men had made for themselves, demanding for his services either a pot of grog or a portion of the dish he cooked.

Sometimes, however, he could only be bribed by money, and in that way increased his pay of 35 shillings a month, in addition to which he was nearly always in receipt of a pension of 11s. 8d. per month. Besides these sources of revenue he also made a good deal of money from the sale of "slush," the fat scraped from the ship's coppers after each meal had been served, and half of which was his perquisite. The other half belonged to the ship for greasing the bottom and running tackle.

The ship's cook was, moreover, honored with a guard of two marines, who stood sentry over the door of the galley during the preparation of meals to prevent unwarranted raids upon the provisions by ship's thieves; he did not wear a uniform, nor was he expected to keep watch, being allowed to sleep in comfort and comparative privacy throughout the night.

ON THE LOWER GUN DECK.

But on the other hand he had some duties not connected with food, among them the preparation, when the ship was in port, of a hot poker for firing salutes.

And it was an established custom of the navy that the ship was not properly paid off until the pennant was struck by the cook. This operation he was expected to perform as the last officer of the ship, and until he had done it no officer could consider himself discharged or at liberty to leave the port. This rule held good though every seaman had left the ship, and sometimes the cook himself, in a fit of absentmindedness, went off without carrying out the task, and had to be rouled out again before the incensed officers could leave for their homes. There will be seamen alive to-day who have heard the phrase: "Every man to his station, and the cook to the foresheet," and the landsman who has read Marryat will always connect the man of the galley with the famous phrase:

"SON OF A SEA COOK."

In addition to the ship's cook, of course, there were, as now, the mess-cooks, men who were appointed by the seamen themselves to be presidents of the messes for the week, and who had

BRITISH POSTAL SAVINGS.

Amount Now to the Credit of Depositors Is \$1,000,000,000.

Great Britain's postal savings banks to-day hold deposits aggregating nearly \$1,000,000,000.

The banks were established in 1855 after the disastrous failure of many private banks. Three hundred stations were opened at the beginning and on the first day 435 working men deposited in all \$5,000. Penny banks followed, and school banks came as a matter of course, finding the children eager to start an account in their own names.

To-day there are 14,362 postoffice savings banks in the United Kingdom, with 9,408,852 depositors. Taking the population of Great Britain and Ireland at 40,000,000, it proves that one person in every four and a half has deposits, and that the average amount per person is \$77.70. Every class is represented among the depositors, and the fisherman often elbows the clerk at the postoffice.

The advantages to the public are: First, the absolute security from loss; second, the convenience of making deposits; third, the ease of repayment, which is not affected by change of residence; fourth, safety against personation and fraud; fifth, the prevention of poverty by the development of thrift; sixth, the ready means where no other banks exist, of a safe deposit; seventh, the education of the young and the untrained to the knowledge of the use and management of money; eighth, the tendency to discourage reckless and speculative expenditures.

The advantages to the country itself group themselves under seven headings: First, the people receive the profits as interest on their savings when these are used as a public investment; second, the country's wealth is kept growing within itself; third, by the wide distribution of these savings money can promptly reach points needing it suddenly from local causes; fourth, in remote places stringency from too limited banking facilities is prevented or lessened; fifth, the laboring people feel a direct personal interest in the stability of the country; sixth, sectionalism among the less intelligent classes is lessened by continual and close touch with a common financial institution; seventh, by special investment, the people's savings may be made the foundation of securities for financial institutions, or loans for municipal improvements or special national undertakings.

BIG LINERS BEING BUILT.

British Sister Ships to Outclass Anything Afloat.

Two new ocean liners, which are being built with the \$10,000,000 lent by the British Government, are fast nearing completion, and will be launched in June or July of this year. They will be named the Mauritania and Lusitania, and will be the largest ships the world has ever seen.

Each vessel will have a gross tonnage of 33,200, while they will be sixty feet longer than any other liners afloat. They are eighty-eight feet in beam, and in this respect are the first to surpass the Great Eastern, which was eighty-three feet in breadth.

Each will have accommodation for 3,000 passengers and will carry a crew of 800. They will be propelled by turbine engines capable of developing 80,000 horsepower, and are expected to travel at a minimum speed of twenty-four knots an hour. Marine engineers predict the vessels will be the steadiest ships on the ocean. They are to be fitted in a manner equal to the most gorgeous of modern hotels. The decorations will consist of reproductions of the greatest works of art, while the system of lifts between the various decks will provide for the rapid transit of passengers from one part of the ship to another.

The first-class dining saloon will be unprecedented in marine architecture. It will be a massive, gorgeous apartment 125 feet long by 80 feet wide, and will comfortably accommodate 500 per-

MODERN CRUSOE OUTCAST

FATE OF THE IMAGINATIVE LOUIS DE ROUGE-MONT.

Man Who Fooled the Solemn Minded Royal Society of England in 1898.

In the year 1898 the versatile Louis de Rougemont gathered together all the learned heads of the Royal Society of England and astonished them, and incidentally the world at large, by declaring that he had lived for thirty years alone among the aborigines of Australia. His story was so well connected in detail, so well told and so scientifically plausible that the learned Royal Society swallowed it in its entirety. Later events, however, proved the whole narrative to be the concoction of an abnormally imaginative mind, and Louis de Rougemont was publicly denounced as a liar. Here are some details of the terrible penalty that was attached to that terminological inexactitude.

SNUBS, INSULTS, CRUELITIES.

Probably a lie has never had a more bitter price. Though correct in most of his details, de Rougemont took such an extraordinary hold on the popular imagination at first that when it was discovered the deception he was never forgiven.

So well are Louis de Rougemont's features known that people turn and say, "There goes the liar!" when he walks along the street. Every door has been closed to him, and he has had to suffer snubs, insults and cruelties innumerable. The last eight years have been for him one long struggle to convince people that he is in reality an honest man.

In his own words he gives below the extraordinary story of his painful experiences:—

"The persecution which began when I was first attacked in 1898 has been kept up ever since. The name of de Rougemont still excites laughter and insults, and wherever I appear in public and am recognized there am I jeered at or called a liar.

"At first things were so bad that I was actually compelled to leave London and go on a long sea voyage. For instance, when the controversy round me was raging, I was recognized while riding on an omnibus by a crowd standing outside a newspaper office in Fleet street, in the windows of which was a caricature of me. And the crowd shouted to the driver to throw me off the top.

"So I was not sorry to get away, having first shaved off my beard and assumed another name.

COLONIAL'S PROTEST.

"When in Australia I was invited to address the New South Wales Lancers on what I had witnessed as a non-combatant at Elands-laagte. When I arrived one of the men got up and remarked loudly and with an oath that though they might care to stop and listen to the liar he would not. And this, though I could not possibly have told lies on this occasion, seeing that the New South Wales Lancers were at Elands-laagte, and could have checked all I said.

"While at the Cape, I had two most unpleasant experiences. The first was one day when I went out to bathe, and suddenly found myself in quicksand. Being an expert swimmer, I threw myself flat under the water, and rolled over on the quicksand beneath the water until I reached a rock. This is the only way in which one can escape from sands of this nature, as, though they are of sufficient substance to hold the body of a man they will not support his legs.

"Before this I had heard a gun fired, but thinking merely that target practice was being carried out I took no notice of it. But as I sat on the rock a man came

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Sunlight Soap

is better than other soaps, but is best when used in the Sunlight way.

Sunlight Soap contains no injurious chemicals.

Sunlight Soap is pure soap, scientifically made. Every step in its manufacture is watched by an expert chemist.

Sunlight Soap saves labor, and the wear of rubbing which common soaps require in washing fabrics.

Your money refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

VALUABLE DESOLATE ISLANDS.

The most valuable desolate islands in the world are the Liakova, in the Arctic Ocean, off the mouth of the Lena, in Siberia. They are frost-bound and utterly barren, save for Arctic moss, but they contain such enormous quantities of fossil ivory that they are exceedingly valuable—in fact, although uninhabited save for the ivory-diggers, and of them selves incapable of supporting life, they produce a revenue of \$5,000,000 a year.

men of the galley with the famous phrase:

"SON OF A SEA COOK."

In addition to the ship's cook, of course, there were, as now, the mess cooks, men who were appointed by the seamen themselves to be presidents of the messes for the week, and who had to receive the provisions for the mess from the purser at the daily issuing of victuals, and who had to hand these on to the ship's cook in good time. As compensation for his trouble the mess cook drew a cook's, or double, portion of grog, and he deserved it, for his duties were arduous and his critics severe.

If he spoiled the duff he was tried by a jury of the mess, and this jury was gathered by hoisting a mess swab or beating a tin dish between decks forward. He was condemned to most painful punishments if found guilty. He was also the carver of the mess, and in order to prevent favoritism a blind-folded member of the mess was required to call out the name of the person who was to receive the portion as it was placed on the table. Small or large, that portion was given to the man named, and probably no more satisfactory method of dealing with the question could have been found.

HAD THE HOSPITAL HABIT.

Many People Who Become Chronic Visitors.

The record of the patient who visited the "Fitzbridge Wells Hospital" continuously for fifteen years can be paralleled, and, indeed, beaten, by several London hospitals, says the London Daily Mail.

There are many obstinate diseases which can rarely be absolutely eradicated, and patients suffering from these diseases will attend hospital for years with regularity. Ulcerated legs are very frequently the cause of such unvarying patronage of the out-patient department of the London hospitals.

There was one old man who used to be a regular visitor thirty years ago to St. Bartholomew's Hospital. He disappeared after about five years' regular treatment, but six years ago he appeared again for treatment and medicine. He explained that in the interval he had been to King's College, the London Hospital, St. George's, the Metropolitan Hospital, and four or five others. At some he had only attended half a dozen times, others he had been to five years; but he had returned to his first love, as he himself said.

He only attended for a few months and then disappeared once more. He may be dead, or he may be going the rounds once more, to reappear, like the Wandering Jew, a decade hence, a nonagenarian still hopeful of a cure.

Other chronic out-patients are less feeble, and Guy's Hospital can boast of at least two patients who have been regular attendants for eighteen years and more. Doctors come and doctors go, but they still attend with their cards and medicine bottles.

One old dame, with fifteen years' attendance to her credit, came too late recently, and found the out-patient department shut. On her next visit she complained bitterly to the doctor about being "locked out." "I might have dropped dead in the street," she quavered.

THE BISHOP'S NURSE.

Dr. Gibson, Bishop of Gloucester, England, presiding at a nursing association meeting in his diocese, said he recalled the time when he was attacked with measles as a boy at school. He had a nurse to look after him at night, and remembered that he was always awakened three times during the night. First, when he was in his earliest sleep and as comfortable as could be he would shake him and ask if he wanted some barley water. He had wanted barley water ever since. Later he would be awakened again by the loud snoring of the nurse—and subsequently by the noise she made in rekindling the fire.

system of lifts between the various decks will provide for the rapid transit of passengers from one part of the ship to another.

The first-class dining saloon will be unprecedented in marine architecture. It will be a massive, gorgeous apartment 125 feet long by 80 feet wide, and will comfortably accommodate 500 persons at one meal. It will be lighted by a great dome extending up through the two decks above and crowned with a roof of cathedral glass.

More than one engineering record has been broken in the construction of the ships. The stern frames and brackets are the largest ever known, the former alone weighing forty-seven tons and requiring no fewer than sixty-nine tons of molten metal in the making.

The rudder weighs seventy-nine tons, and each link in the 2,000 cables is twenty-two and one-fourth inches long and weighs 100 pounds. Each link was tested and withstood a strain of 370 tons.

JAPS AT NELSON'S TOMB.

Visiting Sailors Honor the Greatest of Sea-Fighters.

The London papers to hand give stories of the visit to London of the Japanese sailors sent over to man the great new warships recently built and now going into commission. The Express thus describes the visit of the crew of the Kashima to St. Paul's Cathedral:

At a little before 8.30 in the morning the cry of "Here they come!" was raised among the mass of spectators who had gathered outside Liverpool Street Station. As the dapper little blue-jackets emerged into the street a hearty cheer swept through the watching ranks, followed by a confused chorus of "Danais." The sailors broke into a confused roar of "Mellon!" With that promptitude which is bred of a naval training, they climbed into the string of primrose-colored benches awaiting them. When they arrived at St. Paul's Cathedral the visitors showed the utmost solicitude to be conducted forthwith to Nelson's tomb, which had already been described to them by their comrades of the Kalori's crew. Their mein as they stood around the tomb was a most impressive study. The sentiment of veneration, almost of awe, was plainly expressed in every countenance. The tradition of ancestor-worship is still strong in the Japanese nature.

A most pleasing, half pathetic incident of this visit was the coming of Dean Gregory to welcome the band of silent, bare-headed guests. Venerable under the burden of his 87 years, he stood before these heroes of a rightly strife, and addressed them in silvery, though slightly quavering tones.

"We in England," said he, pausing that the interpreter might translate his speech, "look on the Japanese as our friends. I am sure the Japanese feel this same sentiment towards us. The Japanese are a brave race, and it is the earnest hope of all Englishmen that their destiny among the nations of the earth may prove as great as their valor, their chivalry and their humanity merit."

Archdeacon Sinclair followed with a few kindly words. Captain Ichi returned thanks on behalf of his men for the warmth of their reception.

ENGLISH LADY NURSED JAPS.

The only English lady privileged to act as a nurse in the Russo-Japanese war, and the first to enter Port Arthur after the historic siege, has recently returned to London after fifteen months' experience of the horrors of warfare. This lady is Mrs. Teresa Richardson of Glanbrydan Park, Carmarthenshire, who was specially selected by Viscount Hayashi, the Japanese ambassador at London, to assist in nursing his wounded countrymen. Tall and of commanding appearance, with a kindly, sympathetic face and eyes from which pity shines, Mrs. Richardson was known by the Japanese heroes she nursed as "Our English Mother."

the only way in which one can escape from sands of this nature, as, though they are of sufficient substance to hold the body of a man they will not support his legs.

"Before this I had heard a gun fired, but thinking merely that target practice was being carried out I took no notice of it. But as I sat on the rock a man came running down to the water's edge and shouted to me that they had fired the shot to warn me of the quicksand. I laughed and replied: 'No fatal accident happens to Louis de Rougemont!'"

"What?" he answered. "Are you Louis de Rougemont? If we had known that we would not have bothered to fire the shot and save a liar."

REMARKABLE COINCIDENCE.

How a Colonial Fugitive Was Found in a City of Great Britain.

A couple of men, strangers, sat down together to lunch in a restaurant in a Midland city of England. One noticed that the other was reading a colonial paper. The two got into conversation, and the first, pointing to the newspaper, ascertained that the other was a resident in the colony whence the sheet had come. "I have a friend out there; he went out from here ten years ago. I wonder if you know him," and the questioner mentioned his friend's name. "It is very remarkable," answered the colonial, "that you should ask that question at this moment. I was reading, when you spoke, a three-column article in this paper describing the mysterious disappearance from the colony of that very man. I knew him intimately."

The colonial went on to describe the strange disappearance of the mutual friend. He had gone from the colony as mysteriously as if the earth had suddenly opened and swallowed him. Investigation had proved that his accounts were in perfect order; he had a handsome balance at his bank, his business was flourishing. Nothing that could be discovered bore the least relation to the disappearance. He had no known enemies, and while suicide seemed impossible, none could believe that he had been the victim of foul play. The conversation was suddenly interrupted by an apparition. They made a rush together for a corner of the room. To oblige the psychists one ought to be able to declare that it was the wrath of their friend that the two men saw. It was not. It was the man himself. He had been seized by an intolerable weariness and brain fog, and, acting on an impulse, had fled from the colony to his birthplace to recuperate. That was all. His chance meeting with these two friends gave him the first intimation of the alarm which his disappearance had caused.

A REMARKABLE TRAIN EPISODE.

An extraordinary story of a child's escape from death was given at Leeds (England) Assizes, where the parents unsuccessfully claimed damages from the Lancashire and Yorkshire Railway Company. The mother and the little boy, who is three years old, were traveling to Southport, when the train lurched, and the child was thrown against the door, which flew open. A train was passing in the opposite direction at the time, and the boy was knocked by the engine into the four-foot way, where the train passed over him. Strange to say, he was unhurt.

NEW YORK'S WASTE.

The gross indebtedness of New York is greater than that of the Chinese Empire. The cost of operating the city's government for one year almost equals the annual expenditures of both London and Paris combined. New York pays out in salaries alone the vast sum of \$65,000,000 yearly, or as much as London spends for its entire administration. At the present time there are 45,000 men and women on this city's pay-roll. Of every \$100 that a New Yorker pays in rent, it is estimated that \$12.25 goes into the pockets of municipal "servants."

produce a revenue of \$5,000,000 a year.

EARN CASH

In Your Leisure Time

If you could start at once in a business which would add a good round sum to your present earnings—WITH-OUT INVESTING A DOLLAR—wouldn't you do it?

Well, we are willing to start you in a profitable business and we don't ask you to put up any kind of a dollar.

Our proposition is this: We will ship you the Chatham Incubator and Brooder, freight prepaid, and

You Pay No Cash Until After 1906 Harvest.

Poultry raising pays. People who tell you that there is no money in raising chicks may have tried to make money in the business by using setting hens as hatchers, and they might as well have tried to locate a gold mine in the cabbage patch. The business of a hen is—to lay eggs. As a hatcher and brooder she is out-classed. That's the business of the Chatham Incubator and Brooder, and they do it perfectly and successfully.

The poultry business, properly conducted, pays far better than any other business for the amount of time and money invested.

Thousands of poultry-raisers—men and women all over Canada and the United States—have proved to their satisfaction that it is profitable to raise chicks with the

No. 1—60 Eggs
No. 2—120 Eggs
No. 3—240 Eggs

CHATHAM INCUBATOR AND BROODER.

"Yours is the first incubator I have used, and I wish to state I had 52 chicks out of 52 eggs. This was my first lot; truly a 100 per cent. hatch. I am well pleased with my incubator and brooder. THOS. MCNAUGHTON, Chatham, B.C."

"My first hatch came off. I got 170 fine chicks from 190 eggs. Who can beat that for the first trial, and so early in the spring. I am well pleased with incubator, and if I could not get another money could not buy it from me. Every farmer should have a No. 3 Chatham Incubator.—F. W. HANSAY, Dunnville, Ont."

"The incubator you furnished me works exceedingly well. It is easily operated, and only needs about 10 minutes attention every day. R. MCGUFFEE, MOOSE JAW, Assa."

The Chatham Incubator and Brooder is honestly constructed. There is no humbug about it. Every inch of material is thoroughly tested, the machine is built on right principles, the insulation is perfect, thermometer reliable, and the workmanship the best.

The Chatham Incubator and Brooder is simple as well as scientific in construction—a woman or girl can operate the machine in their leisure moments.

You pay us no cash until after 1906 harvest.

Send us your name and address on a post card to-day.

We can supply you quickly from our distributing warehouses at Calgary, Brandon, Regina, Winnipeg, New Westminster, B.C., Montreal, Halifax, Chatham. Address all correspondence to Chatham. 814

AT THE PLAY PARTY.

By Martha
McCulloch-
Williams

Copyright, 1905, by Ruby Douglas

Mary-Cindy swung down the line, waving and weaving, her hands as

brother, a bachelor, and as fond as he could be of Mary-Cindy. Certainly he wouldn't make her trouble. As for other folks, let them say what they pleased.

Thus the good dame said to herself openly in her upper mind. Down beneath she felt that the party was worth while because it had brought young Ellerton again within range of Mary-Cindy's eyes. He had seemed struck with her at the big meeting, now six weeks back, but had somehow not come to call, as she had confidently expected he would. But nobody could say she had run after him. His coming was, after a sort, accidental. She had but said to Jack Edwards that he might fetch whatever young men he chose, and Jack had chosen to bring Ellerton.

Ellerton had insisted upon being Mary-Cindy's partner in all the plays. He had said, too, he was going to make her take him in to supper, so as to be sure of getting a full share of the good things. All night he had been laughing and as full of pranks as a boy just out of school. He had even been audacious enough to drag Mrs. Dowdell herself into one play—for a single round, of course—and he had fallen into the way of calling her Mammy Dowdell, as did all the other boys, whom she had about half brought up.

"Ain't he a gay one? I wonder how his wife'd like it if she knewed his carryin's on!" Pamela Ricks said in Mrs. Dowdell's ear, nodding as she spoke toward Ellerton.

Pamela, tall and twenty, had been very pretty. Now, at thirty, thinning, fading, with her soul on edge, she was spiteful withal, a gossip of the first water. But Mrs. Dowdell was a match for her.

"Nobody's wife has got any call to mind her husband's bein' at my house, party or no party," she said, with her easiest smile. "But I believe in bein' keeful. That's why I told Frank Ellerton he'd have to put up mostly with Mary-Cindy tonight. I wouldn't have him beavin' around the other gals. I knowed Mary-Cindy'd keep him out o' mischief."

Pamela's jaw dropped. "La, I thought you didn't know—no more'n the rest!" she ejaculated.

Just then the rush to supper swept her away—supper which meant hot roast turkey, barbecued pig, nine kinds of cake and five of custard, not to name hot coffee and brandy fruit. Mrs. Dowdell had stinted nothing, but somehow as she glanced up and down the long table she had set with such housewifely pride it seemed to her suddenly to hold naught but dust and ashes. She had lied bravely to Pamela. It was the only thing to do if she would save her child from Pamela's acid tongue. Her heart went down, down as she looked to the farther end of the room and saw Mary-Cindy with cheeks like damask roses and starry eyes laughing at something young Ellerton had said, then suddenly darting away from him to greet a late arrival.

"You don't deserve a howdy nor a crumb of supper, you horrid Belly Slowpoke," she said to the newcomer, with a smile that took all sting from the words. "You tried your best to slight my party, but you couldn't," she went on. "Don't try to make excuses. I know."

"My excuse made itself. It's waitin' for us outside," Billy Acton said very low as he spoke, stepping between Mary-Cindy and the rest. "I wish you'd come and see it," he went on. "I found it in the road, and what to do with it beats me plumb and clean."

"What? Who is it?" Mary-Cindy whispered as Billy half dragged her toward a seated figure in the deserted

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Purgative, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature to do its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Take Hall's Family Pills for constipation.

A Whistle Language.

They have a whistle language on Gomera island, in the Canary archipelago. They can whistle there as articulately as a Bostonian speaks. And, since they can whistle very loud and shrill, the Gomerans can converse a long way off. A Gomera hunting a mile from home can ask his wife what there is for lunch, and, if the menu does not please him, he can scold her and order a change quite as well as though he stood beside her.

The Gomerans talk in a singsong, and their whistle language reproduces the spoken one's intonations. For instance, children all over America have a taunting cry:

"Hiss for shame,
Hiss for shame,
Everybody knows your name!"

This cry is not sung. It is intoned. And so the Gomerans intone their guttural language. It would be quite easy

Albert College Belleville, ONT.

Business School founded 1877.

Practical and thorough. Five complete courses. Many graduates occupying important places as book-keepers and shorthand reporters.

\$37.00 pays board, room and tuition, electric light, use of gymnasium and baths, all but books laundry, etc., for 10 weeks—longer time at same rate. Special reduction to ministers, or to two or more entering at same time from same place. A specialist in book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department also assist in the work. The high character of the College is guaranteed by thoroughness. New Commercial Hall one of the finest in Ontario.

The owner named a very small sum.
"Now, I'll tell you what I'll do," continued the old man. "I'll give you the

Mary-Cindy swung down the line, waving and weaving, her hands as high as her head, all the while chanting with the rest:

"Whirl about and wheel about, Rose Betsy Lina!
Wheel about and twirl about, Ro-sa Betsy Li-na!
Twirl about, whirl about, Ro-sa Betsy Li-na!
I want you for my d-a-r-l-i-n-g!"

Her chanting was thin and sweet, a fine thread of melody through the ramping, romping chorus, which the rhythmic footfalls, heavy or light, accented into something weird, almost barbaric. The motion, too, had a touch of primitive savagery—it was so free, so unrestrained, so vividly vital.

The row of players ran all the big room's length, men one side, women the other, with the topmost couple ever changing as those who had stood head swung down the middle together, then separated, meeting and parting and swinging as they met up the sides again. The play was no more than a reel, lacking only the piping or the fiddling. But good Mrs. Dowdell, who held dancing a deadly sin, stood by looking on happily and laughing heartily at the antics and shufflings of the more vigorous players.

Mary-Cindy's foot was as light as thistledown. Her mother thought proudly how clumsy she made the other girls look, unintentionally, of course. Mary-Cindy would not think of willfully outshining them thus in her own house at her very first party.

Mrs. Dowdell had been doubtful over the party. Now she was very glad she had let Mary-Cindy have her way. The trouble had been nothing to speak of, and as for the expense—well, she reckoned she could call in the neighborhood young folk to feast and frolic this one night without asking anybody's leave. What if she had not quite paid back all the money she had to borrow when her husband died? She owed it to her

found it in the road, and what to do with it beats me plumb and clean."

"What? Who is it?" Mary-Cindy whispered as Billy half dragged her toward a seated figure in the deserted big room. "You ask," Billy whispered back. "All I know is it's somebody huntin' up Frank Ellerton—somebody that had got stuck in the mud down this side the creek. The buggy axle broke, and we had a time splicin' it!"

"You said we should find my husband. Where is he?" the figure demanded, rising up and turning to face the pair. "Mr. Ellerton, I mean. Tell him to come at once."

"Call him!" Mary-Cindy said, wheeling upon Billy. She was white and trembling, but her voice rang clear. The stranger girl looked at her curiously with eyes full of dancing lights—lights that matched well the wavy color in her cheeks. But she said nothing until Billy came back with young Ellerton, who started at sight of her, yet evidently not in dismay. He caught both her hands and looked down at her with a working face, his eyes asking questions his lips could not frame.

"Frank! Oh, Frank! It's all right—we're friends again—and free!" the stranger cried joyously, flinging her arms about his neck and hugging him tight. "And I'm so glad I almost love you," she went on. "They wanted to send for you—said I ought to wait until you came, but you know I hate waiting. I simply had to come and tell you the good news."

"You darling Edith," Frank said affectionately, patting her cheek. Then he turned to the wondering pair beside him and explained, still keeping hold of Edith's hand. "We've had fearful trouble, all for nothing. You see, we got married in a joke—not in the least meaning to do it—two years back. When we found out we were tied hard and fast our people, who were delighted to have us tied, tried hard to persuade us into accepting the situation. All we would agree to was to wait awhile, a year or such matter, before undertaking to set ourselves free. But the longer we thought of the tie the less we liked being bound, although we kept on being the best possible friends. And then there came a time when we both found out things—things about ourselves and other people. We didn't want a divorce. Indeed, we couldn't well get it. Annulment was hardly practicable, so we were at our wits' end. And then a blessed lawyer dug out the chance of jactitation of marriage, and somehow he has carried it through, and we're consequently ready to dance at each other's wedding."

"Yes," Edith said, nodding and blushing, then holding out her hand to Mary-Cindy. "Mine is next week. You must be sure to come. Will you do it?"

"Certainly she will," Ellerton answered before Mary-Cindy could speak. "She'll come and be your matron of honor. You know I'm going to be Joe Bent's best man."

"I'm glad you have it all settled," Mary-Cindy said, running away, but with a blush that promised all the most eager lover could ask.

The Hungarian crown, the royal head-dress worn at their accession by all the Austrian emperors, is the identical one made for Stephen and used by him at the time of his coronation, more than 800 years ago. It is of pure gold and weighs nine marks and six ounces (about fourteen pounds avoirdupois). It is adorned with 53 sapphires, 50 rubies, 1 emerald and 338 pearls, but no diamonds, it being a notion of the royal Stephen that diamonds were unlucky.

"Hiss for shame,
Hiss for shame,
Everybody knows your name!"

This cry is not sung. It is intoned. And so the Gomeras intone their guttural language. It would be quite easy to whistle the "Hiss for shame" cry. So it is quite easy to whistle the Gomeras' singsong language.—Cincinnati Enquirer.

Better Late Than Never.

"Intelligence has just reached me!"—began Mr. Blodger as he sat down to the dinner table.

"Thank goodness if it has at last!" exclaimed Mrs. Blodger, and the food was partaken of in silence.

Plenty of Reason.

"I don't see why that tune haunts me constantly," complained a dull man who was always humming.

"Because you are forever murdering it!" came the quick reply from Foote.

It takes ten pounds of common sense to carry one pound of learning.—Persian Proverb

According to the Letter.

There are some literal minded persons who are never satisfied with the spirit of the law, but who consider it necessary to enter into compromises with the letter. Of such was an old citizen of Hopkinton, N. H., a good many years ago, and his juggling with his conscience is recorded by Mr. Lord in the records of the town.

The old man used to boast that he never went back on his exact word, but had no compunctions in going round it. Once he wished to buy a certain tract of land, and when the owner named the price he exclaimed:

"I won't give it! I tell you I will never give it!"

The owner did not yield nevertheless. A few days afterward the old man called again. He said nothing about the land, but stepped into the owner's barn and picked up a stall.

"What's that?" he asked.

"That? Oh, that's a stall."

"So you call that a stall, do you? Well, what would you take for it?"

If a Cow gave Butter

mankind would have to invent milk. Milk is Nature's emulsion—butter put in shape for digestion. Cod liver oil is extremely nourishing, but it has to be emulsified before we can digest it.

Scott's Emulsion

combines the best oil with the valuable hypophosphites so that it is easy to digest and does far more good than the oil alone could. That makes Scott's Emulsion the most strengthening, nourishing food-medicine in the world.

Send for free sample.

Over 600 acres.

The owner named a very small sum. "Now, I'll tell you what I'll do," continued the old man. "I'll give you the price you mentioned for your land and this fall. And you mustn't forget the fall. It must be included in the deal."

So the legal instrument was duly made out, signed and delivered, recording the purchase of a certain tract of land situated thus and so and bounded as follows, and also a certain fall."

Evolutionary Shopper.

Mrs. Compton looked at her patient but bewildered husband with an expression of good natured superiority. "Dear me, George," she said cheerfully. "I don't see the use of my trying to explain to you, but I'm perfectly willing to do it, of course."

"I did intend, as you say, to buy a kitchen table, and I came home with a hall mirror. But it was an absolutely natural change."

"First I looked at kitchen tables. Then the clerk called my attention to the kitchen cabinets, with drawers and everything. Then I said how much they looked like bureaus, except that they had no glass. Then he showed me one with a glass, and then he said he had such a pretty bureau if I cared to look at it."

"So I looked at that, and it was pretty, but the glass was rather small. So then he showed me a dressing case with a good sized mirror, and I said what nice glass it was. And then he said, 'If you want to see a fine piece of glass, let me show you one of our new hall mirrors.'"

"And of course, George, you can understand that when I saw that beautiful mirror I had to have it; and you know you don't like me to run up bills in new places, and I hadn't enough to buy a kitchen table, too, so—now isn't it clear?"—Youth's Companion.

Habit-forming Medicines.

Whatever may be the fact as to many of the so-called patent medicines containing injurious ingredients as broadly published in some journals of more or less influence, this publicity has certainly been of great benefit in arousing needed attention to this subject. It has, in a considerable measure, resulted in the most intelligent people avoiding such foods and medicines as may be fairly suspected of containing the injurious ingredients complained of. Recognizing this fact some time ago, Dr. Pierce, of Buffalo, N. Y., "took time by the forelock," as it were, and published broadcast all the ingredients of which his popular medicines are composed. Thus he has completely forestalled all harping critics and all opposition that might otherwise be urged against his medicines, because they are now of known composition. Furthermore, from the formula printed on every bottle wrapper, it will be seen that these medicines contain no alcohol or other habit-forming drugs. Neither do they contain any narcotics or injurious agents, their ingredients being purely vegetable, extracted from the roots of medicinal plants found growing in the depths of our American forests and of well recognized curative virtues.

Instead of alcohol, which even in small portions long continued, as in obstinate cases of diseases, becomes highly objectionable from its tendency to produce a craving for stimulants, Dr. Pierce employs chemically pure, triple-refined glycerine, which of itself is a valuable remedy in many cases of chronic diseases, being a superior demulcent, antiseptic, antiferment and supporting nutritive. It enhances the curative action of the Golden Seal root, Stone root, Black Cherrybark and Bloodroot, contained in "Golden Medical Discovery," in all bronchial, throat and lung affections attended with severe coughs. As will be seen from the writings of the eminent Drs. Grover Coe, of New York; Bartholow, of Jefferson Medical College, Phila.; Scudder, of Cincinnati; Ellingwood, of Chicago; Hale, of Chicago, and others, who stand as leaders in their several schools of practice, the foregoing agents are the very best ingredients that Dr. Pierce could have chosen to make up his famous "Discovery" for the cure of not only bronchial, throat and lung affections, but also of chronic catarrh in all its various forms wherever located.

HIS WIFE'S LUNGS BOTH AFFECTED

But the Great Consumptive Preventative brought Health and Happiness to his Home

"Our doctor said there was no cure for my wife as both her lungs were affected," says Mr. L. H. Walter, of Pearl Street, Brockville, Ont. "It was a sad disappointment to us both, just starting out in life, only married a short time. But before she had finished the first bottle of Psychine the pain in her lungs quickly went away, and after taking six bottles Mrs. Walter was a new creature and perfectly well again."

That is just one of the many families into which Psychine has brought hope, health and happiness. It is a living proof that Psychine cures Consumption. But don't wait for Consumption. Cure your LaGrippe, your Cough, your Bronchitis, your Catarrh, or your Pneumonia with the remedy that never fails—

THE LUNGS ARE LIFE.

An Odd Little Essay on the Subject of Breathing.

Everything on, in and under the earth breathes—animals, minerals, vegetables, etc. The tides are caused by the breathing of the earth itself. This old globe must take two long breaths a day, each inspiration requiring six hours and each expiration the same period of time. If Mother Earth did not breathe she would in all probability "bust" and blow up. When she breathes too hard, as if in a panic, or because of some geological excitement, she cracks the ground and we have the earthquake. Her ordinary respiratory movement merely expands and contracts the water volume.

Singularly enough, air is the most important element provided by nature. A man can live forty-five days without food, several days without water and about three or four minutes without air. Take away his lungs, as by pneumonia, and death is as certain as sin. Does the heart beat make the circulation of the blood or does the circulation make the heart beat? What causes breathing? Does breathing make the heart beat? Does breathing make the circulation? Important, vitally important, are these questions. You may remove a man's liver, kidneys, stomach, intestines; you may sever arteries and veins; you may even stab him through the heart or withdraw his brains, and he will still live, but take away his lungs and he is dead. The lungs are the life!

JUDICIAL NOTICE TO CREDITORS CONTRIBUTORIES, AND THE MEMBERS OF THE NEILSON-ROBINSON CHEMICAL COMPANY, LIMITED.

IN THE MATTER OF THE WINDING-UP ACT, BEING CHAPTER 120 OF THE REVISED STATUTES OF CANADA AND AMENDING ACTS, AND IN THE MATTER OF THE NEILSON-ROBINSON CHEMICAL COMPANY, LIMITED.

AND IN THE MATTER OF AN ACT RESPECTING ASSIGNMENTS AND PREFERENCES, BEING CHAPTER 147 OF THE REVISED STATUTES OF ONTARIO AND AMENDING ACTS AND OF C. M. WARNER, ASSIGNEE.

PURSUANT to the Winding-up Order in the matter of the above Company dated the Third day of April 1906, the undersigned will on the

WHAT OTHER PAPERS SAY.

Toronto Star

The Czar will open the Russian Parliament in person, and will order enough M. P.'s to be released from the jails to ensure a quorum.

A man who was once a policeman in Toronto is now practising medicine in Nebraska. The beauty of combining these two jobs is that the patient can be arrested if he refuses to take the medicine.

Marmora Herald.

The C. P. R. haven't built their new line built into Marmora yet, neither has the foundation for the new hotel been built. The town hall has not yet been repaired, though we are waiting for work to begin at once. A few people have not gone to the Northwest

Montreal Herald.

"If" the Hill roads keep on encroaching in the British Columbia boundary district, the C. P. R. will send out branches from the "Soo" line in Dakota and "if" the "Soo" line builds branches the Hill lines will build across the Manitoba and Saskatchewan boundaries; and "if" Hill does that the C. P. R. will build from Vancouver down into Washington territory; and "if" the C. P. R. does that Hill will parallel the C. P. R. from Fernie to Winnipeg, and so on. But "if" the rival railways do not do some of these things, why then of course, some others of them will not be done either, and a lot of the dreadful things predicted a week ago may not come to pass. We must only wait and see.

Rideau Record.

The country ratepayer continues to make the mistake that the voting of better salaries is solely in the interests of the teaching profession, when in reality it is infinitely more in the interests of the ratepayers themselves. The badly-paid teacher can leave the profession and enter another employment, as many of the ablest are constantly doing. But without good teachers the families of the ratepayers are being handicapped in their future career. For every dollar saved by a miserly vote for school purposes, hundreds will be lost in the future to the same "penny wise, pound foolish" ratepayer and his descendants or those of his neighbors.

"Hand-picked emigrants" is the apt designation used to describe the people coming to Canada under the auspices of the Salvation Army. They are carefully selected, well instructed, and well trained. If they do not yet know how to do the work that is before them in Canada they will soon learn.

THE MOTORIST'S JOYS.

A Tribute to the Beauty and the Delights of the Road.

To "see life steadily and see it whole" was Matthew Arnold's ethical aspiration. That is how the motorist sees the land he traverses. His teacher is the road. A road is the most interesting and instructive thing on earth. It is the chain that binds a country together; it is the artery along which the lifeblood of a people flows; it is the story of their past, the exhibition of their present, the presage of their future; it is the book of humanity, with a picture and a story and a lesson on every page. The history of Rome is in her roads. Once know and love the road and you can tolerate no other transit. Too fast? Read the

Neither Indian nor Ceylon tea alone produces the Red Rose flavor

To produce a tea with the "rich fruity flavor" of Red Rose Tea from either Ceylon or Indian alone is impossible.

Neither Indian nor Ceylon in itself possesses the Red Rose flavor, but combined in proper proportions they produce the "rich fruity flavor" that has made Red Rose Tea famous—that makes Red Rose Tea the only tea used in any home where it is once tried.

K&K K&K K&K K&K K&K K&K K&K SINFUL HABITS IN YOUTH MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a wretched, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk, 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent. "I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skilful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

CURES GUARANTEED OR NO PAY. Consultation Free—Books Free—Question Blank Free for Home Treatment.

Detroit, Mich.

A FRIEND'S ADVICE

SAVED SUFFERING AND BROUGHT BACK HEALTH
—DR. AGNEW'S GREAT HEART CURE AND CATARRHAL POWDER DEFY DISEASE AND NEVER FAIL IN THEIR MISSION OF HEALING

"I feel so thankful at the restored health of my daughter that if any use can be made of this I shall be pleased." This is what Mr. George Weels, of Elora, Ont., says in giving his testimony to the wonderful curative qualities of Dr. Agnew's Cure for the Heart. Mr. Weels' daughter was a great sufferer from heart disease and nervousness. She was unable to lie on her left side. She ran down in health and her recovery was a source of anxiety. Induced by friends, who had proved its worth, she obtained Dr. Agnew's Cure for the Heart and before one bottle had been taken was able to lie in any position she desired, and when two bottles had been taken, an absolute cure was pronounced. Yes, this great remedy is a cure for all ailments of the heart, stomach and nerves, and the instantaneous relief given by it has snatched thousands from death's jaws. Don't trifle a minute if you have the slightest evidence of heart disorders, such as palpitation, fluttering or uneasiness. This remedy will relieve such troubles immediately and will cure the stomach and nerves.

"When I know a thing is worthy of a recommendation I consider it my duty to tell of it." The Rev. James Murdock, of Harrisburg, Pa., says this after having been cured of a very malignant form of catarrh by Dr. Agnew's Catarrhal Powders. What he can say of its healing powers thousands of others have said and can say of it. Don't neglect "only a little cold" in the head. It may lead to chronic catarrh. Dr. Agnew's Catarrhal Powder relieves in 10 minutes and is easily applied. Keep it near you if you are a "cold in the head" subject.

DR. AGNEW'S OINTMENT cures all skin troubles.
DR. AGNEW'S PILLS—40 doses 10 cents.

to send by mail prepaid to C. M. Warner, Esq., or W. F. Hall, Esq., Liquidators, of the said Company, addressed to them at Napanee their christian and surnames, addresses and descriptions, the full particulars of their claims and the nature and amount of the securities (if any) held by them and the special value of such securities verified by oath and in default thereof they will be peremptorily excluded from the benefits of the said Act and Winding-up order.

The undersigned Master of the High Court of Justice at Napanee will on the 11th day of May, A. D. 1906 at ten o'clock in the forenoon at his Chambers in the Court House in the Town of Napanee adjudicate upon the claims of creditors submitted to him pursuant to this notice and let all parties then attend.

S. S. LAZIER,
Local Master.

W. G. WILSON,
Solicitor for Creditors, 18d
Napanee.
DATED this 9th day of April A. D. 1906.

IN THE HIGH COURT OF JUSTICE JUDICIAL SALE.

tion of their present, the presence of their future; it is the book of humanity, with a picture and a story and a lesson on every page. The history of Rome is in her roads. Once know and love the road and you can tolerate no other transit. Too fast? Read the wonderful poem W. E. Henley wrote after a friend's motor car had revealed England to him:

Speed and the range of God's skies,
Distances, changes, surprises;
Speed and the hug of God's winds,
Beautiful, whimsical, wonderful.

Read the whole of this "imperishable poem," as William Archer calls it (I had the privilege of giving it to the public, and never talk to me again of "going too fast to see anything." It is just because we go fast that we see everything.—Henry Norman, M. P., in Scribner's.

Humble Pie.

The term humble pie originally carried no opprobrium with it. It was a pie made out of the "humbles" or "mumbles," from the Norman French "mombriis"—i. e., the entrails of a deer. To this day it is highly esteemed in Scotland and in northern parts of England. So late as the time of Pepys "humble pie" was served as part of the menu of a gentleman's table on an extraordinary occasion. Some writers derive the contumelious use of the phrase "to eat humble pie" from an alleged custom of serving humble pie below the salt, or at the second table. But this is not supported by authority. It more probably came into use simply through the similarity of sound, there being no similarity of meaning whatever between the noun umbles or numbles and the adjective humble.

A Ruskin Remedy.

A letter written by the late John Ruskin to Sir Oliver Lodge says: "Is it still impossible to get into any human head at your universities that the economic crisis is because people will dig iron out of the ground and build iron-clads, instead of raising corn and wine and giving them to whoso needs them? That is the one plain two plus two equals four that I have tried to teach these twenty years—the thing of all others indisputable and needful, and no mortal yet has taken up the word!"

Brief Mention.

Reporter—Now that I have described your dress and those of your maids, the house decorations and the presents, what shall I say of the bridegroom when we print the account of the wedding?

Bride Elect—Well, I suppose his name must go in. You might say that he was among those present.

They Go Toward It.

"There are some men," said the chronic kicker, "whom good fortune seems to follow always."

"I think you're wrong," replied the happy hustler. "You will find good fortune meets them; it doesn't follow them."

Force of Habit.

One time a jail reporter was sent to report a wedding. He began his report by saying:

"The condemned man ate a hearty breakfast of ham and eggs."

Favorite Musical Instruments.

The burglar's, the lute; the scold's, the harp; the aurist's, the drum; the card fiend's, the trumpet; the apothecary's, the viol; the mathematician's, the triangle.

"Acre" once meant any field. It is still used with this significance by the Germans, who speak of God's acre, alluding to the cemetery.

say of its healing powers thousands of others have said and can say of it. Don't neglect "only a little cold" in the head. It may lead to chronic catarrh. Dr. Agnew's Catarrhal Powder relieves in 10 minutes and is easily applied. Keep it near you if you are a "cold in the head" subject.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

1906 TO 1914—FOR \$40

FROST FENCE
is the cheapest you
can buy

The first cost may be more—but the first cost is the only cost. Suppose one fence costs \$40, and lasts, say, for 10 years. That means you get 10 years. Suppose the same length of Frost Fence costs \$20. But the Frost Fence—made of High Carbon Steel Wire and laced with the Frost Lock—is for 20 years at a cost of only \$2 a year.

Isn't the Frost the cheapest you can buy? Frost Fences are for sale by

R. Paul and family have moved in their new home in the village.

JUDGE OF THE SUPREME COURT

Was Alarmingly Afflicted With La Grippe. Cured by Pe-ru-na.

The Grip is Properly Termed
Epidemic Catarrh.

As Pe-ru-na Cures Every Form
of Catarrh, It Has Relieved
More Cases of Grip Than
All Other Remedies
Combined.

HON. W. H. PARSONS,
925 H. St., N. W.,
WASHINGTON, D. C.

The Fear of Grip Makes People Nervous.

There is no remedy in the world that meets the conditions produced by the grip better than Peruna.

Peruna strengthens as it renovates, soothes while it stimulates, heals as it expurgates.

Peruna is not a purgative, or cathartic or sedative, or stimulant, nor a vegetable or mineral poison.

It reaches the source of all diseases of the mucous membranes by its action on the vaso-motor system of nerves.

After-Effects of the Grip.

Every person who has had la grippe during the last year should take a course of Peruna. No one need expect perfect recovery unless they do so.

The grip has produced catarrhal inflammation of the whole mucous membrane, and good health is impossible until these are restored to a normal condition. This Peruna will do.

A great many remedies have been suggested for this condition from time to time, but Peruna is the only remedy that has any substantial value in these cases.

It has never failed to give satisfaction

W. H. Parsons is Ex-State Senator and Ex-Special Judge of the Supreme Court of Texas, and was also Brigadier-General in Confederate Army. In a recent letter from 925 H street, N. W., Washington, D. C., this prominent gentleman says:

"Upon the recommendation of personal friends and many strong testimonials as to the efficacy of Peruna in the treatment of the numerous symptoms of the grippe with which I have been afflicted for four months past, I have been induced to undergo a treatment with this justly celebrated formula. I feel a decided change for the better after using it only one week.

"It is especially good in toning up the stomach and has had a decided effect upon my appetite. I therefore feel much encouraged that I am on the road to complete restoration.

"My numerous friends in Texas, where I have had the honor to command a brigade of her Veteran Cavalry in a four years' war, may accept this voluntary testimonial to the merits of Peruna as a sense of obligation on my part for its wonderful efficacy."—W. H. Parsons.

during forty years' experience and still occupies the unique position of being the leading (if not the only) specific remedy for the after-effects of la grippe.

No Time Like the Present.

If you are suffering from the after-effects of la grippe—if you have become discouraged in your attempts to cure yourself with other treatments, take a bottle of Peruna now.

A bottle of Peruna taken during the beginning of the disease is worth more

than a dozen bottles after the trouble has become deep-seated.

Miss Eugenie Lafortune of 119 Berrie street, Montreal, Can., writes:

"Peruna cured me of a severe case of la grippe when nothing else had any effect on me. Five bottles did the work and they were worth hundreds of dollars for the comfort and health restored to me. I therefore feel that the least I can do is to gratefully acknowledge its merits."—Eugenie Lafortune.

A reward of \$10,000 has been deposited in the Market Exchange Bank, Columbus, Ohio, as a guarantee that the above testimonial is genuine; that we hold in our possession authentic letters certifying to the same. Every one of our testimonials are genuine and in the words of the one whose name is appended.

noon and is counted from the first to the twenty-fourth hour. A "civil day" commences at midnight and is counted from the first to the twelfth hour, and then again commences with one and finishes with twelve. A "nautical day" is reckoned the same as the "civil day," only that the reckoning is begun at noon instead of at midnight.

A "calendar month" varies from twenty-eight to thirty-one days. A "mean lunar month" is twenty-nine days, twelve hours, forty-four minutes, two and two-thirds seconds. A "year"

hour.

So, adding your three miles of leg travel to the hour's axial movement of the earth, this to the earth's orbital journey and that again to the earth's excursion with the sun, and you find you have traveled in the hour 85,253 miles.

CRUDE HOUSEKEEPING.

Domestic Methods in England in the Fourteenth Century.

that it is not only an antidote to poison, but that it has the power to free the mind from vain fears and to give bravery. Warned by the epiphany of the high priest I determined innocence or guilt and was used to detect accused persons. This gem is dedicated to April, and, worn by those born in that month, is lucky.

There is Plenty of Coal.

Every now and then some statistician with too much liver utters figures showing that the world's coal supply will last only a few hundred years.

J. Quigley has bought Mrs. Dafee's house and lot, and intends moving soon. The cheese factory opened here April 2nd, with a good supply of milk. R. Paul and family have moved in their new home in the village. Miss A. Wood is spending a few days with friends at Bath. A quiet wedding took place at the house of L. Peters, when his daughter Nellie, was united in marriage to A. Friske. Congratulations. Mrs. G. Valdeau has returned home after spending a few weeks with her daughter, Mrs. Gibbon, Morven. Visitors: T. L. Winters and wife at J. McGinness'; D. Paul at home; Miss Leslie at S. Anderson; Mrs. Amey at F. L. Ames's; J. Gonn at home; M. Schenhiorn and wife at J. Gollinger's.

Canadian and American Coal Oil.
MADOLE & WILSON.

HEDGEHOGS.

Venom of the Most Poisonous Snakes Does Not Affect Them.

An interesting fact about hedgehogs that perhaps not many persons know is that the bites of even the most poisonous serpents have no effect on them whatever. Mr. Lenz, a naturalist, once watched a fight between a hedgehog and a viper and gives a most interesting description of it. He says that when the hedgehog came near the snake she began to smell it, for the sight of these animals is so poor that they depend almost entirely on the sense of smell, and then she seized its head with her teeth.

In a moment the snake had freed itself and, darting at the hedgehog, bit it several times, but the little animal did not seem to mind the bites at all, and when the snake was tired out with its efforts she again seized its head, which she ground beneath her teeth, poisonous fangs and all. Then she devoured almost the whole of its body.

Mr. Lenz also tells of a pet hedgehog that he kept in his house in a large box. Several times he put someadders into the box, which the hedgehog did not seem to fear at all, but attacked them fiercely and, as in the case of the other, was never in the least affected by their poisonous bites.

A man who had a pet hedgehog in his possession for a long time says that he had often seen it throw itself off the top of a wall fourteen feet in height. Without pausing a moment it would contract itself into a soft, fluffy ball and fall to the ground so lightly that almost immediately it would unfold itself and run off.

DIVISIONS OF TIME.

Measurements of the Days, Months and Years.

A "solar day" is measured by the rotation of the earth upon its axis and is of different lengths, owing to the ellipticity of the earth's orbit and other causes, but a "mean solar day" is twenty-four hours long, as reckoned by the timepieces.

An astronomical day commences at

A "calendar month" varies from twenty-eight to thirty-one days. A "mean lunar month" is twenty-nine days, twelve hours, forty-four minutes, two and two-thirds seconds. A "year" is divided into 365 days. A "solar year," which is the time occupied by the sun in passing from one normal equinox to the other, consists of 364-2424 days, which is equal to 365 days, 5 hours, 48 minutes, 49.536 seconds. A "Julian year" is 365 days even. A "Gregorian year" is 365.2425 days. The error in the Gregorian mode of time reckoning amounts to but one day in each 3,571 years.

A Good Eater.

When Gustavus of Sweden was besieging Prague, a boor of extraordinary aspect gained admittance to his tent and offered, by way of amusing his majesty, to devour a large hog in his presence. Old General Konigs-marek, who was in attendance, at once suggested that the man with the Gargantuan appetite should be burned as a witch, whereupon the boor, whose feelings were hurt by this observation, exclaimed, "If your majesty will but make that old gentleman take off his sword and spurs, I will eat him before I begin the pig." This was accompanied by such a "hideous expansion of the jaws and mouth" that the general, though he had given his "proofs" on many a field, turned pale and fled incontinently to his tent.

Two Handles.

Everything has two handles—the one soft and manageable, the other such as will not endure to be touched. If, then, your brother do you an injury, do not take it by the hot hard handle, by representing to yourself all the aggravating circumstances of the fact, but look rather on the soft side and extenuate it as much as is possible by considering the nearness of the relation and the long friendship and familiarity between you—obligations to kindness which a single provocation ought not to dissolve. And thus you will take the accident by its manageable handle.—Epictetus.

AN HOUR'S WALK.

You Would Hardly Think It Meant Traveling 85,253 Miles.

Have you ever thought of the distance you travel when you are out on an hour's stroll? Possibly you walk three miles within the hour, but that does not by any means represent the distance you travel. The earth turns on its axis every twenty-four hours. For the sake of round figures, we will call the earth's circumference 21,000 miles, and so you must have traveled during the hour's stroll 1,000 miles in the axial turn of the earth.

But this is not all. The earth makes a journey around the sun every year, and a long but rapid trip it is. The distance of our planet from the sun we will put at 92,000,000 miles. This is the radius of the earth's orbit—half the diameter of the circle, as we call it. The whole diameter is therefore 184,000,000 miles, and the circumference, being the diameter multiplied by 3.1416, is about 578,000,000.

This amazing distance the earth travels in its yearly journey, and dividing it by 365 we find the daily speed about 1,586,000. Then we get the distance you rode around the sun during your hour's walk, divide again by twenty-four, and the result is about 66,000 miles. But this is not the end of your hour's trip. The sun, with its entire brood of planets, is moving in space at the rate of 160,000,000 miles in a year. That is at the rate of a little more than 438,000 miles a day, or 18,250 miles an

CRUDE HOUSEKEEPING.

Domestic Methods in England in the Fourteenth Century.

Carpets were unknown luxuries in England in the fourteenth century, but the fashion of strewing the apartments with rushes was being gradually abandoned. Rushes were still used in the retainers' hall, but for the better rooms sweet scented herbs and fragrant twigs were usually employed.

Windows were apertures filled with glass so as to admit light, but to exclude wind. The walls also were frequently hung with cloth or tapestry to protect the inmates of the room from the many currents of air that penetrated the strong but badly built walls. We learn from various ancient documents that it was the duty of the serving men and pages to sweep out the principal apartments, but as the use of water is rarely mentioned damp and fragrant leaves and twigs must have aided not only in collecting the dust, but also toward refreshing the atmosphere in such constantly closed rooms, fresh air being only admitted through the doors opening on to the battlements or balconies.

From old inventories at Thurlleigh and elsewhere we ascertain how scantily furnished were these ancient mansions, although they seem to have been abundantly supplied with flagons and drinking cups in gold, silver and finely engraved pewter, besides an infinite number of black jacks or cups made of leather.—London Standard.

Gems and Disease.

Many curious stories of the healing of blindness and diseases by gems are to be found in ancient works, and it is said that the Emperor Theodosius was cured of blindness by a stone of great brilliancy which was laid on his eyes. What this stone was history unfortunately does not say. The diamond, ruby, emerald and opal were supposed to warn the owner of danger by changing color. Pliny says of the diamond

There Is Plenty of Coal.

Every now and then some statistician with too much liver utters figures showing that the world's coal supply will last only a few hundreds of years. Make it many, many thousands. China has coal to burn—400,000 square miles of coal fields, some say. Japan has plenty more. Roumania has enough for the Balkan states if ever they stop burning powder and one another's houses. America's bin will be full for centuries on centuries. Great Britain and Germany will not be coalless soon. Let us worry about something else.

Tennyson's Prediction.

Tennyson predicted the day of his death. Just a year before his death friends of the poet were visiting Aldworth House. The late Lord Selborne turned to Tennyson and remarked, "You ought to be happy here." "Ah," sighed the poet, "I have only a year to live!" His hearers laughed at the remark, but it was a prophetic assertion that was verified to the minute.

A Girl's Way.

Have you noticed that when a girl has short skirts she is always teasing to have them lower, and the very day she gets them lowered she starts to hold them up?

Its Finish.

The Governess — What happened when the man killed the goose that laid the golden egg, Margie? Little Margie — Why, I guess his goose was cooked.

A man of integrity will never listen to any plea against conscience.—Tome, Fancy Dishes Given Away.

DIED AT WIFE'S FEET.

An Enoch Arden Tragedy Enacted in
Paris, France.

An Enoch Arden tragedy came to light in Paris the other day when Jacques Brisset returned after three years' absence, and on learning from his wife that she had remarried, fell dead at her feet.

Brisset ran away to Belgium with a music hall singer three years ago. He took with him \$500 of his employer's money, and left his penniless wife the burden of supporting two children.

About a year ago she was informed that her husband had been found dead, with his throat cut, on the Belgian frontier near Lille, and her husband's passport and other papers were handed to her.

Soon afterwards M. Courty, a neighbor, asked her to be his wife, and they were married and lived happily together.

While M. Courty was away from home the other day there was a knock at the door. Mme. Courty went to see who was there, and found a pale, thin man, with hair almost white.

Before she could ask what he wanted he fell down on his knees and asked her pardon. In bewilderment the woman asked what there was for pardon, and he then told her that he was Brisset, her husband.

He said that his life with the music hall singer had been most unhappy, and that soon after leaving home he had fallen into the hands of thieves, who robbed him of his last penny. For the last two days he had eaten nothing. Mme. Courty gave him food, and while he was eating related the history of the past two years. When she came to the account of her marriage Brisset gave a convulsive start, and fell dead at her feet.

Mme. Courty, who had unwittingly committed bigamy, will go through the marriage service a second time with M. Courty after they have both attended Brisset's funeral.

A SPRING TONIC.

Weak, Tired and Depressed People Need
a Tonic at This Season to Put the
Blood Right.

Spring blood is bad blood. Indoor life during the winter months is responsible for weak, watery, impure blood. You need a tonic to build up the blood in the spring just as much as a tree needs new sap to give it vitality for the summer. In the spring the bad blood shows itself in many ways. In some it breeds pimples and eruptions. In others it may be through occasional headaches, a variable appetite, perhaps twinges of neuralgia, or rheumatism, or a lazy feeling in the morning and a desire to avoid exertion. For these spring ailments it is a tonic you need, and the greatest blood-making, health-giving tonic in all the world is Dr. Williams' Pink Pills. Every dose helps to make new, rich, red, health-giving blood, which reaches every nerve and every organ in the body, bringing health, strength and energy to weak, despondent, ailing men and women.

HOW GOLD CROSSES THE OCEAN.

Care Which is Taken to Safeguard the
Treasure.

The captain of one of the big trans-Atlantic liners which carries in its strong room millions of gold a year, while recently discussing the subject with a reporter, said:

"After the gold, worth perhaps half a million or a million, and which is packed in solid wood boxes, strengthened with enormous bands of iron, has been placed in the bullion room, access to which is only obtained through the flooring of the saloon, I sign the receipt, and then become responsible for its safety.

"From this moment until I arrive at Liverpool the key never leaves my person, it hanging suspended from my neck inside my clothes by a piece of ribbon.

"Do I think it impossible for a thief to obtain access to the strong room? Fifty desperadoes, shipping as passengers, might, as you say, wait till we were out in the open, and then, after murdering us all, help themselves to some of the gold—not all, it would be too heavy—and then take to the boats. Yes, fifty determined men might do this. But how are fifty criminals to assemble in New York without the police becoming aware of their presence. Why, I should spot them before we started. Responsibilities for such treasures as I carry sharpen the wits. No, the money is safe enough on the ocean.

"I simply from habit keep my eyes open during the voyage till we reach the docks—not that my responsibility ceases even then. Should the ship arrive on a Saturday or on some holiday the vessel is considered at sea, and not only is all leave sternly refused, but the most extraordinary precautions are taken to prevent a surprise attack from shore.

"As soon as the officials from London—consisting generally of a few detectives, clerks of the steamship company—arrive, the bullion room is opened, the boxes are removed in a strong net—each box being checked as it appears—placed on a trolley, and well guarded, hurried without a moment's delay to the bullion truck. When this is done and the word 'All right!' is pronounced I leave a big sigh of relief, for my responsibility then ceases.

"The bullion truck, as you perhaps know, is a large-shaped box, lined with solid plates of iron, about four feet long by three feet high, and secured with several locks of the latest design.

"When the gold is to be carried by rail the bullion truck is always sandwiched in between the engine and the conductor's car, so that when the conductor has not got his eye on it the engineer or fireman has."

SAFETY FOR CHILDREN.

Baby's Own Tablets is the only medicine that gives the mother the guarantee of a government analyst that it contains no poisonous opiate and is absolutely safe. This is worth much to every mother who cares for the future welfare of her child. The Tablets are good for the tenderest baby or for

THE HEIR OF SANTLEIGH

OR
THE STEWARD'S SON

CHAPTER XL.—(Continued).

Guildford Berton staggered slightly, then with his eyes still fixed on Cyril and Norah, who were leaning over the terrace in vain trying to shake the hands eagerly thrust up to them, he backed away, slowly for a time; then, as he got into the densest part of the crowd, he turned and forced his way through the people with a desperate haste, even striking at them in a frenzied, furious fashion. Some shrank back, others struck at him in return and swore at him, but with his head bent down he made a lane for himself, and reached the edge of the crowd.

With the uncertain staggering steps of a drunken man he went down the lane and entered the cottage. He had left no light in the room; the fire had died out; all was dark. Before he struck a match he felt his way to the sideboard, found a brandy decanter, and, with trembling hands, poured out a glassful and drank it. Then, with a cry, as if the spirits had given him power to realize the truth, he flung his hands above his head and cursed Cyril, and even Norah herself. As he was raving, in the very midst of the awful stream of profanity, he stopped short suddenly and listened.

What he heard was only the distant sound of the crowd, but to his ears it took to itself the likeness of a wail, a cry from a woman, and, with a shudder, he cowered against the sideboard, and looked over his shoulder with an expression of sickening fear and dread on his white face, for once again he seemed to see that vague, indefinable shade which bore the faint outlines of the murdered woman, and which had haunted him now and again whenever he was over-tired or excited. For a moment—that might have been a year—he stood cowering, bent almost double; then the expression of his face changed to one of sinister cunning, and, still looking behind him and moving his lips, though no words came, he stole on tip-toe toward the cupboard.

Three hours later Cyril and Jack stood together in the drawing-room. Lady and Norah had gone upstairs, presumably to bed, but really to sit and talk of the wonderful events of the day, and Lord Ferndale, declaring that he must have a quiet cigar after all the excitement, had taken Mr. Petherick to the smoking-room.

The two friends stood looking at each other for a moment, then Cyril held out his hand.

"I wish I could tell you how I feel tonight, Jack," he said; "how happy I am, how grateful to you all, to you and the Ferndales, and all these good people, with their simple, warm-hearted welcome. Please God, I will be worthy of their love, and keep it! But my darling won't find it difficult to do that, will she? Jack, I ask myself as I stand here thinking of the great good luck which has fallen to me, why I, of all men, should have been so fortunate and so blessed, and—and, Jack, it almost frightens me! I can only say, from the bottom of my heart, that I am grateful—very, very grateful!—and, thank God, can add that I am at peace with all men."

"Even Guildford Berton?" said Jack, quietly.

Cyril started, and a look of pain crossed his face.

"Jack, I had forgotten him," he said, simply.

"That's only natural," rejoined Jack.

then, after a moment's thought, Jack led the way to the garden, followed by the trembling old woman uttering inarticulate cries of terror.

Jack stepped before the heap of leaves and stooped down.

"Get me a snade, some one!" he said, hoarsely.

Lord Ferndale brought one, and they stood round while Jack worked.

A suspense of a few minutes that seemed ages, and then they heard his voice, solemn as a knell:

"I have found the answer; it is here!"

Two years later the artistic world was thrown into a state of excitement by a certain picture in the Academy exhibition of that season.

It was a landscape—a small one, but with two figures, a lady and a child. The lady was seated under an apple tree in a most delightful orchard, and the child was lying on its back, vainly endeavoring to bite an apple at least three times the size of its mouth.

It was so fresh in treatment, so delicately painted, that the connoisseurs were unanimous in their approbations and praise, but the general public, who know little and care less for compositions, were quite content with being charmed by the exquisite beauty of the mother and the delightfully lifelike youngster. It was the picture of the year, and it was found necessary to place before it the protecting rail and policeman which only appear before the great event of the exhibition. Critics praised it, the papers rhapsodized it, the public crowded to see it, and for some days after that on which the exhibition opened everybody was asking who and what the painter was, for the name in the catalogue was evidently an assumed one, and told nothing.

The mystery only heightened the public and artistic curiosity and interest, and at dinner parties and in the pauses of the dance one heard people saying to each other:

"Have you seen the mother and child in the apple orchard? Splendid, isn't it? Wonder who on earth the man is?"

The secret was very well kept for nearly a month. At the end of that time, however, the veil was lifted, for a famous critic, who was sharper than his fellows, happened to visit the gallery one afternoon, and found the popular Countess of Arrowdale standing before it.

As he looked first at the picture and then at her she happened to smile. Now, the mother was not a portrait of Norah, but Cyril had perhaps unconsciously bestowed upon the painted face a reflection, a hint of the smile which was one of the charms with which Norah worked her spells, and the critic divined the truth.

"Lady Arrowdale," he said, growing red with the excitement of his discovery, "your husband painted that picture."

"Oh, please don't tell. It was to be a secret, and—and we have kept it so well!"

"Yes, you have," returned the critic, who, of course, meant to rush off as soon as he could and proclaim his important find. "Yes, indeed, you have. I know Lord Arrowdale's pictures pretty well, I think, but, though they are good, as I've said very often, they are nothing compared with this. It is such a sudden jump. How do you account for it, Lady Arrowdale?"

Norah smiled, and looked at the picture in silence, but some one spoke for

and the greatest blood-making, health-giving tonic in all the world is Dr. Williams' Pink Pills. Every dose helps to make new, rich, red, health-giving blood, which reaches every nerve and every organ in the body, bringing health, strength and energy to weak, despondent, ailing men and women. Here is proof. Mrs. Chas. Blackburn, Aylesford Station, N. S., says: "For the past ten years Dr. Williams' Pink Pills is the only medicine I have taken when I found I needed a medicine. Last spring I was feeling poorly, was weak, easily tired and depressed. I got three boxes and they made me feel like a new person. These pills are the best medicine I know of when the blood is out of order."

Thousands of people not actually sick need a tonic in the spring, and to all these a box or two of Dr. Williams' Pink Pills will bring new energy and new strength. To those who may be more seriously ill, who are suffering from one of the ailments that tend to shut out from treatment with these pills will bring new health and vitality. You can get these pills from any reliable dealer or by mail from the Dr. Williams' Medicine Co., Lowell, Ont., at 25 cents a box or six boxes for \$2.50.

HER BUSINESS.

"You can hardly help noticing what hand-some rings Miss Flint wears, can you?"

"Ah! she has such an engaging way of wearing them."

It is Known Everywhere. — There is not a city, town or hamlet in Canada where Dr. Thomas' Electric Oil is not known—wherever introduced it made a foothold for itself and maintained it. Some merchants may suggest some other remedy as equally beneficial. Such recommendations should be received with doubt. There is only one Electric Oil, and that is Dr. Thomas' Take nothing else.

Her. "Perhaps you don't like my style of dancing." She an evident distress: "There is rather too much sameness about it." Her. "How may I vary it?" She. "Suppose you tread on my left foot once in a while."

RHEUMATISM AND PARALYSIS.

Their complete home cure. Post free to readers of this paper. For limited period only.

A handsome illustrated treatise, giving full description of Rheumatism and Paralysis, with instructions for a complete home cure, describing the most successful treatment in the world, recommended by the Ministry and endorsed by medical men. This highly instructive book was written by W. H. Veno, a gentleman who has made a study of these diseases. The preface is by a graduate of the University of Wurtzburg. Send postal to-day and you will receive the book free by return. Address, The Veno Drug Co., 24 King St., West, Toronto.

WISE.

Johnny—"Come in, Sister's expectin' you."

Mr. Stople—"How do you know she is?"

Johnny—"She's been sleepin' all the afternoon."

They are the only medicine that gives the mother the guarantee of a government analyst that it contains no poisonous opiate and is absolutely safe. This is worth much to every mother who cares for the future welfare of her child. The Tablets are good for the tenderest baby or for the well grown boy or girl, and cure the minor troubles that are inseparable from childhood. Mrs. W. J. Macintosh, Cham Harbor, N. S., says: "I have used Paly's Own Tablets for constipation, vomiting and colic and have found them a splendid medicine. I give the Tablets all the credit for the splendid health my little one now enjoys." The wise mother will always keep a box of these Tablets on hand. They can be got from any druggist or by mail from The Dr. Williams' Medicine Co., Brockville, Ont., at 25 cents a box.

ANYTHING WILL DO.

"When a man axes you for advice," said Uncle Eben, "it generally don't mean 'nuffin' except dat he's kind o' lonesome an' wants to be talked to."

Do not let a cold settle on your lungs. Resort to Bickel's Anti-Consumptive Syrup at the first intimation of irritation in the throat and prevent disease from lodging in the pulmonary organs. Neglected colds are the cause of untold suffering throughout the country, all of which could have been prevented by the application of this simple but powerful medicine. The price, 25 cents, rings it within the reach of all.

COMFORTING.

We feel that the bad things other people know about us are more than counterbalanced by the good things we know about ourselves.

The Pastor's Pity.—A prominent pastor of a Durham, Ont., church, writes: "I suffered intensely from Inflammatory Rheumatism. Just one bottle of South American Rheumatic Cure healed me. I pity those who suffer so much and do not know how near they are to a cure. I feel like proclaiming it from the house-tops."—128

WITH THE COW-PUNCHERS.

How the Urinary Broncho is Put Into Harness.

On all sides of the little town lay the glorious sweep of untamed country. To find another railroad to the northward was to ride a hundred and fifty miles to the Canadian Pacific to find a railroad to the southward meant as long a ride to the Northern Pacific. On the edge of the town a freighters' outfit was making ready to pull out four days to a camp near the Little Rockies. Ten horses led the string of laden wagons, behind which trailed the covered chuck-wagon, equipped for sleeping and cooking, for there were no hotels on this route.

The boss and his two helpers were wrestling with a broncho which, until this ill-fated day, had never felt a harness across his back. He was needed as an off-wheeler, and he had to go. He fought like a hero possessed of seven devils, and the three men failed for an hour to get him into the traces and to keep clear from his infernally active heels.

At length his nine comrades jumped into their collars, and the rebel simply had to go with them. He lay down and was dragged on his ear until his addled wits perceived there was nothing in this sort of mutiny. He rose and shid stiff-legged until, outnumbered, outvoted and outgeneraled, he surged into the collar like a thunderbolt and thereafter tried to pull the whole load, in the vain hope of tearing something out by the roots.

The long string of horses and wagons wound out into the open country, and in a little while dipped across a grassy undulation and was gone.—Outing Magazine.

There are many things in life we should be pleased to see changed, espe-

cially when the change would be for the better. "Even Guildford Berton?" said Jack, quietly. Cyril started, and a look of pain crossed his face. "Jack, I had forgotten him," he said, simply. "That's only natural," rejoined Jack. "But I haven't, and as I have interfered so much in your affairs, you'd better let me finish up by disposing of that ingenious gentleman," and he began buttoning up his coat.

"What are you going to do?" asked Cyril, gravely. "I'm going to call upon Mr. Berton." "To-night!" "To-night, for I've a shrewd suspicion that if I wait until the morning I shall not find him at home."

"But—but why not let him alone? Why not let him go? Ah, I see! I'd almost forgotten."

"Yes," said Jack, quietly and grimly. "I only want to ask Mr. Berton one question, and I intend to have the answer. That question is, 'Where is Berta South?' If that answer is satisfactory I should say you had better let Mr. Guildford Berton depart in peace."

"In Heaven's name, yes!" responded Cyril. "I don't know that Heaven will have much to do with it," rejoined Jack, going into the hall and asking for his coat and hat.

"Bring mine, too," said Cyril, quietly to the footman. "You mean to go with me?" asked Jack.

"Can you ask me, my dear fellow?" "Then Ferndale and Petherick shall go also," said Jack, and he went into the smoking-room and informed them of his purpose.

Almost without a word the four men went out. Jack only made one remark as he looked up at the sky.

"If it were not for the bonfire we should want a lantern."

Still in silence, or speaking just above a whisper, they went down the lane, and stood before the gate in the wall.

"Locked," said Jack, and he looked at Cyril.

Cyril put his strong shoulder to the door, and with a creak it fell back. Jack nodded approvingly.

"All dark," he said, in a whisper. "He has gone to bed or—down. No, the door's open. Wait," he added, on the threshold; "let me go first; I'll call if I want you."

They signed assent, and, still lit by the glow of the bonfire, he pushed open the door of the parlor. Almost in an instant he was back with them, saying nothing, but with an expression on his face which caused them to start forward.

"Wait—a light," he said, in a voice that trembled slightly.

Lord Ferndale struck a light, and they entered the room.

A strange, pungent smell came out to meet them, and almost stifled them. Cyril, with a foreboding of something evil, remembered it. Jack lit a candle and held it up, and as its rays fell upon Guildford Berton's figure, lying half in the chair and half on the floor, Cyril uttered a cry.

They raised him, and Jack tore open his collar, and laid a hand upon his heart. Then he looked around at the rest, and spoke the one dread word: "Dead!"

For a moment or two they stood speechless and awestruck; then, with compressed lips, Jack opened the dead man's coat, and took from the pocket some letters.

Cyril bent forward. "They are mine," he said, almost inaudibly.

Jack handed them to him, and as he took them something fell on the floor. Jack picked it up, and Cyril with a shudder, exclaimed:

"My ring! the ring I gave Berta! And—my God, Jack!—and here is the letter I wrote that night at the fete and gave to her!" and he covered his face with his hands.

Jack rose. "I shall get my answer after all," he said. "Light that lantern, Ferndale."

In awestruck silence, but with a feverish eagerness and dread, they searched the grim place from room to room;

important inn. "Yes, indeed, you have. I know Lord Arrowdale's pictures pretty well, I think, but, though they are good, as I've said very often, they are nothing compared with this. It is such a sudden jump. How do you account for it, Lady Arrowdale?"

Norah smiled, and looked at the picture in silence, but some one spoke for her.

"Permit me, Lady Arrowdale," said Jack, who had stepped up and heard the little speech. "This picture is so far and away the best of my friend, Lord Arrowdale, because he mixed his colors with the oil of happiness, drew the orchard by the light of love, and gave his whole heart to the mother and the child. And now you know not only how Arrowdale came to paint such a picture, but why he calls it 'Joy.' Am I not right, Lady Arrowdale?"

And Norah, as she put her hand on his arm, could only assent by a smile, which the critic afterwards declared made him feel as if the tears were in his eyes as well as in hers.

The End.

SENTENCE SERMONS.

Struggle is the school of strength. Faith is food as well as medicine. He who fears to leave tradition cannot find truth.

The wealth of true love will cure the love of wealth.

A hard head is apt to be dull without the bright eyes of love.

Personal righteousness will be the source of any permanent reform.

The life that is written in blue ink does not turn to a permanent color.

The keys of life are not given to those who cannot keep the door of the lips.

Reverence reveals the heart of every truth; superstition sees but the surface.

It takes more than the Sunday dress parade to make the Christian warrior.

When you have honey from the rock you will not want glucose from flatterers.

The people are losing much of life where the prophets are afraid of losing life.

When a man is drifting with the stream he is likely to think that the stream has ceased to flow.

There's a lot of people so perfectly good they cannot give the rest of us a chance even to be pretty good.

Some people think that first-class piety is simply a feeling of pity for the third class passengers on the glory train.

You get near the real valuation of a man when you see him put a penny in the offering while he sings, "Take my life."

One of the great deficiencies of modern worship is that it presents only one opportunity to walk up the aisle with the new dry goods.

The man who wants to make a million in order to build a hospital often satisfies himself with donating his old clothes when he has made his pile.

POISONED BY WOOD.

Mysterious Disease by Which Shuttle-makers Have Been Killed.

Workmen engaged in the manufacture of shuttles in Lancashire from a wood known as West African boxwood have been afflicted with a mysterious disease, which in several cases has culminated in what is known as "the yellow death."

So many cases of illness occurred that the matter was brought to the notice of Dr. T. M. Legge, chief medical inspector to the Factory Department of the Home Office.

Suspicion eventually fastened upon the wood, and Prof. Harvey Gibson undertook the examination of its botanical characters.

These experiments prove that the wood contains an alkaloid which acts as a cardiac poison, inducing a gradual slowing of the heartbeat and diminution of vigor in the contractile tissue of the heart.

It is suggested that the fine particles of wood falling on the perspiring skin, more especially of the hands, yield the alkaloid in varying quantity, which so becomes absorbed into the circulation.

RAINY RIVER MAN HAD TROUBLES

**TILL DODD'S KIDNEY PILLS CURED
HIS KIDNEYS.**

**Then His Rheumatism and Other
Pains Vanished Once and For All —
His Case Only One of Many.**

Barwick, Ont., Apr. 9 — (Special). — That Dodd's Kidney Pills will cure Rheumatism, or any other disease resulting from disordered Kidneys is the experience of many of the settlers in this Rainy River country. The case of William John Dixon, of this place, is a fair sample of the work the great Canadian Kidney Remedy is doing.

"I had Rheumatism so bad I had to use a stick to walk. I had pains in my back and right hip, and I had no comfort in sleeping.

"I could no more than dress or undress myself for nearly two months, and I was for nearly three weeks I could not lace my right shoe.

"My brother advised me to try Dodd's Kidney Pills, and I did so. After taking three boxes I could walk around and lace up my shoes and do my work. Six boxes cured me completely."

Dodd's Kidney Pills are the one sure cure for sick Kidneys. Sick Kidneys are the cause of nine-tenths of the ills the human family suffers from.

FOR SAFER SUBMARINES

**RISK OF LOSING LIVES WILL BE
GREATLY REDUCED.**

**Improvements That Will Lessen Death
to Crews in Underwater
Boats.**

Safety is the principle which has been placed before all others in the designs of the eleven new submarines which figure in the current British naval building programme, says the London Express. Everything is being done to minimize the perils of these vessels—perils made manifest in the series of fatal and all but fatal accidents of recent years.

Roughly speaking, the new safety principles comprise the following:—

1. Greater buoyancy in an inert state to facilitate natural rising to the surface under emergency conditions.
2. Greater internal control as far as keeping water out of the vessel under emergency conditions is concerned.
3. Greater range of vision, so that those on board can take greater precautions against collision.

These three points cover the chief causes of fatal accidents to submarine crews.

SUBMERSIBLE PRINCIPLE.

The new boats will be on the submersible principle. When reduced to diving trim they will possess a much larger reserve of buoyancy than any existing type. This is rendered possible by the great increase of power in the electric engine used for propulsion under water.

When diving, the submersible is driven ahead, and steered downwards by her deflection rudders. She is thus forced under by momentum. Immediately on stopping she rises to the surface without any manipulation of her ballast or trimming tanks.

By increasing the powers of flotation when in diving trim, a very much better chance will exist of bringing the boat to the surface in the event of a mishap when submerged.

Another point by which greater security will be attained is the improvement in the means of promptly closing all access to the interior of the boat. The

OLD AGE PENSIONS.

**Scheme for Provision for Old Age
Made by Great Firm.**

So little is heard to-day in England of Mr. Chamberlain's proposals on the subject of old age pensions that it is doubly refreshing to hear that Cadbury Bros., Limited, in connection with their cocoa works at Bournville, near Birmingham, have now made definite arrangements for the establishment of a pension fund for the benefit of their male employees.

The fund will be supported by contributions by the employees varying from 2½ to 5 per cent. of their wages, and the company will pay to the fund contributions of an equal amount. Pensions are to become payable at the age of sixty, except in cases where arrangements are made for an employee to remain in the service of the company after pension age.

The amount of the annual pension will be one per cent. of the total amount of the employee's wages in respect of which he has made contributions, and will therefore depend on length of service.

Thus, an employee who has been a member of the pension fund for 30 years, will, on attaining sixty, be entitled to a pension equal to £30 for every £100 of his average annual wage.

The company propose to inaugurate the fund by undertaking to pay over to it the sum of £60,000. It is believed that this capital sum will be sufficient to entitle all the existing male employees to pension benefits in respect of half of their period of service with the company up to the present time, without any payment from employees for such periods of service.

If an employee leaves the company's service before attaining pension age he will have returned to him all his own contributions, with compound interest at 2½ per cent. Similarly, if a pensioner dies before receiving in pensions an amount equal to his own contributions with 2½ per cent. compound interest, the balance will be paid to his representatives.

A Sure Cure for Headache.—Bilious headache, to which women are more subject than men, becomes so acute in some subjects that they are utterly prostrated. The stomach refuses food, and there is a constant and distressing effort to free the stomach from bile which has become unduly secreted there. Par-melee's Vegetable Pills are a speedy alternative, and in neutralizing the effects of the intruding bile relieves the pressure on the nerves which cause the headache. Try them.

If you think that honesty keeps the majority of politicians poor you are entitled to another think.

A LITTLE QUIET is the best of all diet, yet it will not make bone and muscle but "Fervor" will. Try it. All drug and general stores. 51 bottles.

Caller—"You appear to be very fond of your little playmate. It is pleasant to see such love among children." The Bigger One—"Yes; he's got er penny to spend."

Halloway's Corn Cure is a specific for the removal of corns and warts. We have never heard of its failing to remove even the worst kind.

Honesty seems to be an ingredient that many a self-made man neglected to mix in with the rest of his material.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

Knieker—Strange they didn't name the baby after its rich uncle. Rucker—No; he looked at it, and said he'd give them \$5,000 not to.

Dr. Agnew's Catarrhal Powder has proved a blessing to many a "man before the public" in cases of hoarseness, bad throat, tonsillitis and catarrh. Some of the most recent evidence of its efficacy comes from a well-known actor, whose

We Own The Largest Stock Food Factory In The World.

It covers over a city block, contains over 18 acres of floor space, cost \$500,000. Size of our office 360x120. 300 office people, 150 typewriters and we use fifty million letter heads and envelopes every year. A carload every 30 days. Our chemical laboratory is one of the best. Our office is one of the great sights of the business world. Many very small concerns advertise large buildings. We invite you to visit our factory and see that we have everything we claim.

LANDS In Western Canada

Two cornering sections, select of land, is Strong soil, 99 per cent. plough land, spring creek, no sloughs. About 40 miles N.E. of Indian Head. Price \$10.50 per acre. Write for map and full particulars.

R. PAR-ONS, 91 Wellesley Street, Toronto, Canada.

"Why am I like a pin?" asked Mr. Jones triumphantly of his wife. He expected she was going to say: "Because you are so sharp." He was sorely disappointed when she replied: "Because if you got lost, you wouldn't be worth looking for!"

Pale, sickly children should use Mother Graves' Worm Exterminator. Worms are one of the principal causes of suffering in children and should be expelled from the system.

"How is your son getting on with his work?" "Beautifully!" answered the father of the gilded youth. "He never troubles it, and it never seems to trouble him."

role, up come the snow-shoes, and the unfortunate carrier, mail-bag and all, goes rolling down the mountains, instead of sliding down them.

EXPLAINING IT.

Mrs. Nagget—You don't love me as much as you used to.

Mr. Nagget—Think not?

Mrs. Nagget—No. You used to say I was worth my weight in gold, and—

Mr. Nagget—Well, you're not as stout as you were, you know.

Ethel—That lovely Miss Kickington's feet are the smallest in town, so they say. Freddie—Well, her father's are the biggest on earth.

"Keep Your Stomach in Good Working

when in diving trim, a very much better chance will exist of bringing the boat to the surface in the event of a mishap when submerged.

Another point by which greater security will be attained is the improvement in the means of promptly closing (l) access to the interior of the boat. The need for this was one of the most tragic lessons of the fate of the A 8 at Plymouth last June.

SLIDING DOORS.

In the new type it is proposed to substitute sliding watertight doors in the top of the conning tower, which can be shut instantly by the pull of a lever placed by the side of the steersman.

The Admiralty also have under consideration the possibility of improving the existing optical arrangements in submarines. The periscope limits the range of vision to an arc of the horizon only. When the attention of the officer on observation duty is fixed on the object of attack there is a risk that he may omit to sweep the surrounding sea to make sure no other vessel is approaching.

This was the cause of the loss of the A 1 with all her crew, and also of the narrow escape of the A 9 a few weeks ago.

The new submarines are credited with a surface speed of eighteen knots, a submerged speed of ten knots, and a radius of action, on economic working, of 600 miles.

INACCESSIBLE FORESTS.

Nearly all of the northern and eastern part of Guatemala is covered with a dense tropical forest, consisting of mahogany, different kinds of cedar, cnele and other hard woods. Along streams down which logs can be floated much of the mahogany has been cut, but as yet very little of the other woods have been marketed. This is especially true of the departments of Peten, Alta Verapaz and Izabal. Most of the forests still belong to the government, and the usual method of securing the timber is by concession, by which a certain number of trees are cut, at a given price per tree, or a stipulated sum is paid for the timber on a given tract. It is not an easy matter to get titles to large tracts of land in Guatemala, as it is discouraged by the government. These concessions are not usually granted for a longer period than five years. Sometimes it is stipulated that if a certain number of trees are cut during that time they must be renewed.

FIFTY CENTS

IN some conditions the gain from the use of Scott's Emulsion is very rapid. For this reason we put up a fifty-cent size, which is enough for an ordinary cough or cold or useful as a trial for babies and children. In other conditions the gain is slower—health cannot be built up in a day. In such cases Scott's Emulsion must be taken as nourishment; a food rather than a medicine. It's a food for tired and weak digestions.

Dr. Agnew's Catarrhal Powder has proved a blessing to many a "man before the public" in cases of hoarseness, bad throat, tonsillitis and catarrh. Some of the most recent evidence of its efficacy comes from a well-known actor, whose home is in New York City. He says: "I have never found anything to equal this remedy for quick relief." 50 cents—137

Mrs. Crabshaw—"You seemed pleased that my doctor recommended a five-mile walk every day." Crabshaw—"Yes, my dear; I was afraid he would recommend an automobile."

ONE OF THE BEST old time remedies for all skin affections, such as Eczema, Ringworm, Scald-head and similar affections is **Weaver's Ointment**. It is an ointment that has brought relief to thousands.

Mrs. Gramercy—"I hear your husband suffers from dyspepsia." Mrs. Park—"Not exactly. You see, he has it, but I suffer from it."

To Those of Sedentary Occupation.—Men who follow sedentary occupations, which deprive them of fresh air and exercise, are more prone to disorders of the liver and kidneys than those who lead active, outdoor lives. The former will find in **Parnelle's Vegetable Pills** a restorative without question the most efficacious on the market. They are easily procurable, easily taken, act expeditiously, and they are surprisingly cheap considering their excellence.

RUSSIA'S FIXED POLICY.

German Publicist Fiercely Arraigns the Czar's Government.

Startling reports of the condition and future of Russia's 6,000,000 Jews were made the other day to the annual meeting of the Central Jewish Relief League, of Berlin, Germany, by Dr. Paul Nathan, a well known Berlin publicist, who has returned from an extensive trip through Russia as the special emissary of Jewish philanthropists in England, America and Germany, to arrange for the distribution of the relief fund of \$1,500,000 raised after the massacres last Autumn.

Dr. Nathan paints a horrifying picture of the plight and prospects of his co-religionists, and forecasts at any hour renewed massacres exceeding in extent and terror all which have gone before. He left St. Petersburg with the firm conviction that the Russian Government's studied policy for the solution of the Jewish question is systematic and murderous extermination.

Dr. Nathan read to the meeting a circular addressed last week to the garrison of Odessa, calling upon the soldiers to "rise and crush the traitors who are plotting to upset the holy government of the Czar and substitute for it a Jewish empire."

Dr. Nathan concluded with a passionate appeal to the Jewish money powers of the world to arrest Russia's career as a borrower. The financiers of the world should call a halt to Russia, not only for humanitarian reasons, but for practical reasons. Russia's bankruptcy is an established fact.

Information published at Berlin states that a renewed outbreak of the Russian revolution is imminent. The Central Revolutionary Executive Committee are distributing great quantities of arms and ammunition, particularly bombs. On this occasion the revolutionists will not fight in masses, but in small flying columns, which will employ the bombs as their principal instruments of destruction.

One of the most remarkable features of the movement is the enormous quantities of small bombs available for use. The scheme is to destroy the permanent way of railways and cut telegraph wires simultaneously in many different parts throughout the country. The prosperous quarters of many towns are also to be set on fire at a given moment.

NOT HIS SEEKING.

"Well, well," remarked Jigley, noticing Jagley's black eye. "How did you meet with that accident?" "I didn't," replied Jagley. "It met with me."

expelled from the system.

"How is your son getting on with his work?" "Beautifully," answered the father of the glided youth. "He never troubles it, and it never seems to trouble him."

Couldn't Estimate Its Value!—Dr. Agnew's Cure for the Heart never fails. It relieves in 30 minutes. It cures. It is a life-light to lead you back to health. W. H. Musselman, of G. A. R., Weissport, Pa., says: "Two bottles of Dr. Agnew's Cure for the Heart entirely cured me of palpitation and smothering spells. Its value cannot be estimated." —139

POSTMEN ON SNOW-SHOES.

Mountain Carriers Take Great Risks in Colorado.

Strength and courage are needed by the men employed in delivering the mails in the Rocky Mountains. In winter the undertaking is difficult and dangerous. Sometimes the carrier is swept away by a snow-slide, and months roll by before the brave fellow and the mail-pouch are found. About fifty of these mountain carriers risk their lives daily on the dangerous trails in Colorado, carrying the mails on snowshoes to the most remote mining camps.

Only hardy men of resource can do this work, for twenty-five pounds of letters, papers, and packages become very heavy and burdensome in climbing the mountains. These carriers know the peaks, passes, and trails as well as the city carriers do the streets and numbers of their districts.

On reaching the summit the carrier straddles the pole, and placing his snowshoes close together, begins his descent. One accustomed to the work will go down the mountains with the swiftness of the wind—a mile a minute.

But it is not so with the one who is inexperienced, for out slips the guiding-

A TORONTO MAN TRIES

SOMETHING NEW AND IS DELIGHTED. FEELS LIKE A BOY.

Mr. M. N. Dafeo, Manager The Dustless Brush Co., 29 Colborne St., Toronto, is telling his friends how he found health after years of illness and pain. He says: "I have been a great sufferer from Dyspepsia for many years. I have been treated by local doctors and have taken nearly all the advertised remedies with only temporary relief, if any at all, but since using Anti-Pill I can eat anything the same as when a boy. I have been taking one Anti-Pill at bedtime for the past three months, and find they regulate both stomach and bowels. My old time vigor has returned, so that my spirits are buoyant and temper normal. As a result of this unhelped for experience I am in duty bound to give all credit to this wonderful remedy, Anti-Pill."

Every druggist sells Dr. Leonhardt's Anti-Pill, or a sample will be sent free by The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

The remedy that cured Mr. Dafeo so completely is surely worth a trial. 502

RELIGION IS A LIVING THING

You Are Not a Religious Man Unless You Are a Growing Man.

Grow in grace.—II. Peter iii., 18.

Some people never reach their second childhood, because they never get out of the first one. As long as they live they will take their intellectual food with a spoon; they will travel only so far as others may trundle them; they will wear only such clothes as others may select for them. Developed in body they are dwarfed in character. Either it is a pity that they grew at all or that they did not grow at all.

Manliness is not made by miracle; it is the result of a process. Character growth is just as natural, just as amenable to laws as material growth. Growth in any thing is the evidence of life. Some dead things are as immovable as a granite boulder; others are blown hither and thither like straw from the thrashing stack. Neither immobility nor vacillation can be taken as evidence of vitality; development alone establishes that.

Some people think they are pious because they never change their opinions, while others think they are exceedingly spiritually minded because they pick up new fancies every hour. There is nothing colder than a piety that is petrified. It is so dead that the man who has it never thinks of it as a life but only as

A NIGHT LATCH INTO HEAVEN.

Because religion is a living thing, a life, it will always evidence growth. Religious revisions, developments of opinion, even changes in standards of conduct are but processes of growth, the pushing off of old leaves to put on the new, the passing into higher forms of being. If the emphasis moves from the fear of hell to the love of a father over all, and then to the wider love for the brothers in that father's family, it does not mean that faith is dying; it does mean that it comes ever in higher forms because it lives.

Nothing would be more comfortable to our slothful natures than a religion that was stamped and sealed as being in its final, unchangeable form. That is what we have been trying to make for ourselves. But the wine has burst the bottles and we have wept sore over the labor of making new ones. The

heretics have been those who have kept up with the growth of truth; the rest have tried to hold it back.

The progress of the world depends not on the increasing speed of its trains nor the accumulation of its bonds and securities; it depends on the development of its people. The world is only greater as man is grander and more divine. Civilization is not in the clothes; we wear, but in the men we are. The new world is the product of the new race, the old things pass away; all things become new; man emerges from the lower into the higher.

Greater far than the changes that have taken place in our physical form are those taking place

IN OUR INNER LIVES.

Religion is the name we give that mighty power that works out the higher type of personal character. If you are not better to-day than yesterday, then you are worse. To stand still is to retreat. If all you can do is to hold your ground, the ground might as well hold you forever.

We do not measure the youth's growth by his knowledge of physiology; neither can we gauge the man's spiritual character growth by his knowledge of theology. It is marked by strength of purpose, by sweetening of disposition, by increasing proficiency in human adjustments. In all things it is an approximation to an ideal.

Let no man hope to leap in an instant into the fullness of character. The best things are likely to grow slowly. Only let them but grow, that is all. Be sure that you really are alive to the best, really are living toward the better things day by day, that childish whims are being forsaken, childish weaknesses being outgrown, that the shining ideal of the all glorious man comes nearer, even though the clearer vision of his glories makes it seem actually farther away. Let religion mean not the falling back into weakness, but the putting on of the whole man, the increase of the life more and more, more light, more love, more law, more likeness to that which the Great Architect has planned for his living temple.

HENRY F. COPE.

THE SUNDAY SCHOOL

INTERNATIONAL LESSON,
APRIL 22.

Lesson IV. Jesus, the Sinner's Friend.
Golden Text: Luke 7. 50.

LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Between this lesson and the last must be placed the sending by John the Baptist of a last message to Jesus, recorded in Matthew 11. 2-19; Luke 7. 18, 35.

Verse 36. One of the Pharisees.—From verse 40 below, we learn that the name of the Pharisee referred to was Simon, though nothing more than may be gleaned from this lesson is known concerning the man.

Desired him.—Extended to him an invitation. Apparently the work of Jesus, together with the multitudes attracted by his public utterances, had made on this Pharisee some impression, and he

I member such a lot of things
That happened long ago,
When me an' Jim were six years old—
An' now we're ten or so;
But those that I remember best—
The ones I 'most can see—
Are the things that used to happen
When mother looked at me.

One time, in church, when me an' Jim
Was snickerin' out loud—
The minister was prayin', an'
The people's heads was bowed—
We had the biggest kind of joke
About a bumble bee;
But things got quiet rather quick
When mother looked at me.

An' then there's sometimes when I think
I've had such lots of fun
A-goin' in swimmin' with the boys
Down there by Jones's run;
But when I got back home again,
Just 'bout in time for tea—

Fashion Notes.

NEW SLEEVES FOR BLOUSES.

It is more or less a lost art to buy enough with each gown for a new pair of sleeves. A dressmaker told the other day of this being the habit of one of the best dressed of her customers, not only with her gowns but with blouses. "And," she remarked, "besides always being well dressed she spends less money on her clothes for one who goes as much as she does than any one I know."

This is economy in a nutshell, especially in blouses, as they are more elaborate than anything else, and it is the beautiful work on the front of the waist that is worth saving, equally so where you have paid the price for it in money or labor. There is a little change this year in blouses themselves, but a change in sleeves is necessary unless the waist was in the extreme of fashion last year.

The little white ruffled sleeve first seen last year made in lingerie is now utilized in silk gauze and chiffons under spangled or sequined black net dresses. These are made up over white, being first mounted on white taffeta and interlined with white silk mull or chiffon. One extremely pretty gown mounted in this way had the white sleeves made entirely of ruffles, and there was a deep girle wrinkled around the waist to match. The waist was of black lace draped surplice fashion. A beautiful black tulle gown worn by Princess Henry of Pless lately had sleeves and a flounce at the hem of lovely cream lace. Her gown was trimmed with paillettes that flashed steel in some lights and silver and jet in others. The edges overlapping both the flounces and sleeves, were heavily fringed with the passementerie.

Their possibilities when suddenly wanting to "dress up" are so great that it is in the wardrobe of the dresses on a small allowance that they ought to be found, and later, when a few soiled ones get upon the counters, they will not be so prohibitive. It also would be worth the while of the home worker to experiment with all over lace and batiste motifs. A flaring jacket can be cut, of the lace, the motifs pinned on in such a way as to add shapeliness, and then, when they are sewed down, the lace can be cut out under, and both the laque motifs can be edged with gathered valenciennes. If a wash lace is chosen for a foundation, a good and serviceable jacket is the result.

A clever thing was done by one woman who secured a deep collar of Irish lace and mounted it on a fine batiste, cutting the latter out to fill out the lines of a jacket. Some bands, which could be separated or used in any lengths were chosen to match the collar, and filled in the plain parts, and the little jacket formed was lovely and cost under \$7. Some of them are cut so short and so flaring anyway that they are little more than circular collars, except for the slight length under the arm.

One of the newest achievements of the French manufacturer is a lace after Cluny thread and pattern which is in the exact shade of "old lace," that wonderful tone taken on by lace that has lain 150 years. Set into blouses of filmy linen as an insertion, it is charmingly becoming to the skin. This, by the way, is a great point to remember in the buying of laces, especially of the all over kind. There is no end of difference in the kinds of white when it comes to becomingness. Once in a while even a cheap all over lace can be found with a certain dulness of tinge. Beside the dead white and the more yellow varieties it looks greenish, though it is not when by itself.

Where you can get this for a blouse, you can always be sure of something becoming, and which invariably attracts the artistic eye. The elbow sleeves in blouses are feats of elaborateness. There is always a puff at the top, as a rule, extremely short. Below this is often put on a fancy lace band, a couple of inches deep, and made like a cuff, finished round with a narrow edge, and buttoned up the back with tiny buttons and loops. This is above the elbow frequently.

Foiled By Fate

"My dear Mrs. Barton, I think you had better not see him. Your father's will is very explicit. While your husband is alive you are entirely dependent upon the trustees for your income; at his death you will have everything in your own hands. When James Barton comes out of jail he is to have £100 a year so long as he goes abroad and stays there; but should you rejoin him, the whole of your fortune passes away to charities."

"There is no fear that I shall do that, Dr. Carp. I married James Barton when I was an ignorant schoolgirl of eighteen. My father was in India at the time, and only knew of it after the event. I was mistress of £10,000 which my mother left me, but my husband squandered it in two years. You cannot imagine the awakening I had when we had been married but a few months. The man I had imagined to be the embodiment of everything manly turned out crafty and unscrupulous, a drunkard and a gambler, and at last a thief."

"What an awakening!"
"Ah! it was terrible. While my money lasted he left me for months at a time while he went to Monte Carlo. Then the time came when we were reduced to poverty and one room. He sold or pawned everything we had and came home every night madly intoxicated, and so ill-treated me that I had to seek protection. Then came his arrest for the jewel robbery and the sentence of five years, and when my father came home from India he found me starving."

"My poor girl, what you have suffered!"
"So, you see, doctor, you need not have the slightest anxiety that I shall rejoin my husband. My only prayer is that I may never see him again."

"There is no need for you to do so, my dear Mrs. Barton. Your husband is to be released in a week's time. With your permission I will meet him as he is discharged, give him the money, and inform him of the conditions, and, furthermore, I will see him on board the ship."

"It is more than kind of you to take so much trouble, doctor, and I thank you so much."

"I would do anything for your happiness. I am hoping for the time when you will once again be a free woman."
"Ah! I wonder how many women there are in the world whose chance of a happy love comes too late?"

Dr. Carp stroked his handsome black beard as he gazed for a few moments at the bowed head of Beryl Barton.

"Then—if you were free, there is someone who, you think, could make you happy?"

Mrs. Barton raised her eyes to his and then turned away.

"Yes; I have at last met—a man."

When Dr. Rawdon Carp left Beryl Barton his handsome face wore a look of exulting satisfaction. Beryl's statement that there was someone who could make her happy was accepted by the doctor as referring to himself, and his self-satisfied egotism would not permit the possibility of there being anyone else.

As he walked towards his own house a man on horseback approached him.

"Sir Anthony Lynch—going to call on Beryl, I suppose. It will be a good job when he goes abroad."

"Morning, doctor; have you been to see Mrs. Barton?"

"Yes; she's picking up nicely, and will soon be her old self again."

"I'm glad to hear that. I am just going to call. She can't have many more opportunities. I am ordered to start for Japan in a few days."

"Ah! you diplomatic fellows do get about."

gleaned from this lesson is known concerning the man.

Desired him—Extended to him an invitation. Apparently the work of Jesus, together with the multitudes attracted by his public utterances, had made on this Pharisee some impression, and he was inquisitive to know this man from a closer personal observation. His invitation seems to have been wholly patronizing in the spirit in which it was extended, and may possibly have been given for the purpose of gaining the good will of the common people, who regarded Jesus as a prophet. It is to be noted that the Pharisee treated Jesus in no respect as his equal, and still less as an honored friend.

Sat down to meat—Or, reclined at table. Orientals ordinarily sat cross-legged when eating, but in Palestine the Greek and Roman custom of reclining on sloping couches while the food was served, on a small low table in front of the couches, had become prevalent.

37. A woman who was in the city—That is, who was well known in the city, a notorious sinful woman.

Alabaster cruse—At Alabaster, in Egypt, small vases or flasks holding rare perfumes and ointments were manufactured out of stone found in the vicinity. In consequence, the word alabaster, or alabastron, came to be used of all vessels for holding such perfumes, wherever made, or of whatever material.

38.—Behind at his feet—At the foot of the low couch nearest the wall and away from the table.

Kissed his feet—Or, kissed much or passionately.

39. Spoke within himself, saying—Such were his thoughts.

A prophet—Some ancient authorities read, the prophet.

She is a sinner—We can imagine the disdain of the self-righteous Pharisee as he contemplated this in his own mind.

40. Jesus answering, said unto him, "Simon"—Note both the absence of resentment on the part of Jesus, who knew full well that he had not been invited as a friend or honored guest, and also the fearlessness with which he administers a stern reproof to this haughty Pharisee in his own house and at his own table.

41. Five hundred shillings—The coin referred to is the denarius, a Greek coin worth about seventeen cents. Five hundred denarii would thus be about eighty-five dollars.

44. No water for my feet—Water to pour on the feet of a person entering the house was offered to almost every guest (comp. Gen. 18. 4; Judges 19. 21; John 13. 4, 5; Tim. 5. 10).

45. No kiss—The kiss of peace was a customary mark of respect with which a rabbi was greeted.

46. My head with oil thou didst not anoint—An exceptionally honored guest was welcomed by having his head anointed with precious oil. Note the climactic arrangement of the charge of discourtesy made by Jesus against Simon, who had extended to him none of these marks of courtesy.

But she hath anointed my feet—This sinful woman, on the contrary, in her deep spirit of penance and thanksgiving, had bathed his feet with tears, had kissed his feet, and had anointed them with precious ointment, thus exceeding the haughty Pharisee in her marks of respect and devotion to the Master.

47. For she loved much—Her love was the result of her faith in the willingness of Christ to forgive even her—not, as the sentence would seem to imply, the cause of her being forgiven. That this is the case is made plain by the next clause: but to whom little is forgiven, the same loveth little.

49. They that sat at meat with him—Other invited guests, evidently friends of the host, and sharing his haughty spirit of self-righteousness. The word "sat" in the original is reclined, as in verse 36. The word "meat" refers to the meal as a whole.

50. Thy faith hath saved thee—The woman's faith had been manifested in her venturing to approach into the presence of Jesus, and still more by her manifest repentance and devotion.

Go in peace—Peace of mind is the great boon resulting from a consciousness of one's forgiven.

When mother looked at me.
An' then there's sometimes when I think I've had such lots of fun
A-goin' in swimmin' with the boys
Down there by Jones's run;
But when I got back home again,
Just 'bout in time for tea—
There's a kind of different feeling comes
When mother looks at me.

That time when I was awful sick
An' the doctor shook his head,
An' every time pa came around
His eyes were wet and red,
I member her hands on my face—
How soft they used to be—
Somehow the pain seemed easier
When mother looked at me.

THE WRONG WORD.

Bessie came in from school and sat down before her mother. There was a solemn expression on her face. Her mother looked down at her with a smile, waiting for her to speak.

"Is it right to tell things that you have heard at school?" she asked, somewhat timidly.

"Not unless it can do someone good, and would not be telling another's secret," said her mother, quietly.

"Oh, this will do good, and it is about some one in our family, so it is our secret."

"About Bobbie, isn't it?" asked her mother, for mother's hearts tell them more than their ears sometimes.

"Yes. The girls—the little girls down in Bobbie's room—say that sometimes he does not know anything!" declared Bessie, whose eyes were wide with her news. The last word had come out with strong emphasis.

"Why, I think he must have learned something," said her mother, smiling.

"They say the teacher has a dreadful time with him, and makes him say the things over after her, and sometimes he seems to know them, and the very next day he doesn't."

"I will see when he comes in what it is all about," said mother.

Presently Bobbie came in from school. He had stayed again after the others, and his eyes were red from crying.

"Come here, Bobbie," said his mother. "I want to ask you about your school. Can't you learn your lessons?"

"I always know my lessons, but the teacher says I don't."

"Give me your book," said his mother. "Read this for me."

Bobbie read the little paragraph. He made no mistake, and his mother asked him to spell the words. This he did perfectly.

She looked inquiringly at Bessie, who sat proudly by. "It wasn't true," Bessie whispered.

"Why does your teacher say that you do not know your lessons?" asked his mother.

"Just because I don't know what a 'nanser' is. I haven't any at home. I never saw one."

Bobbie's lip was quivering and his eyes were filling with tears. "Every time she asks me to give her a nanser, I tell her I can't."

Mother took Bobbie up in her lap, and when she saw that Bessie was going to laugh, she sent her to look down the street for the postman, and then she said to Bobbie: "I see that you do know your lessons just as nice as can be, but you have not known what the teacher meant. It isn't a nanser—it is an answer. When I say 'answer me,' you know what I mean, don't you?" Bobbie's face was beginning to clear.

"When she says, 'Give me an answer,' she means tell her about the lesson."

"Oh, she asks me the lesson and I answer her?" said Bobbie, in great wonder. "Why, to-morrow when she asks me I will tell her all the number work." And he did, for another meaning had been made plain to him, and another word was added to his short list.

NO SCHOOL.

"You think, then, that Johnnie will be all right by to-morrow, doctor?"

"Not a doubt of it, madam; to-morrow will be Saturday."

is always a puff at the top, as a rule, extremely short. Below this is often put on a fancy lace band, a couple of inches deep, and made like a cuff, finished round with a narrow edge, and buttoned up the back with tiny buttons and loops. This is above the elbow frequently.

A pretty way of dealing with a silk or linen blouse, which is supposed to go with a skirt to match, is to make the short cuff turning up well above the elbow. The sleeve is left a little wide at the bottom, and an undersleeve of lace is worn, but not to the wrist as of old. It just nicely covers the band of the elbow, where it fits pretty tight. Another pretty sleeve finish is a band of insertion edged all around ends and sides like a cuff, but fastened around the sleeve above the elbow. The sleeve is cut in a deep instead of a short puff, and long enough to reach below the elbow, where it is finished with an edge. The band divides it, making both a short and a long puff.

Another figure is that elaboration of a black lace blouse part worn over a white chiffon slip with a yoke of white Irish lace showing above. Colored laces in the heavy corded kinds are attractive mounted over white in this way. But the white underneath needs to be accordion plaited and full, and the white lace to be rich and elaborate looking. Crimped ruffles are on white net blouses, and if one is going to indulge in dry cleaning, it makes a pretty trimming, as do also the cheaper lace edges, after having been put through the plaiter.

A BURIED CITY.

Peasants Discover Ancient Ruins in Afghanistan.

The following news has been received at Peshawar, India, from Afghanistan: The Ameer of Afghanistan has left Jellalabad with two troops of his bodyguard for Daranow. Soon after his arrival at Jellalabad the Ameer is said to have received a letter from his son, Prince Inayatulla Khan, announcing that while constructing a road in the Kohistan Illaqia treasure was found at the village of Zama, consisting of gold and silver coins of ancient kings. Two companies of sappers and miners had been despatched under the command of Col. Mohamed Nabi Khan to guard the treasure.

Another letter has now been received from Sardar Abdulla Khan Tokhi, Governor of Balakh, stating that while some peasants were preparing their land for cultivation, they came upon some ruins, which, on further examination, proved to be wall enclosures of a ruined city. The Governor himself visited the spot and found the ruins of a large city with some gold coins, the inscription on which nobody could read.

The grey-bearded Afghan Turks said they had heard from their ancestors that a large Kaffir city existed in the vicinity, which had been destroyed long since, and that in the ruins were buried the treasure of the Kaffir kings. Some of the coins were sent to the Ameer for inspection.

This discovery was also regarded as a good omen by the Ameer, and he has written to the Governor to guard the place well and make excavations to discover the treasure, ordering that everything found is to be despatched with care to Kabul.

The snowfalls in Afghanistan have this year been very good, promising good crops.

AND HE MEANT IT.

It was at the children's tea party and Willie was sobbing bitterly while the hostess tried in vain to find out what was the matter.

"Won't Willie have some more nice cake?"

"No," roared Willie, "I don't want any cake."

"Well, have a nice big piece of pie, Willie?"

"I don't want any pie," yelled Willie.

"Well, for goodness' sake what do you want," asked the hostess in desperation.

"I want some of this out that I've got in," sobbed Willie.

"Yes, she's picking up nicely, and will soon be her old self again."

"I'm glad to hear that. I am just going to call. Sha'n't have many more opportunities. I am ordered to start for Japan in a few days."

"Ah! you diplomatic fellows do get about."

With a mutual nod the two men went their different ways, Sir Anthony to feast his eyes upon the woman he loved above all others, and the doctor to an interview of a far more unpleasant nature. When he reached home he found a gentleman awaiting him whose card bore the name of Moses Smith.

"Now, Dr. Carp, I think I have arrived at the end of my patience. I hold your bills for £4,000 odd. I do not wish to do anything harsh, but unless you can give me something more than promises I must proceed to recover my money."

"I am sorry, Mr. Smith, that I have not been able to take the bills up, but for you to proceed now would be disastrous and spoil everything."

"What do you mean?"

"Supposing I was to marry a young widow with £10,000 a year in her own right?"

"Ah!"

"It would pay you very much better to wait and get paid in full than take the risk of a problematical dividend by forcing me into bankruptcy."

"And the chances?"

"There are no chances; it is a certainty."

"How long do you want?"

"Renew the bills for a month and I'll sign for an extra £500 by way of interest."

"You are either very confident, doctor, or very desperate. However, I can lose nothing by waiting a month, so I will do it; but, remember, I shall be down on you five minutes after the bills fall due."

During the next few days Dr. Rawdon Carp was a very busy man. He paid several visits to London, and made some mysterious arrangements at a house in Stamford Street.

The evening before Jim Barton's release the doctor visited this house and interviewed the particularly ill-favored woman who seemed to be its presiding genius.

"Well, and how is the patient, Mrs. Slimgrove?"

"Near a corpse as can be."

"I will go up and see him."

In an upstairs room a man lay on the bed. He turned his eyes beseechingly as the doctor entered. He did not speak. He was suffering all the horrors of diphtheria. Carp made a cursory examination and went downstairs again.

"He won't live twenty-four hours. Now, I shall be here to-morrow, Mrs. Slimgrove, with a friend. Here is some money; get in some food and whiskey—plenty of whiskey. I rely upon you to attend to these written instructions, and expect me about six in the evening."

On the following day Dr. Carp arrived with the released convict, Jim Barton. A sumptuous repast had been prepared, of which Beryl's husband partook ravenously. During the meal he was silent and morose, but after he had satisfied his hunger and applied himself several times to the decanter he lit a cigar and turned to the doctor:—

"Now, then, what's your game?"

"Perhaps it would be better if I asked a question first. What do you intend to do?"

"Well, what do you think? My wife has inherited all her father's money. A husband's place is with his wife—eh?"

"I don't think you quite understand. Your father-in-law left all his money in the hands of trustees. Your wife is to receive the income as long as she keeps away from you. If she attempts to assist you in any way, or recognizes your rights as a husband, the money passes to charities."

"And where do I come in?"

"You go out. That is to say, you are to receive £100 a year so long as you stay out of England. Remain here, you get nothing. What do you say?"

The ex-convict was silent for a few minutes.

"Well, it's hard lines on me, but £100 is better than nothing."

"In the case of your death the trustees are relieved of their responsibility, and your wife has her fortune in her own hands."

"Well, you can bet your life that I am not going to die to please her."

"It is a pity."

"Is it? That's only your opinion."

"What are your feelings with regard to your wife?"

"I think it is hard lines that she should have all the money and I nothing. Beyond that I don't care if I never see her again."

"Then, if you were paid, say, £500 a year, you wouldn't care whether she married again or not?"

"What do you mean?"

"I mean that you would be better dead. Listen! There is a sick man upstairs. He will die to-night. Why can't he be buried as James Barton?"

"Here, none of that."

"It is so easy. I give you a little powder. You become insensible for two hours and look like a corpse. I send for your wife and she identifies the body as that of her husband. You come to your senses again, the other man is buried on my certificate, and you receive £500 a year for life."

"Who from?"

"The man that marries Beryl Barton."

"And that man?"

"Is myself."

"I thought as much. And what guarantee have I that the money will be paid?"

"The simple guarantee that it is in your power to turn up at any moment and expose the whole thing."

"That's true."

"Will you do it?"

"It is worth thinking about; but no hanky-panky with the physic and stretch me out in real earnest."

They talked far into the night. They were alone in the house save for the sick man upstairs. At last they came to some agreement, and the doctor rose.

Aided by the feeble light of a candle he made his way upstairs. The poor patient lay neglected in his agony. The doctor took a phial from his pocket and poured a liquid into a glass. Raising the sick man he held it to his lips.

In a few moments the man was beyond the reach of pain.

The following morning Dr. Carp sent a wire to Beryl Barton:

"James Barton is here. Very ill—fear the worst."

Twenty-four hours later this telegram was followed by another:

"Barton died this morning. Can you come at once to identify the body?"

Having received an answer, which simply said, "Twelve-thirty train," Carp proceeded with his arrangements. The dead man was taken from the bed and placed in another room, and James Barton took his place.

The doctor mixed the draught, and as Barton swallowed it he carefully noted the effect. The color receded from his face, the heart seemed to cease beating, and to all intents James Barton was a corpse.

Carefully arranging the blinds and covering the body with a sheet, Carp set himself to await the coming of Beryl Barton. An hour later he hurried to the door in answer to a ring, and there stood on the steps, not Beryl, but Sir Anthony Lynch.

"This is very sudden, Dr. Carp. Mrs. Barton could not face the ordeal herself, so she asked me to come. I know Jim Barton well; we were at the University together."

"I am glad on the whole that Mrs. Barton did not come, as there is a great risk of infection. The poor fellow died of diphtheria."

"Poor fellow. A wasted life."

"Better get it over at once. I would rather you did not come farther than the door. No need to run any risk."

Sir Anthony followed the doctor upstairs, and gazed into the semi-darkness of the room.

"Yes; this is Jim Barton right enough."

"Well, let us get down again; it is

You saw James Barton lying dead in the house in Stamford Street?"

"I did."

"I made all arrangements for the funeral, and then had to go down to Plymouth. I went to Stamford Street this morning, and the man who opened the door to me was—James Barton!"

"Impossible!"

"It is true. What I mistook for death was simply coma; he recovered a few hours after I left."

"But I saw the undertaker, and he told me that the body had been buried."

"Unfortunately there was another man lying dead in the house, and he was buried by mistake as James Barton."

"Great heavens! And Beryl, my wife?"

"Ah! Must we tell her, Sir Anthony? Has she not had enough trouble in her life without this? Can we not keep it from her?"

"How, man, how? Don't you see that if this man is alive she is not my wife?"

"She can never be anything to him. Supposing this man was willing to disappear, to remain dead, for a sum of money?"

"I would do anything to save Beryl pain."

"Then give me £6,000, and I will undertake that this man troubles you no more."

"But that would not make Beryl my wife. I must think, I must think. Come, take me to see James Barton; I cannot believe that he is alive. When I have seen him perhaps I shall know how to act."

With ready compliance Dr. Carp called a hansom and the pair drove off to Stamford Street. The door was opened by Mrs. Slimgrove.

"Is Mr. Barton in?" asked the doctor.

"Yes; oh, yes, he's in, an' likely to be. He's upstairs."

"Ask him to come down."

"I think you'd better go up to him. He feels too stiff to walk much."

The old woman went creaking down the stairs, leaving the two men to go to James Barton's room.

The room was in darkness as they entered. The doctor drew up the blinds. They both approached the figure lying on the bed, and then started back with a simultaneous cry of horror.

Jim Barton lay there dead.

"Strange!" said the doctor. "He was well enough when I left him this morning."

"Then how do you account for this?" asked Sir Anthony, as he picked up a paper from the table.

"15th January. I am dying. I have caught diphtheria from the man who died in this bed. May my curses rest on Carp and all his schemes.—James Barton."

"The 15th," continued Sir Anthony. "Beryl and I were married on the 16th, so our marriage was quite legal. Now, sir, what have you to say in explanation?"

"That I have been foiled by my own weapon. I was a desperate man, Sir Anthony, and played for a great stake to win or lose my all. I loved Beryl Barton, and to win her I risked much. I did not know that you were taking a hand in the game; I was confident that I held all the cards. I have lost, and I am in your power."

"I have neither time nor inclination to use that power, Dr. Carp. I am only too thankful that my wife has been spared the knowledge of this horror which you prepared for her. We are going abroad to-morrow, and I can only hope that neither of us will ever see you again."

And so Beryl never knew of the plot so carefully prepared to ruin her life; and when some three years later she returned to England with her husband Dr. Rawdon Carp had disappeared. Moses Smith had been as good as his word.

CHINA'S HEBREW COLONY

SUPPOSED TO HAVE SETTLED THERE 2,400 YEARS AGO.

New Pay But Little Attention to the Ancient Customs of Their Religion.

For more than two thousand years there has been a colony of Jews established at Kaifeng, China. The exact date of their entrance into the country is not known, but it is supposed from a tablet found in their synagogues at that place that they must have appeared about 500 B.C., although it may have been as late as 58 A.D. It is not until the third or fourth century that they are mentioned in Chinese annals, when their synagogue is referred to by a Chinese writer as a "heaven spirit monastery." Western Persia is given as their starting point, by which Persia is probably meant, because of the number of Persian words which are used by the Chinese Hebrews.

Mr. Ezra, who is an authority on the subject, thinks that there is no good reason for the theory that the Chinese Hebrews are descended from the ten tribes. There are many references to these Hebrews from the year 878. An Arabian writer mentions them as one of the sects that perished in a general massacre at Khanfu, but in 956 and 958 there are records of the Chinese officials conferring

HONORS ON HEBREWS,

and in 1163 the erection of a synagogue was begun at Kaifeng.

Hebrews were invited to Pekin to join the imperial army. In the fifteenth century there were many Hebrew communities in China. The best information we have about these communities comes through the Jesuits who entered Pekin at the end of the sixteenth century.

The discovery of the Chinese Hebrews was made by Father Ricci, one of the first Jesuits to enter China.

Early in the seventeenth century, one summer day in Pekin, a visitor, prompted by rumors of the arrival of certain foreigners who worshipped a single God and yet were not Mohammedans, called on Father Ricci. The missionary, noticing the difference of features from the ordinary Chinese, led him to the oratory and knelt on his knees before a picture of the Virgin with the infant Jesus and St. John the Baptist. Nearby was another picture representing four of the apostles.

The visitor knelt also, remarking, "We in China do reverence our ancestors. This is Rebecca with her sons Jacob and Esau, but as to the other picture, who make obeisance to only four sons of Jacob; where there not twelve?"

Returning to the former apartment mutual explanations followed and an unforeseen solution ensued. The stranger was a Hebrew, Ngai by name, who had come to Pekin from Kaifeng to procure literary honors. He stated that in his city there were some twelve families of Israelites, with a fair synagogue, in which they preserved a roll of the law more than

FOUR HUNDRED YEARS OLD,

and in Hangchow; the capital of Chekiang, there were many more families, also with a synagogue.

Scattered over the length and breadth of China there were others of his sect, but these were gradually being lost, from having no meeting place. When shown a Bible in Hebrew he confessed his inability to read it, though he recognized the characters. He said that his preference for Gentile literature subjected him to many reproaches from the chief of the synagogue. Father Ricci was able to test the truth of these statements, and despatched some Chinese Christian messengers to Kaifeng for purposes of investigation, and soon received visits from other native Hebrews. The condition of the Chinese Hebrews

HEALTH

DIEP.

In much that is written concerning the matter of diet there are so many sweeping statements, impossible rules and foolish conclusions that it is no wonder that many persons brush the whole subject aside as being too complex for them.

The trouble is that there are too many persons trying to enforce their own personal ideas on this subject. There are the "cranks" who must have something to be cranky about in any case, and a "crank" who has picked up a little scientific jargon and thinks he has cured himself of something is a very persistent person. Then there are those who have really been cured of some ailment by a diet that happens to suit their own individual cases. They go about forever afterward finding the same ailment in every one they meet and offering the same remedy. There are also the one-food people, who go about seeking what not to devour, and who would reduce every one to whole wheat or pecans.

Whole wheat and pecans are excellent foods and do much good, but so do black-heart cherries, lobsters, and corned beef and cabbage. If John discovers that he has a nightmare every time he eats lobster he does well to renounce that dish, but he need not renounce it because Dick has the nightmare.

Again, one hears much of the good judgment displayed by those persons who rest for at least half an hour after eating, and it would, undoubtedly, be well if the world were so arranged that we could all do so; but unfortunately the business of the day rushes along, and most persons, at least until they come to their evening meal, must go to work as soon as they have eaten.

It is true that this fact constitutes a strong plea for light and easily digested meals in the daytime, leaving the principal one till the work is finished.

It is absurd for persons who have not made themselves somewhat familiar with the chemistry of foods to try to talk learnedly about their action on the human economy, and it may be taken as an axiom that within the individual capacity (which can be learned only by individual experiment) a variety in diet is better than a monotony. A diet that is too strictly limited to a few things trains the stomach to adapt itself to those few, and it is in danger of losing its power to digest things outside of that list.—Youth's Companion.

HEALTH NOTES.

A bunion is nearly always caused by badly-fitting footwear and pointed-toed boots. Wear boots especially made, and remove all pressure from the bunion. When pain and inflammation subside, some apparatus may be applied to straighten the toe into normal position.

Lumbago.—This is a most distressing and painful malady. Intense pain, with inability to stoop or bend the back, is experienced, and severe pain in region of what is known as the "small of the back." A strong liniment of belladonna, chloroform, and alcohol is useful to relieve pain.

Cold feet, as a rule, are due to bad circulation, but very often caused by the footwear. Socks, if not changed frequently, and kept clean, are a cause of coldness. Woolen socks, cork soles inside the boots, and thick, substantial soled boots will do away, in many cases, with the trouble.

Sciatica consists of an intense pain extending from the hip-joint to the calf of the leg. Very often due to constipation, and will disappear with the use of a good purgative. If due to cold or damp, small blister plasters along the course of the pain will often give great relief. Massage and exercise will do much to cure.

Chapped Hands.—In cold weather al-

Entertainment is seldom to be had from a schedule of a British Parliament.

the door. No need to run any risk."

Sir Anthony followed the doctor upstairs, and gazed into the semi-darkness of the room.

"Yes; this is Jim Barton right enough."

"Well, let us get down again; it is not good to remain up here. How does Mrs. Barton take it?"

"Very quietly. Of course, we cannot expect any sentiment. It is a happy release for her."

"It is; and I hope her future will in some measure make up for the unhappiness of the past."

"Thank you," answered Sir Anthony; "it will not be my fault if it does not."

"What do you mean?"

"I mean that Beryl and I have loved each other for years. I am going out to Japan in a few days. We shall be married by special license, and she will accompany me."

"I—I congratulate you."

"Thanks. I shall be glad if you can come to the ceremony, as you are such an old friend of Beryl's."

"I am afraid I cannot manage that. When I have seen after the funeral arrangements I must go down to Plymouth for a week or ten days."

When Sir Anthony had gone Dr. Rawdon Carp manifested his rage in a variety of ways. He considered himself tricked. All his plans were upset, and the vision of Moses Smith loomed large in the near future. But, one piece of rascality having failed, he was quite ready to try another.

When Jim Barton came to his senses again he was all eager for news.

"Well, did she come and shed tears of regret and repentance?"

"No, she did not come; she sent Sir Anthony Lynch instead."

"Sir Anthony! Why him?"

"Because it appears that he is the man she is going to marry."

"Good heavens! And all our tomfoolery goes for nothing?"

"Not quite. I am not so easily beaten."

"What can you do?"

"Let them get married, and a day or two after tell Sir Anthony that you came to life again. I think he would part with a good round sum to keep the knowledge from Beryl."

"What a man you are, doctor! By Jove! that's capital."

"I must disappear for a few days, but I will keep you posted with the news. Meanwhile you had better stay here and let Mrs. Slimgrove look after you. I must go and arrange for that man's funeral now."

In the course of the evening the undertaker called and took away the remains of the unfortunate victim of Dr. Carp's scheme, and in due course he was consigned to the grave under the name of James Barton.

Although the doctor was away at Plymouth he had arranged to be kept well supplied with news of the doings of Sir Anthony Lynch and Beryl, and one day he received the information that they had been quietly married, and were spending a few days in London preparatory to starting for Japan.

The news caused the doctor considerable satisfaction, and he wrote to Jim Barton telling him to hold himself in readiness for any emergency. The following evening saw him in the train en route for London.

Sir Anthony Lynch was very much surprised to receive a telephone message from Dr. Carp, asking him to meet him at the Gordon Hotel upon a matter of grave importance, and further requesting Sir Anthony to keep the meeting secret from his wife.

In due course the appointment was kept, and Dr. Carp assumed a profound air of mystery.

"My dear Sir Anthony, I have some terrible news to communicate. I thought it best to see you before I had an interview with Mrs. Barton."

"Whatever your news is, doctor, I must tell you that Mrs. Barton is now Lady Lynch; we were married two days ago."

"I know that; and that makes my news all the more terrible."

"You alarm me."

"I am alarmed myself, Sir Anthony.

TO REPEAL OLD SCOTS LAWS.

Quaint Enactments Against "Inglish men" and Football.

Entertainment is seldom to be had from a schedule of a British Parliamentary Bill, but 126 pages, containing the names of obsolete Scottish Acts from 1424 to 1707, which the Lord Advocate of Scotland wishes to repeal, supply at once a lesson in the Scots dialect and an amusing commentary on life in Scotland in the Middle Ages, and, indeed, down to the Union of the Parliaments.

The Acts in question have ceased to be of value because the state of things contemplated no longer exists, or by mere lapse of time. We quote the more interesting titles, with the date:

1424.—Of slaughter of salmonde in tyme forbodyne be the law.

1424.—Of strangeris that sellis merchandise in the realme and takis mone tharfor.

1424.—Of playing at the fut ball.

1424.—Anentis heretiks and lollardis.

1424.—Of waypnshawingis (archery, later, rifle meetings).

1428.—Anent the sawing (sowing) of quibete peis (white peas) and benis.

1427.—Anent lipper (leper) folk.

1436.—Tuching the selling of salmonde to Inglishmen.

1455.—That na Scottisman bring in the realme any Inglishmen.

1475.—Of courtis of guerre (war courts).

1487 (by an extraordinary misprint given in the bill "1847").—Of the execution of the act anent the cumin to Courtis in sobre and quiet wise.

1488.—That the Castell of Dunbar be destroyit.

1540.—That the army of Scotland be unhorsit except greit baronis.

1540.—For prenting (printing). Caxton was working at Westminster at the end of the preceding century) of the Actis of Parliament.

1567.—Anent the dismission of the Crowne (Mary's to James VI.).

1592.—Agains (against) Jesuites.

1593.—Anent the custume (customs duty) to be tane (taken) of Englishe beir.

1609.—Act anent the Egiptions (gypsies, cf. Barrie's "Little Minister").

1621.—Anent banqueting and apparell. The most frequent title in the series is "for the freedom of Holy Church" or a variation thereof.

MESSAGE BY THE BLIND.

In Japan They Alone May Give It—Are Taught in Special Schools.

All visitors to Japan will recall the sad, soft tones of the flutes at night, on the streets, in the country lanes, in forest glades and on the mountain paths. It is a melodious and plaintive tune, always the same, and it is heard only when night has enveloped these places in her shadows.

It is the flute of the blind Amma San, the message man and woman. From old men, hoary with age, to young girls in their teens, there they wander, the blind people of Japan. By law, strictly enforced, they must be blind, either from birth or through some fatality during their lives. Thus they gain an honorable living.

With perfect knowledge, gained by years of study in schools specially provided for them, they knead, twist and new string every nerve, sinew and tendon in the human body. In two hours time they will create a new being, masterly in their manipulation of the tired traveler, the exhausted debauchee, and the nervous hypochondriac, of the woman suffering from neuralgia, sick headache or the weaknesses of a languid mind and body.

They will take charge of your body from the head to the soles of your feet, and when their task is completed, they leave behind them a lingering sense of entire comfort, of placid well feeling, which makes you very soon feel them back again. Some of these girls are pretty and attractive and their helplessness gives them an additional charm. Their usual charges are forty sen per hour, in rural districts much less.

jected him to many reproaches from the chief of the synagogue. Father Ricci was able to test the truth of these statements, and despatched some Chinese Christian messengers to Kaifengfu for purposes of investigation, and soon received visits from other native Hebrews.

The condition of the Chinese Hebrews has been declining very fast since that time. A missionary in 1866 found them in an impoverished condition. They had been obliged to tear down a part of their synagogue to sell it. Finally, some thirty years later, a society for the rescue of these people was established, and in response to an urgent invitation eight Chinese Hebrews left Kaifengfu for Shanghai. They arrived in that city in March, 1902, where they were cordially received by the Hebrew colony. Questioned as to their observance of their ancient religion, these Hebrews admitted that their faith was rapidly declining. At present they do not observe any of the ordinances of the Hebrew religion, nor do they observe the idolatrous practices of the heathen. Many of them have been scattered, but there still remain to the seven clans about one hundred and forty adults. Their condition is so deplorable that they have no leader, no synagogue and no school for their children.

KING EDWARD'S GARDENS.

Takes Much Interest in the Growth of His Vegetables.

The King's fruit and vegetable gardens at Frogmore are probably the most complete in the world. His Majesty has had many improvements carried out. The shabby looking old fruit houses have been swept away and replaced by houses more roomy and suitable for fruit culture.

The King and Queen are very fond of the gardens at Windsor, and spend many hours there in the summer. Just before proceeding abroad, the King paid a visit to the gardens, motoring down from London for the purpose. His Majesty was taken through the gardens by one of the foremen, and inspected all the improvements that have been carried out. The King said he was delighted with what he had seen. He took tea in his private rooms at the head gardener's house. Butter and cream were obtained from the royal dairy, close by.

The favorite flowers of the King and Queen are mimosas, violets and roses, and special attention is paid to them.

Fresh vegetables are always ready to be despatched to the King and Queen, and daily from Windsor are sent to the royal palaces, when the court is in residence, grapes and other fruit and vegetables and flowers of all descriptions. Among the splendid tomatoes raised on the gardens is a favorite called "Frogmore Prolific."

Mr. MacKellar, his Majesty's head gardener has done wonders with the crops, and he has a most efficient staff under him, the foremen of the flower, fruit and vegetable department being all skilled men.

ALMOST.

Hewitt—I've had this suit four years. Jowett—Gee! You must have it nearly paid for by this time.

the leg. Very often due to consumption and will disappear with the use of a good purgative. If due to cold or damp small blister plasters along the course of the pain will often give great relief. Massage and exercise will do much to cure.

Chapped Hands.—In cold weather always carefully dry the hands after washing; never allow the moisture to evaporate; this is a cause of the trouble. Before going to bed rub hands well with boracic ointment, vaseline, cold cream or glycerine. Those who cannot afford medicaments will find a bit of mutton fat (uncooked) very effective. Draw on an old pair of gloves after anointing.

Cold Baths.—The man or woman with the moral courage to continue cold tubs through the winter will seldom suffer from colds. Avoid hot baths in winter, except just before going to bed. A hot bath opens the pores of the skin and if the body is afterwards exposed to a cold atmosphere, pleurisy, bronchitis, pneumonia, are likely to result.

An irritating cough is not always due to having a cold; it is very often a habit acquired during the period of having one, and afterwards is more of a nervous, reflex action. When you find you are getting into the habit of continually coughing—a dry, short, cough—try to check the inclination, and more often than not the local irritation in your throat will disappear and the cough with it.

Mustard Lotion.—This lotion is splendid for rheumatism, sprains, etc. Mix two ounces of mustard with half a pin of spirits of wine and two drams of camphor. Let it stand three days in a bottle carefully corked, then strain it off, and keep closely corked in a bottle ready for use.

Take Care of Your Eyes.—Don't face the light when reading or sewing. No matter if your eyes are shaded, the reflex rays strike from your book or from your sewing into your eyes. When you back is to the light the rays rebound away from you, not toward you.

Good for the Throat.—Every morning before dressing, sponge the neck, throat and chest with cold water, and rub in with a large bath towel; not only will this make you less liable to take cold but it will broaden the chest and fill out the unsightly little hollows. The throat also will soon become round and firm.

"A Quakeress," says a physician "never catches cold. Her immunity is due to her bonnet. If I had my way, all of us, women and men alike, would wear Quaker bonnets. This bonnet protects the back of the head and the nap of the neck, two very tender spots. The Quakeress' bonnet may not be beautiful, but protecting her nape as it does, it keeps her free from colds year in and year out."

LONDON ROMANCE.

Mother of Foundling Sends Pathetic Request to Guardians.

How often have writers of fiction based their plots upon some helpless foundling. Here is a pathetic case in which the Lambeth Guardians decide to arrange for the entrance into a home of an unknown babe, found on the doorstep of Mrs. Horford, of Hercules Road, Lambeth, London, England.

With the child were a tin of milk and a loaf of bread. There was also the following letter:—

Kind Friend,—Please be kind to my little boy. I am dying, and no one knows how I feel. It almost breaks my heart to part with him. If you won't take him in, please do not take him to the workhouse, but place him in a home. His father has died in Africa from dysentery.

I have spent my last shilling to get him his food. I shall end my trouble soon. God grant that someone may be kind to my pet and love him. He is a dear little lad.—From your broken hearted Edith Winton.

The guardians, after consultation asked one of the lady guardians to make arrangements for the admission of the child into a home.

Spring Beauties

A large variety of Children's Shoes in colors and black.

THE J. J. HAINES SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market. When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer chooses if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCKWHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade. A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,
16th January, 1906.

Burglary.

On Sunday night thieves broke into R. J. Wales' Stores and into M. W. Pruyne & Son's Liquor Store. At the Wales stores they secured a few cents in cash, a couple of pocket knives and made a lunch off some of the groceries. At Pruyne's they secured nothing of any value but smashed the interior of the safe and took away some papers. The burglars also stole a lunch from Mr. J. Stovel Sunday noon when the family were at church.

Item of News.

T. G. Raynor, the Ontario Representative of the Seed Branch, Department of Agriculture, Ottawa, and an inspector under the Seed Control Act, 1905, was in town on the 14th inst. in the interest of good seed for farmers. He is explaining the practical application of the Act to seed retailers, and is on the lookout for low grade seed of such a character as would be prohibited from being sold for seeding purposes by the Act.

He reports that the general quality of the seed being offered by the trade this year is much improved.

The Old Story.

"I have tried several opticians and paid dollars, and can see no better than before, in fact my eyesight is worse." Permit us to suggest that you try one more. If he expert optician in charge of our new optical department does not make you see as you have not seen for years, it will cost you nothing. We guarantee satisfaction. Eyes tested free. The Medical Hall.—Fred L. Hooper.

Coughs, colds, hoarseness, and other throat

There's a Reason for it.

Why does the sale of Ramsay's Paints (Union Brand) keep increasing year after year? There's a reason for it—We think it is the Quality, in fact we are satisfied it is. One gallon covers 300 square feet—two coats—and it is done up in handy packages for household use—Small cans 18 cents. Large cans 25 cents, and quart cans (imperial measure) 35 cents. Half gallon 70 cents.—Sole agent for Napanee.

MADOLE & WILSON.

Parish of Camden.

Easter Day was a Red Letter Day in the history of the parish. Two services were held at Newburgh at 6 a. m. and 7 p. m.; two at Yarker at 8.45 a. m. and 3 p. m. and at Camden East at 11 a. m. The floral decorations were in good taste at all the churches. The music was hearty and congregational, and the attendance excellent. A great many made their Easter Communion. The musical portions of the services were reflecting credit on both organist and choirs. A feature of the day was the splendid offerings made by the Sunday School pupils on behalf of Domestic Missions in the Northwest nearly \$25.00. The best in the history of the parish. The loose cash offering was in excess of last year. The special Lenten services were well attended this year.

American Field and Hog Fence, one of the best woven wire fences on the market. Would the parties who have our wire stretchers for this fence out kindly bring them in, we are in need of them. **MADOLE & WILSON.**

Vestry Meeting.

The Annual Vestry Meeting of St. Albans Church Odessa, was held on Easter Monday night. The financial statement was very satisfactory showing the receipts Thirty-four Dollars more than the disbursements. The last payment on the debt was made during the past year, so that the Church can now be consecrated at the Bishop's visitation in June.

R. Bennett and A. H. Shaw were re-appointed Church Wardens. W. Calder W. Dougherty and T. Graham were appointed Sidesman.

The Lay delegates are A. H. Shaw for three years, T. Graham for two years, F. F. Miller for one year. Perfect harmony prevailed throughout the meeting. A pleasant incident during the evening was the presentation to Mr. George Ferguson of a handsome Morris Chair. The presentation was made by Rural Dean Dibb, expressing the sincere appreciation of Mr. Ferguson's faithful labors for many years in acting as sexton without remuneration. Mr. Ferguson was completely taken by surprise and was much touched by this mark of the good will of his brethren. The usual votes of thanks followed by the benediction brought the happy meeting to a close.

The service on Easter morning was very bright and happy and well attended.

Austria Enamelled ware. Every piece perfect, no flaws or marks, warranted not to discolor, free from acids. The best goods ever imported.

BOYLE & SON. Agents.

BREAD is never better than the flour it is made of.

Often it is not nearly so good, but that is the fault of the bread-maker.

Without good flour, good bread is impossible, no matter how skilfully it is handled.

Now, good bread must be good to eat, as well as good to see or to taste. Good-to-eat bread is bread that nourishes.

In the matter of nutriment,

Royal Household Flour

is supreme. It represents the best that is in the wheat, ground to a snowy whiteness and purified by electricity.

It produces bread that is light, easy to digest and best of all—nutritious. Ogilvie's Royal Household is to be had at all grocers.

Ogilvie Flour Mills Co., Ltd.
Montreal.

"Ogilvie's Book for a Cook" contains 130 pages of excellent recipes, some never published before. Your grocer can tell you how to get it FREE.

New Store.

Mr. Fred Curry has moved his store from the Rennie Block to the Milligan Block next D. J. Hogan's store. Mr. Curry's new premises have been specially fitted up for the shoe business and makes a very neat and attractive store.

"Herpicide" guaranteed to cure Dandruff, stops hair falling, and prevents baldness, 10 cts. an application, at THE FLAZA BARBER SHOP A. WILLIS.

INSPECTOR'S REPORT.

Extract from the Report of Inspector Hodson on his recent visit to the Collegiate Institute.

GRADING OF ACCOMMODATIONS.

Water closets I, Water supply I, School grounds I, School buildings I, Class Rooms I, Halls I, Writing Rooms III, Cap Rooms I, Teacher's Private Room I, Desks I, Blackboards I, Lighting, Heating I, Ventilation I, Gymnasium II. The school premises are all well looked after by an efficient caretaker.

ORGANIZATION.

I—Ratio of pupils to teachers, slightly in excess of 33 to 1 which is considered somewhat too great.

II—Division of duties among teachers; Judicious.

III—Provision for teaching the classes; Good provision is made for all the classes that are taken up.

CHARACTER OF THE TEACHING.

English and History I, Mathematics I, Science I, Classics I, French and German I, Commercial I, Art I, Reading I, Drill, Calisthenics, Gymnastics I.

CHARACTER OF THE PUPILS' WORK.

I—Book-keeping Sets: Eminently satisfactory.

II—Work in Art: The success attending the introduction of painting is very gratifying.

III—Note-Books in Science: Excellent.

IV—Drill, Calisthenics and Gymnastics: Excellent.

SPECIAL REPORT.

This Institute will in my opinion be entitled to rank as approved.

GENERAL REMARKS.

This Collegiate Institute continues to be characterized by excellent organization and management and the methods of teaching in the various departments are in keeping therewith.

The attendance has overtaken the capacity of the staff, as well as of the accommodations, and consequently an addition to the former and an extension of the latter may soon be deemed necessary.

Ladies look Younger.

Which is the desire of one and all. Take the trouble of visiting Prof. Dorenwend's private show rooms at Paisley House, Napanee, on Friday, April 27th, and see many beautiful inventions in Styles of Human Hair Coverings, Wigs, Bangs, Switches, etc., and inspect his new patent structure.

bride received many handsome presents from her friends, testifying to her popularity.

Austria Enamelled ware. Every piece perfect, no flaws or marks, warranted not to discolor, free from acids. The best goods ever imported.

BOYLE & SON, Agents.

On Sunday Chief Graham arrested three Kingston youths named D. O'Rourke, Thomas O'Rourke and D. Flannagan for trespassing on the G. T. R. property. It seems these boys "rode the bumpers" to Napanee. A number of Kingston youths of late have been in the habit of doing this dangerous trick, much to the annoyance of the G. T. R. officials, who instructed the police to arrest everyone found so doing. The result was the three arrests on Sunday. The boys are aged thirteen and seventeen years. They were remanded to jail for a week and word sent to their parents. The Grand Trunk officials say that this dangerous practice of riding on the bumpers is indulged in by hundreds of young boys, and of late many accidents and deaths have resulted, and they are determined to put a stop to the practice. The lads were sentenced to twenty-one days in gaol.

MAKE OLD DRESSES NEW!

DIAMOND DYES

The Simplest and Easiest Way of Home Dyeing.

Their Great Superiority over all other ways of Home Dyeing—A Ten Cent package will Color from One to Five Pounds of Goods—Colors that Will Not Wash Out in Strong Soapsuds.

Success in home dyeing depends wholly upon the kind of dyes used. With Diamond Dyes, if the simple directions on the package are followed carefully, and the special dyes for cotton are used for cotton and mixed goods, and the wool dyes used for all-wool goods, there is absolutely no chance of failure.

Diamond Dyes are very simple and easy to use, and by using a stick to lift the goods while in the dye bath, there is no need of soiling the hands. For beauty, brilliancy and fastness, no other dyestuffs, whether for home use or for the dye-shop, equal the Diamond. The latest scientific discoveries are used in their manufacture, they are guaranteed the strongest and fastest of all known dyes, and will not wash out in the strongest soapsuds, nor will they fade when exposed to the sunlight.

Try Diamond Dyes once, and see how easy it is to make old and faded dresses, waists, ribbons, capes, jackets etc., look like new.

ATTENTION!

We have moved to our new store opposite the Royal Hotel and we are now prepared to serve our customers with all lines and and styles in

Men's, Women's and Children's Shoes,

and we solicit a trial order from you and we are sure you will be pleased. We also carry a fine line of

Truaks and Valises.

Where Circulation Is Feeblest.

Those who lead a sedentary life find the circulation feeblest about the nose, lips and temples, and those parts of the face should be energetically kneaded several times a day. When the pores become distended the fine, invisible dust in the air enters and clogs and blackens them. Mere ordinary face washing, even when warm water and soap are used, is not sufficient to remove the dirt in the pores, but the vigorous acid of the lemon will cleanse and carry off all such unsightly blemishes.

Care of the Feet.

The feet should be bathed at night, and this treatment is an excellent sleep producer. The water should be salted. The feet should be scrubbed all over with a nailbrush, which will often prevent the formation of corns, while hard spots on the soles may be reduced with a piece of fine emery paper or fine file before the feet are placed in water.

Not Evenly Matched.

"Have you anything to say why sentence should not be pronounced upon you?" asked the judge.

"Nothing, your honor, except that I hope you will make allowances for the fact that the lawyer who convicted me had a louder voice than the one who defended me."

Is one of the best friends that any family has, but there are often sudden and acute attacks of some painful disease that require im-

The Family mediate treatment, such, for instance, as rheumatism, neuralgia, lame back etc. Tuck's Rheumatic

Doctor Bone Oil makes the calling of the doctor unnecessary. It will give relief before he could answer the call, and it faithfully used will cure the most stubborn attacks of rheumatism, neuralgia, lumbago, pain in the chest or back, soreness, sprains, or strains. It is a powerful penetrating oil that goes straight to the seat of the trouble and roots out the cause. It relaxes the stiffened joints, soothes the affected part, and allays the inflammation which produces the torturing pain. It is therefore a valuable remedy not only for rheumatism and kindred diseases, but is equally good for croup, bronchitis and quinsy. One father writes that it cured his child of a violent attack of croup in five minutes. A mother writes that her boy was subject to quinsy and two or three times each year was confined to his bed and could not speak. When threatened with another attack this fall she rubbed his throat and chest with the Bone Oil and by three applications warded off the attack. The wonderful curative powers of this remarkable remedy are being talked about by everyone. A bottle should be in every home. For sale by all medicine dealers at 50c a bottle or will be sent on receipt of 50c. by the Tuck Bone Oil Co., Limited, Smith's Falls. Money refunded if not satisfied.

—FRIDAY, APRIL 27th 1906

AN INTERESTING LETTER.

Received from Mrs. Robt. Hogeboom
to Friends in Napanee.

SANTA ROSA, APRIL 19th, 1906.

Dear Ones All—

We are all alive, but Percy, we have not heard from him, but hear San Francisco is all burning up after this terrible earthquake. Yesterday morning at half past five I fell and rolled sixteen steps, oh! oh! bruised my body and hurt myself. My house stands, but the plaster is nearly all down.

I have sixteen people staying here. Mrs. Oscar Lapum and three children another family of four, the mother with broken shoulder. Allie, her husband and children. We cook in yard and sleep in drive house. There is not an hotel or business house of any kind here. The churches are morgues. I saw some of my dearest friends laid side by side, mother and son, husband and wife and little children in mother's arms.

Then the dreadful fire came and destroyed the living and dead. Oh, the awful cries of the poor imprisoned people will ring in my ears while life lasts.

The whole of California is destroyed. Hardly a Town escaped. I wrote to tell you so you can wire Fred and tell we are alive.

Oh, I sent Percy to the City, I fairly made him go, he hated to go. Oh, if he is dead I will never forgive myself. The richest man in town is poorer than me, and the bank that I had my little all in, is burned, and every other Bank in Town. The Hall of Records and Carnegie Library,—of solid stone, all gone.

I bear up well and cook for the lot, milk the cow and feed the little children.

We expect some shocks, but hope none will come. The relief corp sent us a sack of flour and some bread. We will trust in God and have courage. I hope you will get this, write at once.

Good bye, Good bye.

P. S. The Lord is dealing hard with me, but I must kiss the rod.

Painting White.

If you intend painting white either inside or outside, use Sherwin-Williams Gloss White. It will cover more surface, wear longer, remain whiter, and cost you less than any other white paint. It will not chalk off like Pure White Lead. Ask us for prices before painting. The Medical Hall.—Fred L. Hooper, Sole agent for Napanee.

OBITUARY.

WILLIAM AYLSWORTH.

Mr. Wm. Aylsworth, the oldest resident of Bath, passed away on Friday, April 20th. He retained all his senses until about six weeks before death, at this time both mind and body began slowly to fail and he passed away very peacefully on Friday morning. In his long life he saw the unimportance of all earthly gain, and was willing to trust in God for strength and comfort. He was one of the old veterans in the rebellion of 1837. He leaves one son, Lester, Bath, and two daughters, Mrs. White, Sillsville, and Mrs. Paris, Bath. The funeral service took place on Sunday, at his late residence, and was well attended, thus showing the respect in which deceased was held. Deceased was born in 1813, and was therefore 93 years old.

ATTEND THE BEST.

Ambitious young men and women who are

daughters, Mrs. White, Sillsville, and Mrs. Purvis, Bath. The funeral service took place on Sunday, at his late residence, and was well attended, thus showing the respect in which deceased was held. Deceased was born in 1813, and was therefore 93 years old.

MRS. WILLIAM KIDD.

The late Mrs. William Kidd, who departed this life recently, at her home near Erinsville, was born in the County of Wicklow, Ire., eighty-two years ago. The deceased and a younger sister, emigrated to Canada in 1849. The latter died soon after their arrival in this country. The late Mrs. Kidd, who was Miss Teresa Cavanagh, being possessed of a good education, engaged in teaching, as a means of earning a livelihood in her adopted home. During a period of nine years she taught in Chippewa, Croydon and Centreville. She was married to William Kidd at the Roman Catholic church, Camden in 1850. Mr. and Mrs. Kidd lived the early part of their married life on a farm three miles east of Enterprise. Twenty-three years ago, they moved on the farm occupied by the family in the neighborhood of Erinsville. That the deceased was beloved and respected by her friends and neighbors, was amply testified by the large number who attended her funeral. Summing up her character, it might be said, she was charitable, kind and unostentatious, as well as being a devout Christian. Mrs. Kidd is survived by her husband, her two sons Joseph and John, and two daughters, Mrs. James McKeown and Mrs. Wm. Murphy.

Mr. Wm. R. Fretts, one of South Fredericksburg's oldest and most respected residents passed away on Friday last after a short illness, aged 81 years. The funeral took place on Sunday.

Harvey Martin, of Camden Township, west of Selby, passed away on Friday last. Deceased was ill but a short time of pneumonia, and was well known and highly respected. The funeral took place on Sunday.

Morris Sills, Havburn, one of the old residents of that district, died, Friday, after a prolonged illness, aged about eighty years. Dr. N. J. Sills, of Napanee, is a son. Several daughters and two other sons survive. The funeral took place Tuesday.

Elite Enamelled ware, every piece perfect, new patterns. Guaranteed to be free from any poisonous acids.

BOYLE & SON.

The Town's Crooked Dividing Line.

"There is a reason for most everything," said a Cumberland county man when he was asked how in the world they came to have such a crooked line between two towns in his county. "There's a reason for this crooked line. You see, some of our towns established in pioneer times, when land was abundant and people were few, had a big territory, which was afterward sliced off to make new towns. It was so in the case you mention, and when the cut off was made people along the line of division were of different minds as to which town they wanted to be in. So the legislature drew a straight line between the two parts and then provided that persons dwelling on lands adjoining either side of this line might be in one town or the other, as they should decide within ninety days after passing the act. Some went one way and some the other, and the line was all skewed up to accommodate them."

THE GRAND TRUNK RAILWAY SYSTEM.

This pioneer and popular railway of Canada can now boast of the longest double track railway in the world under one management, its main line being double tracked from St. Johns, Que., to Niagara Falls and Chicago. It has the finest road bed in Canada over which some of the fastest long-distance trains in the world are operated. The "International Limited," running between Montreal and Chicago, has become known as the "Railway Greyhound of Canada" and the finest and fastest train in the Dominion.

Four express trains each way daily except Sunday and two fast limited trains each way daily are operated between Montreal and Toronto. Modern and luxurious trains with Cafe parlor and library cars on day trains and Pullman sleeping cars on night trains.

"George, did you know that I was going to marry your sister?" "Well, I heard her say so, but she's had that idea about so many other fellows, that I didn't feel sure about it till you told me."

Piles — Itching, Blind and Bleeding
Cured in three to six nights. Dr. Agnew's Ointment is peerless in curing. One application gives instant relief. It cures all itching and irritating skin diseases, Chaffing, Eczema, etc.

COULDN'T BLAME IF WEREN'T.

"Are these new-laid eggs?" asked the customer.

"Yes'in. They're our very best Saturday night eggs," replied the grocer.

"Why do you call them that?" questioned the puzzled buyer.

"Because," answered the truthful storekeeper, "they've been trying all the week to be good."

A SPRING DANGER.

**Many People Weaken Their Systems
by Dosing With Purgative
Medicines.**

A spring medicine seems to be a necessity. Nature demands it as an aid to enriching the blood and carrying off the impurities that have accumulated during the indoor life of the winter months. Thousands of people, recognizing the necessity for a spring medicine, dose themselves with harsh, gripping purgatives. This is a mistake. Ask any doctor and he will tell you that the use of purgative medicines weakens the system and cannot possibly cure disease. In the spring the system needs building up—purgatives weaken. The blood should be made rich, red and pure—purgatives cannot do this. What is needed is a tonic, and the best tonic medical science has yet devised is Dr. Williams' Pink Pills. Every dose of this medicine actually makes new, rich blood, and this new blood strengthens every organ and every part of the body. That is why these pills banish pimples and unsightly skin eruptions. That is why they cure headaches and backaches, rheumatism and neuralgia, and a host of other troubles that come from poor, watery blood. That is why the men and women who use Dr. Williams' Pink Pills eat well and sleep well and feel active and strong. Mrs. Albert E. Sampson, L'Ardoise, N. S., says: "I have used Dr. Williams' Pink Pills with the greatest benefit. I know of no medicine that can equal them in building up people who are weak or run down."

When buying these pills see that the full name, "Dr. Williams' Pink Pills for Pale People," is printed on the wrapper around the box. You can get the pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

A QUESTION OF LOCATION.

The Advocate—Where did the defendant kiss you, mademoiselle?

Pretty Plaintiff—On the lips, sir.

No, no, you don't understand. I mean where were you when he kissed you?

Pretty Plaintiff (blushing)—In his arms, sir.

KAI WANG;

**A TALE OF SOUTHERN
CHINA.**

CHAPTER I.

A pagan procession, carrying the inevitable yellow dragon at its head, and winding in and out through the streets of Canton, in Southern China, blocked the passage of a gaudy palanquin that had been advancing from the European island section as rapidly as the ability of the two coolie bearers and the crowded condition of the narrow thoroughfare permitted.

The rich folds of golden silk drapery were drawn aside impatiently, and the face of an American woman appeared as she surveyed the grotesque figures of those who paraded. Though handsome and resolute far beyond the ordinary, this countenance just at present betrayed more of anxiety and secret grief than any other emotion.

Indeed, it required more than passing bravery to thus venture alone into the native section of the great city, where teeming masses of moon-eyed Chinese hustled for a meagre living day after day, and filled the air with their chatter, together with the constant racket of exploding firecrackers, under the delusion that the more noise the better their chance of exorcising the evil spirits that hang constantly around, desirous of even occupying a share of the graves with the dead. At another time perhaps the picturesque and even ridiculous character of the masqueraders who trooped along behind the sign of the yellow dragon, each endeavoring to appear more hideous than his fellows, might have appealed to the artistic temperament of the brave-hearted lady who occupied the bamboo palanquin; but her mind was at present so filled by serious doubts and fears that it made little impression on her, beyond the feeling of annoyance at having her progress temporarily delayed.

Even Chinese processions must have an end, and finally, discovering an opportunity to proceed, the lady urged her coolies to push into the crush; and then, suddenly realizing that she had become the cynosure of many eyes that beamed with interest or looked daggers, according to the individual temperaments of the beholders, she allowed the silken curtain to fall into its place.

One man, who was a foreigner, and to judge from his red face and stalwart figure, an Englishman beyond all peradventure, stood where he chanced to find himself at the time, and stared after the palanquin that bobbed up and down in the midst of the native masses filling the street.

"By Jove! that is strange—an American lady in this melee, and unattended! Who is she, and what does she seek! And something tells me I have known her, though when and under what conditions I can't quite remember. I'm half inclined to follow and find out. But that's an impossibility now, with the howling, chattering mob between. I feel deuced queer—as though the old spirit of romantic adventure were cropping up again, that takes me to the past. Can it be possible the sight of a face—her face—has opened wide the gates I had thought forever closed? Why should this be so? What one woman on earth has ever dominated my career to the extent of—Great Heavens! now I know; now I remember! What woman would dare the perils of this wicked, heathen city of Canton save that brave, dauntless soul who faced the Chilian colonel in the cab of the wild-cat engine running to New York, and

grotesque collection was quite enough to make even the most valiant of men hold their breath with momentary awe.

A thousand such emissaries of Confucius, or Buddha, or any other dignity of the heathen faith, could not hinder this resolute woman from pushing forward along the line she had marked out.

The proprietor of the shop had appeared by this time, and turned out to be a man of more than ordinary intelligence, if one might judge from his features; though, of course, the small, cunning eyes peculiar to Chinamen gave him a shrewd air, as became the renowned position he filled.

Evidently Kai Wang cared little who made the laws for his blessed country so long as he was allowed, by favor of the great Li Hung Chang, or perhaps the imperial ukase of the secretly powerful Dowager Empress, to carry on the profitable business of supplying his fellow-Celestials with their grand public and lesser favorite household gods.

As soon as Avis beheld him she knew he was friendly to her race, a rare anomaly among Chinamen; perhaps Kai Wang, having himself manufactured so many thousand heathen gods, knew only too well of what base material they were constructed, together with the hollow mockery by means of which the cunning priests of the ancient faith manipulated the six arms of the great temple idols, forced their eyes to roll violently, spat fire from their mouths, and caused them to roar so frightfully that worshippers fell prostrate and trembling at their feet, ready to pay heavy tribute in order to cool the deity's anger. Yes, familiarity breeds contempt, and even Kai Wang may have turned with loathing from the miserable creatures fashioned with his own hands, to find respect in the faith of the white strangers.

He spoke fair English, which fact might have given rise to considerable suspicion among his customers, could they have been present to hear, for to their bigoted ears no sound on earth is considered more detestable than the execrated language of the "foreign devils," or fanquay.

In the usual Chinese style, where fulsome flattery is a part of every-day intercourse among even the most humble tradesmen, Kai Wang, bowing and rubbing his hands together, began to compare his lovely visitor to the moon and the stars that glittered in the constellations of the heavens; when Avis, with an impatient gesture, cut him short, and held out her hand to him in a frank, engaging way that quite won the old idol maker's heart.

"You are a friend of my cousin Larry—he sent me word to that effect—and you will be my friend as well, good Kai Wang; I know it, and expect it."

"Your slave, celestial creature," murmured this remarkable heathen, with a salutation that outdid all its predecessors.

"Then take me to him, if he still lives and has recovered from his serious wounds. I am well-nigh crazed to see him, to hear from his lips the terrible story of how my poor Jack fell a victim to the treacherous men in whom he had trusted his fortunes and his life."

There was that in her voice and manner to compel obedience; some people seem born to command others to obey.

The maker of heathen gods smiled and bowed, and meekly asked her to forgive him the gross demeanor of go-

—Fishes, Biting, Biting and Biting.
—Cured in three to six nights. Dr. Agnew's Ointment is peerless in curing. One application gives instant relief. It cures all itching and irritating skin diseases, Chafing, Eczema, etc. 35 cents.—143.

A slip of the tongue is often more disastrous than a slip of the foot.

Ill fitting boots and shoes cause corns. Holloway's Corn Cure is the article to use. Get a bottle at once and cure your corns.

It is perfectly proper to carve out your own fortune, but you should not chisel other people in doing it.

It Lays a Stilling Hand on Pain.—For pains in the joints and limbs and for rheumatic aches, neuralgia and lumbago, Dr. Thomas' Electric Oil is without a peer. Well rubbed in, the skin absorbs it and it quickly and permanently relieves the affected part. Its value lies in its magnetic property of removing pain from the body, and for that good quality it is prized.

Between an ordinary cold and the grip the difference is the size of the doctor's bill.

NO DIFFERENCE

No distinction is made as to the kind of Piles that Dr. Leonhardt's Hem-Roid cures. The names Internal, External, Bleeding, Itching, Suppurating, etc., are simply names of the different stages through which every case will pass if it continues long enough.

Piles are caused by congestion or stagnation of blood in the lower bowel, and it takes an internal remedy to remove the cause.

Dr. Leonhardt's Hem-Roid is a tablet taken internally.

It is a permanent cure and no case of Piles has ever been found it failed to cure. Money back if it does.

A guarantee with every package. Price \$1.00 at any druggist's, or the Wilson-Fyle Co., Limited, Niagara Falls, Ont. 2

Two thousand uninhabited islands lie between Madagascar and the Indian coast.

"Love Laughs at Locksmiths" as South American Kidney Cure laughs at disease. It's the seemingly impossible to disengage that it unlocks that makes its cures almost incredible. But for every cure there is a proof if you care to investigate. It is a liquid remedy and it never fails. Makes and keeps men "fit" and well.—142

Statistics show that the sooner a man allows his wife to have the last word the sooner the controversy will end.

SCALD HEAD is a disgusting and obstinate disease, frequent in children. Treatment: Perfect cleanliness and a generous application of Weaver's Cerate. Mothers will be glad to learn this.

A COWSLIP.

"Oh," cried the sweet young thing from the city, as they passed a herd of young cowlets, "look at the cute little cowlets."

"Don't be silly," said the man. "Those are cute little bullets."

SAFE GUARD THE CHILDREN.

There is no telling when a medicine may be needed in homes where there are little ones. Therefore, the prudent mother will always keep a box of Baby's Own Tablets on hand. These Tablets promptly cure indigestion, colic, sour stomach, constipation, diarrhoea and teething troubles. They break up colds, prevent croup, expel worms, and give the child sound natural sleep. Mothers have the guarantee of a government analyst that these Tablets contain no opiate or poisonous soothing stuff. Mrs. J. C. Gildart, Prosser Brook, N. B., says: "Baby's Own Tablets are like magic when a little one is ill, and I would not feel safe without a box in the house." You can get Baby's Own Tablets from your medicine dealer or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

WELL TRAINED.

"Do you think my dress is long enough behind, Jack?"

"Oh, plenty, dear. Any microbe that can escape that isn't worth catching."

Bickel's Anti-Consumptive Syrup is agreeable to the taste, and is a certain relief for irritation of the throat that causes hacking coughs. If used according to directions it will break the most persistent cold, and restore the air passages to their normal healthy condition. There is no need to commend itself to you by its name, as you know of it who seek a sure remedy and are in doubt what to use, the advice is—try Bickel's Syrup.

MIGHT IMPROVE IF BOTTLED.

"My daughter is just full of music," said the fond parent.

"What a pity she lets it escape," said the neighbor.

South American Nervine makes the whole system radiant in perfect health. It accelerates circulation, enriches the blood, penetrates to the very centres of nerve force, builds tissue, makes and keeps people well. This wonderful remedy has had a charmed experience and has done its greatest work in cases that the medical fraternity had pronounced hopeless.—140

Edgar: "Well, Ethel, what did you find at that wonderful fire sale?"
 Ethel: "Oh! Edgar, I got some lovely silk stockings at ten cents a pair! There is not a thing the matter with them except the feet are burnt off!"

WEAK WATERY BLOOD causes much trouble. That tired feeling and many more symptoms follow in its wake. Try "Ferrovin." It is the best tonic to make you strong and well. All druggists sell it.

Beauty is said to be only skin deep, but many a woman's beauty depends upon the size of her bank balance.

If your children are troubled with worms, give them Mother Graves' Worm Exterminator; safe, sure and effective. Try it and mark the improvement in your child.

RECOVERING A LOST INDUSTRY.

At Thornham, in Norfolk, England, the schoolmaster has taught the village lads the art of hand-wrought ironwork to such purpose that this small place promises to recover a lost industry for England. Skilled London artists now send their designs to Thornham for execution rather than abroad, while the King has been one of the first to recognize the merits of the work that is done. The schoolmaster acts as manager in the unique movement.

UNDER ORDERS.

The Irish trooper's horse bolted down the line with him and as he passed the general called out: "Here, you fool, where are you going?"

Paddy, with his arms around the horse's neck, yelled back: "I dunno, yer honor, ask the horse."

Wens! now I know: now I know! I remember! What woman would dare the perils of this wicked, heathen city of Canton save that brave, dauntless soul who faced the Chilian colonel in the cab of the wildcat engine running to New York, and defied him to secure the papers she carried? Yes, hang the luck! now I know, when it is too late to follow, that the lady in the palanquin was Avis, Dr. Jack's wife!"

While the big Briton thus held communion with himself the coolies had made fair progress in the wake of the procession, for since the curtains were drawn the populace dared offer no indignity lest the vehicle of transportation contain a dignitary in the shape of a high mandarin—mayhap a wearer of the illustrious peacock feather—who would visit condign punishment upon them.

In and out they wound, always surrounded by the crowd with its shrill chatter, its everlasting rattle and roar of firecrackers and such other hideous noises as the ingenuity of pig-tailed Celestials could invent, passing deeper into the heart of the mysterious city, where Europeans seldom strayed lest violence overtake them.

Finally the steady coolies, who seemed faithful to their trust, having been bound by gold or the subtle magnetism of a woman's smile, turned into a side street where something of peace and quiet might reasonably be expected, if a fragment of such heavenly bliss can be discovered in any Chinese city, day or night, year in and year out.

At least there was relief from the ear-splitting rattle and bang of metal gongs, pounded with a vigor only equaled at our railway stations, and for this the tortured tympanums of the lady in the palanquin were doubtless deeply grateful. Peeping out through the narrow interstice between the flowing curtains, she eagerly watched their progress, while showing signs of nervousness which were certainly excusable under the intense strain to which she had been subjected.

Suddenly the coolies came to a halt. They were in front of a thatched building that did not differ to any great extent from the scores of others along the street.

Could Avis Evans have read the sign that hung by the door, she would have known that the occupant filled a very exalted and responsible position in the Kingdom of Everlasting Peace, since he was, forsooth, a builder of the deities worshipped in every pagoda and humble home in China—a maker of gods.

One of the coolies, who understood English to a considerable extent from years of association in Hong Kong, now came to announce the arrival at their destination, the abode of Kai Wang, the idol manufacturer, whose gods exceeded all others in the excellence of their workmanship, even as his prices were lower than rival dealers in pet deities.

Avis had not waited for this announcement; she was already on her feet and out of the now lowered palanquin, for the eagerness of a great anxiety, of love and fear, urged her on.

Thus she was ushered into the little Chinese shop where the maker of the heathen gods kept on exhibition samples of his remarkable work.

Doubtless to the average Chinaman these hideous monsters may be and are objects of veneration; he worships in them the spirits of his ancestors, and, viewed in that light, they may even appear visions of beauty to his distorted sight; but in the eyes of a European or an American they are about as diabolical and piratical a collection of monstrosities as it ever entered the mind of mortal to conceive.

When Dr. Jack's wife entered this humble and ill-smelling shop, she was at first almost paralyzed by the grinning and frowning gods that surrounded her—some with one, two or even three heads.

Being a woman in a thousand, however, and brave beyond the average of her sex, Avis quickly recovered; naturally, she held such objects in supreme contempt, and might have viewed the ugliest idol of them all with indifference, though to run into such a

There was that in her voice and manner to compel obedience; some people seem born to command others to obey.

The maker of heathen gods smiled and bowed, and meekly asked her to forgive him the gross demeanor of going before, he so unworthy in the presence of such divine beauty.

As he moved off he continued these compliments; few women of the far West ever listened to such gorgeous flattery, but it fell on deaf ears, for Avis was eagerly peering beyond the hanging curtain, anxious to catch the first glimpse of that messenger who alone could solve for her the mystery of Dr. Jack's strange disappearance in the heart of China.

CHAPTER II.

The obsequious Cantonese led her through several quaint apartments, given up almost wholly to manufacturing purposes, and at length, brushing aside a wonderful portiere of reeds and colored beads, ushered his guest into the living part of his domicile.

Some one sprang up from a divan and looked eagerly at her—some one who immediately gave utterance to an ejaculation of supreme delight, and, stepping forward, proceeded forthwith to embrace her with warm, cousinly enthusiasm.

The little man was Larry, just as chipper, apparently, as of yore, when he stood by Dr. Jack so loyally during the latter's strange adventures in Spain, Turkey and China.

Avis was considerably shaken by this meeting with the New York dude; still, she bore herself in a manner that was little less than astonishing, considering the grewsome nature of her hasty visit to China.

"You look pale, Larry; you have suffered greatly; but I am so rejoiced to be able to find you alive! God knows it is bad enough, as it is, but it might have been even worse," she said, looking him tenderly in the face with burning eyes.

He flushed with pleasure; it was worth something to know that his existence was a matter of some consideration in the mind of this beautiful and brave woman.

Avis looked around to thank Kai Wang for his kindness; but that astute individual, doubtless recognizing the fact that the space he occupied was of more value than his presence, had dropped the hanging screen and returned to his idols.

Larry Kennedy had not changed an iota in the years that had flown; he was the same consequential little individual whose importance was not to be measured by inches, and whose bravery in the hour of danger was on a par with his rare diplomacy.

He even maintained the identical feeble little yellow puffy side-whiskers at which he was wont to tug desperately when in need of an idea or in sore straits; no one but Larry himself knew what a wonderful safety valve those same small tufts had been at various crises in his later life.

He certainly showed signs of having recently passed through a severe experience; one of his arms still rested in a silken sling, and there were a number of contusions upon his face that could hardly be called healed.

"Be seated, cousin. You have come a long way, and had an awfully tough voyage, I know," was the way he began.

"Your cable started me on the next steamer. I had your letter at Singapore, and understand a considerable part of the calamity," she said.

Larry's eyes were fastened on her curiously, admiringly; he knew this rare woman adored her husband as few wives might, and that her present composure could only be explained by reason of the wonderful control she exercised over her natural feelings.

Larry had long ago found out that "still waters run deep," and he had a secret contempt for noisy exhibitions of grief.

It was not the first time, by long odds, that this same Larry Kennedy found occasion to desperately admire the nerve of his fair cousin.

"I am glad of that, Avis, since it

NO MISTAKE ABOUT THIS CASE

**DODD'S KIDNEY PILLS CURE A
YOUNG MAN WHO HAD REACH-
ED A VERY CRITICAL STAGE
OF KIDNEY DISEASE.**

**His Case Was More Serious Than He
Thought, But Thanks to Dodd's Kid-
ney Pills He is Well and Strong
Now.**

St. Leolin, Glo. Co., N. B., April 16—
(Special).—Mr. Patrick Downing, of this
place, is a young man only twenty
years of age, but some time ago kidney
disease had him firmly in its grip and
had it not been for Dodd's Kidney Pills
he would probably not have been alive
to-day.

"I think the cause of my trouble was
overwork," says Mr. Downing, "any-
way it began with a heavy dragging
pain in my back and across my loins.
Then I was subject to headaches, cramp
in the muscles, dizzy spells and weak-
ness till I felt fit for nothing. But the
worst symptom of my case was when I
noticed my urine was streaked with
blood, then I knew that my kidneys
were affected. Hearing of Dodd's Kid-
ney Pills I sent for some and I am
pleased to say the pains have all gone
since using them and I am well and
strong as ever I was."

breaks the ice and gives me a start in
the horrid business. Heaven knows I've
wished a dozen times, dear coz, that
Dr. Jack and I had given in to you
when we last talked it over, and al-
lowed the great Chinese puzzle to drop;
but he had reason to believe it was a
chance in a lifetime to make millions,
and secure a concession. Alas! the
pitcher may go once too often to the
well."

Larry was a philosopher in his way,
but this generally happened after some
doleful event had transpired, and when
his spirits, usually so light and airy,
had sunk below the zero mark.

In all his exceedingly checkered
career the little man had never felt so
lugubrious as now, when the conscious-
ness rushed over him that he had lost
the bravest and most devoted of friends
when Dr. Jack yielded up the ghost,
owing to Chinese treachery and schem-
ing for a throne.

And if his grief were so overwhelming,
what of Avis, who had lost the partner
of her happy married life, the hero of
her romance, the best of husbands?

"Now, tell me the facts you only hinted
at in your letter. I am nerved to hear
anything, cousin, so keep nothing back.
First of all, tell me, is there no hope
whatever?"

He saw her eager eyes fastened upon
his face, and, although he would have
given all he owned, and all he ever
hoped to possess, for the privilege of
making a favorable answer, the cruel
facts would not permit.

"None," he groaned.
Her face seemed to turn a shade
whiter, but she still maintained that
wonderful self-possession.

"You saw him fall—you were at his
side—and yet you have survived?"

"That is true, Avis; but the circum-
stances were different. Jack was struck
down in the midst of the heathen, and
I saw a dozen of the Black Flag hire-
lings jump forward with upraised
swords while I was being dragged off
the field by Kai Wang, prince of good
fellows, who was deeply concerned in
our business enterprise."

"Yes—go on," said Avis, and if she
trembled at hearing these dread particu-
lars of Dr. Jack's fate, she gave no sign.

"I shall conceal nothing from you,
since you are so strong and have al-
ready made up your mind to accept the
worst. Yes, I even heard the horrid
shouts of triumph that my conductor
told me the Black Flags always raised
when they had dispatched their enemy,
and I knew the worst had come to Jack

that—not because I am unwilling to risk
my poor life again in your service, and
lose it if I need be, but you little know the
terrible danger involved, and what in-
fluence it was that brought about our
undoing," he ventured.

"Suppose you inform me, then—that is
one of the first things I desire to know."

Larry was not equal to the strain of
holding out against such a strong na-
ture; as usual, when he attempted it,
the failure was ignominious.

"Perhaps you are right—it is only
proper you should know, and sooner or
later it was my positive intention to tell
all. Since you insist upon knowing
now, I can only obey your wishes under
a feeble protest.

"You know what a singular business
it was that took us to Peking. By Jove,
we had to see so many exalted man-
darins and persons high in authority, it
made my head swim, ducking and bow-
ing before them all.

"This had to be done secretly, too, for
there was a rival syndicate endeavoring
to get hold of the same concession, and
several times we ran up against the
Russian nabob who was at the head of
it.

"We examined mines far out in the
country; we travelled over hundreds of
miles where the railroad was to be laid;
we had many narrow escapes from in-
furiated natives, until, by Jove, I de-
spaired of ever seeing dear old Piccadilly
again.

"Then came the last act in the drama,
which we thought would wind up the
business—it did, too, but in a way we
little expected.

"You see, it became absolutely neces-
sary for us to secure a personal audi-
ence with the Emperor, and have him
affix his seal to the documents in order
to make the grand transaction legal ac-
cording to Chinese law.

"Now, it has been almost impossible
at any time for a foreigner to gain a
personal interview with the weak Em-
peror, because he is always kept se-
cluded in the palace in the Forbidden
City, which, you know, is situated in the
heart of that great, swarming hive of
humanity, Peking, surrounded by high
walls, deep, mysterious moats filled
with stagnant water, and guarded day
and night by imperial troops, among
whom it seems as a detachment of the
famous mountain clans of Southern
China, those desperate fighters who
gave the French so much trouble in
Tonquin, and are notorious throughout
the East as the piratical Black Flags.

"Well, if it was hard to obtain an
audience with the Emperor in the past,
you may be sure it is ten times more
difficult now." Of course, you have read
that the remarkable woman of China,
known as the Dowager Empress, has
again resumed the reins, banishing the
great Li Hung Chang from court, de-
priving him of his peacock feathers and
giving him the task of engineering the
projected improvements in the Yellow
River valley, so that the annual inun-
dation may perhaps be avoided, which
task is given simply to keep him at a
remote distance while great events are
transpiring at headquarters.

HOTEL TRAYMORE ATLANTIC CITY, NEW JERSEY

lars of Dr. Jack's fate, she gave no sign. "I shall conceal nothing from you, since you are so strong and have already made up your mind to accept the worst. Yes, I even heard the horrid shouts of triumph that my conductor told me the Black Flags always raised when they had dispatched their enemy, and I knew the worst had come to Jack before I lost my own senses."

"Still, you could not swear you knew him to be dead; your own eyes did not see him dead?" she asked, clinging desperately to a last straw.

"I did not, but Kai Wang heard afterward, ere we left Peking, that it was true; he even managed to secure several things belonging to Jack which he had reason to believe I might care for. Of course, they are at your disposal, cousin."

Then a look of despair appeared in her brave, blue eyes; evidently she had allowed herself to build frail hopes upon desperate chances, which Larry's declaration dashed to the ground.

"I fear I must make up my mind to the worst, but it is very hard to believe it. You know what chances he took in the past, and how his own gallant spirit, aided by the smiles of fortune, always carried him through the worst of perils. I have journeyed half way around the world to learn the truth, and nothing will satisfy me but the most positive evidence. You remember the experience of my own brother Aleck, shut up so long in a Turkish dungeon and rescued by Jack; I could never have one minute's peace if the faintest shadow of a doubt remained. Not that I fail to believe your story, dear Larry, faithful Larry—a dreadful fear assails me that even now I am not a wife, but Dr. Jack's forlorn widow. Yet I have solemnly vowed never to leave Chinese soil until I have myself verified every fact, and assured my hungry soul there is not even the faintest shadow of hope remaining."

She said this with the positive manner he knew of yore, and there was an expression of determination upon her face that no combination of dangers might daunt—an expression that gave Larry a feeling akin to mingled awe and admiration, not unmixed with alarm, as he remembered the awful perils such a resolution on her part might bring upon her head. Larry had been through the mill himself, and could speak as with authority, so that the bare possibility of Avis' venturing upon that forbidding path quite appalled him.

"Cousin, I am sorry to hear you say

If a Cow gave Butter

mankind would have to invent milk. Milk is Nature's emulsion—butter put in shape for digestion. Cod liver oil is extremely nourishing, but it has to be emulsified before we can digest it.

Scott's Emulsion

combines the best oil with the valuable hypophosphites so that it is easy to digest and does far more good than the oil alone could. That makes Scott's Emulsion the most strengthening, nourishing food - medicine in the world.

Conceited Young Man: "I wonder why that young lady over there looks at me so much?" Sarcastical Young Lady: "She has weak eyes, and the doctor told her to relieve them by looking at something green."

A Sure Cure for Headache.—Bilious headache, to which women are more subject than men, becomes so acute in some subjects that they are utterly prostrated. The stomach refuses food, and there is a constant and distressing effort to free the stomach from bile which has become unduly secreted there. Parmelee's Vegetable Pills are a speedy alternative, and in neutralizing the effects of the intruding bile relieves the pressure on the nerves which cause the headache. Try them.

What is merely caution is often mistaken for morality.

Faith

You cannot be expected to have faith in Shiloh's Consumption Cure, the Lung Tonic, as a cure for Colds, Coughs and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. If it doesn't cure you it costs you nothing. If it does it costs you 25c. That's fair. Try it to-day. Shiloh has cured many thousands of the most obstinate cases, and we do not hesitate to say that it will cure any Cold, Cough, Throat or Lung trouble. If we did not believe this we would not guarantee it. Shiloh has had an unbroken record of success for thirty years. It has stood every possible test without failure. Further

Proof

is found in the many testimonials of those who have tried Shiloh and been cured. Mrs. Archie Taylor, Asaph, Pa., writes:—"I bought a bottle of Shiloh's Consumption Cure and found it very beneficial. I have two children, and they had a terrible cough. I gave them everything I could think of, but they got no better until one evening my husband brought a bottle of Shiloh. We gave it to the children when they went to bed, and they slept all night. It cured them completely. I shall always keep it in the house."

When Writing Mention This Paper

KING'S CURE FOR DRUNKENNESS.

Dr. T. G. Pinches, speaking at the University College, London, the other day, on the Assyro-Babylonian antiquities at the British Museum, quoted the following inscription, which appears on one of the monuments: "The eggs of an owl given for three days in wine bring on a drunkard's weariness. The dried lung of sheep taken beforehand drives away drunkenness. The ashes of a swallow's beak ground up with myrrh and sprinkled in the wine which is drunk will make secure from drunkenness. Horus, King of the Assyrians, found this out."

It Retains Old and Makes New Friends.—Time was when Dr. Thomas' Electric Oil had but a small field of distribution, but now its territory is widespread. Those who first recognized its curative qualities still value it as a specific, and while it retains its old friends it is ever making new. It is certain that whoever once uses it will not be without it.

Mamma: "What would my little girl do if mamma should go away?" Little Flora: "I don't know. I suppose I'd have to try to box my own ears myself when I was naughty!"

THE CALIFORNIA DISASTER

A Scene of Desolation and Ruin in San Francisco.

A despatch from San Francisco says: Of the scenes that marked the transformation of this, the gayest, the most careless city on the continent, into a wreck and a hell, it is hard to write. That the day started with a blind general panic goes without saying. People woke up with a start to find themselves foundering on the floor. In such an earthquake as this it is human instinct to get out of doors, away from falling walls. They stumbled across the floors of their heaving houses to find that even the good earth upon which they placed their reliance was swaying and rising and falling, so that the sidewalks cracked and great rents opened in the ground. The three minutes which followed were an eternity of terror. We learn here of at least two people who died of pure fright in that three minutes when there seemed no help on earth or Heaven. There was a roar like a great burst of thunder, and from all about came the crash of falling walls. It died down at last, leaving the earth quaking and quivering like jelly. Men would run forward, stop as another shock, which might be greater any moment, seemed to take the earth from under their feet, and throw themselves face downward on the ground in a perfect agony of fear.

FOUND THEIR VOICES.

It seemed to be two or three minutes after the great shock was over before people found their voices. There followed the screaming of women, beside themselves with terror, and the cries of men. With one impulse people made for the parks as far as possible from falling walls. These speedily became packed with people in their night clothes, who screamed and moaned at the little shocks which followed every few minutes. The dawn was just breaking, but there was no other light, as the gas and electric mains were gone, and the street lamps were all out. But before the dawn was white there came a light from the east, the burning warehouse district. The braver men, with no families to watch over, struck out to help. They were in the early morning light able to see the business district of the city burning before them. From every direction came the fire engines, called from the outlying district by the general alarm rung in by the assistants of the dead chief.

CHINESE IN A FRIGHT

The spur of the quake ran up the hill at which Chinatown is situated, and shook down part of the crazy little buildings on the southern edge. It tore down, too, some of the Italian tenements. The rush to Portsmouth Square went on almost unchecked by the police, who had more business elsewhere. The Chinese came out of their underground burrows like rats, and tumbled into the square, beating such gongs and playing such noisy instruments as they had snatched up. They were met on the other side by the refugees of the Italian quarter.

The panic became a madness. At least two Chinamen were taken to the morgue dead of knife wounds, given for no other reason, it seems, than the madness of the panic. There are ten thousand Chinese in the quarter, and there are thousands of Italians, Spaniards and Mexicans on the other side. It seemed as though every one of these, together with the riff-raff of the Barbary coast, made for that one block of open land. The uncontrolled streams met in the centre of the square and piled upon the edges. There they fought all the morning until the troops restored order with their bayonets.

BANKS REMOVE GOLD.

These had been dragged out from the ruins of their house, on the water front.

As the day wore on, and the wind changed, the fire along the water front burned itself out, and ran on further down South Market street. Except for the fire the city is in darkness. The refugees coming over late report that the parks are filled with people sleeping out of doors, under guard of the troops.

SAN FRANCISCO IS GONE.

Unless all information is greatly exaggerated there remains nothing left of the city except outlying suburbs, a few blocks on the water front and a narrow district of middle-class residences lying along Golden Gate Park. No American city was ever so nearly destroyed as this, and outside of the earthquake the fire is probably the greatest in American history. The city has a population of more than 400,000 people. Not more than one-fourth of these can have escaped to Oakland or the peninsula, and at least 300,000 people must be homeless in the parks or the Presidio military reservation. All the hospitals except the free City Hospital have been destroyed, and they have been dragging the injured, sick and dying from place to place of safety all day Thursday. A late report by a Western Union wire direct from San Francisco confirms the despatch which Gen. Funston sent to the War Department early on Thursday evening. He said then that the flames had crossed Van Ness Avenue, the dividing line between the better residence district and the rest of the city, and that the town was doomed. As a matter of fact, everything worth mentioning except this residence district was burned over or on fire by the afternoon. The flames finished with the district down-town, ran south through what remained of the tenement district, extended out through the mission, a region of cheap residences, and leaped to Nob Hill, where stand the great mansions of the early-day California millionaires. Before that time the water supply had been wholly exhausted. Even the sewers were sucked dry. At two o'clock the firemen brought to the volunteer helpers the news that there was no more dynamite. It passed from mouth to mouth.

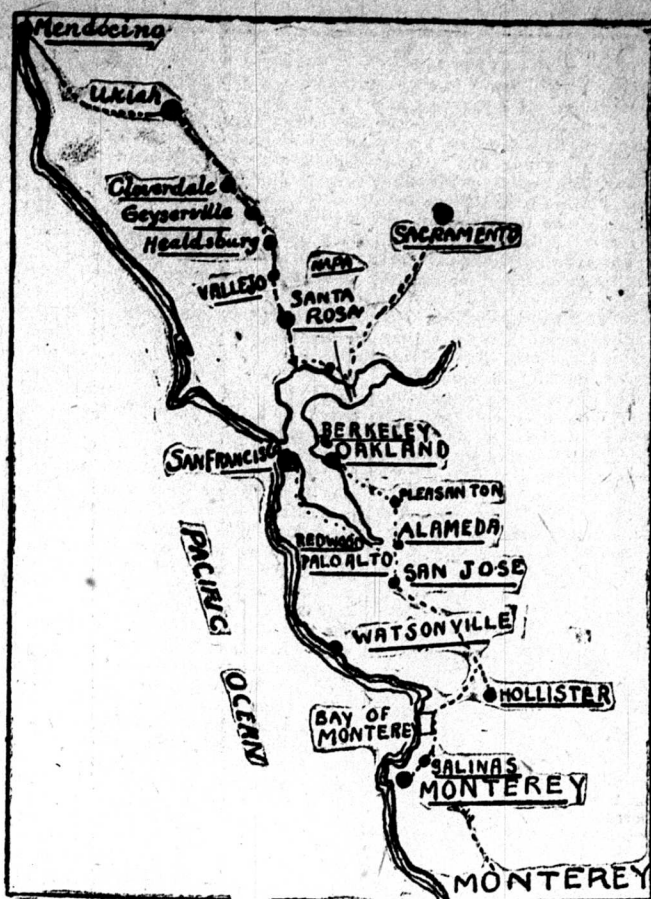

"NO MORE DYNAMITE!"

This cry was the doom of San Francisco.

As a last resort, Gen. Funston emptied the artillery magazines of the Presidio, and the troops and firemen tried to make a last stand at Van Ness Avenue, west of which lie the homes of the rich and well-to-do. Funston's telegram at 8 o'clock on Thursday night showed that they had failed, and the late news over the direct wire confirmed this.

Many must have died in the fire. At least four men were shot during the day for looting. The unburied dead, many of them half burned in the ruins, are becoming a problem. It may become necessary to sink many bodies in the bay or ocean. Owing to the fire, which caught many structures before the dead could be taken out of them, the real mortality will never be known.

It is hard to estimate the loss of money. It may be said that practically all improvements on real estate and a great part of the personal property are gone. The loss will certainly be more than \$200,000,000. The last assessment roll gives the value of land and improvements in San Francisco at \$402,000,000. The insurance held in San Francisco is estimated in New York at from \$350,000,000 to \$390,000,000. This estimate is based on the payment of premiums. The housing of the homeless people who

Map of the Stricken District Showing Towns Badly Wrecked by the Earthquake.

house fires would certainly make trouble.

The troops, tired and irritated, have had many conflicts with looters. There is an unconfirmed report that several men were killed while trying to rob the vaults of the Mint, which hold \$300,000,000 in treasure. There were several other instances of shooting for robbery.

Mayor Schmitz, Gen. Funston and the operators of the telegraph companies all agree in saying that the fire, while still burning, will probably spread no farther, but will burn itself out.

COMMONS VOTES \$100,000.

Ottawa, April 20. — A vote of \$100,000 was passed in the Commons to-day for the relief of the sufferers in San Francisco. Hon. Mr. Fielding, Minister of Finance, in announcing the Government's intention, said: "I have a matter of urgency to bring up, with reference to the disaster which has come upon one of the great cities of the neighboring Republic. I think the information which has now reached us through the press is sufficient to give assurance that the disaster is of a very widespread character, and there will be need of generous assistance from the liberal-minded people of the United States and other parts of the world. At all events, I am sure that this Parliament, representing the people who inhabit the northern half of the continent, will be glad to share in the opportunity of ministering to the assistance of our fellow-men in San Francisco. I propose, therefore, to present a message from his Excellency recommending a grant of \$100,000 as a contribution from the people of Canada to the afflicted people of San Francisco." (Applause.)

Mr. Borden, on behalf of the Opposition, said: "I do not think there are any members of the House who will not cordially support the Government in this proposal. The disaster to the City of San Francisco is one which almost staggers our belief—one which we are hardly able to understand. We have had substantial proofs in the past of

There will be privation, but no starvation in the destroyed city. Trainloads of food supplies are arriving from north, south and east, and Gen. Funston and the Mayor are organizing effective agencies for distribution. There will be no lack of money for this work. Already \$11,800,000 have been contributed, a sum large enough to feed the entire population for at least two months, while thousands of tons of food, clothing, tents and medical supplies are being sent forward. President Roosevelt has intimated in very courteous words, but quite firmly, that the United States can take care of the problem in San Francisco and will not need aid from abroad. It is probable that as this intimation was made on Saturday after the Dominion Parliament took action toward granting \$100,000 the Canadian donation will be accepted.

SANTA ROSA'S DISASTER.

Sacramento, Cal., April 23. — Santa Rosa, in proportion to its size, has suffered worse than San Francisco. The list of dead numbers about sixty, but many persons are missing and a still greater number seriously wounded. Forty sailors from Mare Island, fully equipped with apparatus, are working while volunteer aid has been unstinted. Santa Rosa has suffered the greatest disaster in her history, but the indomitable spirit of her people has been shown all along the line.

REFORMS IN JAPAN.

An Interview With Count Aoki at Victoria, B.C.

A Victoria, B.C., despatch says: On the Empress of China which arrived on Wednesday was Count Aoki, the new Japanese Minister to Washington. The Count declares that the crops this year in his country will be good, and that by September all danger of famine will be over. The biggest problem, he says,

together with the firemen of the Battery coast, made for that one block of open land. The uncontrolled streams met in the centre of the square and piled upon the edges. There they fought all the morning until the troops restored order with their bayonets.

BANKS REMOVE GOLD.

Then, as the dawn broke and the lower city began to be overhung with the smoke of burning buildings, there came a back-eddy. Cabmen, hackmen, drivers of express wagons and trucks, hired at enormous prices, began carting away from the lower city the valuables of the hotels, which saw their doom in the fires which were breaking out everywhere, and the spurts of the gas mains. Even the banks began to take out their bullion and securities, and, under guard of half-dressed clerks, sent them to the hills, whence came to-day the salvation of San Francisco. One old night hawk cab driven by a cabman mad with terror carried more than \$1,000,000 in currency and securities.

Men pulling corpses or broken people from fallen buildings stopped to curse these processions as they passed. Time and again a line of wagons and cabs would run on to an impassable barrier of debris, where some building had fallen into the street, and would pile up till the guards cleared a way through the streets.

SHOT DOWN THIEVES.

And then the vandals formed and went to work. Routed out from the dens along the wharves, the rats of the San Francisco waterfront, the drifters who have reached the back-eddy of European civilization, crawled out and began to plunder. Early in the day a policeman caught one of these men dropping through the window of a small bank on Montgomery street, and shot him dead. But the police were keeping fire lines, beating back overzealous rescuers from the fallen houses and the burning blocks, and for a time these men plundered at will. News of this development was carried early to Mayor Schmitz, and it was this as much as anything which determined him and Gen. Funston came over from the Presidio on the double quick with the whole garrison of United States troops to put the city under martial law. Orders were issued to the troops to shoot anyone caught in the act of looting, and the same orders were issued to the First Regiment, National Guard of California, when they were mustered and called out later in the day. And all this time, and clear up until noon, the earth was shaking with little tremors, many of which brought down walls and chimneys. At each of these the rescuers, even the firemen, would stop for a moment, paralyzed. The 8 o'clock, the heaviest after the big one, drove even those who had determined to stay by the stricken city to look for means of escape by water.

A SAFETY COMMITTEE.

There was an open park opposite the City Hall. Here, in default of a building, the Board of Supervisors met and formed, together with 50 substantial citizens whom they had gathered, a committee of safety. They also set themselves to the problem of providing quarters for the dying and dead. Mechanics' Pavilion, across from the City Hall, had escaped, and it was pressed into service at once. The police and the troops, working admirably together, passed the word that the dead and injured should be brought there, since the hospitals and morgues had become choked, and toward that point, in the early forenoon, the drays, express wagons, and hacks impressed as temporary ambulances, took their course. There were perhaps 400 injured people, many of them terribly mangled, laid out on the floor before noon.

DEAD AND INJURED.

Every physician in the city volunteered, and they got together enough trained nurses to do the work. There were fewer corpses, too busy were the forces of order in stopping the conflagration and caring for the living to care for the dead. The first wagons brought a whole family—father, mother and three children—all dead except the baby, who had a terrible cut across the forehead and a broken arm.

than \$200,000,000. The last assessment roll gives the value of land and improvements in San Francisco at \$402,000,000. The insurance held in San Francisco is estimated in New York at from \$350,000,000 to \$390,000,000. This estimate is based on the payment of premiums. The housing of the homeless people who are sleeping in the parks and the military reservation is going to be a great problem. So, indeed, is their feeding. No supplies can come into the town at present. The people have been living on the supplies taken from grocery stores and handed out by the soldiers, but the wholesale houses are gone with their stores of provisions and starvation is imminent.

There is plenty of money in sight for relief. The Government has appropriated a million dollars and at least half a million is awaiting order in New York. The problem, however, is not so much one of money as of ways and means of getting supplies through quickly.

This is absolutely the greatest disaster that ever overcame an American city, and one of the great fires of history. Beside it the Chicago, Boston, and Baltimore fires are almost unimportant.

THE FIRE IS CHECKED.

San Francisco, April 21.—The fire is probably checked. A turn of the wind, which came late Friday night, blew it back from the residence district, after it had leaped the gap which the soldiers had made with dynamite to save that part of the town. The steady western trade wind has set in. Telegraph Hill and the territory about it, a region of poor dwellings, had been passed by the main fire. This shaft of the wind blew the flames in that direction, and Telegraph Hill burned all day Friday. Russian Hill is also burned over, except for the small area on the sea slope; but if the trade-wind continues strong, as it probably will, the fire will be turned back entirely on the area already burned over. There is every hope that the ruins will be cooling in a day or two.

Reports about the actual area of damage are conflicting. It is probable, however, that about three-quarters of the improvements on real estate is destroyed. The fringes of the city, scattered suburban residences, stand. Outside of that a considerable area is saved, except the better residence district of the Western addition and Pacific Heights. Except for a few mansions of the rich, some churches, and probably some suburban hospitals, every building in San Francisco is gone.

More than 200,000 people slept last night in the concentration camps of the Presidio, Golden Gate Park and Fort Mason. There was a shortage of water. Food was scarce and poorly distributed and many went hungry and thirsty. The city authorities have been able to get at the water mains, and hope to have drinking water by this morning. The troops are preparing another concentration camp in the hills of the Potrero, south of the city, where there is access to a natural water supply. It is now possible to reach the ferry building by a route running around the edge of the bay. Over this route there was a general exodus to the ferries yesterday. The refugees went to Oakland, where there was at least a water supply. But in Oakland, too, there appears to be a shortage of provisions. While some supplies must have reached the city yesterday, and the United States Government is doing everything to rush rations, Gen. Funston has told the War Department that there is imminent danger of famine. This stands to reason, for San Francisco has never kept more than three days ahead with its provision supply, and much of that must have been destroyed in the fire.

Oakland is choked with refugees, who are sleeping in the parks or public buildings, or being accommodated by private citizens.

Admiral Goodrich landed all his available forces yesterday, and they will help out the exhausted troops. The University of California, which is temporarily closed, has sent over its cadet battalion. The Committee of Safety has taken up the work of supplying food stations. Mayor Schmitz has repeated his proclamation, ordering citizens not to build fires in houses, and cooking is still done in the public squares. Chimneys are so unsafe that

tion, said: "I do not think there are any members of the House who will not cordially support the Government in this proposal. The disaster to the City of San Francisco is one which almost staggers our belief—one which we are hardly able to understand. We have had substantial proofs in the past of the sympathy of the people of the United States in times of disaster to Canadian citizens. I wish merely to add that, in the presence of an appealing disaster such as this, and for the purpose of rendering aid on such occasions as this, the two nations are one." (Applause.)

The message was received and referred to the Committee of Supply.

RECONSTRUCTION NOW THE WORD

San Francisco, April 23.—The great fire is no longer a menace. Its ashes will smoulder for weeks, but as an active force it ended on Saturday morning. The last stroke was the destruction on Friday night of almost a mile of docks and wharfage warehouses on the northeastern waterfront.

It is known that the loss of life will be heavier and that of property somewhat less than in the hasty estimates sent out while the fire raged. The sanitary parties now systematically searching the ruins come across scores of bodies in unsuspected places. The chief loss of life seems to have been in the large boarding houses and cheap hotels lying south of Market street. In a single section of the city adjacent to the Union Iron Works 200 bodies have been cremated by the officials for sanitary reasons. Burial parties are working steadily, and it seems likely that the death list will be far above the figure of 250 set by the acting chief of the fire brigade, may indeed be twice that total.

The property loss is still a matter of the wildest guesswork, figures ranging from \$200,000,000 as a minimum to \$500,000,000 as a maximum. The great down-town buildings, while injured badly by fire, seem to have stood the earthquake remarkably well. The steel frame skyscrapers can be repaired and fitted for use in a week or two, and hotels like the St. Francis and Fairmont are in the same position. The utter loss has been in the case of flimsy brick buildings and of wooden structures, which were swept out of existence in thousands. The plans for rebuilding already under consideration look to guarding against both earthquake and fire by steel construction, and it is estimated that 250,000 tons of steel frames will be put into the down-town section of the new San Francisco.

A Victoria, B.C., despatch says: On the Empress of China which arrived on Wednesday was Count Aoki, the new Japanese Minister to Washington. The Count declares that the crops this year in his country will be good, and that by September all danger of famine will be over. The biggest problem, he says, now before the Government of Japan is the nationalization of the railways, and already they have decided on taking over seventeen lines. Reduction in the term of military service is also receiving consideration. The soreness over the terms of peace, he says, is now subsiding, allowing the Government to devote attention to domestic problems. Although there has been considerable consumption of flour from this country, Count Aoki says the Jap is not likely to abandon his main diet of rice, nor does he look for a big market for the ores of British Columbia in his country, which, he says, is also very rich in minerals.

Also on board the Empress was a band of Sikhs, belonging to a Hong Kong regiment, recently disbanded by Imperial authority, who will seek work in the mills of British Columbia.

PHILLIPS GRANTED BAIL.

The York Loan President Committed for Trial.

A Toronto despatch says: Joseph Phillips, president of the York County Loan and Savings Company, was on Thursday committed for trial by Police Magistrate Denison.

There was a long conference between Col. Denison and the Crown Attorney, and subsequently Phillips signed over to the shareholders of the York Loan all the property in dispute, including about \$7,000 in cash.

Phillips was admitted to bail in two securities of \$2,500 each.

ZULU REVOLT SPREADING.

Disquieting News from Natal—Imperial Troops are Ready.

A London despatch says: Disquieting news continues to arrive from Natal, where the Zulus are either befriending the rebel chief, Bambata, or are refraining from assisting in the efforts that are being made to capture him. The loyal tribes are mobilizing, and the Government is enrolling special volunteer forces. The Imperial troops at Maritzburg are held in readiness.

DEL MONTE HOTEL AT MONTEREY.

Where three chimneys fell through the roof, killing a bridal couple and a hotel servant, and injuring several other persons.

DOMINION PARLIAMENT

NOTES AND PROCEEDINGS OF THE OTTAWA HOUSE.

PETROLEUM COMPANY.

Mr. Barker was informed by Mr. Emmerson that the New Brunswick Petroleum Company had been incorporated in 1890 with an authorized capital of \$1,000,000 in 100,000 shares of \$10 each, and non-assessable. Mr. Emmerson had not been a shareholder or in any way interested at the time of the formation of the company, nor until June, 1901, when he purchased 10,910 shares, and he had no other interests than these in the company. The subscribed capital at the time of incorporation was 32,000 shares, and at present it was 76,809. Mr. Emmerson had not disposed of any of his stock in the company.

BORING FOR OIL.

Mr. McCarthy (Calgary) was told by Mr. Oliver that \$3,000 had been appropriated by the Government to assist in boring for oil, etc., near Edmonton. The North-West Gas and Oil Company, of Edmonton, had applied to the Government for an advance for this purpose, and the Government had advanced them \$1,000 for the same purpose. Mr. McCarthy was also told by Hon. Mr. Hyman that the money voted during the last two sessions for a land titles office at Calgary had not been expended.

GOVERNMENT LAND.

Mr. McCarthy learned from Mr. Oliver that an application had been received for the sale to a syndicate of a large tract of Government land in Alberta, between Calgary and Edmonton, in the vicinity of Lacombe. No price was proposed for the land, and the Government had taken no action in the way of having a valuation made.

WIRE FENCING.

Mr. Clements was told by Mr. Oliver that the Government was neither building nor proposing to build any wire fencing on boundary lines between the United States and Canada this year.

COMMONS INVITES KING.

Both sides of the Commons joined enthusiastically in support of a resolution inviting his Majesty King Edward to visit Canada. The motion was introduced by Mr. Belcourt and seconded by Mr. Northrup. They made eloquent speeches in favor of the resolution, and were followed by Sir Wilfrid Laurier, Mr. Borden, Col. Hughes, Messrs. Miller, Bourassa, and Chisholm. On Sir Wilfrid's suggestion the address was amended so as to leave it an open question with the King, should the invitation be accepted, to visit the Dominion at a time most convenient to their Majesties, instead of on the occasion of the opening of the Quebec Bridge, as suggested by Mr. Belcourt.

STANDARDIZING MILK CANS.

The Agriculture Committee redrafted and reported Mr. Archie Campbell's bill regulating the size of milk cans. The committee ordered that one thousand of the bills be distributed among farmers for their approval, or otherwise, before the bill is dealt with in the House. The bill provides that all vessels of one gallon or over, used for the purpose of buying or selling milk by measure, shall contain one Dominion standard gallon, as defined in the Weights and Measures Act. Vessels containing eight gallons shall be known as a standard, four gallons a half-standard, and two gallons a quarter-standard.

All vessels of one gallon and over now in use which have not been verified by an inspector must, within three months of the passing of the Act, be presented for verification. Such vessels when found to contain other than one gallon, or a multiple thereof, shall be stamped with their capacity. Persons who do not use the authorized vessels shall for the first offence incur a penalty of not more than \$50 and not less than \$5, and for each subsequent offence \$50, and the vessels shall be

THE WORLD'S MARKETS

REPORTS FROM THE LEADING TRADE CENTRES.

Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, April 24.—Flour—Ontario wheat patents are quoted at \$3.10 bid in buyers' sacks outside for export. Manitoba first patents are quoted at \$4.30 to \$4.50 Toronto, and strong bakers' at \$4, Toronto. Bran is nominal at \$19.50 to \$20 in bulk, outside. No. 3 American yellow corn is said to be worth 56½¢ on track, Toronto.

Wheat—No. 2 white offered at 79¢ outside, with 78¢ bid, and No. 2 mixed offered at 78½¢ outside, with 78¢ bid. No. 1 Northern, 83½¢ bid on track, Owen Sound, shipment within three weeks, and 83¢ bid Owen Sound, shipment 10 days, but none offered. No. 2 Northern, 82¢ bid Point Edward, May delivery.

Barley—No. 2 wanted at 50¢ outside, without sellers.

Oats—No. 2 white offered at 38½¢ to arrive, Toronto, with 37½¢ bid.

COUNTRY PRODUCE.

Apples—Choice stock, \$4 to \$4.25 per bbl, and inferior qualities, \$3 to \$3.25.

Beans—Hand-picked selling at \$1.80 to \$1.85, and prime at \$1.70 to \$1.75.

Honey—Strained honey quoted at 8 to 8½¢ per lb, and combs, \$1.75 to \$2 per dozen.

Hops—12 to 17¢ per lb.

Hay—Car lots of No. 1 timothy are quoted at \$8.50 to \$9 on track, Toronto, and No. 2 at \$6.50.

Straw—\$5.50 to \$6 per ton.

Potatoes—Ontario stock, 70 to 75¢ per bag, and Eastern, 82 to 85¢ per bag on track.

Poultry—Turkeys, fresh killed, 16¢; chickens, 13 to 15¢; live chickens, 10 to 11¢ per lb.

THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 20 to 21¢; large rolls, 19 to 20¢; good to choice dairy tubs, 17 to 20¢, and inferior at 16¢. Creamery prints sell at 24 to 25¢, and solids at 22 to 23¢.

Eggs—Sales at 15 to 15½¢ per dozen in case lots.

Cheese—Large cheese, 14¢, and twins at 14½¢ per lb. New cheese, 13½¢.

HOG PRODUCTS.

Dressed hogs in car lots are nominal. Bacon, long clear, 11½ to 11½¢ per lb in case lots; mess pork, \$20 to \$20.50; short cut, \$22.50 to \$23.

Hams—Light to medium, 13½ to 14¢; do., heavy, 13¢; rolls, 11½¢; shoulders, 11¢; backs, 15½ to 16¢; breakfast bacon, 15¢.

Lard—Tierces, 11¢; tubs, 11½¢; pails, 11½¢.

BUSINESS AT MONTREAL.

Montreal, April 24.—There was some improvement in the demand for Manitoba wheat from foreign sources to-day, and cables were about one cent per bushel higher. The oat market continues very strong, being 40½ to 41¢ for No. 2, 39½ to 40¢ for No. 3, 38½ to 39¢ for No. 4. Flour—Manitoba spring patents, \$4.50, strong bakers', \$4 to \$4.10; Winter wheat patents, \$4.10 to \$4.30; straight rollers, \$3.80 to \$3.90; do., in bags, \$1.70 to \$1.80; extras, \$1.35 to \$1.45. Feed—Manitoba bran, in bags, \$19.50; Ontario bran, in bags, \$19.50 to \$20; shorts, \$20.50 to \$21; milled mouille, \$20 to \$25; straight grain mouille, \$23 to \$29 per ton. Rolled oats—\$1.90 to \$1.95 in bags of 90 lbs. Hay—No. 1, \$8 to \$8.50 per ton on track; No. 2, \$7 to \$7.50; clover, \$5.50 to \$6; clover, mixed, \$6 to \$6.50. Beans—Prime pea beans, \$1.60 to \$1.65 per bushel; hand-picked, \$1.75 per bushel. Potatoes—Per bag of 80 lbs. 60 to 65¢. Honey—White clover, in comb, 13 to 14¢ per lb section; extract, 7 to 7½¢; buckwheat, 5½ to 6¢. Provisions—Heavy Canadian short cut pork, \$21.50; light short cut, \$20; Amer-

ON THE FARM

Hog cholera is caused by a germ, without the introduction of which the disease will not occur on any farm, writes Dr. T. Butler. The germ may be conveyed by almost anything that can be moved from one farm to another. Hogs having cholera, or well ones that have come in contact with anything contaminated, may carry the disease. Buzzards and other birds that feed on dead animals are common means of spreading the infection. The germs are also very frequently taken on the feet of people walking from an infected farm through the hog pastures of another. A stream that runs through the farm infected with hog cholera may convey the disease to the farm below. Wind also might occasionally blow the germs a short distance. To exclude these, and all other means of carrying the disease, is more or less difficult and sometimes practically impossible, but much may be accomplished by intelligent care.

During the existence of cholera in the country no hog should be allowed to come on a farm not yet infected. In fact, at any time hogs, new to the farm, should be kept separate from all others for at least 30 days. All swine dying should be either burned or buried under two inches of lime and three feet of soil. Communication between pastures or lots should be prohibited. Pens or small lots are better during the existence of the disease than large wood pastures, because more easily guarded. The animals should be given a variety of food including something green. All pens and lots should be kept as free as possible from dust and mudholes. Under a shelter, where the animals can have access to it, place two bushels charcoal, one bushel hardwood ashes, two pounds salt and one pound copperas. The charcoal should be broken in small lumps and the copperas powdered and all mixed thoroughly.

When the disease breaks out in a herd after the first signs of sickness move the well hogs to fresh, temporary pens. Leave the sick ones where they are. These pens need not be large, for if another case develops it will be necessary to move the well ones again. This plan should be followed as long as new cases develop. Thoroughly clean and disinfect all pens and lots where animals have died. As a disinfectant lime may be used for small lots. Pens may be washed with a hot solution of corrosive sublimate to 500 parts of water. It is of little use to treat sick hogs.

In the first stages, however, when the hogs are constipated, give them three ounces epsom salts to every 200 pounds animal. This is best given in milk, followed with from five to ten drops carbolic acid and a teaspoonful of turpentine in a little oil. If the animal will eat, from two to four drams of hypophosphite of soda may be given to advantage. Pig lots should be arranged with movable houses so that they can be changed every year and the ground cultivated before being used for swine again. Places exposed to sunshine and rain may be used in the course of a few months after an outbreak, but pens and shelters must be thoroughly disinfected and left vacant for at least six months.

TREATMENT OF YOUNG CHICKS.

About twenty-four hours after the chickens are hatched they should be removed with the hen to a clean coop, one that has been thoroughly disinfected, so that every form of parasitic life is destroyed. They should be fed a small amount of hard boiled eggs for the first two days, then they may receive bread-crumbs, or cracked wheat. Clean water should be supplied in a shallow vessel. It is a good plan to cover the floor of the coop with sand, by so doing they, in picking up their food, will get more or less sand which will prove beneficial.

After the chicks are a week old they

when found to contain other than one gallon, or a multiple thereof, shall be stamped with their capacity. Persons who do not use the authorized vessels shall for the first offence incur a penalty of not more than \$50 and not less than \$5, and for each subsequent offence \$50, and the vessels shall be forfeited.

ONTARIO LEGISLATURE

WHAT THE LEGISLATURE AT TORONTO IS DOING.

NEW PROVINCIAL LOAN.

Hon. Mr. Matheson formally introduced a motion for the issue of \$3,000,000 inscribed stock or bonds for the Temiskaming Railway. Out of the consolidated funds on hand \$1,900,000 has been already advanced, and this will be replaced from the new loan, which is to be the Canadian one. The loan will not be floated until July, when tenders will be called for by the Government. Hon. Mr. Matheson believes that should a subsidy be received from the Dominion the loan will be sufficient to finish the second contract on the road, after which about fifty miles remain to reach the G. T. P. Railway.

GAMEY MONEY.

A bill was introduced to enable the money in the hands of the Court of Judicature in connection with the Gamey charges to be paid to the Lieutenant-Governor in Council, who may dispose of it for benevolent purposes.

PHARMACY BILL AMENDED.

Mr. Downey's bill to amend the Pharmacy Act met with considerable opposition in the committee stage, but finally went through with only one amendment, and that a not very important one.

LOCAL TELEPHONES.

Hon. Mr. Beck's measure was reported with only one amendment submitted by Mr. Beck, by which existing lines may be vested in the municipality with the consent of their owners.

NO SUNDAY TRAVELING.

Hon. Mr. Hendrie's Railway Bill was advanced another stage in committee and reported to the House with certain amendments to be considered. In objecting to the Sunday clauses Mr. Bowyer noted that many roads running out of Hamilton had the privilege of running on Sunday, as did also those operating under Dominion charters. This would be denied to provincial lines. To this the Premier replied that he believed the people favored the prohibitory clauses, and the Government intended to stand by these sections.

REGISTRATION STANDS A YEAR.

Premier Whitney announced the withdrawal of his bill to abolish manhood suffrage registration in Ontario. The Premier said that there would be a general revision of the election law next year. In the meantime there would be no election, and no harm could be done by postponing the reform.

FRANCHISE TO WOMEN.

The House divided on Mr. Smith's (Peel) bill to give the provincial franchise to women who vote in municipal elections, but this radical proposal found only eight supporters besides the mover. The members generally were inclined to treat the bill as a joke.

PRAIRIE FIRE LOSSES.

Farmers in Bagot District, Manitoba, Suffer Severely.

A Portage la Prairie, Man., despatch says: Word comes from Bagot district, fifteen miles west, of serious loss to farmers as a result of bush and prairie fires. On Sunday the outbuildings of George J. Jones were destroyed. They caught from a bush fire, and in a very short time the buildings were in flames. Two horses, two cows, two calves and three pigs were in the building, and were burned.

\$7.50; clover, \$5.30 to \$6; clover, mixed, \$6 to \$6.50. Beans—Prime pea beans, \$1.60 to \$1.65 per bushel; hand-picked, \$1.75 per bushel. Potatoes—Per bag of 80 lbs. 60 to 65c. Honey—White clover, in comb, 13 to 14c per lb section; extract, 7 to 7½c; buckwheat, 5½ to 6c. Provisions—Heavy Canadian short cut pork, \$21.50; light short cut, \$20; American cut clear fat backs, \$20; compound lard, 7 to 7½c; Canadian pure lard, 11½ to 11¾c; kettle rendered, 12½ to 12¾c; hams, 13 to 14½c; breakfast bacon, 16c; Windsor bacon, 15c; fresh killed abattoir dressed hogs, \$10.25; country dressed, \$9.25 to \$9.50; alive, \$7.50 to \$7.60 for selects. Eggs—New laid, 14½ to 15½c per dozen. Butter—Choicest, creamery, 23½ to 24c; undergrades, 19 to 21c; dairy, 18 to 20c. Cheese—Colored, 12½c; white, 12¾c.

UNITED STATES MARKETS.

Minneapolis, April 24.—Wheat—May, 78¾c; July, 80¾ to 80¾c; September, 78¾c; No. 1 hard, 81¾c; No. 1 Northern, 81¾c; No. 2 do., 79¾c; No. 3 Spring, 77½ to 78½. Flour—Unchanged. St. Louis, April 24.—Wheat—Cash, 87c; May, 80¾c; July, 77¾c. Milwaukee, Wis., April 24.—Wheat—No. 1 Northern, 82 to 83¾c; No. 2 do., 78 to 82c; May, 81¾ to 81¾c. Rye—No. 1, 64 to 65c. Barley—No. 2, 55 to 55½c; sample, 45 to 55c. Corn—No. 3 cash, 47½ to 48c; May, 46¾c. Duluth, Minn., April 24.—Wheat—No. 1 Northern, 81¾c; No. 2 do., 79¾c; May, 80¾c; July, 81¾c; September, 79¾c.

LIVE STOCK MARKET.

Toronto, April 24.—A fairly heavy run of cattle was offering at the Western Market this morning. Export Cattle—Choice are quoted at \$4.90 to \$5.25, medium to good at \$4.50 to \$4.70, others at \$4 to \$4.25, bulls at \$3.50 to \$4, and cows at \$2.75 to \$4. Butcher Cattle—Pickled lots, \$4.75 to \$5; good to choice, \$4.40 to \$4.65; fair to good, \$3.75 to \$4; common, \$2.50 to \$3; cows, \$2.75 to \$4.25; bulls, \$3 to \$4; canners, \$1.50 to \$2. Stockers and Feeders—Short-keep feeders are quoted at \$4 to \$4.50, heavy feeders at \$3.85 to \$4.15, medium at \$2.50 to \$3.50; bulls at \$2 to \$2.75, good stockers run at \$3 to \$3.65, light at \$2.75 to \$3, rough common at \$2 to \$2.75, and bulls at \$1.75 to \$2.50. Milch Cows—\$30 to \$50 each. Calves—They are quoted at 3 to 6c per lb. Sheep and Lambs—Export sheep are quoted 25 to 75c per cwt, lower at \$4.50 to \$5 for ewes and \$3.30 to \$3.75 for bucks. Grain-fed lambs are 25 to 50c lower at \$6.25 to \$6.75, and spring lambs are also easier at \$3 to \$6 each. Hogs—Unchanged at \$7.15 per cwt. for selects and \$6.90 for lights and fats, fed and watered.

TRAGEDY IN NORTH VICTORIA.

Man Found Dead in the Bush with Head Split Open.

A despatch from Lindsay says: Word was received on Thursday from Kirkfield giving the particulars of a terrible occurrence in the neighborhood of that village. Two men, named Miller and Dillon, had been in the employ of a farmer named McNulty, living about four miles north. Wednesday morning at an early hour they were given a job of chopping wood in a bush on the farm. Their employer, after issuing necessary directions, returned to the barn to feed his cattle. About ten o'clock McNulty returned to find Miller lying dead beside a log he had been cutting, the ground deluged with blood that had flowed from a wound in the head. Dillon was nowhere to be seen. It is supposed the two men had quarreled. Dillon has been placed under arrest.

Benjamin F. Esbenshade, of Lancaster, Pa., aged sixty years, a civil war veteran, has just ended a forty days' fast made with the design of curing stomach troubles. A pint of water daily was all that passed his lips. From 164 pounds his weight dropped to 104 pounds, and he is weak as a child, but he believes himself cured.

Democratic Club Mayor McClellan, of New York, said a spirit of unrest and hopelessness, masking under the name of socialism, threatened the country.

GENERAL.

The new Russian loan will amount to 2,400,000,000 francs.

The Sultan of Turkey is dying, according to a London despatch.

Prof. Curie, discoverer of radium, was killed by being run over by a wagon in Paris.

Three men were killed at gunnery practice on the French warship Couronne on Friday.

Three hundred Russian political prisoners have just been deported to Siberia by way of Moscow and Borisogliebksk.

WHY THE SKY IS BLUE.

Different Theories Held by Men Who Study It.

The sky has long been a puzzle to physicists. There are two mysteries to explain about it—its reflection of light and its color. The old view was that the blue of the sky was due simply to atmospheric oxygen. Oxygen has a faint blue tint, and the idea was that several miles of the gas, even when diluted as it is in the air, would have a bright blue color. But this did not account for the intense illumination of the sky, and of recent years Tyndall's "dust theory," or some modification of it, has been generally accepted. This regards the blue color as an optical effect, like the color of very thin smoke, due to excessively fine particles floating in the air, which would also account for the large proportion of reflected light from the sky.

Recent calculations of Professor Spring, of Liège, Belgium, however, indicate that the dust in the air is not sufficient in amount, nor finely enough divided, to support this explanation, and he rejects it for this and other reasons. He has gone back to the old oxygen theory, and accounts for the general illumination of the sky on the hypothesis, first advanced by Hagenbach, that intermingled layers of different density in the atmosphere give it the power of reflecting light.

LAKE UNDER LARGE CITY.

Charleston, W. Va., in a State of Great Excitement.

A despatch from Charleston, West Virginia, says: The city of Charleston was thrown into excitement on Tuesday by the discovery of a gigantic cave directly beneath the town. The cave contains a large lake. Men blasting rock made the discovery of the lake and cavern when the discharge caused the earth to crumble and fall in, leaving a great hole. Workmen ventured into the cavern, exploring it for a considerable distance. They discovered the lake, and, returning to the surface, procured a small boat, in which they rowed about for several hundred yards. There are limestone formations in the cavern similar to those in the noted Luray caves. The water in the lake is remarkably pure and is cold and sweet to the taste. A systematic exploration of the cavern will be begun to-day.

ARREST C. P. R. EMPLOYEES.

Systematic Stealing Has Been Going on, and Many Arrests Follow.

A Winnipeg despatch says: A wholesale arrest of C.P.R. employees, including yardmen, switchmen, brakemen, conductors and engineers, on the charge of stealing merchandise from cars, followed some good detective work. Robberies from cars have been systematically carried on for years. A short time ago the C.P.R. imported a professional "fence" from Chicago and he has been purchasing the stolen goods and returning them to the company. Gradually he detected the men involved and the arrests followed. Fifteen warrants have been issued and the majority of the accused men are under arrest. It is probable that other warrants will be issued.

The first two days, when they may receive bread-crumbs, or cracked wheat. Clean water should be supplied in shallow vessel. It is a good plan to cover the floor of the coop with sand, by doing this, in picking up their food will get more or less sand which will prove beneficial.

After the chicks are a week old they will enjoy a moderately soft mash of ground wheat to which small amount of sand and bone meal have been added. It is essential that they receive more of the mineral nutriment than exist in ordinary foods. The organic forms of phosphate as found in ground bones will prove more efficient than the rock phosphate. Experiments have demonstrated that it is not advisable to mix ground oyster shells with the feed of young chicks, although it is a good plan to permit them to partake of it as they wish. Early hatched chicks will prove less troublesome to rear than late hatched. They escape in a measure the torments of parasites usually so common during the warm season, and the pullets will lay well in the fall when eggs are a good price.

TREATING OATS FOR SMUT.

Many reports from farmers speak favorably of formalin as a preventive of oat smut. Following the directions sent out by various experiment stations the purchase 40 per cent. solution of formaldehyde from druggists at about 50 cents a pound and add it to water at the rate of one pound to 45 gallons which is sufficient, where there is no leakage, to treating 15 bushels.

The method of applying usually practiced is to spread the oats in a layer of three inches deep upon a tight floor, preferably of cement to save leakage; to sprinkle these with a watering can until wet through then to place another layer of oats upon the wet ones and sprinkle again; and to continue until the whole amount is wet or until the pile is as large as can be conveniently handled. The mass is then thoroughly mixed by shoveling.

After a couple of hours the oats are spread out as thinly as possible on a floor swept by a breeze and turned several times until dry enough to sow. During the process the mass of 15 bushels will swell to about 16 bushels; allowance must be made in seeding to this. Bright, warm weather favors the drying and immediate sowing is followed by better results in germination than if the seed is allowed to become as dry as before soaking.

HEALTH GOOD AT COBALT.

Resident Inspector Scott Forwarded Few Facts—Measles Only.

A despatch from Toronto says: Sanitary Inspector Samuel Scott has presented to Dr. Hodgetts his first report as resident inspector of the Cobalt district. In all, he has covered thirty-six prospectors and mining camps, and in these seven hundred men are at work. Cobalt is estimated by Mr. Scott to have 5,000, and about 700 houses. The drinking of water that has not been boiled is prohibited. One case of measles is the only instance known of a contagious disease in the town, and this has been isolated. Dr. Hodgetts and Inspector Bell will likely visit Cobalt in the near future to push the health campaign.

RELIEVED OF COMMAND.

End of the Raging Case at Aldershot, England.

A despatch from Aldershot, Eng., says: The decision of the War Office in the case of the officers of the first battalion of Scots Guards, charged with the ragging of Second Lieut. Clark Kennedy of the regiment because he was unable to meet certain regimental expenses, promulgated on Saturday relieved Lieut. Colonel Cuthbert of his command. Adjutant Captain R. J. Stracey received a light sentence, and four lieutenants connected with connection with the affair lose a year's seniority. Lieut. Clark-Kennedy has left the regiment.

Pale, Thin, Nervous?

Then your blood must be in a very bad condition. You certainly know what to take, then take it—Ayer's Sarsaparilla. If you doubt, then consult your doctor. We know what he will say about this grand old family medicine.

This is the first question your doctor would ask: "Are your bowels regular?" He knows that daily action of the bowels is absolutely essential to recovery. Keep your liver active and your bowels regular by taking laxative doses of Ayer's Pills.

MARSHAL SOULT.

English Views of the Famous Lieutenant of Napoleon.

"When I had Soult as my opponent I could eat, drink and amuse myself without fear of being surprised. It was not that he failed to be a great commander. He was wonderful in his way; he knew how to collect 100,000 men at a fixed point on a fixed date, but when he had collected them he never knew the least in the world what to do with them."

in favor of such nomenclature by those who recognize the sisterhood of the various fine arts. Whistler's early days were passed in an atmosphere of music, and, apart from the masterful craving of erratic genius for novelty and his appreciation on reaching manhood and looking forth on the world of the value of new processes in systematic self advertising, it was therefore not unnatural that he should use musical terminology in giving titles to the output of his work in graphic art. Why should he not speak of that work as symphonies or harmonies in white, in green, in blue, in gray or what not? Why should the word "arrangement" be confined to musical notes? Is not what is perhaps his masterpiece, his mother's portrait, really and truly, as children say, an "arrangement" in black and gray?—Critic.

Cause of Nosebleed.

In weak persons bleeding at the nose is frequently hurtful and should be stopped without delay, as continued hemorrhage may prove fatal if neglected.

Those who suffer from poorness of blood or anaemia and are sometimes seized with violent nosebleeding should avoid as far as possible anything which may tend to bring it on. Gentle exercise only should be taken, as violent bodily movements may provoke a repetition of the hemorrhage. Even running downstairs hastily should be avoided. Bleeding at the nose is usually a sign that something is wrong with the system. The cause should, if possible, be discovered and steps taken to remove it.

"Survival of the Fittest."

In Ireland from time immemorial candidates for political honors have had to cope not only with Irish brains, but with the noble Irish oak in the shape of a shillalah, a fact which illuminates a reminiscence of Galway, found in Blackwood's Magazine. When George IV. visited Ireland an election for Galway was pending. The king inquired of a Galway gentleman who came up to Dublin to attend his levee which candidate would probably be returned.

"The survivor, sir," replied the gentleman.

Exceptions.

Hardy—She may be well educated, as you say, but she uses very singular expressions. Tardy—She does? Hardy—Yes. Yesterday, for instance, she spoke of a musical concert. Tardy—Wasn't that correct? Hardy—Certainly not. It wasn't necessary to say "musical" in speaking of a concert. A concert must be musical. Tardy—Must, eh? Well, I've been to some that were not.

A Restful Book.

"Yes, I picked up his book last night, and I never bugged out of my chair until 4 o'clock this morning."

"Goodness! Was it that interesting?" "No, but I didn't wake up until that time."

True Helpfulness.

I want it to be said of me by those who know me best that I have always plucked a thistle and planted a flower in its place wherever a flower would grow.

Blue Blood.

Lots of people who boast of their blue blood are really color blind.—New York Times.

The Stomach Ache.

For genuine stomach ache—that is, pain in the true stomach—you must blame the digestion. If the pain often occurs one may be sure that a serious state of chronic indigestion obtains. Then of course it is very necessary to take advice directed to that one case. But for a solitary attack there is nothing better than getting rid of the stomach contents. They cannot possibly do good and may greatly upset the system. Warm salt and water is a simple domestic emetic. When there are acid risings and burnings in the throat a teaspoonful of bicarbonate of sodium in water, taken in divided doses, may be tried.

The Adirondack Lakes.

One of the most striking phenomena of the Adirondack region is the carrying power of the human voice in still weather upon the lakes great and small. Persons ashore easily hear the ordinary conversation of others who are so far out upon the lake as to be indistinguishable, and as a great many Adirondack visitors habitually violate the law touching the slaughter of deer all such offenders are extremely careful not even to whisper a word that might betray their guilt when rowing upon the lakes.

A "Gold Brick" of Old Time.

STONE & WELLINGTON,
Fonthill Nurs. ries,
Over 600 acres,

TORONTO, ONT.

A Moorish Legend.

A certain sultan one morning com-

but when he had collected them he never knew the least in the world what to do with them."

So said Wellington, and on this occasion he actually ate Soult's dinner, which was in course of preparation for him. But, though the capture of the French marshal seemed inevitable, he was already "beyond the toils, having by a supreme effort extricated himself from perils as fearful as ever beset a general."

It was a masterly retreat, and throughout it he was not only watching for the best advantages to be gained, but testing the spirit of his men. His hand was almost on their pulses, his eye was ever watchful, and suddenly, by a stroke almost theatrical in its effect, he "drew up the troops, 20,000 in number, on the position he had occupied two months before at the battle of Braga," thus rousing the spirits of his soldiers.

He continued the retreat, facing every difficulty of country and weather, but never deterred, and finally crossed the Cavado "in full time, for the English guns were thundering on the rear."

He had lost about 5,000 men; he had entered Portugal with fifty-eight pieces of artillery; he returned without a gun. — Colonel J. Hanbury Williams, C. V. O., C. M. G., in Blackwood's Magazine.

THE NAMES HE USED.

They Helped to Sell the Wonderful Works of Whistler.

Though the peculiar nomenclature Whistler adopted for the output of his brush and needle inevitably in its novelty excited ridicule and censure and was surely adopted, just as his hirsutious oriflamb was carefully cultivated, mainly as an advertisement to attract the custom of the hunter after art novelties and art bargains even as his wand and flat brimmed hat were assumed to mark him out to "the man in the street," there is no little to be said

A GOOD IDEA OF SPACE.

It is Given by a Contemplation of the Star Sigma Draconis.

Stars or planets are said to be "fixed" when they are separated from us by a distance so great that a change in their orbits makes no perceptible difference in their positions, even though such "fixed" bodies may travel an orbit 100,000,000 miles in circumference in the course of a year. These "fixed" stars may be only a few paltry millions of miles away or they may be billions or even trillions of miles from the pygmy planet upon which we have our being. The most distant of all the orbs, as far as astronomers know, is the fixed star Sigma Draconis, which is separated from us by a distance so great that millions and billions of miles are only as inches and feet compared to the miles which intervene between our earth and the sun. Astronomers are noted for their propensities for indicating stellar distances with robust and well developed strings of figures, but in the case of Sigma Draconis the distance is so great that figures fail to give any conception whatever.

Light travels at the rate of 186,330 miles per second, and, reckoning the day at twenty-three hours fifty-six minutes and four seconds in length and the year at 365 1/4 days, an astronomical light year will equal 5,884,066,148,330 miles. The above figures, which represent the distance which light will travel in a year, when multiplied by 129 give us the distance to Sigma Draconis, or, in other words and figures, that star is 129 light years, or 756,000,000,000,000,000,000 miles, from us! If Sigma had been blotted out of existence before our Revolutionary war began, its light would still be shining as though the star were yet in place!

THEY ARE VERY UGLY.

The Korean Women Are the Homeliest in the World.

I think the assertion may safely be made that the women of Korea are the most unattractive in the world. One of my chief occupations during my stay in the little Hermit Kingdom has been making a diligent search for a passably pretty face. I have failed to find one. It is not that they haven't pretty eyes. They have—eyes of softest brown and gentlest expression. It is not that their features are coarse or irregular, for, while this may be true of many, it is not by any means true of all, and I have caught glimpses of as delicately molded features at Seoul as in any other part of the world.

But the Korean woman is just ugly. She may have fine eyes, she may have a pretty little nose and mouth and other features that in themselves are not at all unattractive, but as she is put together and as her mental life has made her she is ugly.

One doesn't ordinarily see much of the women of the better class in this strange little land; but, being admitted, as I have been, to the imperial palaces and several houses of high degree, I have been at least able to receive impressions. The women who are to be seen on the streets of the cities are usually slaves or servants of a low order; but, whatever they are, they, each and every one of them, look as if they had hurried out into the street without taking time to dress themselves properly.

CASTORIA.

the king of Babylon accuses Amenophis III. of Egypt of sending him a mass of base metal for gold. He says, "The twenty minas of gold you sent me contained, when melted down, only five minas of pure gold."—London Post.

No Competition.

"What do you consider the most memorable occasion in your career?"

"Once, at an evening performance," answered the great tenor, with emotion, "all the boxes were occupied by mutes. I shall never forget that night."

Her Cooking.

Young Wife—How do you like my cooking? Don't you think I've begun well? Husband—Um—yes, I've often heard that well begun is half done.—Punch.

A Change.

Of the twenty-six barons who signed the Magna Charta three wrote their names and twenty-three made their mark. This is all changed now. Every baron can write, but only a few succeed in making their mark.

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature to do its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

A Moorish Legend.

A certain sultan one morning commanded his prime minister to take a census of all the stupid people in his empire and let him have the correct list. The vizier set to work, and at the head of the list, which was a very long one, he placed the name of his sovereign. The latter happened to be in a good humor and merely inquired how he came to merit that distinction.

"Sire," the minister replied, "I have entered you on the list because only two days ago you intrusted large sums of money, for the alleged purpose of buying horses abroad, to a couple of men who are entire strangers and who will never come back again."

"Is that your opinion? But suppose they do?"

"Then I will erase your name and place theirs at the head of the list."

The Turk.

The Turk practices no trade, engages in no commerce. They have a proverb which says, "The Frank has science, the American commerce, the Osmanli majesty." But, as majesty won't fill stomachs, those who do not serve as soldiers strive to become functionaries, and the men of the small villages, falling in this, do nothing, and the work of the fields and house falls upon the shoulders of the women. One chronicle states that occasionally the man of the house crochets a stocking or mends the baby for a short period.

Domestic Bookkeeping.

"And what's your reason for increasing the servants' wages, pray?" her friend asked.

"Because my husband complained that my dress and millinery bills equaled the household expenses, and I want to show him they do not."—London Tit-Bits.

Do You Want to Know

What You Swallow?

There is a growing sentiment in this country in favor of MEDICINES OF KNOWN COMPOSITION. It is but natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only add to the well-earned reputation of his medicines, Dr. R. V. Pierce, of Buffalo, N. Y., has "taken time by the forelock," as it were, and is publishing broadcast a list of all the ingredients entering into his leading medicines, the "Golden Medical Discovery" the popular liver invigorator, stomach tonic, blood purifier and heart regulator; also of his "Favorite Prescription" for weak, over-worked, broken-down, nervous and invalid women.

This bold and out-spoken movement on the part of Dr. Pierce, has, by showing exactly what his well-known medicines are composed of, completely disarmed all harping critics who have heretofore unjustly attacked them. A little pamphlet has been compiled, from the standard medical authorities of all the several schools of practice, showing the strongest endorsements by leading medical writers of the several ingredients which enter into Dr. Pierce's medicines. A copy of this little book is mailed free to any one desiring to learn more concerning the valuable, native, medicinal plants which enter into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

Dr. Pierce's Pleasant Pellets are tiny, sugar-coated anti-bilious granules. They regulate and invigorate Stomach, Liver and Bowels. Do not beset the "pill habit," but cure constipation. One or two each day for a laxative and regulator, three or four for an active cathartic. Once tried always in favor.

\$50,000 GIVEN AWAY. In copies of The People's Common Sense Medical Adviser, a book that sold to the extent of 500,000 copies a few years ago, at \$1.50 per copy. Last year we gave away \$50,000 worth of these invaluable books. This year we shall give away \$50,000 worth of them. Will you share in this benefit? If so, send only \$1 one-cent stamps to cover cost of mailing only for book in stiff paper covers, or 50 stamps for cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

CAUGHT COLD ON THE C.P.R.

A. E. Mumford tells how Psychine cured him after the Doctors gave him up

"It is twelve years since Psychine cured me of galloping consumption," The speaker was Mr. A. E. Mumford, six feet tall, and looking just what he is a husky healthy farmer. He works his own farm near Magnetawan, Ont.

"I caught my cold working as a fireman on the C.P.R.," he continued. "I had night sweats, chills and fever and frequently coughed up pieces of my lungs. I was sinking fast and the doctors said there was no hope for me. Two months treatment of Psychine put me right on my feet and I have had no return of lung trouble since."

If Mr. Mumford had started to take Psychine when he first caught cold he would have saved himself a lot of anxiety and suffering. Psychine cures all lung troubles by killing the germs—the roots of the disease.

PSYCHINE

So the rumor goes that Mr. Joseph Phillips of the York Loan, if he will give up everything of value that he controls and will induce his friends to do the same, will have the laws kindest face turned towards him. It is rumored that there has been bargaining and that Phillips will shell out and be let go—let go to pursue his remarkable career. It is difficult to understand the ways of justice sometimes. But if Phillips owns anything that is his own, this property should not be scared out of him by shaking him over the pit; while if his practices have been such as would have earned imprisonment for him, he should not be able to purchase release by handing over his property. Surely that is a fair statement of the vital principles of justice. Why settle anything in this ferocious business? Give Joseph Phillips a square trial—take from him what is not his, leave with him what is his, and, if he deserve a testimonial, have it engrossed for him, while if the evidence shows that he is entitled to punishment let him have it good and plenty.—Saturday Night.

WHAT OTHER PAPERS SAY.

Kingston Whig.

The bill wiping out manhood franchise has been dropped for the present. Mr. Whitney has heard something and it makes him hesitate about taking and it makes him hesitate about taking a step which is by no means popular. The election law will be tinkered with later, but it may not wipe out manhood franchise. The voice of the people says "Go slow."

Kingston Whig.

The indemnity grab members of parliament seem to be timid about launching their bills. What is the matter? What is the game? The government invites them to play it.

Montreal Herald.

Gorky's theory seems to be that a man should have one wife to cook the victuals and mind the kids and another to talk socialism to. Looks reasonable too.

Toronto Star.

A Chicago woman wants a divorce because her husband choked her many times a day, but it does not appear whether that was the only way he could make her stop talking.

Montreal Herald.

What a lot of tainted money seems to be going Frisco-wards just now. However, it will be as good as any other to exchange for sardines and canned tomatoes, and that's the main thing.

Indianapolis Star

Don't kick on the weather man. A man in a fur coat was seen on the street yesterday, followed by a bare-foot boy.

Montreal Star.

Parliament did the proper thing by promptly voting a hundred thousand dollars for the relief of the homeless in San Francisco. It was an act that doesn't require any defending or explaining. It was the right thing to do and everybody approves of it. In the presence of such a visitation the rules which ordinarily govern the appropriation of money are suspended, and plain simple human nature asserts itself taking no note of passports, or boundary lines or anything but just the calamity in which, for all we

Barred by Torchlight.

Allerton Hall was upward of four centuries the property and residence of the Kitchingman family. It was the largest and most ancient mansion in Chapeltown, consisting of about sixty rooms, with gardens and pleasure grounds. The Kitchingman family for upward of 400 years were carried from this hall by torchlight to be interred in the choir of St. Peter's church in Leeds. At the interment of any of the family the great chandelier, consisting of thirty-six branches, was always lighted in the year 1716 Robert Kitchingman died May 7, aged 100 years. He ordered his body to be buried with torchlights at Chapel Allerton. He was interred on May 16, when 100 torches were carried. The room where the body was laid was hung with black, and a velvet pall, with escutcheons, was born by the chief gentry. The pallbearers had all scarf, biscuits and sack; the whole company had gloves. Fifty pounds were given among the poor in the chapel yard on the day of his interment. Mary, his wife, died July 28, 1716, aged ninety-seven years. She was interred precisely in the same way.—"Annals of Yorkshire."

For Black Eyes.

It is often the case that people meet with accidents and bruises that cause disfiguring discolorations, from which they suffer not a little embarrassment and annoyance. It is worth while to know that there is a simple remedy and one quite within the reach of every one. Immediately after the accident mix an equal quantity of capicum annuum with mucilage made of gum arabic. To this add a few drops of glycerin. The bruised surface should be carefully cleansed and dried, then painted all over with the capicum preparation. Use a camel's hair brush and allow it to dry, then put on the second or third coat as soon as the first is entirely absorbed. A medical journal is authority for the statement that if this course is pursued immediately after the injury discoloration of the bruised tissue will be wholly prevented. It is also said that this remedy is unequalled as a cure for rheumatism or stiffness of the neck.

The President For a Day Story.

The story that David R. Atchison of Missouri was president for a day started as a joke. Atchison was president of the senate at the expiration of President Polk's term, and the law at that time provided that that officer should succeed to the presidency in default of both president and vice president. March 4, 1849, was Sunday, and President Zachary Taylor did not take the oath of office until Monday, March 5. Somebody thereupon started the joke that neither Polk nor Taylor was president during the odd day and that Atchison must have been. But if Taylor could not under the constitution be president until he had taken the oath of office how could Atchison? He did not take the oath either.

The Word "Tariff."

The word tariff has an interesting origin. It is derived from the Arabic tarifa, meaning an inventory of fees payable on demand, and became current in the following way: A certain Moorish general, by name Tarifa, seized in the year 710 upon a small seaport some twenty miles from what is now Gibraltar and the southernmost town in Europe. Here he founded a station for levying toll on all craft trading in the neighborhood and bestowed his name upon the place, after the manner of Constantine, Alexander and others. The word came eventual-

Red Rose Tea Uniformity

A TEA that is good to-day and poor to-morrow is unreliable.

Have you ever noticed variations in the quality of the tea you use? One package good, the next bitter, herby, perhaps weak and insipid.

A lack of expert knowledge by the tasters and blenders of that tea produced that result. There was a failure at a vital point, an ignorance of combining qualities in teas, poor judgment in the blending of that maker's teas, a weakness which invariably gives just such results as your poor tea.

Every chest of Red Rose Tea is tested at the gardens, again by the Eastern Red Rose shippers, then at the Red Rose warehouse upon its arrival before blending; after that an experimental blend is tested, and the final or actual blend is also tested before being packed.

Nothing is left to chance.

That is why that "rich fruity flavor" is always present in Red Rose Tea.

Why Red Rose Tea is always uniform, why

Red Rose Tea

is good Tea

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itching of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old foggy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

MARTYR DAYS ARE NOT YET PASSED!

GREAT ARMIES OF MEN AND WOMEN GO UP AND DOWN THE EARTH IN BONDS MORE IRKSOME, IN SUFFERINGS MORE INTENSE, IN SHACKLES MORE SECURE THAN WERE THE IRON MANACLES OF SLAVERY DAYS, AND YET THE "LINCOLN OF EMANCIPATION" FINDS IN THESE LATER DAYS HIS COUNTERPART IN

Dr. Agnew's Catarrhal Powder

whose mission it is and which mission it fills in freeing thousands from the bondage of dreaded, disgusting, discouraging, distracting catarrh, that cruel, relentless master that is no respecter of persons. How do you know you are in its thrall? Note the symptoms—headache, watery eyes, pains over the eyes, deafness, buzzing in the head, dropping in the throat, offensive breath, dryness in the nostrils—any or all of these symptoms are forerunners of catarrh, and catarrh in the headstage can be relieved in 10 minutes by Dr. Agnew's Catarrhal Powder and the sufferer may be cured the

plain simple human nature asserts itself taking no note of passports, or boundary lines or anything but just the calamity in which, for all we can know, a great many of our Canadian may be involved with hundreds of thousands of their human brethren.

REVIVAL OF SAN FRANCISCO.

There is a good deal of speculation in American newspapers as to whether San Francisco will survive its injuries and resume its place as the chief city on the Pacific coast of America. Wilbur F. Storey the well-known Chicago editor, is said to have given that city up for lost after the fire of 1871. The Chicago that was burned was a country town compared with the Chicago of to-day; and the general experience is that human energy and enterprise are not crushed out, but are stimulated by these calamities. We may instance the cases of Galveston, of Baltimore, and of St. Louis. It is true that there are few cases in which the destruction has been so complete and far-reaching as in San Francisco. But, on the other hand, the position of San Francisco as a port is so advantageous, and the prizes of the Pacific trade so alluring to ambition, that the stimulus for revival will be unusually great.

At the same time this trade is now growing so rapidly that the most energetic building of San Francisco cannot keep pace with it, and her merchants must be content for a time to see business going to build up her rivals. The fact is that the trade of the present is small compared with the possibilities of the future. We may expect to see on the Pacific coast a city as populous and wealthy as New York. The Pacific trade is in its youth, and the race for supremacy has only just begun. The latest reports are that the loss of property is less than was at first anticipated, that the steel-frame buildings have stood well, and can be repaired and fitted for use in a week or two. Unfortunately this is accompanied by the intelligence that the loss of life is heavier than the early reports indicated.

The Ways of Madeira.

The people of Madeira are as harmless as their country. The stranger meets with no snakes and need not fear mosquitoes; neither has he to take any precautions against being molested in the most out of the way parts. Everywhere civility, politeness and pleasant faces will greet him. The prices asked are grotesque, often five times what will be finally accepted. Some find the absence of fixed prices abroad a great nuisance, but the bargaining in Madeira is so good humored and can be made so amusing that the change of custom in this respect is rather refreshing.

A Picturesque Wedding.

An interesting wedding recently took place in England. The bridegroom was a fireman, and accordingly the members of the local fire brigade attended the wedding. They formed up outside the church and made an arch with their axes, under which the bride and bridegroom walked. Then the firemen drew the happy couple home in a carriage, blowing their whistles as they went through the streets.

German Silver.

One of the oddities of nomenclature is that the combination of metals known as German silver contains no silver in its composition and is of Chinese and not of German origin. It was introduced into Europe by the Germans, and for some time it was not generally known that they had simply borrowed it from the Chinese.

Glandular Swellings.

Here is a remedy for goiter and glandular swellings: Glycerinated iodine lotion—iodide of potassium, two drams; distilled water, one pint; glycerin (pure), one ounce. Dissolve the iodide in the water, then add the glycerin. Apply with antiseptic gauze or fine linen.

stating in the neighborhood and bestowed his name upon the place, after the manner of Constantine, Alexander and others. The word came eventually to signify a schedule of charges and passed into the French, Italian and English.

Weird Story of a Chair.

In the museum at Cape Town is shown an old fashioned, high backed wooden chair, to which attaches a weird story. It is related that the chair is the one in which the Dutch governor was found sitting dead a few moments after the execution of a soldier whom he had sentenced to be hanged, and who on his doom being pronounced solemnly called upon his condemnor to accompany him to the throne of the Supreme Judge.

"On Satan's Knees."

A little girl of five or so was much puzzled on hearing the lines of the old hymn:

And Satan trembles when he sees
The weakest saint upon his knees.

"Whatever," she asked, "did they want to sit on Satan's knees for? I'm sure I should not like to sit on Satan's knees at all, and why should he tremble if they were so little?"

From the Irish.

First Citizen—I beg your pardon, sir, but I am a stranger in Dublin. Can you direct me to Grafton street? Second Ditto—With Pleasure. Sure it's the second turn to the right. First Ditto—Thank you, sir. (Walks off.) Second Ditto (calling after him)—Hi! If you're a left handed man it's the other way entirely.—London Globe.

Taking No Chances.

"Perhaps," suggested the waiter, "you would like a Welsh rabbit."

"No," said the austere customer; "I am a vegetarian."

"A Welsh rabbit is made of cheese, you know, sir."

"I know it. As I said before, I am a vegetarian."

Inflexible.

"She is so rigidly conscientious."

"Indeed?"

"Yes; she sticks to her principles as if it were a matter of etiquette."

JUDICIAL NOTICE TO THE CREDITORS OF THE NEILSON-ROBINSON CHEMICAL COMPANY, LIMITED.

PURSUANT to the Winding-up order made by the High Court of Justice in the matter of the Winding-up Act and Amendments thereto and in the matter of the Neilson-Robinson Chemical Company, Limited, bearing date the Third day of April 1906, the creditors of the above named Company and all others who have claims against the said Company formerly carrying on business in the Town of Napanee are on or before

7th DAY MAY A. D., 1906.

to send by mail postpaid to C. M. Warner, Esq., or W. F. Hall, Esq., Liquidators, of the said Company, addressed to them at Napanee their christian and surnames, addresses and descriptions, the full particulars of their claims and the nature and amount of the securities (if any) held by them and the special value of such securities verified by oath and in default thereof they will be peremptorily excluded from the benefits of the said Act and Winding-up order.

The undersigned Master of the High Court of Justice at Napanee will on the 11th day of May, A. D. 1906 at ten o'clock in the forenoon at his Chambers in the Court House in the Town of Napanee adjudicate upon the claims of creditors submitted to him pursuant to this notice and let all parties then attend.

S. S. LAZIER,

Local Master.

DR. AGNEW'S OINTMENT relieves eczema, scrofula and all skin eruptions with first application—25 cents.

Sold by F. L. Hooper.

Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIR,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

It's easy to buy FROST FENCES

Our prices for Frost Fence are only as much as the best fence in the world is honestly worth. And we make the terms so easy that every farmer and stockman can take advantage of them.

Here's the way we will let you buy all the Frost Fence you need:—One third cash on delivery. One third by note, due Oct. 1st '06. One third by note, due March 1st, '07.

Five per cent. discount for cash if paid within 60 days from date of invoice.

And remember—should Frost Fences go wrong, from mechanical defects or workmanship in building, they are repaired, free of charge.

TO THE PUBLIC—

Our Spring Goods have now arrived and we are able to show exceptional values and patterns in Crum's Prints, Sateen Prints, Dress Ducks, Organdies, Priestley's Lustres, and Silks.

We have a full supply of Groceries, Flour, and Feed, Patent Medicines, Boots and Shoes, and Hardware, in fact everything kept by a general store.

We are able to compete with any general store in the province

We pay Highest Price for all Farm Produce.

S. BOND & CO., ODESSA.

Slaves to Rheumatism

Freed by
"Fruit-a-tives"

"Fruit-a-tives" cure Rheumatism and Rheumatic pains by removing the poisons which cause the disease. Rheumatism means poisoned blood. Too much urea or tissue waste is retained in the blood, owing to defective action of the bowels, kidneys or skin. The retained urea becomes uric acid, which inflames nerves and joints and thus rheumatism is produced.

Mr. R. H. Ingram, Sault Ste. Marie, Ont., writes as follows: "I think 'Fruit-a-tives' are fine. I am using them for rheumatism, and have not felt it since I started to take them."

Fruit-a-tives
or Fruit Liver Tablets.

"Fruit-a-tives" cure Rheumatism by greatly stimulating the action of the liver, kidneys and skin. "Fruit-a-tives" make each of these vital organs do its share of nature's work properly. "Fruit-a-tives" rid the system of excessive urea and uric acid—and so purify and enrich the blood and build up the general health, that there can be no rheumatism.

"Fruit-a-tives" are fruit juices, concentrated and combined by our discovered process, which makes them much more powerful medicinally. Then tonics and internal antiseptics are added and the whole compressed into tablets.

If your druggist does not have them, don't take substitutes. Sent prepaid on receipt of price—50c. a box or 6 boxes for \$2.50.

FRUIT-A-TIVES LIMITED, OTTAWA.

Canadian and American Coal Oil.

Old Parliamentary Fines.

It is costly to be a member of the British parliament, but some ancient expenses are spared the modern member. An order dated 1640 runs thus, "Those who go out of the house in a confused manner to forfeit 10 shillings." Others enact that "all the members that come after 8 (the house met at 8 o'clock in the morning then) to pay 1 shilling, and those who do not come the whole day to pay 5 shillings, those who do not come to prayers to pay 1 shilling, such members as come after 9 o'clock to pay 1 shilling to the poor," etc. Still more expensive was it for members to go out of town without permission. In 1664 a penalty of £10 was imposed upon every knight and of £5 upon every citizen who should make default in attending the house, and a penalty of £40 upon every member "as shall desert the service of the house for the space of three days together (not having had leave granted him by the house), and he shall be sent for in custody and committed to the Tower." Week enders had a bad time in 1664.

Why Fruits Turn Red.

Fruits turn red when they ripen because of a wise provision of Mother Nature. It makes the fruit conspicuous to birds and other animals, and thus secures the dispersion of the seed. If the fruit were of the same color as the leaves it might easily be passed over. When the fruit or seed is inconspicuous, through either the want of color or the small size, dispersal is effected without the aid of animals, as in the case of the dandelion, whose seed is carried about by the wind, or of the balsam, the seed of which is ejected by a sort of spring. The colored fruits, such as the grape and the cherry, are furnished with succulent coats, which provide food to birds, who in their impatience often swallow the seeds or stones, which may pass through the animal's body without change. Seeds may thus be conveyed not only for considerable distances on land, but also from continents to oceanic islands, which may in this way acquire a new vegetation.

Some London Clubs.

London has many curious clubs, such as the Utopians, whose motto is "Serve God and be merry," and the Froth Blowers, whose members are said to be bound to curse and swear every time they enter the club. There are also many unregistered clubs which have no headquarters and take out no licenses, and there are also many clubs whose members are manifestly drawn together by some common bond of sympathy. Among these the London Daily Express enumerates the following:

The Boz club (admirers of Charles Dickens).

The '05 club (amicability and the arts). The Royalists (guillotines and diamonds).

The Castaways' club (resigned naval officers).

The Lost Legion (for empire pioneers).

Sarcasitic Swift.

It was Swift who warned a friend who was extolling the air of overtaxed Ireland: "Hush! If they hear you say that, they'll certainly tax the air."

A Bad Combination.

Scads—You say he left no money? Baggs—No. You see, he lost his health getting wealthy, and then lost his wealth trying to get healthy.

THE MEDICAL SENSATION

Other Remedies Failed—Pe-ru-na Cured.

Mrs. Chas. Steinecke, Stoughton, Wis., writes: "My experience with Peruna has been most pleasing. By carelessly leaving a heated ball room I got thoroughly chilled and caught a heavy cold which settled on my lungs. I wore a protector, took many remedies for cold without success. With my other troubles I had catarrh of the head. "Peruna was recommended to me and I bought a bottle and soon began to improve. I kept on taking it and it cured me from all my troubles. I am pleased to testify to its merits."

The World's Greatest Medicine Factory.

The rapid growth of the Peruna Medicine Company is as phenomenal in the business world as the universal popularity of their famous remedy, Peruna.

The plant covers a number of acres, and employs several hundred people. No other medicine firm in the world reaches anything like the volume of business done by Dr. Hartman's firm.

Although Peruna is a proprietary medicine, the details of its compounding are no secret and nothing gives Dr. Hartman greater pleasure than to show the many friends of Peruna all the es-

sential processes by which Peruna is made.

A Doctor's Prescription.

For years Dr. Hartman used Peruna in his private practice as a regular prescription. He had no thought of manufacturing it or advertising it as a proprietary medicine until there was a demand made upon him by his many friends, who clamored for the original prescription.

Forty Thousand Patients.

Dr. Hartman estimates that he must have prescribed Peruna for over forty thousand patients before it was advertised as a proprietary medicine.

KALADAR.

Mr. W. G. Rigby, of Leaside Jet, took charge of service in the Methodist church, on Sunday last.

Mr. Eben Rutan and son left for the west on Monday. Their families will follow in a couple of weeks.

Mr. James Bathgate, Blainton, spent Sunday in town.

Mrs. H. Ailport spent Sunday last with her mother, Mrs. C. Pickering.

Miss Laidley, teacher, is spending her Easter holidays at her home in Ernestown.

Mr. W. Both, Northbrook, was in town on Saturday.

Miss Laura Morton is visiting friends

dangerously near morning, to the lively strains of the Babcock and Dowd orchestra.

Arnold Brown purchased a fine young roadster in Kingston, one day last week.

Visitors: Miss H. Steel, Verona, at J. E. Boulton's; Mr. and Mrs. J. Graham, Elginburg, at Jas. Huff's, on Monday; Will Brown, Desmond, at his home here on Sunday; Rev. and Mrs. Whattam and Miss E. Whattam, Wilton, Mr. and Mrs. T. Clyde and Mrs. J. Snider, Olesca, at Benj. Rose's on Monday; Mr. and Mrs. B. Holden, Yarker, at C. Day's on Sunday.

Mr. and Mrs. F. Brown at D. C. Jenn-

(Daily. All other trains run dall Sundays excepted).

WALTER RATHBUN President. H. B. SHERWOOD, Superintendent. D. A. VALLEAU, Asst. Superintendent.

Mrs. H. Alport spent Sunday last with her mother, Mrs. C. Pickering. Miss Laidley, teacher, is spending her Easter holidays at her home in Ernestown. Mr. W. Both, Northbrook, was in town on Saturday. Miss Laura Morton is visiting friends at Northbrook. Miss Hazel Godfrey is spending her Easter holidays with her aunt, Mrs. W. Parks, at Arden. Mr. Otto Dempsey is home visiting his mother, Mrs. N. McBride. Miss Pearl McBride has returned home, after spending the winter in Selby. Mr. Cole has returned after visiting his friends in Picton. Miss Chas. Morton is paying a farewell visit to her father and sister at Leaside before leaving for the west. Mr. Nichol, Newwood is the guest of Mr. Joseph Morton. Mr. Paul, of Selby, passed through here on Monday en route to Cloyne and Dunbligh. Mr. and Mrs. Jackson of the Star of the East, registered at the King Edward on Tuesday. Mr. and Mrs. Charlie Morton were the guests of Mrs. Fleming on Monday. Rumor says Mr. Morton is about to take up his abode at the King Edward. Peter says there is no place like it. Messrs. Chas. and James Morton have their car loaded and expect to leave for the West on Wednesday. Mr. James Wheeler registered at the Algerian on Tuesday last. Mr. and Mrs. C. Kellar have returned home after spending Easter in Kingston. Mr. A. Kellar visited his sister, M. S. J. Morton.

day. Will Robinson, Desmond, at his home here on Sunday; Rev. and Mrs. Whattam and Miss E. Whattam, Wilton, Mr. and Mrs. T. C. Clyde and Mrs. J. Sailer, Olesca, at Benj. Rose's on Monday; Mr. and Mrs. B. Holden, Yarker, at C. Day's on Sunday. Mr. and Mrs. F. Brown at D. C. Jennings' Napanee, on Saturday. Mr. and Mrs. S. Bush in Colebrook, on Friday.

WOMEN'S SENSES.

They Are, It Is Said, Less Acute Than Those of Men.
The man, when his tooth was pulled, yelled hoarsely. The next patient, a woman, bore the pain of three extractions with silent fortitude. "Yes," said the dentist, "women endure the pangs of tooth pulling better than men, but they deserve no praise on this account. They feel the pain less. Experiments have frequently been made to test the acuteness of the masculine and feminine senses. A series of experiments were made in New York city, and they were interesting and conclusive. First, taste was tried. The male subjects could detect in water the presence of the sixtieth part of a grain of gall. The women couldn't distin-

TWO OPEN LETTERS

IMPORTANT TO MARRIED WOMEN

Mrs. Mary Dimmick of Washington Tells How Lydia E. Pinkham's Vegetable Compound Made Her Well.

Austria Enamelled ware. Every piece perfect, no flaws or marks, warranted not to discolor, free from acids. The best goods ever imported. BOYLE & SON, Agents.

EAGLE HILL.

The saw mill has been closed down for repairs. Our popular teacher, Miss Stewart had a well-earned rest at her home in Belleville, during Easter holidays. Edward Villneff made a business trip to Napanee last week. M. Ready left Tuesday to cook for Gillies Bros., on the drive at Snake Creek. Master Lorne John has gone to spend the summer with his sister, Mrs. C. Teeples, Douglas, and to attend school. Miss Mary Kittner has accepted a position at Denbigh. Otto and Emil Fritsch have left for their home at Swift Current, Sask. Mrs. E. Hawke is spending a week with her aunt, Mrs. J. Rahm, who is seriously ill. Miss H. Petterfer, ill for some time, is slowly improving. Miss Dora Marquardt was the guest of Miss Crissy Chatsen, Saturday. Miss M. J. John spent Good Friday at Manor Hill, guest of Mrs. John Petterfer. Robert Ferguson has purchased a fine buggy. Visitors: M. Irvine, at J. Irvine's; Mr. and Mrs. Ready, at R. Fritsch's; L. and F. Mieske at M. Ready's; O. Mieske, at H. Petterfer's; Chas. Fritsch at A. Kittner's.

Pinkham, of Lynn, Mass., is fully qualified to give helpful advice to sick women. Read Mrs. Dimmick's letters.
Her first letter:
Dear Mrs. Pinkham:—
I have been a sufferer for the past eight years with a trouble which first originated in painful periods—the pains were excruciating, with inflammation and ulceration of the female organs. The doctor says I must have an operation or I cannot live. I do not want to submit to an operation if I can possibly avoid it. Please help me.—
Mrs. Mary Dimmick, Washington, D.C.
Her second letter:
Dear Mrs. Pinkham:—
You will remember my condition when I first wrote you, and that the doctor said I must have an operation or I could not live. I received your kind letter and followed your advice very carefully and am now entirely well. As my case was so serious it seems a miracle that I am cured. I know that I owe not only my health but my life to Lydia E. Pinkham's Vegetable Compound and to your advice. I can walk miles without an ache or a pain, and I wish every suffering woman would read this letter and realize what you can do for them.—
Mrs. Mary Dimmick 50th and East Capitol Sts., Washington, D.C.
How easy it was for Mrs. Dimmick to write to Mrs. Pinkham at Lynn, Mass., and how little it cost her—a two-cent stamp. Yet how valuable was the reply! As Mrs. Dimmick says—it saved her life. Mrs. Pinkham has on file thousands of just such letters as the above, and offers ailing women helpful advice.

ION OF THE AGE—THE DISCOVERY OF PE-RU-NA

BY DR. S. B. HARTMAN.

MISS JOSIE SCHAEZEL,
R.R. No. 1, Appleton
Wis.

MRS. CHAS. STEINECKE,
Stoughton, Wis.

MISS MARGRET FAHEY,
49 Adams St. Troy, N.Y.

MISS ELLA M. MILLER,
140 F. St. N.E., Washington, D.C.

Cured in Four Weeks of Severe Gold on Lungs.

Miss Josie Schaezel, R. R. No. 1, Appleton, Wis., writes:

"I contracted a severe cold which settled on my lungs in very short order and it was not long until it developed into a serious case of catarrh. Every morning I would raise a lot of phlegm, which was very disagreeable. My digestion was poor and my lungs sore.

"After a few doses of Peruna, I began to mend, and felt that if I kept on taking it, it would not be long until I would be well. I was right, for in four weeks I was well again.

"I think Peruna is a grand medicine, and wish to add my testimony to the many others you have."—Josie Schaezel.

Pe-ru-na Removes the Cause of Catarrh.

Peruna has no bad effects upon the system and gradually eliminates catarrh by removing the cause of catarrh. There are a multitude of homes where Peruna has been used off and on for twenty years.

guish the gall in a smaller quantity than the twentieth of a grain. The men's taste was three times keener than the women's.

"Next, smell. The men smelled the presence of the hundredth part of a grain of prussic acid. The women were unconscious of the acid till a quantity five times greater was set before them. In smell the men were five times the women's superiors.

"Men heard a watch ticking at a distance of ten yards; women could only hear it at a distance of two yards. The males again, you see, were five times the better. It was the same thing with

Given Up By Doctors—Cured By Pe-ru-na.

Miss Margaret Fahey, 49 Adams street, Troy, N. Y., writes:

"We have used Peruna in our family for years and I am very pleased to say that it cured me of catarrh of the lungs when the doctors gave up all hope of my recovery.

"I used Peruna for six months and at the end of that time my cough had disappeared, my appetite was much better and I had gained ten pounds and looked the picture of health.

"I am in perfect health, now, and feel that Peruna not only cures catarrh, but builds up the system, and is therefore a grand medicine."—Margret Fahey.

Pe-ru-na's Popularity.

Peruna is not like so many other remedies that pass away as soon as the first few bottles are used. The longer Peruna is used in any community, the more popular it becomes.

Pe-ru-na Actually Cures.

The reason why Peruna has become a standard catarrh remedy the world over is simply because it cures catarrh.

This explains why Peruna has become so popular. It cures catarrh. This is an amply sufficient reason why it should become popular.

Catarrh is almost universal. Catarrh is difficult to cure. The doctors do not care to treat cases of catarrh at all.

It therefore follows that when a remedy is devised that can be used in the home at a moderate cost, such a remedy should inevitably become popular.

On His Dignity.

Mr. Q. Ponze—No, sir; my daughter would starve if she married you. Mr. Nooyne—Oh, well, if you're the sort of man that would let your own daughter starve I've no desire to become a relative of yours. I withdraw my request, sir.

Longing For a Soaker.

Hobbs—Queer, isn't it, that it never rains when one wants it to? Dobbs—Garden in need of rain? Hobbs—No, it's myself. My wife gave me a new umbrella for a birthday present, and

Legend of a Book.

A quaint and kindly legend, illustrating the sorrow devout Christians used to feel for the paganism of their favorite classic authors, is that of St. Cadoc and his Virgil. St. Cadoc, whose day is Jan. 24, was the son of a South Welsh prince, who founded several monasteries in Glamorganshire and neighboring regions, but was driven away to Brittany by the coming of the Saxons. There he was walking one day with a copy of Virgil's poems in his hand and wept to think that Virgil as a pagan might be in hell. An ultra orthodox friend who was with

Entirely Cured By Several Bottles of Pe-ru-na.

Miss Ella M. Miller, one of Washington's society girls, writes from 140 F street, N. E., Washington, D. C., as follows:

"With pleasure I recommend your medicine for catarrh of the head. Having taken several bottles, I find myself entirely cured. I cannot praise Peruna too highly."—Ella M. Miller.

Pe-ru-na Contains No Narcotics.

There are a great many catarrh cures in the world. The most of them are local applications. Few of them are to be used internally.

Unfortunately a large number of these catarrh remedies, especially the ones prescribed by the doctors, contain narcotics of some sort. Cocaine, opium, whisky, and other narcotics are used.

These remedies give temporary relief. The patient thinks he is better right away. In a few weeks, however, he discovers his mistake. Not only is his catarrh no better, but he has acquired the habit of using some narcotic. This happens in a multitude of cases.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotic of any kind.

Peruna is perfectly harmless. It can be used any length of time without acquiring a drug habit.

Vapo-Cresolene
Established 1879.

Whooping Cough, Croup, Bronchitis
Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

Vapo-Cresolene is a long established and standard remedy for chest diseases indicated. It cures because the air rendered instantly and pure is carried over the diseased surfaces of the bronchial tubes with every breath, giving relief and constant treatment. Those of a consumptive nature or who suffer from chronic bronchitis, find

five times the women's superiors.

"Men heard a watch ticking at a distance of ten yards; women could only hear it at a distance of two yards. The males again, you see, were five times the better. It was the same thing with sight and with touch. The men saw five times better. They felt five times more keenly and delicately.

"These experiments explain in a way the apparent anomaly of woman's wondrous fortitude to pain. Woman's senses being less acute, she is less affected by pain than man."—Exchange.

THE OYSTER.

It Was Eaten by Riparian Man Thousands of Years Ago.

It was Dean Swift who remarked that "he was a bold man that first ate an oyster," but neither Dean Swift nor any other lover of good eating has been able to find records of any time, however ancient, when oysters were not eaten, while there is ample proof that thousands of years ago riparian man not only consumed these bivalves, but was very fond of them. Thus the "kjoekkenmoeddinger" or "kitchen refuse" along the Scandinavian coasts exhibits huge hills of oyster shells from which prehistoric men ate this succulent mollusk at their feasts in the days of Thor and Odin. There is, of course, an interesting tradition which relates how, in those prehistoric days a man clad in the skins of wild beasts ran barefooted along the shore of the sea. Suddenly he caught his foot in an oyster shell, which, as it instantly closed upon him, caused him so much pain that he seized a stone to dislodge the strange foe that clung to him so tenaciously. After accomplishing his purpose he raised his hand, moist with the juice of the oyster, to his lips, with results that were so pleasing to his palate that he promptly proceeded to eat the entire bivalve. Thus, it is said, did man first discover the gustatory delights contained within an oyster shell.

The Throne of Thunder.

Mungo Mami Lobeh, the throne, or place of thunder, as the natives call it, the peak of Kamerun, as the whites call it, is the highest point on the western side of the African continent. The first view the voyager gets of it who, coming from the northward, has been coasting for weeks along low shores and up the stagnant rivers, fringed with mangrove swamp, is a thing no man can ever forget. Suddenly, right up out of the sea, the great mountain rises to its 13,760 feet, while close at hand, to westward, towers the lovely island mass of Fernando Po to its 10,190 feet, and great as is its first charm every time you see it it becomes greater, although it is never the same. Five times I have been in the beautiful bay at its foot and have never seen it twice alike. Sometimes it is wreathed with indigo black tornado clouds, sometimes crested with snow, sometimes standing out hard and clear, as though made of metal, and sometimes softly gorgeous, with green, gold, purple and pink vapors tinted by the sunset.—London Mail.

Longing For a Soaker.

Hobbs—Queer, isn't it, that it never rains when one wants it to? Dobbs—Garden in need of rain? Hobbs—No, it's myself. My wife gave me a new umbrella for a birthday present, and it hasn't rained since.

Balanced.

The Caller—Your art gallery is a treat. This picture especially is delightful; the values are so well balanced. Mr. Porkham—That's right; frame, \$200; picture, same price.—Puck.

A Trying Reform.

A Presbyterian clergyman of New York with two popular daughters has discovered a new way to end the visits of their beausat a seemingly hour—a plan which might appeal to lay families as well. For a number of years it has been a custom of this good man to hold evening worship after supper, always concluding the prayers with a short discourse. Things went very well until the daughters began to receive the attentions of young men and begged off or stole away to make their evening toilets. Then the minister changed the devotional hour until 10 in the evening. This reform created an upheaval, but the father insisted, and at the stroke of 10 the visiting young men are now left one alternative—either to leave or join with the family in prayer—and it has proved a severe test of their devotion for the daughters when those not prayerfully inclined stick it out, sermon and all.

The Good Fellow.

The treasurer of a church temperance society told at a temperance meeting a dramatic story.

"A woman entered the barroom," he said, "and advanced quietly to her husband, who sat drinking with three other men. She placed a covered dish on the table and said:

"'Thinkin' y'd be too busy to come home to supper, Jack, I've fetched it to you here.'

"And she departed.

"The man laughed awkwardly. He invited his friends to share the meal with him. Then he removed the cover from the dish.

"The dish was empty. It contained a slip of paper that said:

"'I hope you will enjoy your supper. It is the same as your wife and children have at home.'

Coffee-Tea.

Coffee-tea is the common beverage of the natives of Java and Sumatra. When required for infusion the coffee leaves are gathered fresh from the trees and are dried in a pan over a slow fire until they are light brown. They are then put into a teapot, boiling water is poured over them, and the infusion is drunk with milk and sugar. It seems the general opinion that coffee should come in contact with metal as little as possible. The Viennese people prefer a glass bottle to a canister for storing, and Brazilians use earthenware in preference to a metal pot for making.

Antelopes Choose the Open.

The antelope lives always in open country, unlike members of the deer family, which invariably prefer a thick, dense forest. They cannot be driven into timber cover or thickets of brush, but will literally turn about and run over a pursuer, if necessary, rather than be forced into cover. If they are ever obliged to pass by or through such places for food and water, they take a great deal of time to do so, as if they were determined to see everything that could be seen en route.—H. H. Cross in Century.

neighboring regions, but was driven away to Brittany by the coming of the Saxons. There he was walking one day with a copy of Virgil's poems in his hand and wept to think that Virgil as a pagan might be in hell. An ultra orthodox friend who was with him severely reproved him for even doubting the fact, and a sudden gust of wind carried the book out of Cadoc's hand into the sea. But that night he heard in a dream a sweet voice saying: "Pray for me; weary not in praying. I will sing the merries of the Lord forever." And next day a fisherman brought Cadoc a fish inside which the Virgil was found uninjured.—London Chronicle.

Had Him.

He—Isn't dinner ready yet? She—No, dear, I got it according to the time you set the clock when you came in last night, and dinner will be ready in four hours.

After Identification.

Detective—Could you identify the man who bunked you? The Victim—Identify him? I'll do a good deal more than that to him if I ever get near enough.

Schliemann's Luck.

It is told of Schliemann, the exhumed of buried cities of the ancient world, that he was pursued by ill luck in his earlier undertakings. Mentioning the fact to a friend, the latter asked him which leg and arm he first inserted in trousers and coat. Schliemann said he habitually inserted the right. "That is the cause of your misfortunes," said his friend. "You have offended the left hand fairies, and they take out their vengeance on you. Reverse your habit and see." "And," said Schliemann in telling the incident in his later and prosperous years, "you see how it changed my luck."

The Great Lakes.

Lake Superior is the deepest of the great lakes, showing by soundings 1,008 feet in at least one place. Michigan stands second, with 100 feet less. Huron and Ontario are about 750 in the deepest parts, while Lake Erie is but 204. Vast areas of Lake Erie will not show a depth exceeding 80 feet. The bottom of Lake Michigan is 400 feet above sea level.

An Odd Verdict.

A jury in Lindsey, Lincolnshire, England, after being out some time on a case of alleged false pretenses, returned to court and said, "We can't bring him in guilty and don't like to say he is not guilty." They were sent back and in fifteen minutes reached this verdict, "We find him guilty, but not with intent." The prisoner was discharged.

Blackmail.

"Mamma," said five-year-old Margie, "I'll make a bargain with you."

"What kind of a bargain, dear?" asked her mother.

"If you'll give me a penny every day to buy candy with," replied the small diplomat, "I'll not tell any one you have false teeth."

The One to Be Pleased.

"No," said Peckham, "we never have boiled ham at our house any more."

"Why," replied Newitt, "I thought you were very fond of it."

"So I am, but my wife's pet dog won't eat it at all."

One is never weary of life. One is only tired of oneself.—Carmen Sylva.

CASTORIA.

Bears the Signature of *Chas. H. Fletcher*

Crocolone is a boon to Asthmatics

Crocolone is a long established and standard remedy for all cases of asthma. It cures because the air respiration is entirely unimpeded by the diseased surfaces of the bronchial tubes with every breath, giving relief and constant treatment. Those of a consumptive nature, or who suffer from chronic bronchitis, find relief from coughs or inflamed conditions of the throat.

Write to the Crocolone Co., 100 N. 3rd St., St. Paul, Minn., for a free trial bottle of Crocolone. It is a sure cure for all cases of asthma, bronchitis, and all other conditions of the throat.

50 YEARS' EXPERIENCE

PATENTS

TRADE MARKS, DESIGNS, COPYRIGHTS & C.

Any person sending a sketch and description may quickly ascertain our opinion free whether an invention is a patentable subject. Communications strictly confidential. Inventions on Patent sent free. Office of the Patent Attorney, 100 N. 3rd St., St. Paul, Minn.

Scientific American.

A handsomely illustrated weekly. Largest circulation of any scientific journal. Terms, \$3 a year. Four months, \$1. Sold by all newsdealers. MUNN & Co. 361 Broadway, New York. Branch Office, 125 F St., Washington, D. C.

A Waterspout.

A scientist says of a waterspout that passed over a certain district in France: "Its passage was accompanied with a sound which is described as resembling that of a battery of artillery, drawn on the gallop over a paved street. At the base of an extended nimbus hung the reversed cone characteristic of phenomena of this kind. A strong wind was then blowing from the south-southwest. The waterspout was preceded by a storm and followed by a shower."

Two Archbishops.

The archbishop of Canterbury is primate of all England and therefore takes precedence of the archbishop of York, who is only "primate of England." This very nice distinction was made several centuries ago on account of a very bitter dispute arising between the two functionaries as to which should precede the other. The matter was settled by conferring precedence upon the archbishop of Canterbury, the two titles being also bestowed at the same time.

The Australian Native.

For hundreds of years, perhaps thousands, the Australian black has accepted the doctrine of a Trinity in heaven and the theory of evolution. In some respects he is far superior to his civilized contemporary, but he curls himself around like a dog and sinks to sleep on the bare ground at sunset. In the dark he is a veritable coward.

What Happens.

In a written examination on physical geography one of the questions was: "What happens when there is an eclipse of the moon?"

A boy with rather an admirable knack of getting out of a difficulty wrote the following answer: "A great many people come out to look at it."—London Answers.

Precaution.

Briggs—Does your wife laugh when you tell her a funny story? Bragg—Oh, yes! I always tell her beforehand that it is funny.

Hold on, hold fast, hold out. Patience is genius.—Buffon.

LEIBIG'S FIT CURE

"THE FAITH BY WHICH ONE LIVES"

Rev. Charles Wagner Preaches a Lesson Much Needed These Days.

We feel an immense pity when we see how some people live. Some men have made a study of the life of small households and the means of poor families and it is frightful to see under what privations they exist.

But in the domain of the spirit it is infinitely more sad.

There are many whose food consists of already gnawed bones belonging to the time of our ancestors; others are seated around bread that was new once upon a time, but is now so stale that it has become too hard for their teeth. Others live upon mere illusions and vanities. Others live upon hatred. They find life interesting only because they can hate some one, work against another, speak evil of a third. There are some who live on pride, draping themselves in their rags as in a king's mantle, despising all those who do not wear their livery.

What do men live upon? How do we live? Who goes by his faith? Who has drunk of that good spring of which Christ has said: "Whosoever drinketh of the water that I shall give him shall never thirst?"

To the greater number of even religious people faith is but a decorative supplement to a prosperous situation—something like a fine view around a comfortable estate; but it is not its essential part. Some believe in the God of happy days, in the Lord who gives them prosperity, health, or cures them of an illness. Others rise even a little higher. They believe in God who, under certain peculiar circumstances, by which the imagination and heart are struck, grants deliverances such as that which was given to Daniel thrown into the lions' den, and who was spared by the lions, or to the three men thrown into the furnace, and who were

NOT TOUCHED BY THE FIRE.

But they do not believe in the God of the vanquished, of unsuccess, of misfortune and ruin. They do not believe in the God who lies down with us in the grave, so that it may seem less gloomy to us. After having worshipped the miracle of some striking and liberating action, they do not raise their souls to the God in whom we should still believe, even when the lions devour the prophets, when the fire consumes the martyrs, and when the world, following its ordinary and inexorable onward march, tramples on our hearts and hopes. They do not believe in the God who does without miracles, the only one, nevertheless, who remains with us in these despairing hours when nothing comes to help us. They have not, in a word, the faith that consists in looking down into the bottomless pit and in casting one's self into it, saying to God: "In spite of all, I belong to Thee and my life is in Thy hands." They believe in God under certain conditions, but they do not believe in Him without conditions.

Others hang their faith on to the paragraphs of a catechism, and when some points appear less clear to them their

trust in God lessens, and they say: "We have lost faith." No, you have not lost faith; you have lost papers that represent property. But that property is one which must be won again by personal work. Without that work, however old your papers may be, they will be valueless to you; they will be but protected drafts. The faith that feeds its man, the faith that saves, is not a second-hand faith, even though it may be legitimized by the signatures and seals of the oldest traditions. It is a direct faith. It is not without some definite intention that it is written in the Hebrew text, "The just shall live by his faith"—by personal faith, that has become his very sap and blood, and not a conventional faith, vaguely adopted

FROM THE OPINIONS OF OTHERS.

Then in all that appertains to the treasure of faith we depend upon some extent, great or small. We depend upon something that learned men may exult to-morrow from the tombs of the east or may find at the bottom of a re- tort. We depend upon something that an individual or a group of people may deny or assert in regard to a text in the Bible. We depend, in a word, upon an accident. But then, if that were so, we would be the most wretched of mortals! It might happen to us one day what happens when the earth trembles—all our calculations may be upset, because the centre of gravity is no longer in the same place.

No, the just shall live by his faith, independent of all events.

It is as if Christ would say to him: "Believe, fear nothing, have perfect trust. I come to you as a messenger of immortal goodness, to tell you, in your wretchedness and isolation, that some one is thinking of you."

"Fear nothing, for man can think of nothing that would prevent God from existing; fear nothing for man can say nothing that could prevent God from loving you; fear not the day, fear not the night, fear not men, fear not to-morrow or the past. Your trust in God would be fruitless if you did not complete it by trust in yourself, in your poverty and wretchedness, by which you can glorify God. The homage you should pay him is to believe in His presence, wrapped in the rough cloth of your trembling humanity. If you do not believe in yourself, if you look upon yourself as a negligible quantity, if you doubt God at any moment, your faith is but a broken chain. Listen to the voice that speaks to the prophet: 'For the vision is yet for an appointed time, but at the end it shall speak. Though it tarry wait for it.'"

That is what we need to have said to us in our poverty, in our wretchedness, our ignorance, when we are bending under our burdens, on the graves where we weep, in the midst of the ruins of the earth, of the changes that take place all around us. Let it be also our watchword, at this turning point of our religious history.

rains, but were the first also to become parched and dry after the rainy season had passed, because on them there was no deepness of earth.

7. Among the thorns—A variety of thorns most common in Syria and Palestine was the "Nabk" of the Arabs. Of this same variety of thorns doubtless the crown was woven which Jesus later was forced to wear.

Choked it—The thorns being hardier, and of more rapid growth, as well as many in number, absorbed all the moisture and quickly shut out the sunshine, making it impossible for the

DOG MADE NOT A SOUND

AND THE MAN GUILTY OF A MURDER WAS CAUGHT.

Proof That the Robbery and Murder Was Done by One on Good Terms With Dog.

Many crimes have been detected through the barking of a watchdog, but that the failure of one of these faithful canine guardians to raise an alarm should furnish the clue by which the perpetrator of a murder was discovered, is rather unusual. That, however, is only one of the elements which lends unusual interest to the crime of the Rue Saint Maur which all Paris, France, is discussing. It contains all the material for one of those thrilling stories in which Emile Gaboriau delighted.

Henri Bedor, the proprietor of a large bookbinding factory, frequently worked late in his office over his accounts. He was doing that on the fateful night which proved to be his last on earth. At 9 o'clock, a maid servant, Germaine Pariot, brought in, as usual, the big boarhound, Diane, which was kennelled at night in M. Bedor's office to guard the safe. This dog and its male, Tom, which guarded the factory at night, were of great size and ferocity. None of the employees in the factory dared touch them. The only persons who could come near them without arousing their anger, as the police subsequently ascertained, were M. Bedor himself, his wife, his brother Frederic, the girl Germaine, August Marthieu, his chauffeur, and

HIS COACHMAN, DUBOIS.

The maid servant left M. Bedor shortly after 9 o'clock. At a quarter past ten Germaine heard a door slam. She roused Dubois, and they made an investigation. They found M. Bedor lying dead at the foot of the staircase leading from his office. He had been stabbed in the back and again in the chest, apparently by a rapier or stiletto. The fingers on his right hand been cut, indicating that in the struggle for his life he had endeavored to wrest the weapon from the assassin.

When the police arrived on the scene the great boarhound in the room above, which had given no tongue while his master was being done to death, began to bark furiously. When they entered the room with Dubois his intervention alone prevented the animal from attacking them.

They found the safe locked and the key in the dead man's pocket. On the table was the lamp which M. Bedor had used while examining his books. The glass shade had been broken. Fragments of the glass found at the foot of the stairs where M. Bedor had met his death, showed plainly it was there it had been broken. The murderer evidently had subsequently replaced it on the table in the office-room. To do that he had to pass in front of the boarhound's kennel. Yet the dog had made no sound. Obviously M. Bedor had been murdered by someone who was on

GOOD TERMS WITH THE DOG.

That was the clue—the only clue—which the detectives had to work on. M. Bedor alone knew what money he had in the safe, and they could not tell whether any had been actually stolen.

Of those whom the dog's silence brought under suspicion, the chauffeur alone was unable to give a satisfactory account of his movements on the night of the murder. He was arrested. At first he stoutly protested his innocence, but ultimately he broke down and made a complete confession. That brought the element of love into the crime, which is essential to all thrilling detective stories.

Mathieu was engaged to be married. To win the consent of the girl's parents, he had misrepresented his financial position. He had declared that he was in receipt of a salary twice as large as he was actually paid, and had, besides, a snug little sum in the bank.

YOUNG FOLKS

A NAUGHTY GIRL.

Sometimes when I am naughty And am sent away to bed, My bedstead heaves a mighty sigh, And shakes its walnut head. And as I lie and look about What do you think I see? My little yellow booties Sticking out their tongues at me!

DAN RICE AND HIS BEAR.

A circus had come to town, and boys of ten were wild with excitement over the show. As boys will, they tried practising some of the feats which they saw represented upon the showbills.

One of them succeeded so well that he attracted the attention of one of the managers who was in need of just such a boy. When the circus left town the child was missing from his home. He had been stolen, and had now to undergo a severe training for the life into which he had been forced.

For ten years his poor parents heard nothing of him. Then he wrote to them telling them that he was winning fame under the assumed name of Dan Rice. He had been very fond of animal pets from early boyhood. Now, he developed great courage, skill and patience in training wild animals. This talent made him so valuable to the company that he rose rapidly. When he reached manhood he soon owned a part of the menagerie.

Among those belonging to his partner was a female bear, an unusually fine specimen. But she was very fierce, despite all the efforts which her owner had made to tame her. He tried again and again to win her good will, but failed. At last he gave up in despair, pronouncing her untamable.

Dan Rice had not been unobservant, and now proposed trying her himself. His partner replied "Go ahead. If you succeed you may have her." Rice lost no time in beginning his efforts, which, ere long, were perfectly successful. He always carried in his pocket a lump of sugar, an apple or something he knew she relished. "Sallie," as he called her, became very much attached to him. He could do anything with her that he chose.

A few months after winning his bear, Dan Rice became a Christian. He considered seriously the subject of his business. He thought prayerfully over it, and became convinced that he could not constantly continue with a circus, to whom he was strongly attached.

Eight years passed by. One day he found himself in a city where a large circus was showing, having with it an unusually fine menagerie. The animals strongly attracted him. Rice knew that his name would open the way for him into any circus with a glorious welcome. But he wished to go incognito, so bought a ticket and went in. He had been strolling about for some minutes, observing the animals attentively, when he saw that a large female bear seemed in a great state of excitement, and he recalled, had been ever since his entrance into the tent.

Shortly the keeper, accosting him, said, "What have you done to that bear?"

"Nothing at all," Rice replied. The man remarked, "She seems much excited when you go near her cage and more so when you walk away."

"I have observed that myself," said Rice.

"Well, I must ask you to leave the tent; you must have done something to her," said the manager.

"I have paid my money; I have done nothing to your bear, and I will not leave until I am ready," replied Rice.

Meanwhile the bear's excitement grew more violent.

"Then I shall have to put you out," exclaimed the keeper, at the same instant seizing Rice by the collar. But he was a powerful man, and wrenching himself loose, he answered, "If you don't how to quiet an animal

THE S. S. LESSON

INTERNATIONAL LESSON,

APRIL 29.

Lesson V. The Parable of the Sower.

Golden Text: Luke 8. 11.

LESSON WORD STUDIES.

Lesson V. The Parable of the Sower.

Golden Text: Luke 8, 11.

LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

The Parable of the Four Soils.—This parable usually called the Parable of the Sower, is one of the very few sayings of Jesus recorded by all four evangelists. It is one of a larger group of eight parables which set forth the nature of the kingdom of heaven. Of this larger group of eight all but one are recorded in Matt. 13. That one, omitted by Matthew, is the parable of the Seed of the Seed, recorded by Mark chap. 4, in connection with two other parables of this group, the Parable of the Sower, and the Parable of the Mustard Seed, also recorded by Matthew. Luke records this parable and also the Parable of the Mustard Seed, together with the Parable of the Leaven, making in all three of the group of eight, the same number as are recorded by Mark. Of these eight parables again, four make use of the figure of the growth of the seed, to illustrate the gradual development of the kingdom of heaven. One employs the figure of a net, two the figure of the great treasure, the hidden treasure, and the goodly pearl; and one the figure of the leaven which leaveneth the whole lump, to set forth other aspects of the nature of the kingdom of heaven. This group of parables belongs to the earlier part of the ministry of Jesus, and is preceded by a still earlier sub-group of three short parables: The feasting of the wedding guests, the patching of the rent garment, and the pouring of old wine into new bottles.

Two other larger groups of parables belong to the latter portion of the ministry of Jesus; one containing eighteen parables, recorded principally in Luke, belongs to the period of the Perea ministry, and the other containing eight belongs to the latter period of conflict in Jerusalem, just before the passion of Jesus. Those in this last group are recorded principally by Matthew, and in part by Luke, while Mark records only one of the group preceding.

Verses 2, 3. Parables.—The word parable comes from the two Greek words, "para," meaning beside, and "bollo," meaning to throw, and means therefore literally to throw or place one thing beside another. In usage it soon came to mean also a comparison of things thus placed together. It is used in the Bible with a large variety of shades of meaning, all of which involve the idea of comparison.

3. Went forth.—Possibly far from his home to a distant field.

4. By the wayside.—The wayside referred to is the hard trodden path through the grain field.

The birds came and devoured it.—In the grain-raising sections of our own country, where are found the immense grain fields extending for miles in every direction, it is not unusual in seed time to see large flocks of birds, sometimes even of wild geese, following close behind the plow, from which the seed is scattered in front of the plow shares which immediately turn over the soil and cover the seed, which have been left uncovered, and which have fallen to one side of the plow. The picture in the mind of Jesus was not the same as this, but this reference, to a scene familiar to some of the readers of these notes, will assist in making plain the method of Christ's teaching which was to take the familiar objects and scenes with which his hearers were acquainted, and use them to illustrate the truths which he endeavored to teach.

5. On the rocky ground.—The slopes of the hillsides about Galilee toward which Jesus was looking from his position on the edge of the Lake, were in many places rocky with but a thin covering of loose earth. These slopes of the hillsides were the first to assume their covering of green after the early

this same variety of thorns doubtless the crown was woven which Jesus later was forced to wear.

Choked it.—The thorns being harder, and of more rapid growth, as well as many in number, absorbed all the moisture and quickly shut out the sunshine, making it impossible for the more tender sprouts of the grain to thrive and grow.

12. The lesson of this verse is that it is the receptive attitude of mind which makes possible the understanding of Christ's teaching.

15. Straightway . . . Taketh away, the word—Some men are so hardened in sin, so pre-occupied in their temporal pursuits that the word of God fails to find a lodgement whatever in their heart and mind.

17. No root in themselves—Shallow unstable natures, not independent in their convictions.

FROM BONNIE SCOTLAND

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going on in the Highlands and Lowlands of Auld Scotia.

It is proposed to have a museum in Leith Town Buildings.

Edinburgh Blind Asylum is to be enlarged at a cost of £15,000.

Leith School Board proposes giving a hot mid-day meal to all poor scholars.

At Stockbridge a new police and fire station is to be erected at a cost of £8,000.

Buildings to the value of £14,700 have been erected in the burgh of Dumfries during the past year.

Last year 164,161 criminal cases were disposed of in the courts of Scotland—a considerable decrease.

The Armstrong Cork Company, of Pittsburg, are about to open a branch of their works at Greenock.

The representation of Scotland in Parliament is made up of 58 Liberals, 12 Unionists and 2 Labor members.

Some 600 or 700 miners have been thrown out of employment by a fire in the Lady Victoria mine in Mid-Lothian. This year the 1st and 2nd Lothian Brigades of Volunteers are to camp on ground in the neighborhood of Edinburgh.

Among the fish landed at Gyrvan the other day was one extra large conger eel, which turned the scales at 70 lbs.

Edinburgh is considering a proposal to lay out a space as tea garden and winter garden where music will be furnished.

The Mackintosh of Mackintosh has been appointed Lord-Lieutenant of the County of Inverness, in succession to Cameron of Lochiel.

Rutherglen town council has selected the contractors to erect the new public library presented by Dr. Carnegie, which is to cost £7,500.

Mr. Gemmell Hutchison, who was commissioned to paint the royal review of Scottish Volunteers at Edinburgh, has completed his picture.

Councillor Cohen, of Glasgow, has been presented with the Royal Humane Society's award for saving a man from drowning at Gourrock in July.

Dr. James Rankin, the doyen of the medical profession in Kilmarnock, died at his residence, Dundonald road. He had been in practice for about 49 years.

Mr. Andrew Carnegie has forwarded a cheque for £20 to Mr. Henry Venters, of Leven, in recognition of his gallantry in rescuing eight persons from drowning.

There are 25,000 to 30,000 school children in the Scottish Highlands whose home language is Gaelic. The great majority of them, for a year or two after going to school, do not understand English, yet they are, in the majority of cases, expected to acquire a thorough English education from a teacher who, nine times out of ten, knows no Gaelic.

lective stories.

Mathieu was engaged to be married. To win the consent of the girl's parents, he had misrepresented his financial position. He had declared that he was in receipt of a salary twice as large as he was actually paid, and had, besides, a snug little sum in the bank. As a matter of fact, he had not saved anything. His prospective father-in-law had complained of the delay in the marriage, and had told him that if it did not take place soon, he would break off the match. Thus pressed, he agreed to marry his fiancée in a fortnight. In the meantime he had to secure a flat, paying a quarter's rent in advance, and furnish it. In a few days the girl was to meet him at a dealer's, and inspect the furniture, which he had not even purchased.

He decided to make a coup. Relying on the fact that the boarhound Tom, which guarded the factory at night, would not betray his presence, he concealed himself in the building until after the work people had left. Then he forced open a drawer in which the money was kept to meet petty cash expenses, but he found only 50 francs. That was not enough for his purpose, so he hid himself again and waited.

HE WATCHED HIS MASTER

as he went to his office after his dinner, and while M. Bedour was writing he slipped into his apartments and took his swordstick which he had placed in an umbrella stand.

When M. Bedour, his work over, was returning from the office the chauffeur, who was crouching in a recess on the landing, fancied that he had detected him. "That," he says in his confusion, "was his misfortune. If he had not looked my way, I should have allowed him to pass, but I felt so sure that he had seen me, that, gripping the swordstick, I dashed forward and tried to pass him in my flight."

But M. Bedour barred the way at the foot of the stairs. A struggle ensued and the lamp which his master was carrying fell to the ground. M. Bedour clutched at the swordstick, the chauffeur plunged it into his body and kneeling on his chest after he had fallen, he again drove the weapon through him. He expired without a cry.

Taking the key of the safe from his dead master's pocket, the chauffeur groped his way to the office, relit the lamp at the stove, unlocked the safe and abstracted \$150 in bank notes and a handful of gold. The big boarhound, Daine, recognizing a friend, merely wagged his tail while this was going on. Little did Mathieu then imagine that the dog's silence, which made the theft such easy work, would bring him under suspicion. After locking the safe again, he replaced the key in M. Bedour's pocket and made his way in the direction of the courtyard.

But the slamming of a door had given the alarm. Hearing footsteps approaching, Mathieu hid himself under some steps over which Dubois and the maid passed, and let himself out of the building by a door in which they had left the keys. In this way he got clear away. But for the silent testimony of the boarhound, it is doubtful if he would ever have been suspected.

FOILED AGAIN.

"Madam, you have a daughter. Does she sing popular songs?"

"No, she—"

"Does she play on the piano?"

"No, she—"

"Does she paint in water or oil colors?"

"No, she—"

"Does she recite Curfew Shall Not Ring out Tonight?"

"No, she—"

"She is the modern young girl for whom I have been searching, with no accomplishments. Present me to her, madam."

"But, my dear sir, you won't let me speak. She is only six months old."

A woman's "no," never means "yes" when she is conversing with her husband.

Meanwhile the bear's excitement grew more violent.

"Then I shall have to put you out," exclaimed the keeper, at the same instant seizing Rice by the collar.

But he was a powerful man, and wrenching himself loose, he answered, "If you don't how to quiet an animal I'll show you," at the same instant stooping under the rope which guarded the cages.

"She'll tear you to pieces!" shouted the keeper; but Dan Rice slipped his hand into the cage, laid it on the bear's head, uttering the one word, "Sallie."

She lay down and licked his hand.

The bystanders were utterly amazed. The keeper laid his hand on Rice's shoulder, exclaiming, "Who are you, anyhow?" When he was told that it was Dan Rice, so famous as an animal trainer, and that Sallie had belonged to him, he wondered no more. The news quickly spread and he and Sallie held a regular ovation. He told them that the actions of the bear had quickly aroused his suspicion that she knew him. He had already tested the fact by his own movements before the keeper accosted him.

This story and Rice's real name were told me many years ago by one who knew him personally. I tell it as I recall it. The name has slipped my memory.

PREROGATIVES OF THE QUEEN.

King's Consort Can Act as His Proxy Under Certain Circumstances.

"M. A. P.," in an article on "What the Queen can do," says: Strict as the laws appertaining to high treason have been they did not always include the consort, so that plotters were able to threaten the life of the consort at will, and incur no responsibility whatever. When Mary married Philip of Spain affairs in this direction became a positive scandal, so a law was passed ordaining that the consort should be included in the protection afforded to the monarch against high treason. To plot against Queen Alexandra, therefore, would be high treason, and punishable with hanging, but the moment the King dies this protection falls away, and no more notice could be taken to a plot against her life than if she were an ordinary person.

The constitution demands that the consort shall take no part whatever in the government of the country; so that her name does not appear on any official documents King Edward signs. Nevertheless, if the King becomes ill or is away from the Kingdom at the moment of some national crisis he can appoint the Queen Consort as his proxy, when her word carries as much authority as his. This has only occurred on one occasion since King Edward ascended the throne, when the Ministers of State were summoned to the Queen's presence.

Many convicted criminals owed their pardon during Queen Victoria's reign to the Prince Consort, though the law allowed him no authority for setting them free, his intercession with the Queen covering his lack of power in this respect. The law is very strict in barring the consort the right to liberate a prisoner, nor could Queen Alexandra sign the death warrant of one. If the King were inaccessible, then the warrant would have to wait until his signature was available. Directly the King dies his consort must take the oath of allegiance to his successor, and it is a curious point that if she wishes to marry again she must obtain his sanction. So if upon the death of King Edward the Queen wished to re-marry she would have to seek the permission of the present Prince of Wales.

A POWERFUL REMEDY.

"So you used some of the liniment I left here yesterday," said the agent. "Didn't you find that it worked well?" "I should say so!" cried the lady. "I mistook it for the furniture polish and it took all the skin off the piano legs in one application."

ENEMIES OF AUSTRALIA

BUSH FIRES HAVE CAUSED GREAT LOSS OF PROPERTY.

Many Disasters This Year—Rapidly With Which the Flames Spread.

Drought and bush fires are the twin dreaded enemies of Australian pastoralists and agriculturists, and of these they are always standing in bitter fear.

Heavy floods may occasion serious disasters, but the area devastated by these are of comparatively limited extent, whereas the ravages of either of the two other evils may extend over the greater portion of a State, as in the case of the tremendous fiery outbreak which some few years ago enveloped the Victorian rural districts with a raging mass of smoke and flame, rendering "Black Thursday" a date to be ever remembered with sorrow by hundreds of industrious families who found themselves suddenly confronted with suffering and ruin, necessitating their beginning the battle of life afresh.

There have been not a few similar disasters since then, writes a Sydney correspondent of the London Globe, and the earlier weeks of 1906 have found the sister States of New South Wales and Victoria waging a desperate battle with the fire fiend, who has everywhere been threatening the farmer's homestead and the selector's hut alike with destruction.

In Europe such widely spread outbreaks are practically impossible, the country being too largely intersected by roads, canals and railways; besides being divided into comparatively small areas by lofty hedgerows, embankments, ditches and streamlets. In Australia it is otherwise. If a fire breaks out in a patch of dry grass, there is nothing to prevent it spreading

WITH LIGHTNINGLIKE SPEED

for very many miles. Fences, as known in England, are not to be met with in the Commonwealth; neither are the stone walls so common in many parts of Great Britain, fences of barbed wire or wire netting being in universal use.

Although designated "bush fires" the outbreaks are by no means confined to the bush, which is the Australian term for forest. It is rather the other way. After a period of drought the grass springs up with marvelous rapidity, often to the height of three or four feet, and even more, furnishing a secure refuge for rabbits and all kinds of animal pests. It is the same with the cereal crops. But directly the hot summer sun commences scorching everything in the field, the moment of danger has arrived. A single spark may kindle a conflagration beyond human power to extinguish. It is estimated that within the last few weeks between two and three million acres of pasture and agricultural land in New South Wales and Victoria have been swept by the merciless flames.

The two leading causes of bush fires are the employment of phosphorus for rabbit poisoning, and the careless use of "vestas," or wax matches. The phosphorus, no matter in what form it may be applied, is readily ignited by the sun's heat, and it has frequently been suggested that some kind of substitute should be utilized during the warmer months of the year.

As regards the use of wax matches, attempts have been made, but unsuccessfully, to secure the prohibition of their sale, save during the Australian winter months. A lighted match thrown carelessly down the other day by a tramp after lighting his pipe started a fire which consumed more than

THIRTY SQUARE MILES

of pasture and growing crops. Recently a man was sent to prison for a month. He was sitting on the roadside on his swag, when he lighted his pipe. Immediately afterward he found his swag on fire. He endeavored to beat off

Fashion Hints.

THE COMING GOWNS.

This year all wash fabrics are soft in finish and much less satiny in lustre than last year's cottons and linens, says the fashion writer in the New York Evening Post. The mercerizing process has been brought to a high degree of perfection, and the best of the thin materials are mercerized. They have a soft chiffon finish which is charming and are well adapted to the full, clinging styles so prevalent at present. A number of pretty models have been made with accordion and sun-pleated skirts. Of course this takes them out of the class of tub gowns, but as far as that detail is concerned, few elaborate cottons or linens are ever tubbed. The cleaners renew delicate gowns better than the most expert laundress can, and the cost of dry cleaning is not excessive. With care, a thin gown can be worn a number of times without soiling.

THE UNDERSLIP.

With thin gowns, a foundation is very necessary, and a new lingerie piece has come into being. This is the princess underslip in lawn, taffeta, and China silk. Pink, blue, yellow, mauve, and white slips are to be had, well made and ready to wear. The taffeta slips are most desirable and most expensive, from \$20 to \$30 and even more being asked for them. Of course, all the details of these garments are perfect, even the button flap having a beading of fine French embroidery or lace. Some of the slips are high-necked and long-sleeved and are finished with a beading and narrow ribbon. Others are low-necked and sleeveless. The China silk slips cost \$10 and are rather soft and floppy. Many women prefer them, in spite of their lack of body.

WASH MATERIALS.

Most of the model gowns in wash materials are difficult to describe, further than to say that they have princess skirts, circular or pleated, and are elaborately trimmed with lace. Waists are draped, or else are covered with lace and embroidery boleros. High girdles are almost the rule. However, these descriptions are not very satisfactory.

A very individual gown of rose-color and white-checked voile was made with a full-shirred skirt. Two groups of inch-wide tucks trimmed the skirt, the first group of three tucks appearing above the knee and the second group of five above the hem. The blouse was shirred below a shallow yoke of German Valenciennes which was bordered with a round berthe collar of Irish crochet. A second berthe collar of Irish crochet was inset in the middle of the blouse, crossing it and disappearing under the sleeves. The sleeves themselves were short puffs, shirred at the ends and showing ruffles of inch-wide Valenciennes.

A SIMPLE GOWN.

A very simple gown of mauve linen, very thin and sheer, was also tucked. The skirt was circular and was trimmed with two groups of narrow tucks, between which groups was a running design of shadow embroidery and Danish Hebrido embroidery worked in heavy white thread. The waist was tucked across the middle, the sleeve tucks exactly matching those of the waist, and the same white embroidery was used in the decoration. More embroidery trimmed the front of the waist above and below the tucks, and a line of embroidery outlined the square décolleté, under which was worn a lace and embroidered muslin guimpe. The sleeves were wide and short and had little undersleeves to the elbow of the guimpe material. This gown might wash beautifully.

ROYAL PARTY IN INDIA

THE PRINCE AND PRINCESS OF WALES' VISIT.

The King-Emperor's Subjects Received Them With the Greatest Enthusiasm.

The closing scenes of the Prince and Princess of Wales' visit to India have been fully in keeping with the spirit which has made their progress remarkable even among Royal journeys, says the London Morning Post. In the ceremonial sense the tour has been attended with complete success. With the exception of the tiger-hunt in Nepal the long and exacting programme has been carried out without a single hitch. The presence of the Prince and Princess has evoked a display of enthusiastic and affectionate loyalty from all classes of the King-Emperor's subjects. That outburst of feeling has been due in no small degree to the tact and sympathy characteristic indeed of all members of the Royal family, and not least of our future King and Queen. Practically every important centre of the Indian Empire has been visited. The Prince's drive up the Khyber Pass without any guard except an escort of Afridis will remain an especially

MEMORABLE INCIDENT.

and the confidence which he thereby reposed in the chivalry of the hill-tribes is among the most valuable political results of the tour. But if in its ceremonial aspect the Royal progress has been thus singularly felicitous, other consequences to which it is bound to give rise are almost more significant. People in England are apt to overlook the fact that in the last resort the dominant factor in our Indian administration is the personal relation between the governors and the governed. In this country the vicissitudes of political life give color to the impression that the fortunes of our great dependency are determined, at least to a large extent, by the Minister who by the suffrages of his fellow countrymen finds himself temporarily in charge of the India Office. In a great measure this is of course true, but it is nevertheless a consideration which is seldom or never present to the minds of the majority of our fellow-subjects in India. In their eyes the raison d'être of the Government, to which they stand in a relation of almost unquestioning obedience, is the rule of the Emperor of India. Personal sovereignty is in short, the source of the only power which they recognize or which indeed they are able to understand. In this sense the person of the King-Emperor acts as a connecting link between India and this country, without which our dominion would at once cease to be intelligible. The loyalty and affection with which this personal rule is associated in the eyes of the great masses of Hindoos is due in the first instance to the veneration with which they regarded the late Queen.

THE FIRST EMPRESS OF INDIA.

Although Queen Victoria was never able to visit her dominions in Asia, the sympathy, which she never failed to display in the fortunes of her subjects in that continent, her efforts to learn their language, and her constant reliance on her Indian attendants secured for her a regard indistinguishable from the closest personal ties. To the millions who dwell in India the death of the Queen was a loss which they could only compare to the loss of a mother. The affection with which Queen Victoria was regarded by her Indian subjects has been extended without diminution to King Edward. The memory of his visit, as Prince of Wales, is still green in the memories of a people singularly alive to the qualities of sympathy and justice. It is well, therefore, that the traditions of English sovereignty in India should have been worthily continued at the hands of the Prince of Wales. The experience he has gained can hardly fail to be of the utmost value when he in turn is called upon to wield the

HEALTH

AVOIDING PNEUMONIA.

The early spring is the time when pneumonia is especially prevalent. The disease seems to make an extra effort at this season before it subsides during the warmer months.

The cause of this increase in the number of cases of pneumonia at the end of winter is not hard to find. The body has been through a season of stress, and has come out a little too worn for wear, and less able to resist infection. All through the winter one has been living in hot and close rooms, breathing an atmosphere more or less poisoned by the expired air of oneself and others, has been eating more than was needed, and has been working hard with either muscles or brain, often in utter disregard of the rules of hygiene. The body is thus loaded with the accumulated waste of the winter's excesses, and is in a measure self-poisoned and less able to withstand the assaults of disease.

In addition to this weakening of the resisting powers, the sudden and violent changes of temperature characteristic of early spring throw an additional strain on the system, predisposing to congestions, and so preparing the soil for the reception and multiplication of the ever-present germ of pneumonia. It is sometimes said that this pneumonia germ becomes more virulent in the spring, but this is only a guess, and probably a mistaken one. The reduced strength of the human victim is sufficient to account for the increase in pneumonia without supposing an increased strength in the germ of the disease.

The way, therefore, to escape pneumonia is to take the system in hand and tone it up to the resisting point. This is to be done by fresh, cool air day and night, exercise, bathing, moderation at the table both in quality and amount of food and drink, seven or eight hours of sleep at night, and the avoidance of worry.

The care of the teeth, always an important matter, is especially important in relation to pneumonia, for it has been found that the germs of this disease are almost always present in the mouth. If the teeth are kept clean and the mouth rinsed from time to time, those germs are few in number; but in a neglected mouth they may increase enormously, finding a safe lodgment between the teeth and in the corners where food particles afford a good soil for their growth. The tooth-brush is therefore a useful weapon in the fight against pneumonia and all other diseases of the respiratory organs; but the heavy artillery in this fight is fresh air and proper breathing.—Youth's Companion.

LAUGH AND LIVE LONG.

Laughter is undoubtedly one of Nature's general tonics. It brings the disordered faculties and functions into harmony, it lubricates the mental bearings, and prevents the friction which monotonous, exacting business engenders. It is a divine gift bestowed upon us as a life preserver, a health promoter, a joy generator, a success-maker. Life with the average man is too serious at best. Never lose an opportunity for relaxation from the stress and strain of your business or profession. Every draught of laughter, like an air cushion, eases you over jolts and the hard places on life's highway. Laughter is always healthy. It tends to bring every abnormal condition back to the normal. It is a panacea for headaches, for life's bruises. It is a life prolonger. People who laugh heartily keep themselves in physical and mental harmony, and are likely to live longer than those who take life too seriously.

GOOD RULES FOR THE EYES.

Although the eyes contribute more than almost any other feature to personal beauty, they get surprisingly little attention from the majority of per-

THIRTY SQUARE MILES

of pasturage and growing crops. Recently a man was sent to prison for a month. He was sitting on the roadside on his swag, when he lighted his pipe. Immediately afterward he found his swag on fire. He endeavored to beat off the flames with his hat and shirt, but in vain. Had he not been badly burned in the effort to undo the mischief he had caused, he would have received a heavier sentence.

In another case a drunken man set fire to a patch of dried grass in twenty-seven different places. Fortunately his attempts were witnessed by a couple of laborers, who trampled on the ignited masses before the flames could spread. Scores of such cases have been reported, and there is good reason for fearing that several of the most destructive conflagrations have been wilfully occasioned, especially by disappointed swagsmen.

As illustrating the rapidity with which the flames sometimes travel, it is stated that when the mail train left the Victorian border recently for Sydney the fire on either side of the line kept pace with it for several miles.

On another part of the railway the flames spread at the rate of twenty miles an hour. In the neighborhood of Apollo Bay, Victoria, a storm of wind sent the fire onward at the speed of a mile per minute.

The losses of live stock have been enormous, and millions of rabbits have been destroyed. In one place the flames showed an unbroken frontage of nearly thirty miles. Where not engaged in the struggle for life, men, women, and even little children were found engaged as fire fighters. Near Gundagai, in New South Wales, the live stock on one of the stations was saved by the women folk.

ATTIRED IN MEN'S CLOTHES.

the father and brothers being absent. A thousand acres of grass and miles of fencing were, however, destroyed.

There has been a sad loss of life, occasioned chiefly by inability to escape the embrace of the all devouring element. Near Toora, in Victoria, six young men took refuge in a dam, waiting in suspense the advance of the flames from which they were endeavoring to escape. So fearful was the nervous strain to which they were subjected that one of them went out of his mind and endeavored to cut his throat. Fortunately his companions succeeded in securing the knife before he could accomplish his purpose.

In the same neighborhood a schoolmaster heroically saved the lives of twenty-eight children in his charge. While in the school room the flames came rushing toward the building. The teacher took in the situation at a glance. He made the children lie flat on the ground outside furthest from the fire, and covered them with blankets, which he kept moist with pailfuls of water, obtained by rushing through the burning grass up to his elbows. He said it was like passing through a fiery furnace.

Once he put the pail down for a few seconds, and on taking it up again the handle burned the skin off his hand. But the courageous man persevered, as did his boys. The children acted splendidly. As the flames reached where they were lying they ran into hollow logs further on, which they covered with wet blankets. Thus they passed the fatal afternoon and night. Ultimately every child was saved.

The next day there was a sad funeral in the vicinity. Nine men had become surrounded by the flames and all perished. Everywhere farmers and selectors rose to the occasion, risking their lives over and over again in attempts to rescue the weak and helpless. The emergency brought out the best qualities of the selectors, whose heroic endeavors tended to relieve the overwhelming disaster of several of its gloomiest features, and show the brighter aspect of human nature.

Stand by your convictions is excellent advice. Most lawyers, however, advise an appeal.

med the front of the waist above and below the tucks, and a line of embroidery outlined the square décolleté, under which was worn a lace and embroidered muslin guimpe. The sleeves were wide and short and had little undersleeves to the elbow of the guimpe material. This gown might wash beautifully.

WHAT GOES WITH GRAY?

Now that so much gray is worn, and likely to be worn, it is important to study the color a little, and find out its defects as well as its possibilities. A gray gown demands white next the face, but for the matter of that there are very few gowns, except white ones, in which the material is continued up to the throat. Where the complexion is clear, without any tinge of sallowness, especially when combined with dark hair and eyes, gray is usually very becoming, with a touch of white, or of black and white together. Other grays, and some other complexions, require that a touch of color be added to the gray costume.

The combination of gray and green is a smart one, so is gray with pale or "Alice" blue, or a dash of red. It must be noticed that the gray which requires green is quite different from the gray which needs blue or red. In purchasing a gray gown, one should try the material with different colors, when the right one can readily be distinguished.

There is an impression that it is almost a safe choice to wear a black, or black and white hat, with a gray costume. Sometimes either of these will prove to be just the thing; again, the black will be found to simply kill the gray. Consequently, in selecting a hat, a piece of the costume material should be taken along, and tested with different colors, unless there is to be a color used in the trimming, when, of course, the hat should match.

FIGURES ABOUT LONDON.

Nearly 130,000 Births in 1904 -- Large Proportion of Crime.

London's population (4,131,758), according to the annual statistical abstract just issued, is roughly 14 per cent. of that of England and Wales, but London's proportion of burglaries in 1903 was 27, of robbery 34, and of larceny 38 per cent. It had the due proportion of death sentences, but 30 per cent., or twice its share, of total convictions.

London's birth-rate, 13.9 per cent. of the total for England, was slightly below its share, while its illegitimate birth-rate was still less, 12.7 per cent. The death rate was 13.6, and the marriage rate, 15.4, was above its share.

London's share of alien immigrants was 57.4 against its due of 14 per cent., while its share of houses was only 9.1. Its share of imports of food was 31.5, and exports of food, 15.8. Its proportions of on and off licenses were respectively 13.6 and 11.2.

The tramway passengers of the London County Council numbered in 1904 156,839,813. London General Omnibus passengers 216,311,248, and London Road Car, 72,653,966.

Letters delivered in 1905 numbered 727 millions, postcards, 166 millions, book packets, etc., 163 millions, and telegrams handed in, 28 millions.

Births in London in 1904 were 129,235, against 130,006 in 1903; deaths 74,990 against 69,929; marriages, 39,588, against 40,262.

The rateable value in 1905 was £41,657,066, against £41,086,974 in 1904. Parliamentary electors totalled 621,180, against 612,569; and County Council electors, 742,397, against 731,370.

Licensed premises numbered 10,370, against 10,702.

GERMANY'S MIGHTY THIRST.

The annual drink bill in Germany equals three times the amount of the navy and army budgets combined. One year's total abstinence would pay off the national debt.

the memories of a people singularly alive to the qualities of sympathy and justice. It is well, therefore, that the traditions of English sovereignty in India should have been worthily continued at the hands of the Prince of Wales. The experience he has gained can hardly fail to be of the utmost value when he in turn is called upon to wield the sceptre over the millions who will hail him as their Emperor. The outcome of his journey was well expressed in the concluding words of his speech at Karachi in which he referred to the figures of Peace and Justice at the base of Queen Victoria's statue. "You do well," said the Prince, "to connect them with the memory of Queen Victoria, for he greatly desired that her Indian subjects should ever enjoy these blessings."

KING EDWARD'S GARDENS.

They are Among the Very Finest in the World.

The King's fruit and vegetable gardens at Frogmore are probably the most complete in the world. His Majesty has had many improvements carried out. The shabby-looking old fruit houses have been swept away, and replaced by houses more roomy and suitable for fruit culture.

The King and Queen are very fond of the gardens at Windsor, and spend many hours there in the summer. Just before proceeding abroad, the King paid a visit to the gardens, motoring down from London for the purpose. His Majesty was taken through the gardens by one of the foremen, and inspected all the improvements that have been carried out. The King said he was delighted with what he had seen. He took tea in his private rooms at the head gardener's house. Butter and cream were obtained from the royal dairy, close by. The favorite flowers of the King and Queen are malmaisons, violets, and roses, and special attention is paid to them.

Fresh vegetables are always ready to be despatched to the King and Queen, and daily from Windsor are sent to the royal palaces, when the Court is in residence, grapes and other fruits and vegetables, and flowers of all descriptions. Among the splendid tomatoes raised in the gardens is a favorite called "Frogmore Prolific."

Mr. MacKellar, his Majesty's head gardener, has done wonders with the crops, and he has a most efficient staff under him, the foremen of the flower, fruit and vegetable departments being all skilled men.

SPIDER THAT EATS BIRDS.

Lives in the Forest of the South American Tropics.

There has just been deposited in the insect house at the London zoo a specimen of the bird eating spider, which earns its name by occasionally including in its menu some of the brilliantly hued humming birds and varicolored finches of the South American tropics.

It is doubtful whether the silken threads which he spins in profusion constitute his most effective tackle for securing his prey; indeed, it is more probable that the little birds get caught through alighting upon the banana and other leaves, in the twisted folds of which the spider makes his home. The similarity of his coloring to the bark of trees, to which he attaches himself, is also a powerful factor in enabling him to approach his prey.

The silken threads which help to ensnare so many beautiful birds are a serious annoyance to the traveler when riding or driving through the less frequented forests. As they continually strike the face, one is reminded of some flendish motor trap on the Surrey roads.

The bird eating spider is much smaller, although not less ferocious in appearance, than the famous tarantula. The body of a full grown tarantula is as big as a hen's egg and on an average it gives from twenty to forty yards of silk, the weaving of which was expected at one time to prove a very considerable industry in some of the Australian colonies. The silken output of the bird eating spider is greater in proportion.

physical and mental harmony, and are likely to live longer than those who take life too seriously.

GOOD RULES FOR THE EYES.

Although the eyes contribute more than almost any other feature to personal beauty, they get surprisingly little attention from the majority of persons. Here are a few simple rules for preserving their strength and brightness.

Do not read by firelight. When possible protect the eyes from the direct glare of lamp, gas and candlelight. Do not read or work in such a dim light that an effort is necessary to see clearly. If the eyes are tender, wear smoked or tinted glasses. Never apply soap near the eyes. Bathe them once daily, the lids being open, in tepid water. It is best to use an eye bath or egg cup and to open and close the lids in the water. Do not apply any face cream near the eyes. Put nothing on the lashes but the best of unscented oil. Never cut the lashes in the belief that they will be improved. Keep in mind that white cliffs, stretches of sand and of snow are injurious, and must be guarded against with glasses.

ROYAL SPEECH MAKERS.

William Fourth's Last Word — King James Delighted in Talking.

A strange performance was the last speech of William IV. delivered to his Lord and Commons. His sight was failing, and in the dark chamber, he tried in vain to read the words of his speech, until, in a passion, he exclaimed in a loud voice and with an oath, "I can't see." Candles were brought, and the King, facing his task again with flushed and angry face, said, "My lords and gentlemen,—I have hitherto not been able, for want of light, to read this speech in a way its importance deserves; but as the lights are now brought me I will read it again from commencement, and in a way which, I trust, will command your attention."

Of all our sovereigns King James I. most thoroughly enjoyed his speech-making in Parliament. His was no formal written speech, but a lengthy harangue in which his eloquence often took startling forms. He was quite in his element when he was soundly lecturing Parliament and laying down the law in no measured language. On one occasion, we learn, he spoke a whole hour by the clock; and in his son, the first Charles, he had no unworthy disciple. Charles II., however, had no oratorical ambition, and was content to be brief and business-like.

Queen Elizabeth was more anxious to impress her Parliament with her personal beauty and splendor than with her oratory, although she never failed to say a few gracious words.

PRINCE OF NIGGARDS.

Loving Husband Allowed His Wife Six Cents a Week.

The wife of Edward John Field, of Shepherd's Bush road, who sought a separation order at West London Police Court the other day, told a remarkable story of her husband's autocratic indifference.

Field, said the wife, was once a foreman, but had now started in the window cleaning business on his own account. During the past month, however, he had only given her one shilling for her keep and she was nearly starving.

It was also stated that the husband used to bring food into the house and eat it all himself.

"My business," said Field, to the bench, "is not prospering. I don't see that I can promise my wife any money before the end of April."

"Perhaps," said the clerk, "the bench will help you," and the magistrates granted a separation order, giving the wife the custody of the child of the marriage, and ordered the man to allow her 15s a week and to pay £2 2s. costs.

Mr. Pittendrigh Macgillivray, R.S.A., will soon have completed a statue of John Knox, which is to be placed in the Albany aisle, on the north side of St. Giles' Cathedral, Edinburgh.

AMERICAN IMMIGRANTS

WHAT CANADA COSTS UNCLE SAM IN MEN AND MONEY.

Said to Be a Low Estimate to Put Their Value to This Country at \$300,000,000.

The Canadian Government is after the American farmer, writes Frank G. Carpenter from Winnipeg in the Chicago Record-Herald. It considers him the best of all men to develop and build up a country, and it is spending vast sums to get him. It has inaugurated an immigration campaign bigger than any ever backed by any government, and it is now working the United States just as a wholesale dealer goes over his territory. It has our country divided up into districts, and there are immigration agents at every centre with instructions to drum the neighborhood for pioneer farmers. In this it is aided by the railroads and real estate agents. The latter have mapped out the territory, just as a book publishing firm lays out the field to which it expects to sell, and land agents, like book agents, are moving from farm to farm and getting subscribers to settle upon the lands and pay by installments.

The magnitude of this work is extraordinary. During the last year the Canadian Government has published advertisements in 7,000 American newspapers, and it has distributed more than three million maps and boom documents. The Interior Department has sent out carloads of books in colors, cartooning the relations between the United States and the Dominion. These tell the story at a glance, and, as Boss Tweed said about Tom Nast's pictures of him, anyone can read them.

WORK TO ATTRACT SETTLERS.

The Government issues one class of publications that is intended to catch the American children as well as the grown-ups. This consists of geographies, with first-class maps and pages of text, describing the material resources and the great possibilities of the new Canada. These have been sent to the American schools throughout our land and they are distributed by the main load.

The results of this work have been enormous. I am told there are more than 200,000 Americans here now, and that 80,000 more are expected this year. Those who have already arrived have brought in many million dollars' worth of goods, stock and actual cash, so that it is a low estimate to put their value to the country at \$300,000,000. It is said that they would have been worth two-thirds that amount to the country had they come without a cent, but they have brought so much with them that their personal possessions run into the hundreds of millions. Indeed, it makes one think of the children of Israel, who moved out of the land of Egypt, taking with them jewels of gold and raiment, save that the money taken into Canada by the American immigrants belonged to themselves, while that of the Israelites was mostly borrowed from the Egyptians.

MONEY FROM UNITED STATES.

I have before me the report of the Minister of the Canadian Interior Department, giving some items from the immigration agents as to just how much money was brought in last year from certain United States points. The agent at Detroit says that he issued cheap tickets to 2,900 Americans who went to Canada to settle, and that they took with them in actual cash and other effects about \$1,200,000. C. J. Broughton, the Dominion agent at Chicago, says that 1,140 emigrants started by him took along ninety-one carloads of goods, and that the settlers were mainly well-to-do. One man carried away \$250,000, four had together \$225,000 and one had \$5,000. Benjamin Davies, the Canadian agent at Great Falls, Mont., wrote that

from its start, when he was private secretary of Hon. Clifford Sifton. He had something to do with it as railway commissioner of Manitoba, and he now controls all of its machinery between Lake Superior and the Rocky Mountains.

In my talk I asked the Commissioner how the Canadian Government could afford to spend so much money bringing in settlers. He replied:

"Our Government does not expect to make money out of such things except through the development of the country. We are charging nothing for the land, but we want Canada prosperous and believe she will become more so as more land is brought under cultivation. With more people there will be more business for our factories. There will be more importations through the custom-houses, and, as most of our revenues come from tariff duties, the Government will have greater receipts."

"About how fast are you settling the new Canada?" I asked.

"We have about 30,000 new homesteaders every year. This is in addition to men who come to buy land. Each of these homesteaders takes up 160 acres, and that altogether means 30,000 new farms annually. If you figure the families at three members it means a new population of 90,000 possible taxpayers and consumers."

METHOD OF DEVELOPMENT.

"Another important feature of this movement is its effect upon the railroads and railroad buildings. Thirty thousand homesteads means a new farming area of 7,500 square miles. If that were in one solid block on two sides of a railroad, reaching back for ten miles on each side, the strip would be 375 miles long. The Government, however allots only the alternate sections as homesteads, so you must double the territory over which the homesteads are planted, and your tract is 750 miles long. Such a tract would reach from New York to Fort Wayne and beyond. It would mean a continuous line of farms covering a strip ten miles wide from Philadelphia to Detroit, or thereabouts; and railroads have to be built to accommodate those farmers. The settlement of such a tract is a part of what is now going on here in one year. It is true that our lands are scattered all over the country, and the homesteads are here and there and everywhere. The railroad building goes on all the same.

"All these new settlers are new customers for our stores and our factories. They add to the value of the lands belonging to the Government near which they settle, and to the general wealth of our country. They mean everything to our future, and we feel that the money used to bring them here is among our best expenditures."

"There is one thing I should like to say," continued Mr. Smith, "and that is, we want your people to come here to settle. Our American immigrants are about the best element of the new Canada. They are good men, and the most of them bring in good money. That is what we need more than anything else. We have enormous resources, but we require capital and push to develop them, and we would rather have that from America than anywhere else. Your people of the West and our people of the West are much the same. They assimilate easily; and as time goes on I believe the two countries will in sympathy be closer together than ever before."

A SORT OF HORSEWHIPPING.

An Old Man Tells of His Worst Flogging.

The rod, the sparring of which spoils the child, need not of necessity be made of the time-honored hickory as is shown in the following anecdote. An old man who in his boyhood received the chastisement, tells the story. He says it was the worst flogging he ever had, and that the instrument by which his father administered it was the sharpest

CUSTOMS OF MOROCCO

RESIDENTS LIVE A LONG DISTANCE FROM HIGHWAYS.

Color No Bar to Preferences—Many of the Population are Pure White.

Morocco, alluded to by Ion Perdicaris as 'the land of the extreme West,' has been much in the public eye lately, and in the attempt of the French to gain permanent control in the land; the intervention of Germany and the assemblage at Algieras, in Spain, of a Moroccan conference, may be witnessed the prelude to the closing act in the drama of Moorish independence. The young Sultan, Abdul Aziz, may be the last independent ruler of the Drisite dynasty, which dates back about 1,200 years.

Ion Perdicaris, the man who was captured and held hostage by the bandit Raisuli some time ago, is perhaps one of the best informed men on Moroccan affairs in the world. In an address to the National Geographic Society, last February, Mr. Perdicaris stated that in 788 Idris, fleeing from death at the hands of the Khalif El Mehdi, came to the city of Tangier, where he was amicably received by the Berbers, and became their ruler. Curiously enough, four of the persons chiefly concerned in Mr. Perdicaris' capture were descendants of this Idris—the Sultan of Morocco, who paid the indemnity of \$70,000 in order to effect his release; the two young chieftains of Wazan, who took a relief expedition and supplies to the captive, and Raisuli, who was his captor.

THE WORD "MOROCCO"

signifies the land of the extreme West, that is, of the extreme West of the African continent. The land is protected from the desert winds that sweep over Algeria and Tunis by a barrier of snow-capped mountain ranges, and is blessed with a splendid climate. The population of the country may be 4,000,000 or 7,000,000—no accurate census has ever been made. The country gives to strangers the appearance of being sparsely settled, because the residents live back from the highways in order to escape the necessity of supplying food to travellers, a privilege to be obtained from the Government, and which entails a serious tax upon the people.

Berbers, or people of Berber descent, constitute two-thirds of the population. They are pure white, and antedated Phoenicians, Carthaginians, Romans, Goths, and Arabs in settling along the southern shore of the Mediterranean. Others who have settled there are Jews and negroes.

Most of the Jews are exiles from Spain and Portugal. From the negroes from Soudan the famous Bokhari Guards were recruited. In Morocco color makes no difference. A man's capacity decides his position. Some of the negroes in Morocco have occupied very high positions, and after the death of the late Sultan, there was an interregnum of six years before the young Abdul Aziz was old enough to take the reins of Government, during which a negro regent named

AHMED BEN MAUSSA

governed. He was one of the most able rulers Morocco has ever seen. Not only did he keep the country in perfect order, but he was respected by all who knew him. The gentry are drawn mostly from those Moors who were exiled from Spain, and who return to Morocco. Some there are who claim descent from the Prophet, and these are called cheefs. The members of the select circles in Morocco are often as white as Europeans. The explanation of this is that many of the Mohammedan chieftains of Spain marry Gothic women during their residence in Spain, and their descendants to-day, with their white skins, astonish strangers who do not expect to find white men there.

A TRAMP'S DINNER.

Fared Sumptuously, and Invited a Caller to Have a Bite.

When Gibson saw the smoke curling up above the underbrush that borders the road from the railway-station he deemed it his duty to find out what kind of a fire it was that caused the smoke. As he crushed his way through alders and sumac, an agreeable smell of broiling ham met his nostrils; and on the other side of the wall an unshaven person, who was also rather ragged and not scrupulously clean, was tending a large slice of ham, which was nicely balanced over some hot coals on two black twigs. A blackened tomato can adjusted on the edges of two bricks evidently contained coffee, and on an open newspaper some sliced potatoes were waiting their turn. A loaf of bread and a quart box of fine strawberries reposed beside the potatoes.

Gibson cleared the wall with a bound. "Hello!" said he.

The tramp dropped the ham on the coals and seemed to meditate flight.

"It's all right," said Gibson. "Pick up your ham or you'll burn it."

The tramp rescued the meat and looked distinctly relieved. Gibson sat down on a log.

"You seem to be fixing for an early dinner," he remarked.

"You're off there," said the tramp, genially. "It's a late breakfast. I don't ever eat lunch—unless I can get it."

"Well, you're making up for it to-day. There must be a pound and a half of that ham."

"I wish there was two!" said the tramp, fervently. "There, I guess it's about done now. Will you set up and have a bite?"

"Much obliged," said Gibson, "but my dinner's waiting for me at home. It looks good though. Who's your butcher?"

"I smoke my hams myself on my model farm," replied the tramp, indistinctly, between bites. "It don't know but what it costs me more than it would to buy 'em; still I don't grudge the extra expense."

"I see," said Gibson. "Do you raise your own potatoes, too?"

"I raised these," replied the tramp, dexterously spearing half a dozen slices on the point of his clasp-knife and conveying them to his mouth.

Gibson smiled. "Strawberries from your own garden?" he continued in the same jocular vein.

"Well, as to them berries, I wouldn't exactly say I grewed 'em myself. I picked 'em though." He winked over his can of coffee. "It's a good meal," he continued, appreciatively. "There ain't nothin' lackin' only a smoke."

Gibson had in his waistcoat pocket a cigar which he regarded as particularly fine. It was the only one, and he had meant to smoke it after his own dinner, but he was seized with a generous impulse, and presented it to the tramp.

The thought of the tramp's enjoyment of that meal was with Gibson all through his own dinner, which happened to be boiled mutton. He almost wished he had accepted the tramp's hospitable invitation.

"My dear," he said to Mrs. Gibson, "do you know what I'd like? Some broiled ham, my dear—nicely broiled—with warmed-over potatoes; and I should like to top off with some strawberries."

"That's just exactly what you will have for breakfast to-morrow morning!" cried Mrs. Gibson, delightedly. "I'm glad I've got something that you will enjoy. There's a nice slice—"

At this instant the cook burst excitedly into the room. "Mrs. Gibson, ma'am," she said, "the ham's gone out of the refrigerator! It couldn't have been cats, because the strawberries is gone, too, an' the cold potatoes I'd sliced to fry for breakfast!"

ONE SECRET OF OLD AGE.

John Van der Elst at 89 Walks Twelve Miles a Day.

If there is any man in New York

along ninety-one carloads of goods, and that the settlers were mainly well-to-do. One man carried away \$250,000, four had together \$225,000 and one had \$5,000. Benjamin Davies, the Canadian agent at Great Falls, Mont., wrote that 1,687 settlers were sent by his agency to Canada and that they took with them goods and cash to the amount of \$2,500,000, and in addition 3,000 head of cattle. The agent at Sault Ste. Marie says that he had sent 724 people with eleven carloads of stock and \$150,000 in cash, while the agent at St. Paul states that the average American farmer, going to Canada, takes with him a carload of farm stock and implements and about \$1,500 in cash. One American who passed through St. Paul en route for Saskatchewan had \$38,000 in his inside pocket. The agent from Omaha sent 2,369 emigrants, and they had with them about \$3,000,000 worth of stock and goods. One family from Kansas City carried away \$100,000, and instances are common where the Americans who are settling in Canada are bringing in \$5,000 and upwards.

Those who go are of all ages. There are many young men and families with young children. The St. Paul agent says that one of the Minnesota State senators has nineteen sons, brothers and nephews now settling in western Canada, and that the senator himself has bought land. Another agent states that one of the farmers to whom he issued tickets was 76 years old, and that he went to Canada to make a home for his mother, aged 104.

HANDLING THE NEWCOMERS.

The Government does not drop the immigrant as soon as he crosses the boundary. It has its agents ready to meet him, and in many cases it sends men with him to his location. There is a force of immigration guides, and there are Government rest houses at all the chief railroad centres, where the settlers may stay for a day or so if they cannot make proper train connections. Here at Winnipeg great buildings are being put up, which will lodge from a thousand to fifteen hundred immigrants at one time. They will have cooking, bathing and laundry arrangements on each floor, although the immigrants will be expected to buy their food and do their own cooking. The immigrants will be cared for free during their enforced wait here en route to their farms.

There are rest houses in Winnipeg now, but they are old buildings that had to be rented for the purpose. I have gone through some of them. The settlers sleep on iron beds on mattresses of straw, and the quarters are so limited that they are necessarily crowded in the thick of the season. A whole family is often restricted to one room, in which there are several beds, but everything is scrupulously clean, and the people who take advantage of such accommodations do not object.

There are agents in charge of all such buildings at the various stations, and the land guides go with the settlers and aid them in selecting their homesteads. Such guides serve without charge, although the settler pays the livery bills. Even after the man has taken up his homestead the Government asks that he complain if anything goes wrong, and the Immigration Bureau will stand between him and the railroads and others in case of oppression. As a rule, however, the railroads are glad to help the settlers. They carry immigrants from the Atlantic ocean to the Northwest for one cent per mile, and if they go back for their families the return trip is at the same rate.

OPENING UP RICH LANDS.

I have met the chief officials of the Canadian Government who are carrying on this movement. They are all under the Secretary of the Interior, and more especially the deputy secretary, W. W. Corey. They have offices at Ottawa and in the various parts of the United States, as well as a large bureau here in charge of J. Obed Smith, who is the Commissioner of Immigration and who has control of all the work in the Northwest. Smith has been with the movement

in the following anecdote. An old man who in his boyhood received the chastisement, tells the story. He says it was the worst flogging he ever had, and that the instrument by which his father administered it was the sharpest-backed, hardest trotting most awkward old horse ever seen.

I won't say that the punishment was undeserved, and I know it cured my propensity for mischief. I lived then some three miles from the post-office, and eight miles from a friend of ours who had sold father a pig to be delivered when convenient.

One day, when I was at the post-office with a neighbor's boy, this friend came riding down the road, and tying his horse, deposited the bag containing the pig near by. He was accompanied by a miserable-looking cur, which sat down by the bag while his owner went into the post-office. Quick as a wink we caught the dog and substituted him for the pig. We placed the pig in a pen not far off; then we scurried home.

We were hanging around the yard when the man with the bag rode up. Handing father the bag, he dismounted just as the string was loosened and the dog jumped out.

"I declare!" exclaimed the man. "That dog was a pig when I left home. I put it into the bag myself."

We boys were a little way off, and father shouted to me, "Where have you been?"

"To the store," said I. "Did you see this bag?"

"Yes," I acknowledged.

"Who changed the pig for the dog?" he demanded.

"I—I did," I faltered.

It was a little past supper-time and I was hungry, and I hoped father'd forgive me and have it over with. But that wasn't his way. He just spoke up quiet like:

"Get out Old Rocks, put a bridle on, but no saddle, do you mind, not even a bag. Take the dog back to its owner's house, then ride to the post-office, get the pig and bring it here. No supper for you to-night, young man."

Off I started, and do what I could. Old Rocks kept up his hard trot until I got back, at nearly midnight. I rode in all about sixteen miles, and you better believe I was so pounded and cut by the razor-backed old horse that I didn't miss not being whipped. For a week upright or horizontal positions suited me best, and whatever mischief I afterward engaged in, you may be sure involved neither pigs nor dogs.

IF THE CZAREVITCH LIVES.

Magnificent is the only word that can describe the present state of the Czar's son and heir, the Czarevitch Alexis, and his future prospects. He has cradles by the score, the very meanest of which is studded with jewels; his feeding bottles are of gold, and his layette is described as more dainty and costly than the trousseau of many a queen. If he lives to ascend his father's throne he will have more titles than he can remember. He will be a Czar six times over, and in addition will bear more than twenty ducal titles, besides innumerable other dignities. He will be lord of a hundred palaces, with more than 20,000 servants, and his private estates will cover 2,000,000 acres, yielding an annual revenue of over \$10,000,000.

DAY OF REST IN FRANCE.

The commission which has been considering the introduction in France of a weekly day of rest has proposed Sunday as a day of compulsory idleness for all except certain trades, necessarily busy every day. It will be laid before the French Parliament. Evidently the Continent of England, and for that matter the United States, are drawing together in the use of Sunday. The old-fashioned English Sunday meant no work and no play. The Continental Sunday meant play, but unhappily, also, a great deal of work. While England is forgetting the austerities of Puritanism and taking to play on Sunday, France is advancing in the economics of labor and finds work seven days a week intolerable.

many of the Mohammedan chieftains of Spain marry Gothic women during their residence in Spain, and their descendants to-day, with their white skins, astonish strangers who do not expect to find white men there.

So far the Sultan or his ancestors have acknowledged allegiance to no other ruler. His power is somewhat curtailed by the Ulama, however, composed of the "learned in the law." The chereefs and marabouts also temper the absolute power of the Sultan.

As the legal and theological code are both taken from the Koran, there is no distinction between professors of law and theology in Morocco. Students of both branches pass through the same education and occupy one position or the other, just as they prefer.

Tangier is the diplomatic capital of the country, although the Sultan divides his time between Fez and Marakche. Tangier was chosen as the diplomatic capital for the accommodation of the members of the foreign legations, who could not take up their beds and household goods and follow the Sultan whenever he desired to make a change of residence. The Sultan has officers and Ministers who have power to represent him before these legations in every thing except the

MOST IMPORTANT MATTERS.

Some idea of the standing of Morocco in former years may be gathered from the statement made by Mr. Perdicaris that up to about 1839 the naval power of the Sultan was supposed to be equal to repelling any aggression by any of the great maritime powers, and some of the minor European States actually paid an annual indemnity to the Sultan in order to protect their flag from aggression by the Salee rovers.

Thirty or forty years ago the Moorish Government changed its attitude toward foreigners, and under pressure of foreign consulates punished severely any lawlessness toward them. The foreigners came to occupy a position of great security and power, especially in the vicinity of the coast, but this attitude on the part of the ruler changed early in the present century. The singular immunity and advantages which they had enjoyed began to disappear, and the question with Mr. Perdicaris arose whether it was safe for him to remain in the country any longer. While he hesitated about abandoning his considerable interests in Morocco he was captured by the outlaw and suffered greatly in body and mind before his release was effected.

THIMBLE COLLECTING.

One of the queerest fads among the upper classes is the collecting of the thimbles of women celebrities. One of the finest of these collections is that of a London society man, who has a cabinet full of the dainty finger-shields of the maidens he has loved and lost; while Mrs. Vanderbilt rejoices in the possession of a veritable thimble of that excellent needlewoman Queen Elizabeth. This is the gem of her collection, although the latter contains a solid silver thimble worn by our Queen when a girl of fourteen, and a substantial "finger-shoe" of no less a person than the mother of our King.

TROOP OF DOG SCAVENGERS.

The municipality of Nice has organized a troop of dog scavengers for the cleaning of the sewers. Some of the sewer pipes are too small to allow of the passage of men. The dogs have been trained to drag a cord with a brush at the end of it from one end of the pipe to another. The system is meeting with complete success.

NAVY OF YOUNG MEN.

The British navy is largely manned by young men. Over half the crews are mere youngsters. Here are the official figures: Aged fifteen to twenty-five, 63.7% sailors (or 57.69 per cent.); aged twenty-five to thirty-five, 36.18 (or 32.7 per cent.); aged thirty-five to forty-five, 3.55 (or 8.45 per cent.); aged forty-five and over, 1.27 (or 1.14 per cent.).

ONE SECRET OF OLD AGE.

John Van der Elst at 89 Walks Twelve Miles a Day.

If there is any man in New Jersey who has a good chance of reaching the century mark in years, it is John Van der Elst of Newark. He is 89 and walks an average of twelve miles every working day.

He is a collector for two or three business houses and is on his feet from morning until night. He does not care to sit down, and when he goes to the office to turn in the money he has collected and write out his accounts he always stands at a high desk.

Van der Elst is about six feet tall, but now somewhat bent. He has a ruddy face, which seems all the ruddier for his white hair. He says that beer has done more to prolong his life than anything else. He never smokes, but he must have his beer.

He walks with a long stride, springy and elastic. He got into walking through finding that the cars did not take him very near many places to which he had to go to collect money. He made up his mind that it was useless to waste money on car fares, so he stopped it, and now he strikes out for the nearest place where he has to do business, and keeps it up until noon time.

On the day of the recent blizzard Van der Elst was at his work early despite the fierce storm. The members of his family besought him to stay at home, but he would not listen. He had an important piece of business to transact and off he went. He rode part of the way, but most of it he had to fight through the gathering drifts on foot. He traveled about in the storm throughout the day, and the next day felt no evil effects whatever.

He eats but two meals a day, morning and evening. The meals are big ones, and he enjoys them. He sleeps like the top of tradition and enjoys his work. He never gets weary while on his rounds about town, and is always rested when he wakes up.

Some time ago he was truckman and teamster, and endured all manner of hardships on cold and stormy days and nights. For years he did a trucking business between Newark and New York, and was out in storms that would have killed an ordinary man.

Occasionally he had to drive for hours riding on a seat that was a pool of icy water, with his clothing frozen on his back. He does not remember having lost a single day from work through sickness during the last quarter of a century.

He can do the work of the average man of fifty-five or sixty. Exposure and hard work have toughened him. He loves to be out of doors, and no doubt would pine and sicken if his work kept him inside.

Van der Elst was born in Belgium, but came to this country fifty-four years ago.

ARE YOU A "TRYER"?

All honor to the man who tries! He may fail—quite likely he will—many and many times before he accomplishes the desired results. But if he has got the grit and the hang-on tenacity of the bulldog, he will come out a winner in the end. The harder the battle, the more glorious the victory. Easily attained success is equally valuable, but rare. The trouble is, this wheel of chance sort of success is seldom valued for what it is worth. It comes so easily, it is liable to be lost just as easily. The man who has come out a winner after hardship and disappointment, who has fought many battles with great odds against him, and who has overcome obstacles galore—well, he knows the price he had to pay for victory, and it is valued accordingly. Whether or not the silvery lining is yet in sight for you, "don't give up the ship." After all, the real joy is in the fight—the little victories that come with everyday business battles. The "big reward" may seem to be discouragingly far off in the future, but keep trying and trying. The world honors the man who tries as much as the man who succeeds.

A TIGER DRIVE IN NEPAL

CLOSE CORDON OF 400 ELEPHANTS EMPLOYED.

How the Great Ring of Big Brutes Was Pressed Toward a Central Point.

Wishing to see something of Jung's famous method of tiger driving, I went with three gentlemen of Mr. Girdlestone's party to the neighborhood of the jungle, which was to be beaten an hour or so before the time fixed for the Prince's start-from camp. Before we had gone half a mile, says a correspondent of the Indian Pioneer, we got a glimpse of the scale on which Maharajah conducts his operations.

For the purpose of this single beat upwards of forty huts had been constructed, only of boughs and leaves, it is true, but still huts quite as substantial as those which the Taros in the Terai consider good enough for permanent habitation. These huts are built in a perfectly straight line about twenty yards apart, this line being in fact the chord of an arc, the arc itself formed by a close cordon of elephants.

By day for several previous days these huts open towards the arc, had been occupied by groups of soldiers and shikaris who by the noise of their chatter and the clatter of their cooking and wood cutting quite deprived the tigers in the forest in front of them of any fancy for strolling that way, and by night these sentries had maintained huge fires between each hut, which fires had the same result of barring the way during the dark hours. In front of this line of huts a path about ten yards wide had been cleared of timber so as to permit the convenient approach of the Prince's elephants to

THE SCENE OF ACTION.

By this time the Prince and his party were beginning to arrive, so the Maharajah pushed forward to meet him, and we joined in behind. Now the plan of the operations, which is indeed of the utmost simplicity, began to develop itself. The cordon of thirty or forty elephants which I formerly mentioned and which marked one end of the arc or semi-circle of elephants, now extended themselves in line, directly the Prince's party had passed, so as to form the chord of the arc, as far as their number permitted. In the meanwhile the Prince and Maharajah, with their followers, proceeded along the line of huts until they came to the last, where was the other extremity of the arc.

The elephants of our party (also perhaps thirty or forty in number) were then extended backward so as to join hands with the pad elephants which had sufficed to furnish, say, half the chord, and the ring of elephants around the doomed tiger was complete. Three elephants only were exempted from forming links in this chain, those of the Prince, the Maharajah and Gen. Probyn. These were within the ring, and free to go wherever desirable, all others to keep in their places in the circle so far as intervening trees would permit, and simply press convergently to the centre. Strict directions were given that no one under any circumstances was to fire except the Prince. Even Jung Bahadur and Gen. Probyn would not fire unless in the case of the Prince's extreme peril. Then the ring of the elephants, every mahout pressing toward the same central point and the Prince and his two companies moving toward the same point, but within the ring, and a little in advance of our part of it.

BEGAN TO CLOSE IN.

There were about 400 elephants employed. I should guess that at first there may have been on the average four yards between every two elephants. Allow six feet for the breadth of the elephant itself, and the circle might be roughly estimated as a mile and a half round. Soon, however, the interval be-

USEFUL INFORMATION.

Interesting Items From the Four Quarters of the Globe.

Londoners use on an average thirty-four gallons of water per head per day. A single pair of sparrows may have a progeny in ten years of over 270,000,000 birds.

During the past five years the membership of friendly societies in the United Kingdom increased by 2,000,000.

During 1905 no fewer than 294 vessels of 500 tons gross register and upwards were totally lost. Ninety of these were British ships.

Sergeant Robert Daly, who stands 6ft. 8 1/2 in. and is the tallest man in the Royal Irish Constabulary, has retired on a pension.

It has been found that the best "emergency ration" for lifeboatmen who have been out for many hours in the cold without food is chocolate.

Egypt is the only country in the world where there are more men than women. The male sex in the dominion of the Khedive exceeds the female by 160,000.

A swallow's speed has often been stated to be sixty miles an hour. Recent experiments prove that a swallow in a hurry can travel at the rate of 128 1/2 miles an hour.

Actors are never stranded in Russia, because when a manager takes a company touring he must deposit with the Government enough money to bring all safely home.

It is just about two years since the outbreak of insurrection in German South-West Africa. The campaign has cost Germany 2,000 men and \$75,000,000 in money.

Fishes have been discovered at Guatemala with two pairs of eyes. One pair does duty above the water, the other below, the fish thus being able to see in two elements at once.

Aargau Town Council has voted \$200 towards a monument to the memory of Carlo, a St. Bernard dog which recently died, and which, during the last nine years, saved nearly 100 lives on the Alps.

The trade of tooth-stainer is peculiar to Eastern Asia. The natives prefer black teeth to the whiter kind, and the tooth-stainer, with a little box of brushes and coloring matter, calls on his customers and stains their teeth.

Trustworthy statisticians declare that there are 250,000,000 Mohammedans in the world. The Christian population is put at 447,000,000, but the increase of Islam is more rapid than that of the combined Christian denominations.

The Paris poodle is now sheared by machinery. A clipping machine, driven by a two and a half horse-power gasoline motor, is mounted on wheels, and moved from street to street as required. The result is stated to average six dogs per hour.

Probably the most costly tree in the world is the plane tree which grows in Wood Street, in the City of London. It occupies space which would bring a rental of \$1,250 per annum, and this capitalized at thirty years' purchase gives a value of \$37,500.

Japan, with a population of about 47,000,000, employs upwards of 3,600,000 persons in her fishery, fish-curing, and aquatic industries, including profitable seaweed and sea-salt farms. Great Britain and Ireland, with a population exceeding 45,000,000, do not employ 200,000 persons in these trades.

THE TRIPLE SOMERSAULT.

The Fatal Feat That Is Rarely Tried by Acrobats.

Acrobats who risk their necks for the public's amusement and their own livelihood are seldom averse to attempting new dangers if there is only sufficient money in them, but probably 999 out of every 1,000 would flatly decline to try a triple somersault were the suggestion made to them. As a matter of fact, a triple somersault usually means death, and it is no exaggeration to say that scores of lives have been sacrificed in trying it.

Yet there is one man who has lately

THE SUNLIGHT WAY

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way (follow directions).

Hard rubbing and boiling are things of the past in homes where Sunlight Soap is used as directed.

Sunlight Soap will not injure even the delicatest fabric or the hands, and the clothes will be perfectly white, woollens soft and fluffy.

The reason for this is because Sunlight Soap is absolutely pure, contains no injurious chemicals—indeed, nothing but the active, cleansing, dirt-removing properties of soap that is nothing but soap.

Equally good with hard or soft water.

YOUR MONEY REFUNDED by the dealer from whom you buy Sunlight Soap, if you find any cause for complaint.

LEVER BROTHERS LIMITED, TORONTO

FORCED TO EAT BOOKS.

People Who in This Way Have Contributed to Destruction of Literature.

Among the causes that contribute to the destruction of books, says an Italian writer, Americo Scariatti, there is one very curious one that may be called bibliophagia. No reference is intended to the mice that once destroyed in England an entire edition of Castelli's "Lexicon Heptaglotton," but to human beings who have literally devoured books.

In 1370 Barnabo Visconti compelled two papal delegates to eat the bull of excommunication which they had brought him, together with its silken cords and leaden seal. As the bull was written on parchment, not paper, it was all the more difficult to digest.

A similar anecdote was related by Oelrich, in his "Dissertatio de Bibliothecarum et Librorum Fatis" (1756), of an Australian general, who had signed a note for 2,000 florins, and when it fell due compelled his creditors to eat it.

The Tartars, when books fall into their possession, eat them, that they may acquire the knowledge contained in them.

A Scandinavian writer, the author of a political book, was compelled to choose between being beheaded or eating his manuscript boiled in broth.

Isaac Volmar, who wrote some spicy satires against Bernard, Duke of Saxony, was not allowed the courtesy of the kitchen, but was forced to swallow them uncooked.

Still worse was the fate of Philip Oldenburger, a jurist of great renown, who was condemned not only to eat a pamphlet of his writings, but also to be flogged during his repast, with orders that the flogging should not cease until he had swallowed the last crumb.

SIEGE COST 50,000 LIVES.

Sanaa Almost Depopulated—Suffering of Inhabitants from Hunger.

Leland Buxton, who has just returned from a tour of several months in the Persian Gulf and in the Yemen, visited Sanaa, which was recently besieged by the rebel Arabs.

He states that he found Sanaa to be practically depopulated, having been reduced from a population of 70,000 to

VISIT BY RUSSIAN POLICE.

Midnight Summons—Shot Without Trial Before Dawn.

Ivan Krivorotoff, his wife and mother were aroused in their home at the station of Golitvino, south of Moscow, by a loud knock about midnight on January 2. Ivan's mother opened the door, and three men entered. Semen Ivanoff, the head constable, who had been drinking; Vassily Konkoff, deputy constable, and the gendarme stationed at Golitvino. All were well known to Krivorotoff. They entered his bedroom, and he shook hands with them and asked:

"Ivanoff, what do you want with me?"

"Get up and dress, Krivorotoff," was the answer, "and come with us to the station."

Krivorotoff's heart was gripped by the fear of death. The Semenoff Regiment had passed on its punitive expedition only a day or two before. It is true Colonel Riemann had held a thanksgiving service for the suppression of sedition, and had declared that enough blood had been shed and that there were no more Semenoff soldiers in the vicinity, but the recollection of the twenty-six bodies in the fresh trench near the railway station was too much for Krivorotoff.

"Oh, come on," replied Ivanoff. "They are waiting on you at the investigation."

Krivorotoff told Ivanoff this was not true, as there was nobody at the station to conduct an investigation, and refused to go, declaring they wanted to kill him.

"What a fool you are, Krivorotoff," said Ivanoff. "Do you know that the colonel said at the mass that there would be no more killed. What are you afraid of? Who's going to shoot you? Hurry, dress and come on."

Krivorotoff again refused. The gendarme put his revolver to his temple. Krivorotoff's mother begged him to go in peace, so as not to anger the officer. He submitted. Before leaving he embraced his wife and mother. Ivanoff sneered, "What's the use of snivelling? Might think you are going to be shot."

Krivorotoff never returned. The railway hands heard several shots a few minutes later, and the grave of the twenty-six showed signs of having been reopened.

Krivorotoff's wife went to the authorities for information. They offered her a certificate that he had been executed.

There were about 400 elephants employed. I should guess that at first there may have been on the average four yards between every two elephants. Allow six feet for the breadth of the elephant itself, and the circle might be roughly estimated as a mile and a half round. Soon, however, the interval between the elephants dwindled to three yards, two yards, one yard. At last, except where the trunk of a tree interposed, the elephants were almost touching each other.

Before it had actually come to this a large herd of spotted deer, with two fine stags among them, had shown themselves at various points of the circle seeking where to break through. At last maddened by the shouting and crashing of branches as the elephants marched on and in utter desperation, one hind rushed between two elephants near me and the rest of the herd followed her. The passage of those timid creatures was quite enough to show me what ticklish cattle elephants are. A number of them backed out of the line and screamed, as much as if these poor scared deer had been so many ferocious tigers; and if a tiger had taken advantage of the momentary break in the circle he might have got off scot free.

The deer, however, had soon all passed, and the ring was again continuous. At this time a shot was heard. I could not see the Prince on account of some intervening underwood, but it was, of course, he who had fired. Then came two shots in rapid succession, and the shouting of the mahouts redoubled; and the noise was indeed so alarming and stupefying to the birds within the circle that a black partridge actually flew and stunned itself against an elephant's head.

THEN CAME A FOURTH SHOT.

Still we pressed inward. Only now there was not room for all the elephants to keep in their places in the too narrow circle and a great number of pad elephants were jostled out of the front rank and had to keep in the second row. At first I could not make the tiger out, but we moved, and then I saw the beautiful beast for an instant as he crept into thicker jungle.

And now the din became deafening, the trees were crashing as if the forest was being felled, the four or five hundred mahouts shouted like a whole army of stentors, and the elephants trumpeted and ran through their entire gamut of unearthly noises. Then came one, two, three shots, with perhaps a second between each, and then cheers told us that the tiger was dead. He was a very handsome and rather large one, nine feet nine inches in length. No one, of course, had hit him but the Prince, and he had given him three mortal wounds.

SIX SAYINGS TO REMEMBER.

"There is something better than making a living; making a life."

"Our success in life depends upon our will to do."

"It is never too late to be what you might have been."

"Great principles are in small actions. If we fail in our present circumstances to live nobly, we need not imagine we should have done better on a grander scale. Develop great character 'To be of good cheer in case of disappointment; exercise greater charity in simple duties and not in conspicuous trials.'"

The silken threads which help to intertwine the erring, and make more allowance for the opinions of people whose views differ from mine; to smile more and frown less."

"To be honest; to be kind; to earn a little, and to spend a little less; to make upon the whole a family happier for his presence; to renounce, when that shall be necessary, and not to be embittered; to keep a few friends, and these without capitulation; above all, on the same grim condition, to keep friends with himself—here is a task for all that a man has of fortitude and delicacy."

"Is this pure milk?" said the inquisitive lady customer. "Yes," replied the milkman; "we sell the cream separately."

of every 1000 would nearly decline to try a triple somersault were the suggestion made to them. As a matter of fact, a triple somersault usually means death, and it is no exaggeration to say that scores of lives have been sacrificed in trying it.

Yet there is one man who has lately accomplished this dangerous feat and lived—Daniel O'Brien, a clever young Irish acrobat, well known in England.

This acrobat is a splendidly formed young fellow, slender but beautifully proportioned, and a wonderful performer. He holds the record for the double somersault (32 ft.), and he has received medals in every country he has visited. For the purpose of his great effort the straw bed, intended to receive the acrobat, after he had hurtled through the air, was placed 8 yards from the spring-board.

When the signal was given the athlete dashed down the plank, hit the "spring" with a tremendous bound, rose between 15 ft. and 16 ft. in the air, his knees pressed closely together with his hands, revolved twice, seemed to hesitate, then, with a supreme effort, made a third revolution, and landed safely in a sitting position on the bed. Everyone rushed to his assistance, wondering if he had broken his spine, but before he could be reached he had risen to his feet and was bowing his acknowledgments of the flattering silence (born of fear) which had greeted his wonderful performance.

"That's the last time I attempt the triple," he said, when he had recovered his breath; "the double is enough for me after this. I was afraid I was going to strike the back of my head, and if I had it would have been a case for the coroner."

ANIMALS ON STRIKE.

Even Birds and Beasts Often Drop Their Jobs.

Both birds and beasts occasionally go on strike, according to observers. A herd of horses will bunch together, neglect their food, become restive, neigh and rub noses when in a field. The outcome is that the herd will not allow themselves to be saddled or harnessed and will chase and attempt to kick the attendants. Female birds take tantrums and refuse to do the housework. They desert their nests and leave their eggs to become barren. The male naturally becomes greatly concerned, but will never attack the female, so there is no remedy. Warblers and starlings are given greatly to these strikes.

A species of black ants have little yellow ants which do most of their work for them. Occasionally the yellow species will go on a strike. Their food supply is cut off, but if that does not avail the strikers are attacked or another lot of yellow ants are secured.

Even the rabbit is a hardened striker. In rabbit colonies the stronger rabbits do most of the burrowing, and as often as perhaps once in two years these become discontented and refuse to work.

INDIAN PROVERBS.

The coward shoots with shut eyes. No Indian ever sold his daughter for a name.

Before the paleface came there was no poison in the Indian's corn.

Small things talk loud to the Indian's eye.

When a fox walks lame old rabbit jumps.

The paleface's arm is longer than his word.

A squaw's tongue runs faster than the wind's legs.

There is nothing so eloquent as a rattlesnake's tail.

The Indian scalps his enemy, the paleface his friends.

There will be hungry palefaces so long as there is any Indian land to swallow.

When a man prays one day and steals next six, the Great Spirit thunders and the evil one laughs.

Leland Buxton, who has just returned from a tour of several months in the Persian Gulf and in the Yemen, visited Sanaa, which was recently besieged by the rebel Arabs.

He states that he found Sanaa to be practically depopulated, having been reduced from a population of 70,000 to something like 20,000 as a result of the famine during the Arab siege. The Jews suffered terribly during the period and almost the whole town is deserted. Sanaa, which, so far as he knows, has only been visited by a few Englishmen, has magnificent and large buildings, covered with decorations, and the town is surrounded by mud walls.

On his way to the capital Mr. Buxton found villages had been destroyed by the Turkish artillery, and that a great portion of the route to Sanaa was entirely depopulated. Large numbers of skeletons and skulls marked the route.

The siege of Sanaa was attended by terrible suffering and starvation, and cannibalism occurred both among the Arabs and the Turks. The people were reduced to terrible straits, and one Turk himself admitted that he had killed and eaten three Arabs.

The dogs, which are a characteristic feature of most eastern towns, had disappeared, both they and the cats having been used as food. The only European in Sanaa is an Italian trader, who was in the place throughout the siege, and who has lived here for twenty years.

NO PRIZES FOR LITTLE JAPS.

School Rewards Are Unknown—Learning for Learning's Sake.

A Japanese lady lecturing in London recently said that the two most important lessons taught to Japanese children were loyalty to the Empire and love for their parents.

"If we do not love our country," she stated, "we cannot love another." The very reason why you British love foreigners is because you have a well-ordered Government, and you love your country so well that it radiates on the foreigners.

"Japanese children," she continued, "have no nursery life; they are always looked after by their parents and grandparents. I certainly think that the parents should always be close to their children, as their contact is most essential in moulding their character."

No child goes to school in Japan before six years of age, and when there, besides the ordinary school curriculum, two hours are set aside each week to teach the child ethical knowledge, and one hour a week is given to studying etiquette—how to walk, pour out tea, bow, and hold the hands and fingers.

"We do not give any prizes," the lecturer went on, "nor do we hold examinations; no marks are given; the child is taught to learn for the sake of knowledge, and not to obtain a certain number of marks."

LAWYERS IN BRITISH HOUSE.

The law is well represented in the House of Commons, 134 of the members being barristers and solicitors. Commercial life is represented by 130 merchants and manufacturers, and literature by forty-eight authors and journalists. Other occupations are distributed as follows:—Fifty-five ex-army men and yeomanry officers, 44 artisans, 35 shipowners and shipbuilders, 12 farmers, 10 doctors, 9 bankers and 6 schoolmasters.

HIGHEST BALLOON ALTITUDE.

The credit of having reached the highest altitude in a balloon is given to Mr. Bersen and Dr. Suring, of Berlin. They first went to the height of 30,000 feet, losing consciousness for brief intervals. They continued to ascend to 33,790 feet, when one of them became unconscious and could not be aroused. The other, after opening the valve, also became insensible, and neither recovered till the balloon had dropped to 10,000 feet.

might think you are going to be shot." Krivorotoff never returned. The railway hands heard several shots a few minutes later, and the grave of the twenty-six showed signs of having been reopened.

Krivorotoff's wife went to the authorities for information. They offered her a certificate that he had been executed by the military authorities on January 1, instead of the morning of January 2.

Such writes the St. Petersburg correspondent of the London Standard, is the story related to V. Vladimiroff, the well known writer, by the mother and wife of the victim. Neither it nor any other stories published by Vladimiroff have been denied by the authorities.

WHY THE SKY IS BLUE.

Different Theories Held by Men Who Study It.

The sky has long been a puzzle to physicists. There are two mysteries to explain about it—its reflection of light and its color. The old view was that the blue of the sky was due simply to atmospheric oxygen. Oxygen has a faint blue tint, and the idea was that several miles of the gas, even when diluted as it is in the air, would have a bright blue color. But this did not account for the intense illumination of the sky, and of recent years Tyndall's "dust theory," or some modification of it, has been generally accepted. This regards the blue color as an optical effect, like the color of very thin smoke, due to excessively fine particles floating in the air, which would also account for the large proportion of reflected light from the sky.

Recent calculations of Professor Spring, of Liège, Belgium, however, indicate that the dust in the air is not sufficient in amount, nor finely enough divided, to support this explanation, and he rejects it for this and other reasons. He has gone back to the old oxygen theory, and accounts for the general illumination of the sky on the hypothesis, first advanced by Hagenbuch, that intermingled layers of different density in the atmosphere give it the power of reflecting light.

FRENCH ARMY CONSCRIPTS.

Never Take Good Clothes or Possessions Into the Barracks.

"They are a curious crowd," says a writer describing the conscripts of the French army, "these boys of twenty and of twenty-one, in various stages of sobriety, as they throng onto the platforms of the railway stations and, under the fire of gentle and superior sarcasm from the young men in uniform who have already done a year or two, climb into the third-class cattle pens which are to take them to the threshold of their lives in barracks. The sons of wealthy men elbow the scourgings of the street."

"All wear their worst clothes, except those who do not possess a second suit. The chief peculiarity about the whole of them is an entire absence of luggage. A young friend of my own was one of them. His luggage for the two days of his first visit to Paris consisted of a comb and an extremely aged tooth brush, and before leaving Paris he asked me to keep his overcoat for him till he returned. 'They will only spoil it, and it is a new one,' was his plea."

"I counted the valises of a whole train load of conscripts who accompanied my friend, and they numbered exactly four. 'Those four will have their lives teased out of them to-morrow,' was the verdict of a private under arms upon the platform."

PENSIONS FOR SERVANT GIRLS.

The late Herr Theodor Kutzner, a Berlin millionaire, has left to that city the sum of 2,800,000 marks to create a fund to be known as the "Theodor and Karl Kutzner Foundation." The revenues of the capital left to the city are to be used for providing pensions of 250 marks each to be given to servant-girls, seamstresses, and embroiderers. They must be at least thirty-six years old.

**Saturday Morning,
TO CLEAR AT \$2.00.**

1 Table of Ladies Fine Kid and Patent Boots, nearly all sizes in the lot, worth up to \$3.50 a pair,

to Clear at \$2.00.

THE **J. J. HAINES** SHOE HOUSES, Napanee, Belleville, and Trenton.

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market. When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and **BUCK-WHEAT FLOUR** always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,
16th January, 1906.

Wait and See.

A great surprise is in store for you. The Seven Sutherland Sisters are coming to The Medical Hall, Fred L. Hooper's. They have the longest and most beautiful hair in the world. Demonstration beginning April 30th, for two weeks.

Coming Attractions.

"A Royal Slave," which comes to the Brisco Opera House for one night, Wednesday, May 9th, is to be one of the real events of the theatrical season in this city. Of all the romantic dramas seen last season, few were as well received as Gordon & Bennett's beautiful production of the Southland. It is not only unusual in dramatic construction, but is magnificent in its scenic investiture, every piece of scenery used in the production being carried by the company.

Fabio Romani.

The attraction announced for the
Brisco Opera House on Monday even-
ing, April 30th, will be that reigning
romantic success, "Fabio Romani"
which is a cleverly arranged drama-
tization of Marie Corelli's novel of re-
markable, creative fancy and wide
discussion, "The Vendetta." It is
seldom, if ever, that an adaptation for
stage presentation, exceeds in popular-
ity and general favor that of the novel
itself. However, that is the same with
Fabio Romani, which is now entering
on its sixth year of the most solid suc-
cess known to theatrical history. The
story which is a most impressive one,
deals with the unfaithfulness of a wife
and her open preference for a favored
suitor, to such an extent that she con-
sidered the husband an obstacle to her
joy of living and causes him to be en-
tombled alive and suffer a living death.
It is under these circumstances the
wronged husband wreaths his anguish
and registers a terrible vow of venge-
ance, which is directly followed by the
volcanic eruption of Mt. Vesuvius,
thus precipitously releasing the hus-
band from his long entombment and the
death of the false wife and her
paramour then follows.

American Field and Hog Fence, one

The Bath Amateur Dramatic Club
will present the rural comedy drama,
"Happy Hollow" in the Brisco Opera
House, on Tuesday, May 1st., in aid of
the Bath Public Library. This play
was presented in Bath on April 17th,
and filled the hall to overflowing and
was much appreciated. Go to the
Opera House on Tuesday eve and help
along a worthy object.

The Steamer Reindeer.

Made her first trip for the season to
Napanee on Sunday, and started on
her regular trips on Monday morning.
During the winter months the
steamer has been thoroughly overhauled
and greatly improved. Her hull has
been replanked and caulked and a
new wheel and steering gear provided.
The improvements increase her speed
two miles an hour and with a new
coat of paint, the Reindeer is one of
the best and fastest boats on the bay.
Capt. Collier may be justly proud of
his boat and we bespeak for him a most
prosperous season.

Japs Want Longer Legs.

Japanese scientists attribute the su-
perior stature of the English speaking
races to their meat eating habits and
the Emperor is reported to be consider-
ing a scheme to put the nation on a
meat diet to make his subjects grow
taller. A native physician of Tokio,
who was educated in England, is advo-
cating the general use of the bicycle
to achieve the same purpose. In his
opinion the bicycle is the most success-
ful body builder and muscle developer
the English people possess. He envies
the English length of limb. He recom-
mends that young Japs, of both sexes,
be taught in early youth to ride the
bicycle.

The Old Story.

Battle Creek, Mich.

Mr. Fred Arnott, Toronto, was in
town a few days this week.

Mrs. Jas. Soby and daughter, Gera-
ldine, Pieton, are guests of Mr. and
Mrs. John Soby.

Mr. and Mrs. A. D. McRossie return-
ed this week from spending the winter
in New York.

Mr. W. A. Asselstine, Roblin, was a
caller at our office on Monday.

Mrs. F. S. Wartonman and Miss Helen
Wartonman Colebrook, spent a few days
last week in Toronto.

Miss Dot Davern, Deseronto, spent
last week the guest of her cousin, Miss
Hattie Davern.

Mr. and Mrs. T. Nance, of St. Martins,
Cornwall, England are guests of
Mr. and Mrs. S. Gibson. Mrs. Nance
is Mr. Gibson's niece.

At the last monthly meeting of the
Montreal Insurance Institute, Mr. G.
H. Allan, formerly of Napanee, deliv-
ered a very interesting paper on "Field
Work in Life Insurance."

Invitations are out for the marriage
of Miss Carrie Grace Sills daughter of
Mr. E. R. Sills, of Richmond, to Mr.
W. J. Funnell, of Morven. The cere-
mony will take place on Wednesday,
May 9th, at Mr. Sills' residence.

Rev. Father Hogan, formerly of
Napanee, returned to Perth, on Good
Friday, from a visit to Rome where
he had been received by the Pope on
the occasions. On his return his
parishioners presented him with an
address of welcome.

Luman Sherwood, C. E., now of
Denver, Col., has accepted a call of the
minister of railways and canals to
service and will return to Canada in
May. He will be located at Kirkfield,
his work being in connection with the
Trent Valley canal in vicinity of the
new lift lock. Mr. Sherwood is an
R. M. C. graduate and belongs to
Napanee.

A telegram has been received from
Dr. W. H. Clark, San Francisco, cousin
of Mrs. Sidney Warner, Mrs. Finkle
and Mrs. A. Gibson, Napanee, announc-
ing his safety after the earthquake and
fire. He was in the United States
hotel when the earthquake came, but
that he escaped serious damage. Dr. Clark
has lived in San Francisco
for thirty years and is a son of the late
W. H. Clark, Postmaster Camden
East, and has two sisters, living in
Kingston Mrs. Dr. McDonald, and
Mrs. Henry Perry, of Japan.

Base Ball Team.

A meeting of all those interested in the organization of a base ball club will be held in the Public Library, on Monday evening, April 30th, at 8 p.m. The prospects for a good ball team in Napanee were never brighter than at present, and all interested are invited to be present.

Oddfellows' Church Service.

The members of Napanee Lodge, No. 86; Argyll Lodge, No. 212, and Mt. Ararat Encampment No. 16, with visiting brethren will attend divine services in the Presbyterian Church, on Sunday next. The members will meet in Argyll Lodge rooms, at 2.30 p.m., and march to the church at 3 o'clock. Bring your badges.

Alleged Cock-fighters Summoned.

Belleville, April 25.—Chief Gynyon of Deseronto, arrived here with a dozen subpoenas, which he has served on men charged with engaging in cock-fighting, near Deseronto, on Good Friday, and they are to appear before Magistrate Bedford, of that town, on Wednesday. About fifty men in all from this city, Deseronto and Napanee were served. There were ten battles, seven being won by Deseronto although they were Belleville birds. Those implicated from this city include a number of prominent citizens.

Boarding Houses. Take Note.

In view of the part that electricity plays in our modern life it is amusing to recall that when Benjamin Franklin evolved the lightning conductor he was called to account by certain individuals for sacrilege in "attempting to divert the Almighty's lightning."

Restaurant proprietors and boarding house keepers have apparently overlooked a valuable hint which Dr. Franklin afforded them, as follows: He took an ancient rooster and killed it by a powerful shock from one of his Leyden jars. When subsequently the bird was served at his table "its flesh was found to be as tender as that of a young partridge," or so he declares. This is one of the discoveries which should make the name of Franklin forever honored.

Flowers.

The instinctive and universal taste of mankind selects flowers for the occasion.

WILTON.

Rev. R. A. Whittam preached an excellent Easter sermon, to a large congregation in the Methodist Church on Sunday morning, and Rev. G. S. Milligan delivered an equally appropriate sermon in the Presbyterian church in the evening.

After an absence of over three years, William Owens, Watertown, is spending a few days with mother, Mrs. John Owens, and renewing acquaintances in the village.

Mrs. W. O. Bullock and children, accompanied by her sister, Mrs. Williams Forsythe, left on Wednesday to join Mr. Bullock at Lyn, where they will reside.

Mrs. J. B. Sanderson and Mrs. Frank Ward, spent Easter with friends in Petrolia.

Mr. W. B. Storms, Montreal is spending Easter with his father, Mr. Ruglas Storms, who is very ill.

Mr. M. Storms returned to his home in Mississippi, last week.

Albert Storms, Toledo, Ohio, after an absence of seventeen years, spent last week with his parents here.

Miss Mable Price, Mountain Grove came last week as an apprentice at Mrs. Lapum's sewing rooms.

A young son has come to reside with Mr. and Mrs. Orange Storms.

Miss Lucille Gallagher Harrow, Smith is visiting at L. L. Gallagher's.

Miss Flossie Caton, Odessa, is spending a few days at Geo. Simmons.

James Davidson, Opinicon, is spending the Easter holidays at W. Parrott's.

Mrs. R. K. Owens and Master McTavish spent last week with friends in Kingston.

Miss Eva Gallagher, attending Napanee Collegiate, is at home for the vacation.

Mr. Bert, Asselstine, Queen's, is spending Easter at home.

Mr. S. Storms has gone to Watertown for the summer.

A number from here attended the sugar social at Violet last week.

Mrs. York and child and Miss Grace Wallace, formerly of Ottawa, are visiting their parents, Mr. and Mrs. Jas. Wallace, for a short time, when they will leave for Killarney, Manitoba, to join Mr. York, and reside in future.

Mr. and Mrs. A. F. Miller made a trip to Adolphustown, last week.

Twins—a wee girl and boy—have come to live with Mr. and Mrs. Almon Brown.

Anson Martin and family, have moved back to the farm, and Fred. Storms and family have rented the house vacated by Mr. Martin, and are moved this week.

One gallon of Prism Brand Paint will cover 360 sq. ft., two coats. Every can guaranteed. The Medical Hall.—Fred L. Hooper, sole agent for Napanee.

Milk Cans second to none, first class material and workmanship, dairy pails creamers, pans and Melott Cream Separator, three sizes.

Economy is a Virtue

The steamer Jessie Bain, has been chartered for the Deseronto, Picton, Napanee Route this season.

The steamer Reindeer arrived in the Harbour on Sunday and commenced her regular trips on Monday.

Paints and oils white lead, gasoline coal oil liquid veneer, removes all stains make furniture new.

BOYLE & SON.

"Weary Willie," one of the principal characters in "The Convict's Daughter," a sensational scenic melodrama to be presented at the Brisco Opera House, Friday, April 27th, is undoubtedly the most unique stage individuality found in theatrical history. He is a "hobo" but not the typical tramp of star truck-riding fame. He is educated, philosophical, cynical, magnanimous, self-sacrificing and loyal, and his heart contains the metal of a man under all circumstances. His life teaches a wholesome moral lesson. Hounded—threatened even with death while in the toils of the villain—with the stigma of a crime, he did not commit, on his life, he bears himself with commendable courage through all his misfortunes. The hour of his great triumph comes when a dying man confesses he is guilty of the crime for which "Willie" suffered, and in restitution bequeaths to him—like the famous Monte Cristo—a valuable mine and other property, making him rich and happy. Then his time for vengeance on the venomous villain comes, but it is tempered with mercy and charity for a ruined banker. Altogether it is a rare stage character and one that possesses extraordinary interest for every student of human nature and particularly for theatregoers.

Most housewives judge the purity of a flour by its whiteness. White somehow signifies purity. But while pure flours are always white, white flours are not always pure.

Royal Household Flour

is the whitest flour that is milled. It is also the purest. You may think the flour you are using is about as white as flour can be. Yet if you place it beside Royal Household Flour it will look yellow by comparison. Ask your grocer for Royal Household, and make sure that he understands that you mean it.

Ogilvie Flour Mills Co., Ltd.
Montreal.

"Ogilvie's Book for a Cook," contains 130 pages of excellent recipes, some never published before. Your grocer can tell you how to get it FREE. 152

THE CHEAPEST BICYCLE PER YEAR

to be as tender as that of a young partridge," or so he declares. This is one of the discoveries which should make the name of Franklin forever honored.

Flowers.

The instinctive and universal taste of mankind selects flowers for the expression of its finest sympathies, their beauty and their fleetingness serving to make them the most fitting symbols of those delicate sentiments for which language itself seems almost too gross a medium.—Hillard.

A Study In Anatomy.

"Mamma, what part of the body is the trombone?"

"No part of the body, my dear."

"Yes, it is, because it says in the paper here that last night while returning from the symphony concert Professor Gridel fell and broke his trombone."

They say that money does not bring happiness. This is an experiment, however, which every one wishes to try for himself.

Gentlemen who shave themselves or those who like an easy shave try a Carbo Magnetic Razor. Does not cost anything to try from
BOYLE & SON.

E. LOYST has a carload of good potatoes, Royal Household flour, all other grades. Bran, Shorts, Cream Equivalent, Flax Seed, Oil Cake, Rock Salt, barrel and sacks fine and coarse. Groceries. Highest price paid for eggs and hides. One price to all.

Golden Nose.

Tycho Brahe, the famous Danish mathematician, was known as the "Wizard of the Golden Nose." While at the university he lost his nose in a duel and replaced it with a nasal organ of gold, held in place by cement and a pair of spectacles. This addition to his countenance gave him a very peculiar appearance and caused him to be much feared by the common people, who attributed to him many supernatural powers, largely on account of his remarkable nose.

Tasmanian Girls.

For many years Tasmania has been known as the "Circassia of the colonies," a tribute to the exceptional loveliness of its young women. There have been Tasmanian peeresses, but the pretty Tasmanian girls are mostly in demand as barmaids for Sydney and Melbourne. Some years ago it was elicited in evidence at an official inquiry in Melbourne that Tasmanian barmaids command double the ordinary wages for this kind of work.

Two Goat Islands.

Here is an extraordinary coincidence: The island lying between the American fall and the Canadian fall at Niagara is called Goat Island. What is now called Livingstone Island at the Victoria falls in Africa is called Kempongo by the natives, and this signifies "goat island."

Contradicted.

"It's impossible to have too much of a good thing," said the thoughtful thinker.

"Oh, I don't know," rejoined the contrary person. "Matrimony is a good thing, but what the law does to a bigamist is plenty."

Economy is a Virtue

DIAMOND DYES

Will Save Money for Every Home in Canada.

When times are hard and dollars scarce, the smart and bright women of our country find that the Diamond Dyes are important helps in economizing. By the use of Diamond Dyes the husband, mother and children can be well and stylishly dressed, although nearly all the clothing may be old material dyed over.

Diamond Dyes make such lasting and beautiful colors that goods dyed with them cannot be told from new. Any one can use them, as the directions are so plain and simple that no skill is needed. The colors of Diamond Dyes never grow dim; they never fade or wash out. In order to secure the best results in home dyeing, every woman should see that her dealer or merchant should give her the "Diamond Dyes," as other package dyes are only poor imitations.

THE CHEAPEST BICYCLE PER YEAR

A Cleveland costs say, \$60, and lasts easily 10 years, cost per year \$6.00.

A cheaply made bicycle costs say, \$30, and lasts 2 years, cost per year \$15.00.

Not much of a sum in arithmetic to figure out which is the better investment, is it?

And if you ride a Cleveland you have a beautiful and easy running bicycle, during all that time with no expense except for new tires.

What of your friend who rides the so-called cheap wheel and whose investment amounts to two and one half times as much as yours per year?

It pays to pay for quality, for quality is something that is remembered long after the price is forgotten.

Cleveland Bicycles in both Cushion Frame and Rigid Frame Models are made and guaranteed by the

Canada Cycle & Motor Co.

NEWS IN GENERAL.

Toronto's tax rate has been fixed by the Board of Control at 18½ mills.

Edith Latta, a fifteen-year-old girl of Cannifton, has been asleep for four weeks,

James T. Hackett was committed for trial at Montreal on the charge of murdering Edith Ahern.

Dealings of the Manufacturer's Life in stock transactions were investigated before the Insurance Commission.

Hon. Mr. Hanna intimated that the business of the Legislature would be completed about May 10th or 11th.

The new Grand Trunk elevator at Montreal, one of the finest in the Dominion was opened on Saturday.

One million dollars of the Soo loan was paid, and the guarantee for the other million extended for six months.

William O'Connor and Mrs. Henry Allen of Lansdowne are under arrest on a charge of poisoning the woman's husband.

The C. P. R. steamer Amur arrived at San Francisco with 500 tons of provisions from the people of British Columbia.

It has been arranged to have the census of population and agriculture in Manitoba, Saskatchewan and Alberta taken on the night of Sunday, 24th of June.

Chief Justice Taschereau of the Supreme Court will resign. Hon. Charles Fitzpatrick will probably succeed him, Mr. Aylesworth becoming Minister of Justice.

George Le Tray was suffocated in a fire that gutted the main floor of the Toronto General Postoffice, destroyed some mail and did about \$30,000 damage.

The Dominion Government will grant \$10,000 to an exhibition to be held in Charlottetown this fall, open to all Canada. The Provincial Government grant is \$4,000.

Hon. Mr. Matheson, Provincial Treasurer, and Mr. W. H. Hearst, barrister, of Sault Ste. Marie, agent for the Government, left for New York in connection with the Soo loan guarantee.

The Grand Trunk Pacific returns 525,000 acres of its land grant of 2,000,000 acres to the Province on condition of being relieved of its obligation to place four hundred settlers a year on the land.

It is a critical moment in Ontario's history. If the perpetual energy available in our waterpowers is reserved for the people it will mean success and prosperity all down the ages. If this same energy is alienated the effect will be similar to that of the alienation of the coal measures.

In Parliament on Monday there was a long debate on Mr. McIntyre's resolution for reform of the Senate, and at Sir Wilfrid Laurier's suggestion it was finally withdrawn. Mr. Oliver gave some surprising statements regarding the amount of work entailed in preparing returns asked for by the Opposition.

Kingston, April 30.—Capt. John Thomas, Picton, who bought the schooner Fleetwing, and was fitting her out here, died aboard his vessel after a couple of weeks' illness of heart trouble. The remains were taken to Picton this morning.—The first raft

and long, princess slips, rust-proof steels through-out, bias cut and gored with four fine elastic garters, dainty fine lace and ribbon. Sizes 18, 19, 20, 21, 22, 23, and 24. This you can consider as a rich opportunity, and come Saturday. We absolutely guarantee this Corset as \$1.50 quality.

Saturday we sell 90 Pairs at..... **\$1.00 per pair.**

MADOLE & WILSON.

Kingston, April 30.—Capt. John Thomas, Picton, who bought the schooner Fleetwing, and was fitting her out here, died aboard his vessel after a couple of weeks' illness of heart trouble. The remains were taken to Picton this morning.—The first raft of the season left this evening for Quebec in tow of the str. Parthia.

Kingston, Ont., April 30.—"Your present plant and business system is a vast improvement over that taken over by the municipality. Your present management is of the very best way. The proposed by-law to appropriate \$85,000 for extensions is most strongly approved." The above are the conclusions of R. A. Ross, the Montreal expert engaged by the City Council to report upon the light plant and the extension plans. The result of his inspection of the plant will give the greatest satisfaction to the City Council and the ratepayers.

Kingston, May 1.—William O'Connor and Mrs. Henry Allen of Londowne are under arrest on a charge of poisoning the latter's husband, a young farmer, who died last December after a few weeks' illness. It is charged that O'Connor and Mrs. Allen wished to marry, and conspired to get the husband out of the way. Lately the woman changed her mind, and from statements made by O'Connor suspicion was aroused, and the arrest followed. The body of Allen has been exhumed and the stomach sent to Toronto for analytical examination. O'Connor comes from a well-to-do family in Escott. Mrs. Allen is from the old country.

Use Prism Brand Floor Enamel. It dries quickly, has a varnish gloss, and is true to Color. The Medical Hall.—Fred L. Hooper, sole agent for Napanee.

MORVEN

The May Quarterly Meeting of the Morven Circuit will be held next Sunday, May 6th, in the Lutheran Church at 10 a. m., and the evening service will be held in the White Church at 7.30.

The Quarterly Board will meet in the Brick Church, on Monday, May 7th, at 2 p. m.

The annual meeting of the Epworth League will be held this Friday evening at 8. All the members are cordially invited to attend.

Miss Laura Mowers, who has suffered a severe attack of pneumonia, is convalescent.

LAYING THE CORNER STONE

The New Church the Scene of an Interesting Ceremony Thursday Morning.

Promptly at eleven o'clock on Thursday morning Rev. Emsley, chairman of the occasion, and pastor of the Eastern Methodist Church, began the ceremony of laying the corner stone of the new Eastern Methodist Church which will replace the old stone church torn down last summer, and in a neat address outlined the subsequent proceedings.

Hymn No. 672 was sung, after which benediction was pronounced by Rev. Richard Duke.

The first lesson was read responsively, lead by Rev. Real, and the second lesson was read by Rev. Conn.

Mr. Uriah Wilson, M. P., was to have delivered an address, but he was unavoidably detained in Ottawa on parliamentary business.

The corner stone was then well and truly laid on the south east corner of the building by Mr. Harvey Warner, with whom originated the idea of building the new church, and whose generous support has gone a long way towards insuring of the carrying out of the present plans. Mr. Warner was presented with a beautiful silver trowel, with the following inscription: "Presented to Harvey Warner, Esq., by the trustees of the Eastern Methodist Church, Napanee, Ont., 3rd May, 1906—1 Peter, 2nd Chap., 6 verse."

Mr. Warner's address was as follows: "In the name of the Father, and of the Son, and of the Holy Ghost, I lay this corner stone for the foundation of a house to be builded and consecrated to the service of Almighty God, according to the order and usages of the Methodist Church. Amen."

After the laying of the stone Mr. W. F. Hall outlined the contents of the lead canisters, and placed them in the stone. The canisters contain the following:

CONTENTS OF CORNER STONE.

Toronto Globe, Mail and Empire, World, Montreal Witness and Star, Napanee Express and Beaver. Copy Minutes of last meeting of the Quarterly Official Board, List of names of those attending the last service in old church, Proceedings of Committee on Church Union between Presbyterian—Methodist and Congregational Churches, Missionary Report, Epworth League, Christian Guardian, List of Office.

The results of the Easter Vestry meeting held at the Parish Room, April 23rd, in connection with St. Luke's church, Camden East, were as follows: Rector's Warden—Mr. W. Evans; Peoples' Warden—Mr. T. R. Mowbray; Sidesmen—Messrs. Chas. Riley, Thos. Hamilton, Roy Smith, Acton Robinson, J. Hamilton, Elgin McWilliams, Peter Quinn, Charles Quinn, Everton Smith; Ushers—Messrs. John Robinson, Thomas Hamilton, Samuel Greenway, W. Ewens.

The Finances of the Parish have never been in better order, splendid reports were brought in by the Wardens.

Treasurer of Church Building Fund; Treasurer of the Cemetery Fund; Treasurer of Sunday school fund and by the Rector. Votes of thanks were passed to the Rector, rearing Wardens, Organist and Choir, Superintendent and Teachers of the Sunday school, the Women's Auxiliary and the Guild of St. Luke's Church. The church debt is reduced to \$144.90. The driving shed has been repaired by the Pybus Bros., Napanee, at a cost of \$88.00. Well done St. Luke's church, Camden East.

Painting White.

If you intend painting white either inside or outside, use Sherwin-Williams Gloss White. It will cover more surface, wear longer, remain whiter, and cost you less than any other white paint. It will not chalk off like Pure White Lead. Ask us for prices before painting. The Medical Hall.—Fred L. Hooper, Sole agent for Napanee.

IT'S DELICIOUS!

What's Delicious?

A Cup of Malagama Black Tea. Try half pound package, which will only cost you 20 cents, and which we think you will want more of after trying.

For sale by

THE COXALL CO.

Napanee Express and Beaver. Copy Minutes of last meeting of the Quarterly Official Board, List of names of those attending the last service in old church, Proceedings of Committee on Church Union between Presbyterian—Methodist and Congregational Churches, Missionary Report, Epworth Era, Christian Guardian, List of Official Members and Trustees, Bills before the present Parliament re Sabbath Observance and Sessional Indemnity. Minutes of Conference, Canadian coins of last mintage, Photo gravure of former Church.

Short, but very interesting, addresses were delivered by Mr. M. C. Bogart and His Honor Judge Madden, after which a collection was taken up. Mr. Uriah Wilson, M. P., sending a donation of \$10 to be placed on the plate for him, and a very respectable sum was realized.

Immediately surrounding the stone were: Rev. Emsley, pastor of the church; Harvey Warner, Esq., Rev. Richard Duke, chairman of the district; Rev. J. R. Conn, M. A., pastor of the Presbyterian Church; Rev. J. R. Real, pastor of the Western Methodist Church; His Honor Judge Madden, Mr. M. C. Bogart, Warden of the county; Mr. W. F. Hall, secretary of the building Committee; Rev. Farnsworth, Yarker; Rev. Down, Napanee; and Messrs. J. R. Dafeo, and W. T. Waller, clerks of the building operations.

The new church is being built entirely of cement and will be an exceedingly handsome as well as a solid building, and will be a fitting monument of the skill and industry of the members of the building committee, backed as they are by an enthusiastic congregation.

A very large crowd of citizens of Napanee and surrounding country were present to witness the ceremony, every point of vantage on the surrounding buildings holding their quota of sight seers, and the roads in front of the building being almost impassable with the crowd. The scholars in the schools were given a holiday to allow of their being present at the ceremony.

Paints and oils white lead, gasoline coal oil liquid veneer, removes all stains make furniture new.

BOYLE & SON.

YARKER.

The Vestry meeting was held at St. Anthony's church, Yarker Easter Wednesday. The reports made by the Rector and Warden were good. Finances as usual very healthy in this parish. Rector's Warden—Mr. Albert Benjamin; People's Warden—Mr. Arthur Baxter; Sidesmen—Messrs. J. C. Connolly, W. J. Dohler, Dr. Oldham and John Ewart. Votes of thanks were tendered the Wardens, Organist and Choir, The Women's Auxiliary, The Guild and Superintendent and Sunday School Teachers.

NEWBURGH.

The Vestry meeting was held at St. John's Church, Newburgh, Easter Tuesday. The Wardens reported finances as healthy. The Rector brought in satisfactory reports of the work in the parish. Votes of thanks were tendered the warden, Organist and Choir, the Superintendent and Sunday-school teachers, the Women's Auxiliary. The Sunday School lent offerings in the three Parishes has never been better viz; Camden East \$7.80 Yarker \$14.84; and Newburgh \$5.06; total \$26.78. The income from all sources in the Parishes has reached quite \$1800.00 this year.
